Hello Metro Board,

In attachment D of the 28 x 28 project list, item 23 states that Metro is working on light rail speed and reliability improvements. LA City's transportation committee has recently received hundreds of comments requesting that LA Metro, LADOT, and LA City place signal preemption for light rail as a higher priority work item. The LA city council file that speaks to this is council file 24-1222.

As part of the traffic signal upgrade process at eight key intersections, I request that LA Metro direct LA City and LADOT implement the transit signal preemption feature where possible as part of these A&E line signal upgrades: Much like what is currently being done on the Metro G Line. I would like to request implementation of least limited preemption, full preemption where possible.

It should be no more difficult than upgrading the 2070s with the D4 Traffic Signal Control software.

Thank you.

Colin Warn

Hello Metro Board,

In attachment D of the 28 x 28 project list, item 23 states that Metro is working on light rail speed and reliability improvements. LA City's transportation committee has recently received hundreds of comments requesting that LA Metro, LADOT, and LA City place signal preemption for light rail as a higher priority work item. Commuting north on the A line or east on the A line is devastatingly slow when it doesn't have to be. Me and thousands of other angelenos are losing valuable commuting time to favor a handful of drivers. The LA city council file that speaks to this is council file 24-1222. As part of the traffic signal upgrade process at eight key intersections, I request that LA Metro direct LA City and LADOT implement the transit signal preemption feature where possible as part of these A&E line signal upgrades: Much like what is currently being done on the Metro G Line. I would like to request implementation of least limited preemption, **full preemption** where possible.

Thank you.

Thanks,

Hello Metro Board,

I am a Lincoln Heights residence [redacted] and I noticed that in attachment D of 28 x 28 project list, number 23 mentions that LA Metro working on light rail speed and reliability improvements. Currently the Los Angeles City' transportation committee has received hundred of supporting signal preemption for light rail as a higher priority, and this is directed towards LA Metro, LADOT, and the City of Los Angeles. LA City council file is 24-1222. Due to the traffic signal upgrade process at the eight stated key intersections, I request that LA Metro require LA City and LADOT to implement the transit signal preemption feature on the A and E line signal upgrades in s a similar manner as the Metro G Line. I would like to request full preemption whenever possible, but limited preemption is better than nothing.

Signal preemption for light rail will encourage me to Downtown Los Angeles in a more reliable manner, since every time I ride on the A or E line, the entire train gets stuck behind a red light multiple times which causes delays, but only a few people in private vehicle benefit.

Thank you for reading this message.

Faster transit is critical to increasing ridership, which cascades into a bunch of positive impacts for our city:

* It decreases fossil fuel emissions, improving the health of our communities, reducing healthcare costs, and making our lives more affordable
* It reduces traffic, giving us savings on auto repair costs, auto insurance, and gas costs
* It decreases traffic accidents, further reducing healthcare costs, and saving lives

Please choose to improve communities and save lives today.

Thank you,
Andrew

Good morning,

I hope you are doing well. I am writing to invite the L.A. Metro Board of Directors to review the attached policy brief, titled "The LA28 Games as a Catalyst for Sustainable Accessibility and Supports for People with Disabilities." Developed as part of the CA-LEND program, this brief examines the opportunity to leverage the 2028 Olympic and Paralympic Games in improving long-term accessibility within Los Angeles County's public transportation system.

Our work highlights existing gaps in accessibility, particularly for individuals with neurodevelopmental and related disabilities, and offers practical, systems-level recommendations for agencies such as LA Metro and the LA28 Organizing Committee. The goal is to ensure that accessibility improvements made for the Games translate into lasting benefits for the community members of L.A. County.

This policy brief is particularly timely and relevant to Metro, considering the discussion of lessons learned at Milano Cortina 2026 during the 4/15 Special Board Meeting (No. 2026-0213), and the review of the Neurodiversity in Transit survey results during the 4/16 Operations, Safety, and Customer Experience Committee Meeting (No. 2026-0258).

Thank you for your continued commitment to advancing inclusive and equitable systems. We truly appreciate your support.

On behalf of the CA-LEND Leadership Project Team,

Warmest regards,

Desiaire Rickman
2025-2026 CA-LEND Public Health Scholar
MPH Student, Claremont Graduate University

The LA28 Games as a Catalyst for Sustainable Accessibility and Supports for People with Disabilities

APRIL 2026

A CA-LEND POLICY BRIEF

Authored by: Desiaire Rickman (Public Health Scholar), Dr. Sarah Aburaisi (Public Health Scholar), and Maria Saba (Self-Advocacy Scholar)

EXECUTIVE SUMMARY

Despite existing physical accessibility standards required under the Americans with Disabilities Act (ADA) of 1990, public transportation in Los Angeles County remains functionally inaccessible for many people with disabilities, especially those with neurodevelopmental and related disabilities (NDDs). For individuals with NDDs, navigating public transit often requires additional support that is not consistently and readily available. The upcoming 2028 Olympic and Paralympic Games present a powerful time-bound opportunity to address these long-standing gaps. Key findings from previous host cities demonstrate that accessible public transportation can be created and sustained beyond the Games. The City of Los Angeles has launched several initiatives, including Twenty-eight by '28 and its "Games for All" vision, which aim to fill current infrastructure gaps and advance compliance with the ADA. This policy brief outlines recommendations for the Los Angeles Metropolitan Transportation Authority (Metro) and the LA28 Organizing Committee to ensure long-term inclusion for residents with disabilities.

BACKGROUND & DESCRIPTION OF PROBLEM

While Los Angeles County's transit infrastructure meets many minimum physical accessibility requirements under the Americans with Disabilities Act (ADA), compliance alone does not ensure functional accessibility. For individuals with neurodevelopmental and related disabilities (NDDs), barriers to public transportation are often cognitive, sensory, and communicative rather than structural. These barriers included inconsistent signage and wayfinding, unclear or rapidly delivered announcements, unpredictable service changes, overcrowding, sensory overstimulation, and limited staff preparedness to assist riders with complex support needs[13]. Unlike physical mobility accommodations, which are addressed through ramps and lifts, cognitive and sensory accessibility requires coordinated system design, standardized communication practices, and workforce training. When these supports are absent or inconsistent, individuals with NDDs experience reduced independence, heightened anxiety, and safety concerns while navigating transit systems. Families often compensate by relying on paratransit or private transportation options, which are more costly, less flexible, and limited in capacity[2].

Transportation accessibility functions as a social determinant of health. Limited transit usability restricts access to employment, healthcare, education, and community participation, reinforcing broader inequities for people with disabilities[1]. Although transportation investments are underway in preparation for LA28, planning efforts have primarily focused on expanding physical capacity and accommodating visitor demand. Without explicit attention to functional accessibility and long-term inclusion, improvements made in advance of the Games may fail to address systemic barriers faced by residents with disabilities across Los Angeles County.

RECOMMENDATIONS

Global sporting events such as LA2028 offer an optimal opportunity for host cities to advance public health and health equity objectives. One thousand days out from the Opening Ceremony, Mayor Karen Bass announced a "Games for All" vision for the city of L.A. and signed an executive directive that aims to enhance infrastructure, community resilience, and opportunity for Angelenos[4]. Ahead of the city's

first time hosting the Paralympic Games, accessibility is one of the building blocks for the creation of an inclusive city for all.

It is imperative for Metro to complete the remaining transportation projects that were outlined in former Mayor Eric Garcetti's "Twenty-Eight by '28" initiative to improve accessibility and transit options for visitors and residents with disabilities and NDDs ahead of the Games[3]. This initiative aimed for the development of 28 transportation projects ahead of LA28[12]. Nine (32%) of the projects have been completed with 19 (68%) still in progress[10].

Additionally, new and current transit systems (e.g., buses, trains, and subways) should be compliant with ADA requirements. In a 2025 Metro needs assessment survey, respondents identified lack of priority seating during peak hours, inadequate wheelchair-accessible spaces, and communication barriers (e.g., navigating systems and understanding announcements) as challenges faced while riding public transit[11]. Beyond physical ADA standards, Metro should improve wayfinding, modify announcement systems, and expand staff training to assist riders with cognitive, sensory, and communication needs. Metro must address these gaps ahead of LA28 to ensure that accessibility improvements result in lasting, system-wide change rather than temporary compliance measures.

The LA28 Organizing Committee must strive to enact and build upon the accessibility advancements observed in host cities during prior Games. In 2024, Paris designed an Athletes' Village that had fully accessible accommodations, and the city's bus and tram network – which includes 59 bus lines, eight tramways, and 1,750 accessible bus stops – achieved 100 percent accessibility ahead of the Games[7,8]. After the 2020 Games, Japan increased the number of wheelchair accessible seats in the Bullet Trains' newest coaches[9]. For London 2012, the city upgraded and expanded its entire transit system, resulting in more trains, more accessible platforms and stations, and a completely accessible bus network[5]. However, there is limited research that explicitly examines how past host cities have improved accessibility on public transportation for individuals with NDDs. This gap presents an opportunity for Los Angeles to lead in this field and establish a new standard for future host cities.

In its 2020 Accessibility Guide, the International Paralympic Committee recommends that new structures built for the Games should contribute to a permanent legacy structure that is accessible and promotes an inclusive environment for all[6]. This aligns with the City of L.A.'s "Games for All" vision, and permanent accessible structures should be prioritized to benefit the everyday lives of residents with disabilities and NDDs.

CONCLUSIONS

Public transportation in L.A. County presents notable challenges for many people with disabilities, particularly individuals with NDDs, who rely on constant support to navigate complex transit systems. As outlined in this brief, these challenges are not isolated issues but systemic gaps that affect quality of life for this population, not just for the Olympics, but for the longer term. LA28 presents a unique and time-sensitive opportunity to address these long-standing inequities. Investments already underway demonstrate that Los Angeles has both the resources and the momentum to improve access across its transportation systems. Lessons learned in previous host cities reinforce how treating accessibility as a core planning principle leads to improved transportation systems for everyone. Through adoption of

these recommendations, Metro and the LA28 Organizing Committee can ensure that accessibility enhancements made for the Games translate into lasting, inclusive infrastructure and services for residents with disabilities. Reinforcing long-term support will help ensure that the legacy of LA28 is not only global recognition, but a more navigable, equitable, and inclusive Los Angeles for all.

RE: Support for the San Vicente-Fairfax Alternative for the Metro K Line Northern Extension

Dear Metro Board Members,

The Westside Young Democrats are writing to express our strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines. This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

We urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Sincerely,
Westside Young Democrats

Re: Item 7 – SUPPORT: Metro Staff Recommended San Vicente-Fairfax Alternative for the Metro K Line Northern Extension LPA Without Delay

Dear Chairman Dutra and Honorable Metro Board of Directors,

On behalf of the Greater Los Angeles Realtors (GLAR) a real estate trade organization representing a membership of over 10,000 REALTOR® members throughout Los Angeles, including the cities of Beverly Hills, Culver City, Los Angeles, Santa Monica and West Hollywood, we are writing as members of the 'All on Board Coalition' expressing our support selecting the Metro Staff recommended San Vicente-Fairfax Alternative as the locally preferred alternative (LPA) for the Metro K Line Northern Extension Project. Of the three routes under consideration, only the San Vicente-Fairfax route would serve all the major destinations and job centers in Central Los Angeles, Mid-Wilshire and West Hollywood, while moving more riders, unlocking local funding and completing this vital north-south transportation link that has been considered off and on for over five decades.

The San Vicente-Fairfax route has seen overwhelming public support throughout Metro's previous studies and outreach and has the best chance of uniting the region. Longstanding support for this alignment and efforts to generate funding to accelerate its construction through a potential Enhanced Infrastructure Financing District (EIFD) facilitate getting this project built in our lifetimes. Timely confirmation of the LPA is a prerequisite to starting the process of forming an EIFD.

The San Vicente-Fairfax alignment would serve all the major destinations in Mid City Los Angeles and West Hollywood, including the Grove/Farmers Market, Cedars-Sinai Medical Campus, the Beverly Center, Television City, LACMA and Museum Row, West Hollywood's entertainment district, Hollywood & Highland, the Hollywood Bowl, and many more. It would serve a diverse range of underserved communities and job centers along the way while providing direct access to six times as many jobs and thrice as many residents as the

Docusign Envelope ID: 78E88F4F-FBCE-8B51-8343-782FEC50E62B

La Brea alignment. When combined with the South Bay extension towards Torrance, once fully completed the K Line will be a regionally significant north-south corridor that has been envisioned in various studies dating back to 1974.

Once completed, the San Vicente-Fairfax route would bring fast and reliable transit to Mid City, West Hollywood, and Hollywood resulting in the highest ridership of any light rail line in the Country with almost 100,000 daily riders a day.

GLAR wants to give kudos to the Metro Community Relations and Planning team for the superb job done executing this environmental review process. We also want to use this opportunity to give thanks to the City of West Hollywood and County Supervisor Lindsey Horvath for their steadfast leadership by continuing the momentum for the K Line Northern Extension. Many of our GLAR members remembered Horvath's enthusiasm for this project when it was just a simple idea first proposed when she was a Transportation Commissioner in West Hollywood in 2013.

Metro has a unique opportunity to unlock the heart of the City with direct rides to key regional destinations, job centers, healthcare and cultural institutions, and develop transit-oriented communities with much needed housing that are over ten times more densely populated than the County average.

GLAR want to thank Metro again for keeping these vital transportation projects moving as we were supportive of the Measure M sales tax measure and continued to support the work Metro is doing to deliver the transportation infrastructure that the voters supported.

We encourage the Metro Board of Directors to support the San Vicente-Fairfax alternative as the best option for our region. Thank you for your time and consideration

Sincerely,

Re: Westside Central Service Council Statement of Support for K Line Northern Extension – San Vicente-Fairfax Alignment

Honorable Chair Dutra and Metro Board Members,

The Service Councils have been appointed by the Metro Board to perform an important and necessary function of providing a monthly forum to engage with the public about bus and rail service, changes, and policy recommendations. Public engagement and input are paramount to effective transit planning.

At our March 11, 2026 meeting, the Westside Central Service Public Council received a project briefing for the K Line Northern Extension. Over 50 members of the public reached out to express their support of the project; the majority of those commenters specifically expressed support for the San Vicente-Fairfax alignment to be selected as the Locally Preferred Alternative. The feedback gathered at our meeting demonstrates a clear interest in the community for the San Vicente-Fairfax option. The Council voted unanimously to formally support the San Vicente Fairfax alignment as the Locally Preferred Alternative for the K Line Northern Extension project, and to include the terminus station at the Hollywood Bowl.

The San Vicente-Fairfax alignment fills a gap in the transit system by bringing the K Line to a corridor that is currently heavily relied upon but underserved by rail. This alignment brings a long-awaited rail connection to West Hollywood, a very active and densely populated destination that lacks rail service. West Hollywood is a major employment, cultural and nightlife center that attracts visitors from across the region but remains heavily dependent on cars and buses for access. The San Vicente-Fairfax alignment would finally connect this community to the regional rail system, improving mobility for residents, workers, and visitors, while helping reduce congestion in a corridor that experiences consistent high travel demand. Connecting this area to the broader Metro system would improve reliability, reduce travel times, and provide additional travel options for thousands of daily riders.

With an estimated 59,700 daily riders on the alignment and 65% of trips made by low-income riders, the San Vicente Fairfax stands out as the most effective and equitable option, delivering

the highest ridership of the alternatives being studied. It serves more people, reaches key destinations, and ensures this investment by Metro delivers maximum mobility benefits in the region. For these reasons: strong community support, the ability to serve a high-demand corridor and the opportunity to strengthen regional connectivity, the Westside Central Service Council encourages the Board to select the San Vicente-Fairfax alignment as the Locally Preferred Alternative (LPA) for the K Line Northern Extension and to include the Hollywood Bowl terminus station. Selecting this alignment would demonstrate Metro's commitment to listening to the communities it serves, choosing an option that maximizes ridership, equity and connectivity.

Sincerely,

Attachment: Public comments received regarding the K Line Northern Extension at the March 11, 2025 Westside Central Service Council Meeting

CC: Conan Cheung, Chief Operations Officer

Public Comment on K Line North Extension Project
Westside Central Service Council March 11, 2026

Name	Comment	Position	Format submitted
Jeff McMullen	As a resident of West Hollywood, urged the Westside Central Service Council to encourage the Metro Board to select the San Vicente Fairfax alignment. The alignment has nine subway stations, one at Santa Monica/San Vicente in the heart of the Rainbow District. To facilitate construction, Metro would use the West Hollywood Sheriff Station land, which is 2.1 acres for the building. The availability of that land to serve as a staging area for construction and redevelopment of Metro's Division 7 bus depot opens the opportunity for Metro to use that 8.5-acre site to build additional housing in the City of West Hollywood in alignment with Metro's 20,000 Homes by 2030 initiative. The private sector is organizing a large investment on the development of that site that would have a fully incorporated, expanded Rainbow campus, the landmark architecture of the Pacific Design Center's blue, green, and red, adding in orange, yellow, indigo, and violet buildings. A rainbow arch monument modeled after St. Louis Gateway Arch is proposed. It would be 630 ft high, 630 ft long, and would completely change the region.	Support San Vicente Fairfax alignment.	In person, Westside Central Service Council Meeting
Dominic Moonhart	Westwood resident supports the San Vicente-Fairfax alignment. He prefers that the La Brea alignment be built as a separate branch as part of the K Line. If he had to pick, he would support the San Vicente proposal and urge that the Hollywood Bowl get its own station due to area traffic. Asked the Council to consider the Hollywood Bowl Station as part of the project and to consider the San Vicente option because he thinks West Hollywood deserves the most stations in this project.	Support San Vicente Fairfax alignment.	In person, Westside Central Service Council Meeting
David Fenn	Senior Planner with the City of West Hollywood, has been working on this project since before Measure M passed, is excited to see it moving forward. Thinks only San Vicente Fairfax alternative would serve all destinations in Mid-City and West Hollywood, from Cedars-Sinai and The Grove. It would also put the most residents and jobs in walking distance to stations and serve 6,000 more daily riders than the next alternative. Two-thirds of riders would be low income. Only the San Vicente Fairfax route would unlock additional local funding through a potential enhanced infrastructure financing district long proposed by the West Hollywood City Council. He asked, on behalf of the City of West Hollywood, that the Council consider recommending the Metro Board to adopt the San Vicente Fairfax alignment.	Support San Vicente Fairfax alignment.	

Name	Comment	Position	Format submitted
Jack Galentez	Strongly supports the San Vicente Fairfax Alignment as the locally preferred alternative for the K-Line North Extension as well as extending the line to the Hollywood Bowl to maximize regional access and ridership. Alignment would connect communities from Mid-City and Beverly Hills and the Beverly Grove to the heart of West Hollywood, bringing Metro Rail directly to the arts districts, dining corridors, cultural destinations, and entertainment areas that define the region, and lays the groundwork for a future extension that can better serve major regional venues like the Hollywood Bowl. With an estimated 59,700 daily riders, San Vicente Fairfax stands out as the most effective and equitable option, delivering the highest ridership of the alternatives being studied. It serves more people, reaches key destinations, and ensures this major investment by Metro delivers maximum mobility benefits in the region. Choosing another alignment would mean fewer riders and a missed opportunity to build a system where people will use it most. This alignment advances equity, sustainability, and regional connectivity, and a future extension to Hollywood Bowl would only sustain those benefits. Supporting access to world-class cultural events while reducing traffic and emissions. It's the right project for the right corridor, one that supports local businesses, reduces congestion, and strengthens access to residents, visitors, tourists, and visitors alike. He asked the Council to move forward with support for the San Vicente Fairfax alignment as the locally preferred alternative, to keep the vision alive for a future Hollywood Bowl extension and finally bring Metro Rail to West Hollywood.	Support San Vicente Fairfax alignment.	Zoom
Christopher Michel	Marina Del Rey resident, enjoys going to West Hollywood but the driving or getting there by transit are both bad. Supports the San Vicente Fairfax alignment. When people go to West Hollywood, drinking is usually involved. He believes this would save lives and prevent drunk driving. He thinks West Hollywood is a world class destination that doesn't have the transit it deserves. There are many events there like Pride and Halloween where it is so difficult to get there by car or get parking.	Support San Vicente Fairfax alignment.	Online participant
Shelby Staub	Resident of the Greater West/Central Los Angeles area for past 3.5 years. Support K-Line North extension, San Vicente alignment. Studies have shown safety and effectiveness of the TBM tunneling being proposed for the line's excavation process. Despite homeowners & landlords of Lafayette Square and other neighborhoods fears and despisal for change, this extension is needed. If you are	Support San Vicente Fairfax alignment.	email

Name	Comment	Position	Format submitted
	afraid of what is happening 90 ft underneath the soil, you should be even more afraid of emissions in the air from car exhaust which would be mitigated by the over 45,000 riders (minimum) that would be added to the Metro system, and increased connectivity to major destinations, especially in the San Vicente alignment. This extension offers direct connection to LAX to Wilshire Bl in its first section, creating a symbiotic relationship for both the tourists who flock to Los Angeles every year, and locals who work along the Wilshire corridor who live in the Beach Cities area. Section 2, which will hopefully run through the heart of West Hollywood, will allow residents and locals going out to stay safer and avoid incidents associated with driving under the influence by taking Metro, and create millions of dollars in revenue for both Metro and the businesses along the new stations' corridors.		
Michael Lebowitz	I cannot think of a single bad thing about this line extension. I'll sit in HOURS of traffic for YEARS if it means that we can connect equity-focused communities to jobs, opportunities, cultural institutions, and healthcare. It would improve quality of life and bring in so much money to region.	General project support	eComment
Nicholas Tatonetti	The Westside/Central Service Council should recommend that the Metro Board selects the San Vicente-Fairfax Route as the locally preferred alternative because it would: Connect equity-focused communities to jobs, opportunities, cultural institutions, and healthcare Sere more residents, businesses, and destinations Serve all the top destinations in Central LA and WeHo (Ex: Cedars-Sinai, the Grove, Museum Row, and the WeHo Rainbow District) Serve 6,000 more daily riders (⅔ would be low income!) Unlock local funding through a potential EIFD.	Support San Vicente Fairfax alignment.	eComment
Jesse Budlong	As a West Hollywood resident and transportation planner, I strongly urge the selection of the San Vicente-Fairfax Route as the LPA. This alignment is the most effective choice because it: Maximizes Equity: Serves 6,000 more daily riders, 2/3 of whom are low-income. Connects Key Hubs: Links Cedars-Sinai, Museum Row, and the Rainbow District. Closes Network Gaps: Connects the K, D, and B Lines with the region's busiest bus routes. Unlocks Funding: Enables local EIFD funding. Please select the route that best serves our residents and economy.	Support San Vicente Fairfax alignment.	eComment
Henry Gnoza	I support the San Vicente-Fairfax Route as it connects more people and more neighborhoods and more businesses.	Support San Vicente Fairfax alignment.	eComment

Name	Comment	Position	Format submitted
Crystal Schense	We need reliable Westside transportation. I have to drive to Cedars and UCLA etc. from Lancaster. I prefer above ground trains since they're faster and less expensive, but do not care as long as something is built soon. It's long overdue and traffic "reduction" measures resulted in much more traffic trapped on roads turning around as everything is one way, using more gas and mileage, and no new lanes, roads have been built, middle lanes and turning lanes reduced or eliminated resulting in traffic that gets backed up. So much spending on creating more traffic, we've had no new train lines. Also need micro transport- disabled, women, elderly need safe ways to get to work and appts.	General project support	eComment
Anthony Vulin	I support of the San Vicente-Fairfax Alignment and hope it can be completed ASAP. West Hollywood is far from freeways and this will help elevate traffic in the area and all around LA. Having a station in the Rainbow District would really help as well. As there are so many people who come to WeHo to enjoy the bars and clubs from all over LA. A safe Metro connection will mean a lot for our community.	Support San Vicente Fairfax alignment.	eComment
Wayne Wright	My complaint is where the stations will be, how deep the tunnel will be, rail connections with the B & D Lines and what construction issues will it cause at the connecting B & D Line Stations? How many years will it take to build the K Line Extension? More answers will come when Metro staff piece the final route for the Board & public in the future to look at. Thank you...	General project questions	email
Jose Dennis Alabaso	Sometimes, I can support with the San Vicente-Fairfax Route Segment in and for the city of West Hollywood. Why? Because my best friend (Trevor Ryan Lissauer) is a professional actor and folk singer who is living not too far to the Grove Shopping Center in the city of Los Angeles. Maybe we can help together to help complete the Metro K Line Northern Extension. Okay? Thank you	Support San Vicente Fairfax alignment.	eComment
Peter Balassa	I DO NOT support the Fairfax-San Vicente route. I much prefer the Fairfax or La Brea routes. They would take less time to construct and would not disrupt life in all parts of West Hollywood.	Supports Fairfax or La Brea routes	eComment
Kristin Miller	Full support for the San Vicente - Fairfax alignment. It adds desperately needed Metro transit infrastructure to major cultural, retail, nightlife, and residential areas that are currently only served by bus and will serve as a vital western connector between lines, as well as giving the whole westside transit access to LAX.	Support San Vicente Fairfax alignment.	eComment

Name	Comment	Position	Format submitted
Sam Borelli	Let's Go!	General project support	eComment
Briana Pittelli	As a West Hollywood constituent, I am urging the Westside/Central Service Council to recommend that the Metro Board selects the San Vicente-Fairfax Route as the locally preferred alternative route. This route would serve the most residents, businesses, and destinations of all the options and connect top destinations in Central LA and WeHo to the rest of the Metro. As a result, this will support local economies, reduce reliance on cars to get around the city, which would also reduce greenhouse gas emissions and traffic.	Support San Vicente Fairfax alignment.	eComment
Leslie Foster	I think it's incredibly important to extend the K line north; this extension will provide West Hollywood with a vital connection to the Metro Rail network, allowing ease of transit throughout the county and significantly aiding the county's sustainability goals, not to mention the additional foot traffic it will bring to businesses all along the line. In addition, the line will provide a much more direct route for residents of Hollywood and West Hollywood, and tourists visiting the area, to travel via rail to the airport. The extension will be a significant step toward our county having a world class Metro rail system.	General project support	eComment
Michael Angarol	Please support and expedite the San Vicente/Fairfax route. Residents need alternatives to cars now more than ever with the price of oil out of control. We have an amazing opportunity here to connect equity focused communities, jobs, healthcare, and cultural institutions. The sooner we can ditch our cars the better and stronger our local communities will be. Thank you.	Support San Vicente Fairfax alignment.	eComment
Daniel Doody	I would love to be able to get a train from DTLA to WeHo. I actually live downtown because of its public transportation and this would be a game changer.	General project support	eComment
Steven Arnst	I am writing in support of the San Vicente-Fairfax route for the K Line extension. Unlike other options, this connects important medical services, community centers and economic hubs of our city to create a more cohesive and connective rail route throughout the city. Please support!!	Support San Vicente Fairfax alignment.	eComment
Andrew Loberg	The Westside/Central Service Council should recommend that the Metro Board selects the San Vicente-Fairfax Route as the locally preferred alternative to connect equity-focused communities to jobs, opportunities, cultural institutions, and healthcare and to serve more residents, businesses, and destinations	Support San Vicente Fairfax alignment.	eComment

Name	Comment	Position	Format submitted
Patrick Lewis	Support the San Vicente-Fairfax route for K Line north extension. This route connects the most riders to the most destinations in West Hollywood. Make it easy and convenient for people to take transit and ditch their cars. Let's finish the line!	Support San Vicente Fairfax alignment.	eComment
James Bourne	The Council and Metro Board should select the San Vicente-Fairfax route. It provides the best linkages to existing transit lines, major thoroughfares, and key destinations in Mid-City and West Hollywood. The Fairfax and La Brea routes fail to get close enough to major destinations (think about how the Green Line missed LAX for 30 years...NOW is the opportunity to avoid a similar embarrassment in MidCity/WeHo). Providing meaningful connections through transit is essential to providing equal opportunity for Angelenos across the region.	Support San Vicente Fairfax alignment.	eComment
Tony Hoang	It's the best route for the region!	General project support	eComment
Shane Cameron	I'm in support of this extension to allow more residents access to more areas of our community.	General project support	eComment
Christian Mudrick	Rapid transit that isn't a bus service is vital to a city's growth and livability. The traffic continues to worsen and single car ownership is a big expense and burden to most: rapid transit aligns us with all other international and domestic major cities with high livability standards that we deserve!	General project support	eComment
Felipe Carbonell	I support the San Vicente-Fairfax alignment for the K Line Northern Extension to West Hollywood. This route serves dense neighborhoods, major destinations, and strong existing bus corridors, which will help maximize ridership and improve connectivity across the Metro system. As an active Metro rider, I would personally use this line and believe it will make it significantly easier for residents and visitors to access West Hollywood without relying on a car. I encourage Metro to prioritize the San Vicente–Fairfax route.	Support San Vicente Fairfax alignment.	eComment
Nick Phillips	Serve riders to get to more populous areas, central LA, WeHo.	General Project support	eComment
Drew McPhillips	Support the San Vicente-Fairfax route extension for rail to WeHo.	Support San Vicente Fairfax alignment.	eComment

Name	Comment	Position	Format submitted
Anthony Garrison	Support recommending San Vicente-Fairfax route as the locally preferred alternative because it would connect equity-focused communities to jobs, healthcare, cultural institutions, and opportunity across Central Los Angeles and West Hollywood. Route would serve more residents, businesses, and key destinations like Cedars-Sinai, the Grove, and Museum Row while increasing ridership by an estimated 6,000 daily riders, many of whom are low-income. Just as importantly, it could unlock additional local funding through a potential EIFD. For these reasons, the San Vicente–Fairfax alignment provides the greatest benefit for both mobility and community access.	Support San Vicente Fairfax alignment.	eComment
Noe M	I support the San Vicente - Fairfax route for rail to WeHo.	Support San Vicente Fairfax alignment.	eComment
Spencer Wejrowski	I highly support the San Vicente-Fairfax Hybrid Route over other alternatives for the K Line Northern Extension Project. It is the clear winner here. It will better connect people of all ages and incomes to institutions and destinations, including Cedars-Sinai, the Pacific Design Center, the Beverly Center, The Grove, Television City, and WeHo's nightlife district on Santa Monica Blvd to name a few. The connections to businesses, homes, and places of work, worship, healthcare, and entertainment are undeniable with this route. The people, including residents and tourists alike, deserve a better alternative to driving. Please consider supporting this route!	Support San Vicente Fairfax alignment.	eComment
Austin Moreau	The Westside/Central Service Council should recommend that the Metro Board selects the San Vicente-Fairfax Route as the locally preferred alternative because it would: Connect equity-focused communities to jobs, opportunities, cultural institutions, and healthcare Serve more residents, businesses, and destinations Serve all the top destinations in Central LA and WeHo (Ex: Cedars-Sinai, the Grove, Museum Row, and the WeHo Rainbow District) Serve 6,000 more daily riders (⅔ would be low income!) Unlock local funding through a potential EIFD.	Support San Vicente Fairfax alignment.	eComment
Justin Hayhurst	I'd really love this and think the city would benefit greatly from it!	General project support	eComment
Braden Goodman Williams	More Metro please!!	General project support	eComment

Name	Comment	Position	Format submitted
Trevor Brown	Let's make this happen!! We need rail to WeHo.	General project support	eComment
Ian Grady	I support this project.	General project support	eComment
Andrew Solomon	I live in West Hollywood with my partner and our 3vyear old daughter. As a parent, the LPA for the NKE is probably the single biggest infrastructure decision that will affect her life. I'm super excited to see it on tonight's agenda. But why is it just RECEIVE AND FILE? You are our representatives to the Metro Board-- put your finger on the scale. **I urge the Westside Service Council to recommend the San Vicente-Fairfax alignment for the northern extension of the K Line.** Metro's own analysis shows this option performs best. It produces the highest projected ridership (nearly 60,000 daily trips) and the largest number of new riders, while serving over 125,000 jobs and more than 130,000 residents near stations. It connects dense communities and major destinations that currently lack rail access, including West Hollywood and the Fairfax district. If the goal is to build a line people will use, San Vicente-Fairfax is the best choice. The Metro Service Council Charter states these bodies exist to represent community interests in Metro service and provide input and recommendations to the Metro Board. On an issue of this magnitude, receiving and filing the NKE report would fall short of that purpose. The northern extension of the K Line will shape mobility on the Westside for generations. The public deserves to know where this council stands. **Take a vote. Make a recommendation to the Metro Board.** And I hope that recommendation is the **San Vicente-Fairfax alignment**.	Support San Vicente Fairfax alignment.	email
Derek Bishe	I strongly urge the Council to recommend the San Vincente-Fairfax alternative for the K Line Northern Extension. The San Vincent Fairfax alternative is the only way to get this extremely necessary train built in our lifetimes, and we need it now. On top of that this train would connect the other lines in the area and connect people with the places they want to go - the San-Vincente Fairfax alignment goes directly to the major attractions in West Hollywood and would have a much higher ridership than the other alternatives. Please, please, please help us get out of our cars!	Support San Vicente Fairfax alignment.	eComment

Name	Comment	Position	Format submitted
Nick Black	i am in complete support. a big reason i haven't made the plunge to move to WeHo has a lot to do with the lack of rail. this would only benefit the community and bring even more money to the city of West Hollywood. I'm in full support.	General project support	eComment
Stephen Post	I support the San Vicente–Fairfax alignment as the Locally Preferred Alternative. This route directly serves some of the top destinations in Mid City and West Hollywood, connecting riders to arts districts, cultural landmarks, dining, nightlife, and entertainment hubs across the region. With nearly 100,000 projected daily trips, it's the alignment riders are choosing—and selecting a different route would mean thousands fewer daily boardings.	Support San Vicente Fairfax alignment.	eComment
Mandeep Singh	I support the San Vicente-Fairfax route for rail to WeHo as it will make LA more accessible by metro	Support San Vicente Fairfax alignment.	eComment
Lissette Rodriguez	As a Metro rider who cares about the future of our region and understands how a properly built out transit network can benefit all of us, I urge the Metro Board to vote to approve the San Vicente-Fairfax alignment as the LPA for the K Line North Extension. Selecting this alignment would accomplish many things, among them not only reaching the most ridership levels of any of the proposed alignments, but also the possibility of accelerating construction by unlocking local funding through the creation of an EIFD. For this and many other reasons, the San Vicente-Fairfax alignment is the best choice for the LPA. Thank you.	Support San Vicente Fairfax alignment.	email
Robert Shipley	I support selecting the San Vicente–Fairfax route as the locally preferred alternative. This alignment would better connect equity-focused communities to jobs, healthcare, and key destinations across Central LA and West Hollywood, including Cedars-Sinai, The Grove, Miracle Mile, Museum Row, and the Rainbow District. It is projected to serve about 6,000 more daily riders, with roughly two-thirds being low-income, making it a strong choice for both mobility and equity. This route could also help unlock additional local funding through a potential EIFD, strengthening the project's financial viability.	Support San Vicente Fairfax alignment.	eComment
Jordan Teresi	In full support of expanding the K line to serve my neighborhood, West Hollywood. Cars are DESTROYING this city; there is so much traffic and so many dangerously unsafe drivers on the road that our tax dollars need to go toward funding better and	General project support	eComment

RE: **City of West Hollywood Concerns with Draft K Line Northern Extension Motions Relative to Proposed Enhanced Infrastructure Financing District (EIFD) Formation.**

Dear Chair Dutra and Members of the Metro Board of Directors,

Thank you for taking the time to consider next steps for the K Line Northern Extension project. We are grateful for the support we have heard from many of you or your staffs for the San Vicente-Fairfax alternative over the last few weeks. While we appreciate efforts to build trust with communities along the line concerned with tunneling, motions under consideration to address those concerns could undermine our ability to form an Enhanced Infrastructure Financing District (EIFD) and develop an implementable plan of finance. Our concerns include the following:

- **The locally preferred alternative must include a defined route for the entire line as defined in the environmental document even if changes are anticipated.** It is essential that the City and agency partners have some degree of certainty before taking on the considerable expense and effort required to form an EIFD. EIFDs must include a defined Infrastructure Plan with the specific projects intended to receive funding from the district.

- **Leaving the Mid City alignment undefined creates major uncertainty in overall project costs.** Previous Mid City alternatives studied by Metro ranged in cost from an additional $6.5 million to an additional $646 million representing a considerable difference in the scale of the funding challenge before us, even before new alternatives are considered.

- **Leaving the Mid City alignment undefined creates major uncertainty in potential competitiveness for other funding sources.** The additional cost range above is also paired with a wide range of travel time and ridership penalties, all of which change the cost benefit ratio of the project which could undermine competitiveness for state or federal funding and

financing. This would further alter the scale of the funding challenge before us.

- **Delaying the start of any additional outreach and technical studies creates additional project delays and schedule uncertainty between formation of an EIFD and next steps like project engineering and federal environmental review.** If additional outreach and technical work must be done, it should be started immediately to run in parallel with EIFD formation activities and should be capped at a reasonable maximum duration to prevent further delays.

- **It's unclear that additional outreach and analysis would produce a different outcome from prior Metro activities.** Metro spent the last 18 months and $2.3 million on peer reviewed technical studies scientifically confirming that tunneling would have no perceptible impacts to properties on the surface, would not impact property values or mineral rights, and confirming their extensive experience safely tunneling under every conceivable land use from historic homes and hospitals to schools and concert halls. Despite this overwhelming evidence and extensive outreach to the concerned communities, some people may never be convinced. As written, the City has no guarantee that embarking on a similar process again would not put us right back in this position when the project returns to the Board of Directors.

We remain open to supporting appropriate efforts to address concerns with tunneling, but we respectfully ask that you consider the above to ensure that final direction from the Metro Board of Directors does not impede our ability to form an EIFD or develop an implementable plan of finance. Thank you for your time and consideration and please don't hesitate to reach out to our staff if you have any questions or concerns.

Sincerely,

[redacted]

John Heilman

SUBJECT: Public Comment FOR, Metro Board Meeting March 26, 2026, Agenda Item No, 7 (2025-0846)

Metro Board Clerk

Metro Board Administration

One Gateway Plaza

MS: 99-3-1

Los Angeles, CA 90012

Honorable Members of the Board,

My name is Cooper Crane. I am a graduate student of public history at the University of California, Riverside. I study California history, including transportation history within Southern California. I am writing the members of the Metro Board for public comment on item number seven, for the Metro board meeting on March 26, 2026. I am writing to comment in favor of the staff recommendation for the LPA for the K Line North Extension through West Hollywood. The K Line north extension is one of the most important projects for transportation within the Los Angeles area. It will provide vital connections between the B, E, and C lines, as well as the D-line extension. The extension of the K-Line light rail will relief traffic congestion on Sepulveda, the most heavily trafficked bus-corridor within the Metro system, and provide critical north-south links for central Los Angeles. Until the completion of the Sepulveda Pass Corridor, the K-Line extension will also provide a vital

link for commuters in the San Fernando Valley via the B-Line without having to commute to downtown.

The K-line extension is needed now, and cannot be delayed. Mayor Karen Bass is proposing a recommendation into additional studies into the impact of tunneling on residential areas above the proposed extension. This recommendation is misguided. Metro has already conducted numerous studies that have shown that there is no impact on communities as a result of tunneling. This is a bad-faith recommendation intended to prevent the formation of a EIFD in West Hollywood that would provide funding for immediate construction, and is similar to historic anti-tunneling arguments in LA's transit history. Without the board approval of the LPA, the K-line will not have a local source of funding and will be delayed decades.

Los Angeles cannot afford to let this happen. Gas, oil, and energy prices will rise over the next decades as oil-based infrastructure will become unsustainable. For the future success and growth of Los Angeles, the city and county needs additional transit links that can be built in the present. Any delay now will be irreversible and detrimental to the continued success and survival of Los Angeles. I urge the Metro Board to vote in FAVOR of the Metro K Line LPA for the north extension to the Hollywood Bowl.

Respectfully,

Cooper Lennon Crane,

PhD student, University of California Riverside

SUPPORT: Staff-recommended San Vicente-Fairfax Hybrid Alignment for K-Line North

On behalf of Abundant Housing LA, I write to express support for the San Vicente-Fairfax Hybrid Alignment for the K-Line North. This route will connect riders from Redondo Beach, Crenshaw and Jefferson Park with Fairfax, West Hollywood and Hollywood, with a northern terminus at the Hollywood Bowl. An Enhanced Infrastructure Financing District (EIFD) from the City of West Hollywood, partnered with other local sources, will provide essential funding for this project. Once finished, it will be the busiest light rail line in the country.

As this is a subway, the route will require tunneling, which Los Angeles has been doing for public transportation projects for 40 years. Subway tunneling in urban areas is a safe, well-established practice that does not harm surrounding homes or infrastructure. Extensive geological surveys allow engineers to anticipate ground conditions before excavation begins, and modern tunnel boring machines operate at levels so deep enough that they are unnoticeable from the surface.

This project must move forward without delay. Los Angeles County is one of the most traffic-congested areas in the country, and given our region's high cost of living and the need to reduce greenhouse gas emissions, it is imperative that we expedite and expand sustainable transportation options for transit-dependent riders. For these reasons, we urge your support.

Sincerely,

Azeen Khanmalek
Executive Director
Abundant Housing LA

Subject: Item 7 – March 26, 2026 Board Meeting: 2025-0846 Approve the San Vicente-Fairfax alignment evaluated in the 2024 Draft Environmental Impact Report (EIR) as the Locally Preferred Alternative (LPA) for the K Line Northern Extension (KNE) Project[1]

Dear Chair Dutra and Members of the Board:

The Boards selection of a Locally Preferred Alternative ("LPA") for the K Line Northern Extension ("KNE" or "Project") prior to completion, consideration and certification of a Final Environmental Impact Report ("FEIR") for the proposed Project would be a violation of the California Environmental Quality Act ("CEQA"), given the recent passage of SB 79.

Historically, transit agencies have relied on the legal precedent that selecting an LPA is merely a non-binding planning milestone, a defense rooted in the California Supreme Court's ruling in *Save Tara v. City of West Hollywood*. However, the passage of the Abundant and Affordable Homes Near Transit Act (SB 79) last October fundamentally altered this legal landscape. Because of SB 79, selecting an LPA is no longer a procedural stepping stone; it is a highly consequential land-use trigger which must be analyzed in a Final EIR before the Board can take any action that triggers SB 79.

[1] The Board Report and attachments are available at: https://datamade-metro-pdf-merger.s3.amazonaws.com/2025-0846.pdf

Selection of a Locally Preferred Alternative is no longer an action without environmental consequences. SB 79 is triggered by the selection of a "preferred alternative." The Board's selection of an LPA for the Project, will trigger SB 79 for transit stops along the preferred alignment, resulting in significant impacts that have not been analyzed in a certified FEIR, and which will be triggered as soon as SB 79's July 1, 2026 implementation date, even if the LPA does not break ground until 2041, and/or is never fully funded, and/or is not the ultimately approved Project, and/or is never constructed. The Board is thus precluded from selecting an LPA until a full FEIR has been completed and certified which addresses the impacts of the proposed Project in combination with SB 79.

At a minimum, the EIR for the LPA must analyze the land use impacts of the LPA in combination with SB 79, and the resulting strain on sewer, water, and power systems and public services. It must address impacts associated with triggering increased density in high fire zones (VHFHSZ). It must address the growth-inducing impacts of the LPA. It must disclose the financial impacts on cities and their residents, who will inevitably bear the tax and utility rate increases to fund required infrastructure expansions, and the potential indirect environmental impacts resulting from this strain on local government finances. It must also address how the LPA in combination with SB 79 will hurt the ability of cities to encourage the development of affordable housing, resulting from SB 79's luxury housing loophole, and SB 79's affordability requirements, which are substantially lower than the RHNA housing affordability targets cities and counties have been required to achieve with their Housing Elements, thus impacting the ability of cities to meet affordable housing targets. It must also address the resulting inconsistencies with existing General and Specific Plans.

Selection of an LPA triggers SB 79, which will result in significant impacts that have not been identified or analyzed in the EIR for the Project. The significant SB 79-related growth-inducing and other impacts resulting from selection of an LPA have not been analyzed or addressed in a certified FEIR. It is therefore inappropriate for the Board to select an LPA at this time.

1. THE PROPOSED LPA

Figure 1 from Attachment D to the Board Report shows staff's proposed LPA, as follows:

Map of Staff Recommendation for LPA for K Line Northern Extension (KNE) Project

IOS = Initial Operating Segment

FIGURE 1 – Proposed LPA

Staff is recommending the approval of the San Vincente-Fairfax alignment with the following features and modifications as the LPA, as detailed in the Board Report:

> San Vicente-Fairfax alignment evaluated in the 2024 Draft Environmental Impact Report (EIR) as the Locally Preferred Alternative (LPA) for the K Line Northern Extension (KNE) Project contingent upon the formation of an Enhanced Infrastructure Financing District (EIFD) by the City of West Hollywood in coordination with Los Angeles County to provide additional local sources of funding (at least 25% of the capital cost estimate) per the Early Project Delivery Strategy with:

A. an initial operating segment (IOS) from the Expo/Crenshaw Station at the E/K Line to Wilshire/Fairfax at the D Line;

B. an adjusted tunnel alignment in Mid-City to continue to maximize use of public rights-of-way (ROW) to reduce subsurface easements, described as Crenshaw ROW: Option 2 in the Mid-City Additional Alignment Analysis Report (2025);

C. a commitment to work with the owner of the Midtown Crossing Shopping Center to preserve the opportunity to relocate the supermarket at an alternate location on acquired property adjacent to the construction site, prior to the start of construction; and

D. a terminus station at the Hollywood Bowl.

2. PROJECT HISTORY

The following are key milestones in the Project's environmental review history:

- The Measure M Expenditure Plan allocated $2.24 billion (in 2015 dollars) to the project **and identified 2041 as the ground-breaking year** when project funds would be available for construction, with the goal of opening between 2047-2049.
- In August 2020, the Board directed staff to begin work on environmental clearance under CEQA and prepare a Draft EIR.
- On April 15, 2021, Metro initiated public scoping for an environmental document with a 45-day scoping period, which ended on May 28, 2021.
- Metro published several technical studies in 2023 including ridership projections, projects benefits, and preliminary cost estimates.
- On July 23, 2024, Metro released the Draft EIR[2] ("DEIR") for public review over a 60-day comment period that extended to September 20, 2024. As noted on page 5 of the Board Report: "During the public comment period for the Draft EIR, Metro received over 1,300 submissions by email, mail, and phone. The City of West Hollywood shared a survey with their residents and received over 600 comments on the Project, which they attached to their comment letter on the Draft EIR. Of the over 1,300 submissions received on the Draft EIR, 95% came from individuals, while the remaining came from public agencies, elected offices, community groups, and businesses.

[2] The DEIR is available at: https://www.metro.net/projects/kline-northern-extension/

- Following release of the DEIR, Metro released a number of technical studies,[3] including:
    - Frequently Asked Questions Summer 2025 – Tunneling Safety, dated August 2025
    - Mid-City Additional Alignment Analysis Summary Report, dated August 2025
    - Tunnel Safety Report, dated August 2025
    - Frequently Asked Questions Summer 2025 – Property Considerations, dated August 2025
    - Property Considerations Report, dated August 2025
    - West Boulevard Addendum to the Mid-City Additional Alignment Analysis Report, dated October 7, 2025

- A vote on staff's recommended LPA is scheduled for the March 26, 2026 Metro Board Meeting. A FEIR has yet to be completed. The staff report includes only the following attachments and does not include the DEIR:
    - Attachment A - Summary of Draft EIR Comments
    - Attachment B - Summary of 2025 Community Engagement
    - Attachment C - Metro Cost Benefit Analysis
    - Attachment D - Map of Staff Recommendation for LPA

3. SB 79

SB 79 was signed into law by the Governor on October 10, 2025[4] and goes into effect on July 1, 2026. SB 79 specifies "by right" development densities within ½ mile of "transit-oriented development stops" defined in Section 65912.115 as follows:

> (p) "Transit-oriented development stop" means a major transit stop, as defined by Section 21064.3 of the Public Resources Code, **and also including stops on a route for which a preferred alternative has been selected or which are identified in a regional transportation improvement program, that is served by heavy rail transit, very high frequency commuter rail, high frequency commuter rail, light rail transit, or bus service within an urban transit county meeting the standards of paragraph (1) of subdivision (a) of Section 21060.2 of the Public Resources Code.** When a new transit route or extension is planned that was not identified in the applicable regional transportation plan on or before

[3] The technical studies are available at: https://www.dropbox.com/scl/fo/77p64ve9aljqc2sofdlpp/AB7_s20Rs0bbpCXXO6Cifuo?rlkey=m922ulvqno3yiyazosozh5xmj&e=1&st=ya0oz0df&dl=0

[4] The full text of SB 79 as chaptered is available at: https://legiscan.com/CA/text/SB79/id/3272905 And https://legiscan.com/CA/text/SB79/id/3272905/California-2025-SB79-Chaptered.html

> January 1, 2026, those stops shall not be eligible as transit-oriented development stops unless they would be eligible as Tier 1 transit-oriented development stops. If a county becomes an urban transit county subsequent to July 1, 2026, then bus service in that county shall remain ineligible for designation of a transit-oriented development stop. (Emphasis added).

Section 21064.3 of the Public Resources Code defines a major transit stop as follows:

> "Major transit stop" means a site containing any of the following:
> (a) An existing rail or bus rapid transit station.
> (b) A ferry terminal served by either a bus or rail transit service.
> (c) The intersection of two or more major bus routes with a frequency of service interval of 20 minutes or less during the morning and afternoon peak commute periods.

SB 79 is thus triggered by the selection of a "preferred alternative." The Board's selection of an LPA for the Project, will thus trigger SB 79 for transit stops along the preferred alignment, resulting in significant impacts that have not been analyzed in the certified FEIR, and which will be triggered as of SB 79's July 1, 2026 implementation date, even if the Project does not break ground until 2041 and/or is never fully funded, constructed or operated. The Board is thus precluded from selecting an LPA until a full FEIR has been completed and certified which addresses the impacts of the proposed Project in combination with SB 79.

In addition to defining transit-oriented development stops, SB 79 defines two tiers of stops as follows:[5]

> (n) "Tier 1 transit-oriented development stop" means a transit-oriented development stop within an urban transit county served by heavy rail transit or very high frequency commuter rail.
>
> (o) "Tier 2 transit-oriented development stop" means a transit-oriented development stop within an urban transit county, excluding a Tier 1 transit-oriented development stop, served by light rail transit, by high-frequency commuter rail, or by bus service meeting the

[5] SB 79 Section 65912.156 includes the following definitions:
(d) "Heavy rail transit" means a public electric railway line with the capacity for a heavy volume of traffic using high-speed and rapid acceleration passenger rail cars operating singly or in multicar trains on fixed rails, separate rights-of-way from which all other vehicular and foot traffic are excluded, and high platform loading. "Heavy rail transit" does not include California High-Speed Rail.
(e) "High-frequency commuter rail" means a commuter rail service operating a total of at least 48 trains per day across both directions, not including temporary service changes of less than one month or unplanned disruptions, and not meeting the standard for very high frequency commuter rail, at any point in the past three years.

standards of paragraph (1) of subdivision (a) of Section 21060.2 of the Public Resources Code.

As explained in SB 79 Section 65912.157, states in part:

(a) A housing development project **shall** be an allowed use as a transit-oriented housing development on any site zoned for residential, mixed, or commercial development within one-half or one-quarter mile of a transit-oriented development stop, if the development complies with the applicable of all of the following requirements:

(1) A transit-oriented housing development project allowed under this chapter **shall** include at least five dwelling units and meet the greater of the following:

(A) A minimum density of at least 30 dwelling units per acre.

(B) The minimum density required under local zoning, if applicable.

(2) The average total area of floor space for the proposed units in the transit-oriented housing development project **shall** not exceed 1,750 net habitable square feet.

(3) For a transit-oriented housing development project within one-quarter mile of a Tier 1 transit-oriented development stop, all of the following apply:

(A) **A local government shall not** impose any height limit less than 75 feet.

(B) **A local government shall not** impose any maximum density of less than 120 dwelling units per acre.

(C) **A local government shall not** enforce any other local development standard or combination of standards that would physically preclude achieving a residential floor area ratio of up to 3.5.

(D) A development that achieves a minimum density of 90 dwelling units per acre and that otherwise meets the eligibility requirements of Section 65915, including, but not limited to, affordability requirements, **shall** be

eligible for additional concessions pursuant to Section 65915, as specified in subdivision (d).

(4) For a transit-oriented housing development project further than one-quarter mile but within one-half mile of a Tier 1 transit-oriented development stop, and within a city with a population of at least 35,000, all of the following apply:

(A) **A local government shall not** impose any height limit less than 65 feet.

(B) **A local government shall not** impose any maximum density standard of less than 100 dwelling units per acre.

(C) **A local government shall not** enforce any other local development standard or combination of standards that would physically preclude achieving a residential floor area ratio of up to 3.

(D) A development that achieves a minimum density of 75 dwelling units per acre and that otherwise meets the eligibility requirements of Section 65915, including, but not limited to, affordability requirements, shall be eligible for additional concessions pursuant to Section 65915, as specified in subdivision (d).

(5) For a transit-oriented housing development project within one-quarter mile of a Tier 2 transit-oriented development stop, all of the following apply:

(A) **A local government shall not** impose any height limit less than 65 feet.

(B) **A local government shall not** impose any maximum density standard of less than 100 dwelling units per acre.

(C) **A local government shall not** enforce any other local development standard or combination of standards that would physically preclude achieving a residential floor area ratio of up to 3.

(D) A development that achieves a minimum density of 75 dwelling units per acre and that otherwise meets the eligibility requirements of Section 65915, including, but

not limited to, affordability requirements, shall be eligible for additional concessions pursuant to Section 65915, as specified in subdivision (d).

(6) For a transit-oriented housing development project further than one-quarter mile but within one-half mile of a Tier 2 transit-oriented development stop, and within a city with a population of at least 35,000, all of the following apply:

(A) **A local government shall not** impose any height limit less than 55 feet.

(B) **A local government shall not** impose any maximum density standard of less than 80 dwelling units per acre.

(C) **A local government shall not** enforce any other local development standard or combination of standards that would physically preclude achieving a residential floor area ratio of up to 2.5.

(D) A development that achieves a minimum density of 60 dwelling units per acre and that otherwise meets the eligibility requirements of Section 65915, including, but not limited to, affordability requirements, shall be eligible for additional concession pursuant to Section 65915, as specified in subdivision (d).

(b) For purposes of this chapter, the distance of a transit-oriented housing development project from a transit-oriented development stop shall be measured in a straight line from the nearest edge of the parcel containing the proposed project to a pedestrian access point for the transit-oriented development stop.

(c) A local government may still enact and enforce standards, including an inclusionary zoning requirement that do not, alone or in concert, prevent achieving the applicable development standards of subdivision (a). A local government shall not adopt any requirement, including, but not limited to, increased fees or inclusionary zoning requirements, that applies to a project solely or partially on the basis that the project is seeking approval as a transit-oriented housing development, except as necessary for the requirements of this chapter.

4. SB 79 TRANSFORMS THE ADOPTION OF AN LPA INTO A BINDING ACTION

When SB 79 takes effect on July 1, 2026, it will mandate by-right, high-density housing (up to 120 units per acre and heights up to 95 feet) within a half-mile of qualifying Transit-Oriented Development stops. Crucially, the statute defines qualifying stops to include planned stations on routes where a "preferred alternative" has been selected.

By voting to adopt the KNE LPA tomorrow, the Board will actively trigger sweeping, mandatory upzoning across Los Angeles and West Hollywood. Because this action instantly strips local jurisdictions of their zoning authority and vests developers with new entitlements, the LPA selection can no longer be defended in court as a "non-binding" study preference. It is a definitive commitment that dramatically alters the physical environment.

5. THE DRAFT EIR IS LEGALLY INADEQUATE UNDER THE NEW BASELINE

The Draft EIR for the K Line Northern Extension was released for public comment in July 2024, well before SB 79 was signed into law. Consequently, the Draft EIR evaluated the project's growth-inducing impacts, traffic circulation, utility demands, and public service requirements based on *existing* local zoning. It did not model the environmental impacts of the exponential housing density that SB 79 will now mandate along the San Vicente, Fairfax, or La Brea corridors. Under CEQA, an EIR must analyze the reasonably foreseeable indirect impacts of a project. Because the KNE LPA vote automatically triggers state-mandated upzoning, the influx of high-density development is now a legally foreseeable consequence of your vote.

Under CEQA, an EIR must analyze the "growth-inducing impacts" of a project. Historically, transit agencies would model future neighborhood growth based on existing local zoning. That is no longer legally defensible. Agencies, including Metro, must now input SB 79's statutory minimums into their traffic, water, sewer, and public services models.

- **Tier 1 Zones:** Metro must assume the environmental impacts of **160 dwelling units per acre (du/ac)** and **95-foot heights** within a quarter-mile of the planned stop.
- **Tier 2 Zones:** Metro must model **120 du/ac** and **75-foot heights** between a quarter- and half-mile of the stop. This exponentially increases the projected localized impacts of the transit project, forcing agencies to develop much more aggressive (and expensive) mitigation measures for utilities and traffic flow.

6. VIOLATION OF THE CEQA PRE-COMMITMENT DOCTRINE

CEQA dictates that an agency cannot take any action that significantly furthers a project in a manner that forecloses alternatives or mitigation measures prior to the completion of the EIR. If the Board adopts the LPA now, it will be committing to a route

that triggers massive land-use changes without having ever analyzed the environmental impacts of those specific changes and will foreclose other options. To comply with CEQA, Metro must first revise the EIR to model the statutory maximums of SB 79 as "growth-inducing impacts" and develop appropriate mitigation measures. Only after a Final EIR is certified can the Board legally select an LPA that carries such profound, irreversible land-use consequences.

7. METRO MUST ACTIVELY ADVOCATE FOR NEEDED CHANGES TO SB 79

We support Metro's requested changes to SB 79 adopted at Metro's January 22, 2026 Board Meeting as part of the Board's opposition to SB 677 unless amended. Metro's stated position is:[6]

> To ensure that Metro can continue advancing its Long Range Transportation Plan and improving transit service across the region, Metro recommends considering an alternative structure or a Los Angeles–specific exemption. These options could include:
> - Limiting the bill's applicability to only those rail transit projects that are in revenue service.
> - Creating an incentive-based structure using state funds that allows local agencies to determine how best to locate density around transit infrastructure.
> - Delaying the effective date of the bill until implementation issues can be addressed.
> - Limiting the bill's applicability to the Bay Area as a pilot project for a set period of time.
> - Exempting Los Angeles County from SB 79, given the region's extensive and ongoing transit expansion efforts and the importance of maintaining strong local partnerships to advance these projects.

SB 79 is highly destructive to neighborhoods, the ability of cities to promote affordable housing, and to public support for transit projects. We urge the Board to actively and aggressively pursue legislation to:

- Limit the bill's applicability to the Bay Area as a pilot project for a set period of time.
- Exempt Los Angeles County from SB 79, given the region's extensive and ongoing transit expansion efforts and the importance of maintaining strong local partnerships to advance these projects.

Transit should serve people. People should not be forced to serve transit. Don't make people choose between improved transit and the destruction of the

[6] https://boardagendas.metro.net/board-report/2025-1053/

neighborhoods they love. Actively oppose the application of SB 79 to the greater Los Angeles area.

8. CONCLUSION

Moving forward with an LPA vote before finalizing an EIR that accounts for SB 79 violates CEQA and is likely to invite CEQA litigation. We strongly urge the Board to delay the LPA selection until Metro staff has updated the environmental review to reflect the new realities of state housing law.

Thank you for your time, service, and attention to this urgent matter.

Sincerely,

Susan O'Carroll, Ph.D

Re: Public Comment for the March Metro Board Meeting — Support for the Northbound K Line Extension along Fairfax/San Vicente Route (Item 7 on Agenda)

Dear Chair and Members of the LA Metro Board,

I am submitting this letter as public comment for the **March Board Meeting** to express strong support for advancing the northbound extension of the K Line along the Fairfax/San Vicente Route. This project represents a critical investment in the region's future, expanding equitable mobility, improving regional connectivity, and bringing new economic opportunities to communities that have long been underserved by major transit infrastructure.

The K Line has already begun to deliver meaningful improvements to mobility in South Los Angeles. Extending the line north will complete a vital corridor linking LAX, Inglewood, Hyde Park, Leimert Park, Baldwin Hills, Mid-City, West Hollywood, and Hollywood directly to the broader regional rail network. This expansion will give residents and workers more reliable access to jobs, schools, health care, and cultural destinations across Los Angeles County.

The northbound extension also aligns with Metro's climate, sustainability, and equity goals by offering a clean transportation alternative, reducing emissions, and encouraging smart, community-centered development along the corridor. When paired with strong equity protections and continued community input, this project has the potential to uplift small businesses, expand opportunities for local hiring, and strengthen historically marginalized neighborhoods.

As you take up this item in the March meeting, I also urge the Board to maintain the highest standards of transparency and public trust during deliberations on route options and project decisions. Community members have raised questions about potential conflicts of interest involving Board participation, including whether members with property located near proposed alignments are working behind-the-scenes where there should be no appearance of undue influence. While I am not asserting wrongdoing, I believe the Board would benefit from proactively addressing these concerns, clarifying recusal procedures, and reassuring the public that all decisions are being made fairly and impartially.

This March meeting represents an important moment to move the project forward with a clear commitment to equitable outcomes, open dialogue, and community-centered planning. I urge you to advance the northbound K Line extension with urgency while upholding the highest standards of accountability and public confidence.

Thank you for your leadership and for considering this input. I appreciate your dedication to improving mobility for all residents of Los Angeles County and look forward to seeing this essential project progress.

Sincerely,
Tarik Yetken

Dear Members of the Metro Board,

I am writing to express my strong support for tunneling the K Line extension through the Lafayette Square area. This approach represents a forward-thinking, community-conscious solution that minimizes surface disruption, preserves neighborhood integrity, and supports long-term transit efficiency.

A tunneled alignment would reduce impacts to traffic, local businesses, and historic areas while ensuring a safer and more reliable transit experience for riders. Given the long-term nature of this infrastructure investment, it is critical that decisions prioritize the broader public good rather than short-term or localized concerns.

I also encourage the Board to carefully evaluate all stakeholder input with transparency and fairness. In situations where individuals involved in the discussion may have personal or financial interests in the affected area, it is especially important to ensure that decision-making remains objective and focused on what best serves the entire community.

Los Angeles deserves infrastructure solutions that are equitable, efficient, and built to last. I respectfully urge the Board to move forward with a tunneled alignment through Lafayette Square as the option that best meets these goals.

Thank you for your time and consideration.

Sincerely,
Israel Pimentel

COUNTY OF LOS ANGELES
DEPARTMENT OF PARKS AND RECREATION
"Parks Make Life Better!"
Norma E. García-González, Director Alina Bokde, Chief Deputy Director

March 25, 2026

The Honorable Fernando Dutra, Chair
LA Metro Board of Directors
Office of Board Administration
1 Gateway Plaza, Mail Stop 99-3-1
Los Angeles, California 90012

Dear Chair Dutra and Honorable Members of the LA Metro Board:

STATEMENT ON METRO BOARD VOTE ON THE K LINE EXTENSION ITEM 7

On behalf of the County of Los Angeles Department of Parks and Recreation (LA County Parks), I am pleased to express our strong support for the approval of the Locally Preferred Alternative (LPA) for the K Line Northern Extension (KNE), including the proposed terminus station at the Hollywood Bowl.

The Hollywood Bowl (Bowl) is one of Los Angeles County's (County) most iconic cultural and recreational destinations, welcoming approximately one million visitors annually for performances, community events, and educational programming. As stewards of this cherished public asset, we recognize the importance of ensuring that access to the Bowl is equitable, sustainable, and aligned with the County's broader mobility, environmental, and community goals.

The inclusion of a terminus station at the Hollywood Bowl represents a transformative investment in public access. By directly connecting the venue to the regional rail network, the project will significantly expand affordable transportation options for residents across Los Angeles County, particularly for those from Equity Focus Communities, who are projected to make up a substantial share of riders. This improved connectivity will allow more families, students, and individuals to attend performances and cultural events without the burden of high parking costs or reliance on private vehicles.

In addition to enhancing access, the Hollywood Bowl terminus will play a critical role in reducing traffic congestion in one of the most heavily impacted areas of the region. Event nights at the Bowl are synonymous with significant vehicle congestion on surrounding roadways and freeways, contributing to increased greenhouse gas

emissions, poor air quality, and neighborhood impacts. By providing a fast, reliable, high-capacity transit alternative, the KNE project will help shift thousands of trips from cars to transit, supporting Metro's projected reduction of over 127,000 daily vehicle miles traveled and advancing regional climate goals.

The project also aligns with broader County priorities to improve mobility, reduce environmental impacts, and enhance quality of life. The connection to the Hollywood Bowl will not only benefit eventgoers, but also employees, performers, and nearby communities who will gain more reliable and efficient transportation options. Furthermore, the station will support first/last mile improvements, encourage multimodal access, and reduce strain on local infrastructure and parking resources.

We also recognize the operational and construction efficiencies identified in the report, including the suitability of the Hollywood Bowl parking areas as a staging site for tunnel boring operations. This dual benefit, both as a transit destination and as a practical construction asset, further strengthens the case for its inclusion in the LPA.

For these reasons, LA County Parks strongly supports the recommendation to approve the San Vicente-Fairfax alignment as the LPA, inclusive of the Hollywood Bowl terminus. This project represents a meaningful step toward a more connected, accessible, and sustainable Los Angeles County.

We appreciate Metro's continued partnership and commitment to delivering infrastructure that serves our communities and enhances access to the County's treasured public spaces.

Sincerely,

[redacted]

RE: Board Agenda Item 9. K-Line to Torrance SUPPORT Awarding PMSS Contract

Dear Metro Board Members,

South Bay Forward is a grassroots group of residents in the South Bay region of Los Angeles County and a Metro CBO for the K-Line to Torrance. Our mission is to expand housing and transportation choices for a more inclusive, equitable, affordable, and sustainable community. Together we learn, identify solutions, educate, and mobilize for positive change.

As longtime supporters of transit to the South Bay, we are writing in SUPPORT of awarding the PMSS Contract to Hill International, Inc for the K-Line Extension to Torrance. Moving this project forward expeditiously benefits all residents of the South Bay and neighboring cities.

Sincerely,

Sheana Ahlqvist, Chair
South Bay Forward
Representing ~ 900 South Bay Residents

March 25, 2026

Subject: Request to Reject Current K Line Extension Alignment

Dear Members of the Board,

I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.

Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day.

Equally concerning is the lack of fair and timely community engagement.

There are also serious concerns about governance and equity in decision-making.

Recent developments have only deepened these concerns.

Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.

We are not opposed to the K Line Extension. We want to see it succeed.

We respectfully ask that you:

• Reject the current alignment

• Ensure a fair and transparent evaluation of alternatives

• Provide meaningful and timely engagement with our community

• Restore trust through open communication and accountability

Thank you for your time and consideration.

Sincerely,

Jolie Kingsley Ceo

RE: Board Agenda Item 7. K-Line North SUPPORT for San Vicente-Fairfax Route

Dear Metro Board Members,

South Bay Forward is a grassroots group of residents in the South Bay region of Los Angeles County and a Metro CBO for the K-Line to Torrance. Our mission is to expand housing and transportation choices for a more inclusive, equitable, affordable, and sustainable community. Together we learn, identify solutions, educate, and mobilize for positive change.

We are writing to express **strong SUPPORT for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension** project. This line is **complementary to the recently approved K-Line to Torrance diverting traffic to transit**. We support **moving forward with the two projects – connecting rail from Torrance to West Hollywood – as soon as possible**. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood connecting to the South Bay in less than an hour. South Bay residents currently rely on automobiles to get to areas north adding to traffic in already busy neighborhoods.

The San Vicente–Fairfax route best serves the needs of our communities by providing access to Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines and LAX.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents compared to the La Brea route.

We urge the Metro Board to **prioritize community input and long-term regional benefits by selecting the staff recommendation for the San Vicente–Fairfax route as the Locally Preferred Alternative**. Thank you for considering public input on this important decision.

Sincerely,
Sheana Ahlqvist, Chair
South Bay Forward

25 March 2026

The Honorable Fernando Dutra
Chair
Los Angeles County Metropolitian Transportation Authority
One Gateway Plaza
Los Angeles, CA 90012-2952

RE: Item 7, 2025-0846 Support - K Line Northern Extension (KNE) - Locally Preferred Alternative (LPA)

Dear Chair Dutra and Directors:

The Transit Coalition (TTC) expresses support for the staff proposed recommendation for Item 7 the San Vicente-Fairfax option as the Locally Preferred Alternative.

The San Vicente-Fairfax alignment has the most support among public officials, agencies and organizations according to the Metro K Line Northern Extension Draft EIR Public Comment Period Summary Memorandum. Many organizations that identified an alignment chose the San Vicente-Fairfax alignment.

Support for the San-Vicente Fairfax Alignment (282) was nearly double the opposition to the Mid-City Alignment (138) and opposition to the K Line Northern extension (20).

Destinations such as Cedars-Sinai Hospital, the Beverly Center, the Los Angeles LGBT Center, Midtown Crossing, the Midtown Shopping Center and the Hollywood Bowl are important elements served along the proposed San Vicente-Fairfax route.

In addition to the K Line Northern Extension Draft Environmental Impact Report (DEIR), Metro completed a separate report on property concerns on the K Line Northern Extension: *The K Line Northern Extension Property Considerations Report*.

Metro has safely constructed over thirty miles of tunnels spanning 43 years. Metro A, B, D, E and K Lines operate below or next to residences, businesses, schools, parks and other buildings in daily service.

Additionally, the Metro D Line Extension passes adjacent to single-family homes in Westwood that were constructed from the 1920s to the 1930s. The planned tunnel depth for the K Line Northern Extension will be between 40 and 120 feet.

This is like other tunnel projects in Los Angeles County. Metro decades of experience and the DEIR and supplemental reports should ease concerns about underground tunneling and property impacts along the K Line Northern Extension.

The K Line Northern Extension Property Considerations Report **decisively answered concerns about property rights with facts, existing laws and the scope of Metro decision-making. The report states that, "zoning jurisdictions are overseen by local jurisdictions, not Metro," and "Metro would purchase the necessary subsurface easements from property owners."**

Metro must, by law, compensate property owners for subsurface easements like private utilities including cable and telephone companies. ***The K Line Northern Extension Property Considerations Report*** **details the compensation procedure on pages 2 and 3.**

The report cited two separate studies that revealed positive outcomes for areas closer to rail transit. A 2019 study conducted by the American Public Transportation Association (APTA) and the National Association of Realtors (NAR) studied the relationship between transit station areas and several demographic variables in 7 U.S. cities.

Los Angeles was one of the study cities. Between 2012 and 2016, the study revealed that home prices in the City of Los Angeles grew 61% and 8% higher for homes within 0.5 miles of a rail or fixed-guideway bus station than homes farther than 0.5 miles.

The second study was by the National Institute for Transportation and Communities (NITC). It assessed forty-two metropolitan regions on the relationship between transit station areas and several demographic and household factors.

The study showed that the transit station areas created 20% of regional job growth, raised median household incomes by 9% and used less than 1% of urbanized land.

It revealed a 15-25% increase in home values within 0.5-mile radius of a rail expansion than homes outside the radius.

The K Line Northern Extension will benefit existing homeowners without compromising property rights. The San Vicente-Fairfax alignment enjoys broad support among public officials, government agencies and private organizations. Metro has a continuous record for safe tunneling and transit operations in Authority tunnels.

The San Vicente-Fairfax alignment is superior for transit ridership, fare revenues and economic development. The Transit Coalition proposes that the Metro Board of Directors approve the SanVicente-Fairfax alignment as the Locally Preferred Alternative and fully implement the Staff Recommendation, as is, without obstructive amendments meant to delay or slow project implementation.

Sincerely,

Bart Reed
Executive Director

Dear Metro board and political leaders,

No more delay - please approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be one of the busiest light rail lines in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system. It will be extremely helpful to Angelinos like myself who resides in the area it will pass through. As gas prices rise and traffic congestion has not let up, we need more alternatives for travel that are also friendlier to our environment and lungs.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues. Thank you so much for your attention to this matter!

Thank you,
D'Ava Newman

Dear Metro Board Members,

In advance of this Thursday's meeting, I am writing to reiterate my strong support for selecting he San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. Dear Metro board and other leaders,

I am a mid-city resident. The K Line Northern extension will pass within a couple hundred yards of my home and will have a station a short walk away. I am wholeheartedly in support of this project.

Approve the K Line Northern Extension San Vicente-Fairfax alignment! We have done enough studies. We have dealt with enough delays.

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

The light rail tunnel for the regional connector in DTLA goes underneath Disney Hall, The Broad, and Colburn School. These are some of the most acoustically sensitive places in LA and there have been no issues.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Dear Metro Board Members and Local Leaders,

Enough with the delays. It's time to approve the K Line Northern Extension San Vicente–Fairfax alignment.

At this point, it's obvious that no number of meetings, studies, or reassurances will convince a small group of opponents that tunneling 100+ feet underground (something Metro has done safely across the region) poses zero meaningful impact. We cannot let a handful of objections stall a project with massive regional benefits.

West Hollywood is stepping up with 25% of the project cost. That level of partnership is rare, and this board should treat it as the opportunity it is.

Once built, this will be the busiest light-rail line in the country, connecting the region to Cedars-Sinai, The Grove, West Hollywood, the Hollywood Bowl, and other major destinations. It's the missing north–south link between the B Line and E Line -- a connection that will unlock exponential systemwide benefits.

No more delays. No more "additional studies." Approve the San Vicente–Fairfax alignment. And better yet, return to the DEIR option so riders aren't slowed down every trip and Metro doesn't waste $165 million solving problems that don't exist.

Thank you,

Curtis Taylor

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Elizabeth Favor

I strongly support the plan for building the LPA route for the K Line North extension. It is extremely important for us to be able to access this route because it connects so many different parts of the city together.

Dear Metro board and political leaders,

The proposed line extension to Cedars-Sinai would be life changing for my father and thousands of people. As a blind person, my father relies on very difficult to use public transportation. He lives down the street from the forthcoming Fairfax metro station. To be able to take the reliable Metro to his doctor's at Cedars-Sinai would make his life immeasurably easier. This project needs to move forward now! Delays only increase the budget and hurt the people of LA!

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

While I don't think everything in this video is a fair characterization, I do hear somethings that right true:

https://www.youtube.com/watch?v=OhQZj04A_UE

- The Metro Board isn't listening to its staff
- The Metro Board is not listening to actually good transit design for the long term health of all of our citizens.
- The Metro Board keeps bowing to NIMBY's who have the time to take off from work, rather than the people who need this transit to do things, like show up at jobs they can't constantly be skipping.

Please get the K line built where it will serve the most people as fast as possible!

Los Angeles remains the city with the nicest weather I've ever lived in. It is by far the most unpleasant and ugly to get around.

Transit, bike paths, walking, shade, infiltration gardens, mix-use developments, community plazas, and infrastructure for us to gather. Movement through the city.

Let's unconstipate the city! Let's build transit science based solutions!

Dear Metro Board Members,

I am strongly in support of Item 7 on your 03/26/2026 agenda. This item, the K LINE NORTHERN EXTENSION (KNE) - LOCALLY PREFERRED ALTERNATIVE (LPA), is the smartest choice for our region and the transit needs of the area. The relatively small increase in cost compared to other options results in much higher increases in usage and reductions in vehicle use. Please do not let a very tiny but very loud group of people derail one of areas most consquential transit projects.

We have no other option than to take bold, transformative action to get people out of their cars, increase transit use, and reduce climate change problems. Los Angeles is a world-class destination but cannot remain so without a robust transit system. Great strides have been taken over the last decade or two (bravo Measure R and Measure M). I urge you to do everything in your power to speed up the planning and procurement/RFP process and to focus on breaking down traditional delays in the process. It is shameful that the projected opening of this extension is likely going to be in 2050. If there is state legislation that is proposed to assist public transit projects in moving forward more quickly, please support those as well.

Thank you for your time and work to move this vitally important project forward. The people of Los Angeles are watching your votes. We want PRO-transit people in office.

On Mar 17, 2026, at 7:38 PM, Ryan Byrd <r[redacted] wrote:

I am a resident of Lafayette Square, and I strongly oppose LPA Option 2 for the K Line Northern Extension.

This alignment deviates from the original plan following the elimination of the Crenshaw/Wilshire station, and it unfairly shifts the burden onto our historic residential neighborhood.

LPA Option 2 would create approximately 22 subsurface easements beneath homes, raising serious concerns about property rights, structural impacts, and construction disruption.

It would also remove our local grocery store and the only pharmacy serving our community within miles—cutting off access to essential services.

Our neighborhood should not bear the brunt of accommodating changes made to meet the needs of other communities. We ask Metro to reject LPA Option 2 and pursue an alternative that avoids unnecessary impacts to residential areas and preserves critical local resources.

Thank you for your consideration.
Sincerely,

Ryan Byrd - Lafayette Square

Agenda #7 FOR Draft EIR Alignment

Hi, I am writing in support of approving the DEIR LPA for the K line northern extension, with option 1 for the Mid-City alignment.

This is a really important project that needs to be approved as soon as possible! Providing rail access to West Hollywood and the Hollywood Bowl will be transformative for the region. Beyond improving mobility for current transit riders in the area, the K line extension will also introduce thousands of new riders to the system.

While I understand that there have been some concerns over tunnelling for the DEIR alignment, extensive studies have proven that tunneling is extremely safe, and nearly undetectable. Therefore, altering the alignment to appease these concerns is unnecessary, and risks delaying the project, with worse travel times for users.

The time of Metro riders matters. We want a system that can get us around the region in a reasonable amount of time. Building the K line northern extension, with option 1 for the Mid-City alignment, gets us closer to that system. Delaying this project keeps that future far away from reality.

Please, do not delay this needed transformation. Thank you!

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood. The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input *[I recommend watching Nandert's latest video on YouTube or any social media platform at your earliest convenience*] and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Sincerely,
Auguste Miller

Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Sincerely,
Declan J. Quinlan

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Kathryn Madden

Dear Metro Board,

For the routing of the K Line North, I ask that the board go forward with the option of tunneling underneath homes. The vibrations will not be an issue, due to the depth of the tunnels, and it will speed up the line for millions of people over the future timespan of the line. It is very short-sighted to move the tunnel around these homes.

Thank you,
Owen Barbagallo

Just tunnel under Lafayette Square. Don't let 36 homeowners upend the needs of the millions who will ride this line for decades to come. Please just use common sense here. Don't act like you're in the Trump administration. Act like you actually care about the working people and children of Los Angeles. Let's get this built.

Hi Metro Board,

I am reaching out as a los angeles local to not delay this K line northern extension route any further. Numerous studies have already been done showing that this tunneling along with trains running underneath these homes will have zero noise impact.

You at the metro board have made tremendous steps in expanding the metro in LA. I am forever grateful, but we cannot allow a false narrative to spread that this tunneling (which is 100 feet below Lafayette Square) be postponed and pushed off further. We have the funding commitment from WEHO. Timing is so crucial here please.

I hope the board is able to hear me plea to continue this metro expansion and not delay this route any longer.

Thank you,
Sam

Dear Metro Board,

I am writing to urge the Board to expedite the construction of the K Line Northern Extension and to unequivocally reject the anti-intellectual obstructionism currently being displayed by a small group of local homeowners.

Public infrastructure of this magnitude must be prioritized for the greater good of millions of Angelenos, rather than being held hostage by the baseless paranoia of a few. The technical reality- that a tunnel 100 feet underground presents zero structural or noise risk - is an empirical fact. To allow "vibe-based" fears and scientifically illiterate claims to delay a multi-billion dollar project is not just a policy failure; it is an insult to the engineering profession and a betrayal of the city's taxpayers.

The K Line Northern Extension is a linchpin for the future of LA transit. Delaying this project to indulge irrational grievances is a choice to prioritize the comfort of the few over the fundamental mobility of the many. I ask that the Board stands firm against this meritless opposition and continues to prioritize the timely delivery of this essential project based on data, not misinformation.

Best regards,

Good Afternoon,

I am M.C. Guerry and I live in Hermosa Beach. The K line has become the main way I go north to Los Angeles. Unfortunately, the K Line South has been delayed and possibly canceled, and it is looking like that will happen to the K Line North. The reason for this is politicians catering to a small group of non-transit riders.

This is inexcusable. Metro is unique compared to other cities' transportation Boards in that it is composed of politicians whose main job is something other than the Board. Thus, I first ask that this committee recommend to reduce the number of politicians and politically-appointed representatives to the Metro Board. We need Board members whose primary concern is the success of the Metro public transportation system.

Second, the experience of the transit rider should be the focus of Metro. It is dumbfounding that this committee has only one person on it who speaks for the transit rider. In addition, I have been amazed how little I heard from Board members during the outage this past week. It isn't surprising, though, since so few of the Board members actually ride public transportation. Thus, I request that this committee make it so it is requirement that all board members are also transit riders.

Furthermore, Metro needs to focus on public transportation and stop funding highway widening. Numerous scientific studies show additional lanes do not reduce traffic. I urge you to learn what induced demand is. What does reduce traffic? It is better public transportation. Hence, I ask that this committee recommend the board be composed of transportation experts who follow sound policy.

Thank you,
MC Guerry

Hello,

As a daily Metro rider, please, please, please ignore the Metro-haters and anti-builders. Please build the Draft EIR for the K-Line. The needs of the many outweigh the wants and baseless fears of the few.

There is never a time for sick political games that favor control-freak homeowners.

Dear Metro board and political leaders,

The time for further delay has passed. I urge you to approve the K Line Northern Extension via the San Vicente–Fairfax alignment without additional studies or deferrals.

It is clear that no amount of outreach, meetings, or technical analysis will satisfy a small group of opponents, despite overwhelming evidence that deep tunneling—more than 100 feet below ground—has been executed safely and successfully by Metro on numerous occasions. Continuing to revisit settled concerns is no longer a productive use of time or public resources.

The City of West Hollywood has committed to funding 25% of this project—an extraordinary

contribution that should not be taken lightly. That level of local investment reflects both urgency and confidence in the project's value.

Once completed, this line will become one of the busiest light rail corridors in the nation, providing critical access to major destinations such as Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. More importantly, it will establish the long-missing north–south connection between the B Line and E Line, delivering systemwide benefits and significantly improving mobility across the region.

Further delays only increase costs, prolong congestion, and undermine public trust. No more studies. No more hesitation. Approve the San Vicente–Fairfax alignment now. Better yet, return to the DEIR option to avoid unnecessary rider delays and prevent the waste of an additional $165 million addressing issues that have already been resolved.

Decisive action is needed. The region cannot afford to wait.

Thank you,
Jovian Lee

I help operate a business near the Sunset and Vermont junction and the rail line was crucial to keeping my job in los angeles while I lived temporarily in Hemet with family while recovering from surgery and could not sustain long drives. For every angeleno against the rail project there are ten temporarily or permanently disabled people who would benefit greatly from this line extension.

Drunk driving is also a plague upon our city and the best way to save lives and reduce the harm is to offer safer and better public transit options to parts of our city where there are high density of restaurants and bars.

Thank you,
Bernadette McConnell

Dear Metro board and political leaders,

I encourage you to approve the K Line Northern Extension San Vicente-Fairfax alignment, particularly as West Hollywood is amazingly willing to put up 25% of the project cost — an opportunity this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line, and will create great access to the D line expansion as well! This will have exponential positive effects across Metro's system and ease access to (and reduce vehicle traffic in) areas frequented both by

locals and tourists.

Don’t delay. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip.

Thank you,

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this

board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Jehan Anketell

Hello,

I support the San Vicente-Fairfax alignment. Tunneling is safe and Metro has the studies that prove that. Further, the San Vincente-Fairfax alignment will add 9 new stops to the K line. These 9 new stops will increase ridership and remove more cars from the road.

I also support a stop to the Hollywood bowl. Given the huge expense, I'm willing to make this a phase three or phase four goal.

The priority should be the San Vincente-Fairfax alignment because those 9 new stops will be critical for Los Angelenos' ability to get around in the future. Robust ridership stems from a line's ability to serve. The San Vicente-Fairfax alignment offers the best ridership outcomes.

Thank you.

Dear Mayor Bass and Members of the Metro Board of Directors,

I am writing to urge you to vote YES on Item 7 and officially approve the San Vicente-Fairfax alignment as the Locally Preferred Alternative (LPA) for the K Line Northern Extension.

As a Koreatown resident and a local startup founder, I see firsthand how vital a true transit grid is to the future of Los Angeles. Connecting the D Line to a major north-south artery like the K Line isn't just about convenience; it is essential for linking our major job centers, supporting local businesses, and attracting the talent our city needs to thrive.

When completed, this extension is projected to be the highest ridership light rail line in the country. We cannot afford to jeopardize its funding, its accelerated timeline, or the immense economic benefit it brings to the broader county because of hyper-localized opposition to underground tunneling. Metro's own independent engineering experts have already confirmed that deep tunneling operations will result in zero surface impact or vibration for the neighborhoods above.

Please rely on the science and the overwhelming regional benefit of this project. I urge the board to reject any further costly delays or alternate alignment studies, and to approve the San Vicente-Fairfax LPA so we can keep this critical infrastructure on track.

Thank you for your time and your service to Los Angeles.

Sincerely,

Prajwal

Hello Metro Board,

I urge everyone here to do what is right for ridership and public transit, no more delays. Do not bend to the NIMBYs who continue to hold us back.

40-year-old disabled Southern California native, I pay my taxes and I ride public transit.

We don't deserve to be treated like second class citizens because we don't have cars and home with the deeds in our names.

The K Line needs to move forward without any more lost time and money so that folks such and myself and those less fortunate can enjoy the same levels of mobility and clean air that I've dreamed about since I was a youth.

Thank you for your time,

[S]kʌɟƨ

Dear Metro Board Members and Political Leaders,

I'm writing to urge you to approve the K Line Northern Extension San Vicente–Fairfax alignment without further delay.

It has become clear that no number of additional community meetings or studies will satisfy a small group of residents who refuse to accept what Metro has demonstrated time and again: tunneling 100+ feet below ground is safe and has negligible surface impact. We cannot allow a vocal minority to hold regional transit hostage indefinitely.

Consider what's at stake:

West Hollywood has committed to funding 25% of the project cost: an extraordinary local investment this board should not take for granted. That kind of partnership doesn't wait forever.

Once built, this will be one of the busiest light rail lines in the country, connecting the region to Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. More importantly, it is the missing north-south link between the B Line and E Line, and its completion will have a multiplying effect on ridership and connectivity across Metro's entire system.

Every year of delay means rising construction costs, lost ridership, and a failure to deliver on promises made to taxpayers who voted to fund this project. It is unconscionable to further delay a project of this magnitude — one that millions of Angelenos are counting on — to appease objections that have already been studied and answered.

I urge you to approve the San Vicente–Fairfax alignment immediately. Better yet, revert to the original DEIR option so riders aren't burdened with unnecessary delays on every trip — and so Metro doesn't waste $165 million addressing problems that don't exist.

Enough studies. Enough stalling. Approve this project now.

Thank you,
Brett Keating

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment! Why is it that some minor European country like Spain can have one of the best metro systems on the planet, in Madrid, whereas L.A. just drags it feet, even though supposedly USA is #1.

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before. Just build the damn thing already! Traffic

sucks in this city!

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. Dear Metro Board:

Enough delays, political theater, and wasteful spending—approve the K Line Northern Extension via the San Vicente–Fairfax alignment now.

It's clear that no number of community meetings or additional studies will satisfy a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

Once completed, this will be the busiest light rail line in the country, connecting riders to critical destinations like Cedars-Sinai, The Grove, West Hollywood, and the Hollywood Bowl. More importantly, it will finally create the missing north–south link between the B and E Lines, unlocking systemwide benefits and dramatically improving mobility across the region.

No more delays. No more redundant studies. Approve the San Vicente–Fairfax alignment, and better yet, revert to the DEIR option to avoid unnecessary travel delays for riders and prevent wasting $165 million solving problems that don't exist.

Thank you,
Israel Jimenez Villarreal

Dear Metro Board of Directors and Los Angeles political leaders,

I am writing as a resident and daily transit user in Los Angeles who is frankly exhausted by how long this region has punted on the most obvious infrastructure decision in front of it. The March 26 board vote is not a moment for further hesitation — it is a moment to stop letting a handful of vocal opponents hold an entire region's mobility hostage.

Your own staff has recommended the San Vicente-Fairfax alignment. That alone should tell you everything. Years of technical analysis, a full Draft EIR, tunnel safety reports, Mid-City supplemental studies, and a Cost-Benefit Analysis — and the answer remains the same. At some point, the volume of studies becomes an admission that this board is unwilling to lead, not

that the data is unclear.

The facts are not complicated. This is a fully underground extension, tunneling 100+ feet below grade — the same engineering Metro has executed safely on the D Line and elsewhere across this system. The concerns raised by Mid-City residents, however sincere, do not override peer-reviewed geotechnical evidence. You do not owe NIMBYism an infinite number of rebuttals. One cannot bend to the claim of flat-earthers that the earth is flat and stop sending satellites. In the same fashion, you cannot keep denying Angelenos the transit system they rightfully deserve and demand on the basis of some people's irrational fear that their house might shake a little.

The case for San Vicente-Fairfax is overwhelming:

• Over 125,000 jobs within half a mile of new stations
• Connections to four existing rail lines and six of the ten busiest Metro bus corridors
• Direct service to Cedars-Sinai, The Grove, West Hollywood (where support for public transit is overwhelming), and the Hollywood Bowl
• The critical north-south link between the B Line and E Line that this network has been missing since day one
• A municipality — the City of West Hollywood — committing 25% of the capital cost, something no other city in LA County has done for a transit project. You do not get to take that on the table and then stall.

The board should also seriously consider reverting to the DEIR alignment option rather than accepting modifications that add per-trip delay for every future rider just to resolve concerns that Metro's own technical reports have already refuted. Spending $165 million to paper over non-issues is not compromise — it is waste.

I understand that politics is about managing competing interests. But this board was not elected to manage competing interests indefinitely. It was elected to make decisions. Los Angeles is a city that has spent decades using car dependency as a proxy for freedom and watching its quality of life erode accordingly. The people who live here without cars, who take buses at midnight, who can't afford to Uber everywhere, who want to live in this city without being structurally penalized for it — we are watching this vote.

Construction doesn't start until 2041. Service doesn't begin until 2047 at the earliest. The delay has already been baked in. What this board can control is whether it approves the best possible alignment now, or whether it kicks it further down the road and forces the next generation of Angelenos to relitigate it all over again.

Approve the San Vicente-Fairfax alignment on March 26. Your riders, your transit-dependent constituents, and frankly your own legacy are depending on it. Stop fearing Mid-City's constituent's wrath; transit dependant voters are equally if not more numerous.

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this

board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Justi Sexton

I am a voting taxpayer in LA county. I am absolutely disgusted by the possibility that Metro will put the wants of a few dozen residents of Lafayette Square who, despite all evidence presented that the tunneling of the K Line will have no impact on their homes, above the needs of the millions of people who use public transit in our city.

The K Line will be a watershed moment for public transit, and will connect vibrant communities in our city together and allow people to live in the city without the significant expense of maintaining a car. However, Karen Bass and certain corrupt members of the Metro Board have made it clear they have no interest in being good stewards of public funds and instead have expressed interest in wasting millions of taxpayer dollars to make the K Line slower, if not kill the line entirely. All because of the complaints of residents of Lafayette Square who refuse to accept any of the studies proving the tunneling will not impact their homes. There are countless examples of tunnelling with zero impacts to people on the surface (many examples of which are in LA!). Any delay by Karen Bass and the Metro Board could only be explained by blatant corruption. The people of Los Angeles will remember at the ballot box should Karen Bass and Jacquelyn Dupont-Walker block the needs of their constituents due to corrupt backroom dealing.

There should be no further delay to the K Line.

Dear Metro Board Members,

I'm writing in support of Agenda Item #7 (Approving the K Line North Extension).

This extension will receive the highest ridership for any light rail extension currently proposed in the United States, and provides a much needed rail connection between many important neighborhoods, including transfers to the D and E lines.

It is imperative that we support public transit access to LA County through projects like this. It is my understanding that some wealthy individuals living in neighborhoods along the extension's path are fighting against the extension due to tunneling impacts. In response, Metro staff spent the last 18 months studying alternatives to find a route to minimize encroaching on residential land.

Additionally, Metro staff conducted a study to report that the depth of the tunneling in this case **will have no surface impacts**. (See report here: https://www.metro.net/documents/2025/10/kne_oct_tunnel_ppt_251004.pdf/

Please do not allow the unscientific concerns of a handful of wealthy individuals impede the lives of hundreds of thousands of people for generations into the future. Every delay makes the project more expensive, and delays the day when Angelenos can ride this train. Any convoluted solution to avoid the neighborhood altogether will only add additional travel time and inconvenience hundreds of thousands of riders, just to advance the unscientific and unfounded concerns of a small number of wealthy homeowners.

Please do the right thing and make LA a forward thinking city and county. Support public transportation, support cutting greenhouse gases, and vote for the interests of the majority of regular citizens over those of wealthy, out-of-touch, landowners.

Best,
Edmund

Dear Metro board and political leaders,

Though I am not an LA resident, I do visit regularly, and I simply must ask you to approve the San Vicente-Fairfax alignment for the K Line Northern Extension. Metro staff have gone to great lengths to demonstrate the safety, quiet, and overall inconsequential impact of tunneling 100 feet under Lafayette Square and other neighborhoods, as Metro has done safely many times before. It is unprecedented for a local area to offer 25% percent of a project budget; no other American transit agency has had an opportunity like this. Furthermore, it is for a light rail line with more potential than any in LA or the entire country. People will be able to use rail to visit tons of new places like Cedars-Sinai Hospital, The Grove, Hollywood Bowl, and West Hollywood in general. The knock-on effects of connecting two high-ridership lines like the B and

E lines are incredibly beneficial, so please: do not push metro staff to do more studies. Do not delay this amazing project any further. Approve the staff-recommended alignment or switch back to the DEIR alignment, which was better for riders and cheaper for Metro. Lafayette Square seems about as upset as before, and we could be saving money and getting the project done sooner.

Thank you,
Guthre Leonard

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Melissa Sanford
Santa Monica

To Whom it May Concern,

As a lifelong resident of LA County the continued expansion of the Metro Rail is one the best things that could've happened to my beloved city. I marvel at the fact that one day I could travel throughout LA without having to hop on freeways and worry about traffic. I submit this comment in support of the northern expansion of the K line. We must stop catering to the wants of the few when the NEEDS of the many are in play. Metro board has more than qualified employees and they have submitted ample evidence that tunneling 80ft below said area would create no noise at all. Densely populated areas like NYC, like London all share underground rail and they do not have noise issues. The ONLY reason this is even being debated is because there are special/personal interests who seek to stop this expansion. Need I remind every member of the board, except for the one appointed by the governor obviously, that you are all ELECTED officials. You represent the will of the people, not of your friends or oligarch donors but of all the people of LA. The greater good of the county must be placed ahead of that of 22 people who are NIMBY. I know Los Angeles and the United States is more than capable of providing, us the people, public transport that is reliable, sustainable, and above all up to par with needs of the 21st century. Looking at the completed map of Measure M gives me hope that I have not felt in a long time. We must not allow the wants of your donors to interfere with the needs of LA county. The benefits of the acceleration and completion of Measure M are to be seen not only in economic sector but in the environmental, the social, and every other aspect of the day life of the Angelino. For those who lobby against this by arguing that it is unsafe, I say to you, the only way to combat this is by getting more eyes on it; if, more people ride the metro you as a government entity will be forced to deal with it. I do hope that these projects are further accelerated as I do wish to see LA with great public transport, I yearn for the city that love to be interconnected easier. Accelerate all the remains in Measure M, and expand even further. Put aside all the interest and lobbying and let's get this done!!!

Attentively,
Jose Casillas

I've lived less than ten yards from Lafayette Square for over ten years. It's literally next door. And I've always loved it. It's a beautiful neighborhood for walks, and I always feel safe walking through it even at night. I even park my car inside of it.

But my opinion on the neighborhood will be sorely reversed if the K-Line Northern extension is worsened, delayed or even cancelled as a result of a handful of uninformed complaints.

Let me add: I do not blame people for being concerned about the safety of their homes if drilling goes on underneath them. I think it's a totally reasonable assumption that it could be damaging! But that is only an *assumption*. And the facts have shown that as reasonable as the assumption may sound, it is not born out by facts.

So why are we thinking about compromising drastically needed city infrastructure for the disproven worries of a handful of residents in a wealthy enclave? People who are refusing to accept the very expensive research that was conducted to ease their concerns in the first place? And why would we even consider spending tens or hundreds of millions of dollars to avoid their pestering complaints? Why are members of the Board so afraid to stand up for the rest of the city?

A few dozen millionaires might not like it, but the DEIR route for a northern extension of the K-Line is what Angelenos deserves. The idea that this board wouldn't embrace something this valuable because of a handful of people who won't listen to science is the kind of thing I would expect out from a red state politician, but from a Los Angeles city official? That's not who we are.

Thank you,

Ian T. McFarland

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

This is essential fertile ground for expanding public transport across LA which is desperately needed as more and more people flock to the city each year. Roads are crumbling and the current infrastructure cannot support the amount of traffic. LA NEEDS public transportation.

Thank you,
Jasmine Gillison

Dear Metro Board Members,

I am writing to ask that each of you review the attached LA Metro presentation on tunneling before the board meeting next Thursday, 3/26/2026:

https://www.metro.net/documents/2025/10/kne_oct_tunnel_ppt_251004.pdf

Concerns about tunneling impacts on structures have come up in recent discussions, and I believe the technical record clearly refutes them. It is important that the Board engage with actual evidence rather than allow unfounded claims to shape deliberations or delay this project that will benefit millions of riders annually--projected to be the busiest light rail line in the country.

To that end, I want to share a brief summary of the data so you can come prepared. The VdB scale used to measure ground-borne vibration is logarithmic (20log), meaning each 10 VdB increment represents approximately a 3x change in vibration velocity. According to Metro's analysis:

- The threshold for human perception of vibration is 60 VdB.
- Metro estimates the rail tunnels would produce 49–52 VdB at the surface.
- This means projected vibration levels are more than three times below the threshold a person could even feel.
- More significantly, projected levels are approximately 316 times below the threshold at which vibration can cause building damage.

These are not ambiguous findings. The evidence is straightforward, well-documented, and should be more than sufficient to put these concerns to rest. I ask that each Board member arrive Thursday having reviewed this material and ready to address tunneling objections with the technical record.

Thank you for your attention to this matter.

Dear Metro Board of Directors,
My name is [Your Name] and I am a resident of [Your Neighborhood]. I am writing to urge the Board to approve the full Locally Preferred Alternative (LPA) for the K Line Northern Extension this Thursday.
I would like to remind the Board—and specifically Mayor Bass—of her own words regarding this project. As a Member of Congress, Mayor Bass wrote to Metro leadership stating that she "supports the acceleration of construction and completing the Northern Extension of the LAX/Crenshaw line." In that same letter, she warned that delaying construction until 2049 would risk missing out on $7 billion in private and LAX-related investment and fail to close an "obvious gap" in our community. She also emphasized the importance of completing this line in time for major global events.
With the 2026 World Cup and 2028 Olympics fast approaching, the need for this acceleration is even more urgent today. We cannot allow the project to be stalled by a handful of households when the Mayor herself has previously championed this line as essential for connecting South LA to medical facilities, retail centers, and world-class entertainment destinations.
I urge the Board to:
Approve the full LPA today to stay on track for project acceleration.
Prioritize regional mobility over the localized concerns of 22 homes.
Deliver on the promise of a world-class transit system in time for our upcoming global stage.
Please honor the vision of acceleration that Mayor Bass herself once advocated for.
Sincerely,
Tamer Bou Hassan

Good afternoon Metro Board Members,

My name is Troy Rubio Trejo, and I am writing as a Los Angeles County resident to express my full support for the K Line North Extension and its future alignment.

I want to acknowledge the extensive work that has already gone into this project. Following the delay in October 2024, Metro invested over $2.3 million and more than 18 months conducting additional technical studies on alternative alignments, tunnel safety, and property impacts—specifically in response to concerns raised by residents in the Lafayette/Wellington Square area. These studies clearly demonstrated that there would be no impacts to homes, with tunnels designed to run 80–120 feet underground. Metro has successfully completed similar tunneling projects across Los Angeles without issue.

In addition, Metro went even further by modifying the alignment through Mid-City—at a cost of $165 million and with added travel time—showing a strong commitment to addressing community concerns and prioritizing safety.

At this stage, it is essential that the project continues moving forward. While a small number of residents still have concerns, the data and engineering

expertise support the safety and feasibility of this alignment. Further delays would undermine the years of planning and analysis already completed and stall a project that will benefit millions of residents.

Once completed, the K Line North Extension is projected to become the busiest light rail line in the country, connecting critical destinations such as The Grove, the Original Farmers Market, the Beverly Center, Cedars-Sinai, West Hollywood, and the Hollywood Bowl. This is a vital investment in the future of Los Angeles.

I respectfully urge the Board to keep this project on track, support the chosen alignment, and avoid any further delays. Our region deserves continued progress on a project of this scale and importance.

Thank you for your leadership and dedication to improving transportation in Los Angeles County.

Sincerely,

Troy Rubio Trejo

Los Angeles County Resident

Dear Metro Board,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood. As a 10-year resident of the area, it desperately needs traffic congestion relief. As one of the densest parts of LA County, it is highly suitable for greater transit oriented development.

The San Vicente–Fairfax route best serves our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Geoff Sokolowski

Beverly Grove Resident

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system. By offering viable transit stops in these popular destinations across MidCity/WeHo/Hollywood - it goes a long way to reducing traffic congestion (which so much of is individual vehicles looking for parking) and protecting pedestrian safety in high traffic areas.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Ash Williford

Metro has studied the tunneling and proven that there is no impact to the surface structures, Metro should move to ignore the Nimby homeowners who make up a very small fraction of the city and do not represent the city's best interests. Bowing to a couple dozen homeowners is an incredible waste of tax-payer money and it is incredibly irresponsible to extend public outreach any longer just to hear out the people who will in no way be affected by the system.

Public transit is lacking and making the system more expensive and slower to build fails all residents in the region whether they know it or not. Metro knows better.

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this

board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Robert Blachman

Dear Metro board and political leaders,

I am writing to express support for approving the K Line Northern Extension on the San Vicente-Fairfax alignment. As there is no evidence of any harm to buildings and residents with a tunnel more than 100 feet under the ground, any other alignment causes excess costs and delays with no tangible benefits.

This is expected to be a highly used line which is key to interlinking the "hub and spoke" LA metro system and needs to be completed as early as possible, especially in light of West Hollywood's contribution to the project.

Please approve the K Line Northern Ext San Vicente-Fairfax alignment or switch back to the DEIR option so transit riders aren't delayed to address non-issues.

Thank you,
Sam Mumford

Hello! I am just writing to express support for this project (the K line extension/Fairfax San Vicente route) -- having a train line convenient and across the West side would be GAME CHANGING. Please build it! I will be just one of many who i think would benefit. I LOVE living on the West side but accessibility of transportation is maybe the biggest downside, and this would go a long way to make that less of a problem.

Thank y'all so much!

Brooke

Dear Metro board and political leaders,

I urge you to approve the K Line Northern Extension San Vicente-Fairfax alignment.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Here is the reality: once built, the K Line will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have significant, positive effects across Metro's system.

Do not delay this project any further. Demonstrate courage and listen to people like me who will benefit from this project. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Very Respectfully,

Tom Rodriguez

Hello,

I live in the Fairfax district and I am writing to express my immense support for the locally preferred alternative for the K line extension project.

This extension will be so vital to the community, connecting west hollywood and the grove with LAX and the rest of los angeles by subway. My only wish is that it could come sooner than 2049, because of how important it will be for me for work and limiting car use in the city.

Please enact the locally preferred alternative as quickly as budgeting allows. As excited as I am about the D line extension, this K line extension would change my life for the better.

Thank you,

Emily Sands

While I cannot attend the Metro Board meeting on 3/26/26 I want to voice my full support for the K-line San Vicente-Fairfax alignment.

I've lived in West Hollywood for 16 years and I can say that this extension of Metro rail service will not only facilitate travel in and around WeHo, but it will also connect tens of thousands of residents and workers to the existing Metro system: to DTLA, the Westside, LAX (!) and the South Bay.

The impact of this expansion of mass transit will be immediately felt with the opening of each new station. I might not live to see it completed, but it will improve travel and life in West Hollywood and Central LA.

I live less than a mile from the Redondo Beach station on the K line.
Please for the love of God, build the San Vicente Fairfax route.
Please do not kill the LPA option like Metro did with Hawthorne.

Best,
Sallia Goldstein

Dear Metro board and political leaders,

We need Karen Bass and Jacquelyn DuPont Walker to disclose all private conversation they have had about the K line extension. It is absolutely infuriating that Los Angeles public transit development keeps being stalled and tax payer costs keep increasing because of unnecessary NIMBYism.

Enough closed door conversations.

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Sincerely,
Andrew Shine

Dear Board Members,

I amm100% behind the choosing the San Vicente line. The old rail lines right-of-way are still there down the middle of the street which means not unnecessarily disturbing residents and creating major traffic concerns during the build.

Plus La Brea takes you nowhere and Fairfax would be conveniently connected

Dear Metro board and political leaders,

This is urgent for many, many reasons, but please remember one of the reasons is to end drunk driving, which many people do while getting to West Hollywood. This project should be prioritized even more because people are more likely to take the metro than the bus! This WILL reduce drunk driving, DUIs & deaths!

There has been Enough delay on the K Line Extension - Please approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

Even if this new line went to just ONE of the key destinations, like only The Grove, or only Cedars Sinai, only West Hollywood, or Only Beverly Center…it would be worth it because those locations are *that* important, there is no excuse to not already have a metro stop at these places.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

 NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Dorian Whitney

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's ridiculous to continue delaying this vital Metro line just because about 37 homeowners refuse to believe the scientific studies that prove there are zero impacts to their homes from tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this

board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system. I live off the K line south of the Expo line, and I'm so excited by the prospect of being able to take Metro to West Hollywood and the Bowl! I'd also connect to the D line and easily get to Koreatown.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center, the hospital at which I proudly serve patients from all backgrounds.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Andrew Osborne, MD

Subject: (EXTERNAL) Ongoing Accessibility Failures Across Metro System (Braille Signage & Announcements) General Comment / Item 7

CAUTION: This email originated from outside of the organization. Help Metro protect against cyber threats. Verify the sender's email address carefully. Do not click links or attachments unless you trust the sender. Be aware of phishing signs such as urgent requests, unexpected links, or offers that seem too good to be true. Be cautious of spoofed emails that appear to come from trusted sources. Report suspicious emails. Follow Metro policies and update accounts only through official channels.

Dear Metro Board Members,

I am writing to formally document ongoing accessibility issues across the Metro system that have persisted for years without resolution. While I had intended to provide public comment, the scope and consistency of these issues warrant a more detailed written record.

We are not dealing with a single issue, but a pattern of accessibility failures affecting blind and visually impaired riders.

First, braille and tactile signage remains inconsistent or missing. Along the A Line, particularly between 7th Street Metro Center (upper level) and Downtown Long Beach Transit Mall, many stations lack adequate braille signage. In addition, signage along the Red and Purple Lines has been faded and difficult to read for approximately a decade. These issues were previously reported to accessibility staff, yet remain unresolved.

Second, station announcements are unreliable. Multiple stations, including Glendora and several along the A Line, do not consistently provide audible announcements. At Union Station, particularly during evening hours around 21:00, announcements are often unclear or not audible enough to identify arriving trains.

Third, onboard announcement systems continue to fail riders. There are ongoing inconsistencies between interior and exterior announcements. Some newer A Line trains appear unable to produce external announcements, and operators do not consistently compensate for this—especially at shared platforms where identifying the correct train is critical. This creates significant barriers for blind riders attempting to navigate the system independently.

These issues have been reported multiple times through Customer Relations and other channels over the years, yet conditions remain largely unchanged.

As Metro continues to expand the system and invest in new infrastructure, it is critical that accessibility be treated as a foundational requirement—not an afterthought. Accessibility features such as braille signage and audible announcements must be fully functional and validated prior to project openings and maintained consistently across the system.

We should not be building new stations while longstanding accessibility failures remain unresolved.

I appreciate your attention to these concerns and look forward to meaningful progress on these issues.

Sincerely,
Jared Rimer

Dear Metro Board,

I am very concerned about the uncertain financial aspect of the Metro Board following the staff recommendation for selecting the hybrid San Vicente-Fairfax route as the preferred alignment without more solid financing and more information about potential financial risk for Los Angelenos, whether or not the West Hollywood commitment for $4 billion happens through the proposed EIFD. Might there also be an EIFD proposed for the Los Angeles side, too?

I urge the Metro Board to delay the vote while this is better sorted out and shared with the public more broadly.

The second aspect of this proposed vote on the staff recommendation for the hybrid route is distressing because SB 79 is effective on July 1, and we'll be simultaneously up-zoning neighborhoods around the future Fairfax & Third and Beverly & La Cienega transit stops, but not actually see a train running for 20-25 or more years. This will fuel land speculation, and we'll get more chain-link lots and lose actual housing where people live today. When favorable economic conditions return for developers, we'll get pricey, denser apartment buildings, and a lot more congestion, if you can imagine that -- all while waiting decades for the northern extension of the K-Line to be approved, fully funded, and built. Selecting a route needs to be uncoupled from SB 79 for the time being.

Thank you for your consideration,
Ann Rubin

Dear Board member Dutra,

I'm writing to urge you to vote YES on Thursday for the San Vicente-Fairfax alignment as recommended by Metro staff for the K Line Northern Extension.

This project represents a rare opportunity to fund major transit infrastructure without raising taxes, through an Enhanced Infrastructure Financing District (EIFD) that captures property value growth near stations. The Metro staff recommendation is fiscally sound and shouldn't be delayed.

I also want to highlight something often overlooked in transit planning: placing Metro stations near entertainment districts and bars is a public safety win for all Angelenos. When people have safe, reliable transit options at the end of a night out, they don't drive drunk. Every station we build near a nightlife corridor is fewer impaired drivers on our streets.

West Hollywood's San Vicente corridor is exactly this kind of destination — and routing the K Line through it serves both mobility and safety goals.

Please vote to approve the alignment on Thursday without delay.

Thank you for your service,

Dear Metro Board of Directors,

I am writing to express my strong support for Item 7, the San Vicente-Fairfax alignment for the K Line Northern Extension.

We are at a critical juncture for Los Angeles transit. After spending $2.3 million and 18 months on technical studies, the safety of this alignment is a proven fact. Metro has already made a $165 million concession to route the line up Crenshaw to appease local concerns.

It is unacceptable that the progress of a project designed to serve a county of 10 million people is being stalled by the complaints of roughly 22 voices. We cannot allow the needs of a few dozen residents to outweigh the transit necessity of millions of Angelenos who need access to Cedars-Sinai, the Miracle Mile, and West Hollywood. This line would personally help me get to work at the school I teach at!

I urge the Board to prioritize the region's future over hyper-local obstruction. Please approve the San Vicente-Fairfax alignment today.

Sincerely,

Taylor Gottbetter

Good morning,

As a Metro user and LA County Tax Payer, I want to take this opportunity to voice my support for the Metro staff recommendation for the K-Line's northern extension.

The San Vicente-Fairfax alignment is best suited to serve the most high density corridor as well as provide desperately needed rail access through West Hollywood. With the inclusion of West Hollywood's EIFD, this route has a more secure funding mechanism and grassroot support.

I must say, I find it highly disturbing that the final selection of an alignment has been delayed over a year and is now FURTHER DELAYED presumably by Mayor Bass in conjunction with Councilmember Dupont-Walker.

Why did taxpayers have to pay millions of dollars for FURTHER studies on unfounded concerns from a tiny minority of homeowners in Lafayette and Wellington Squares? The effects of tunnel vibrations were studied in the DEIR and any vibration was found to be under the FTA impact threshold. Why are we wasting both time and money verifying what we already know? Why is a small group of people indefinitely delaying a critical transit project that is available to EVERYONE?

This illustrates the need for reform of the METRO Board. We need industry experts to make up the majority of the board. If we leave it full of politicians, they will always find ways to delay, minimize and kill transit projects at the behest of vocal minorities in their districts.

Reform the board and select the Metro staff recommendation for the extension.

SERVE LA, not the bad faith conspiracies of a tiny group.

Best,

--

Shane Rogers

Dear Metro board and political leaders,

I live near the intersection of Adams and Crenshaw. My son attends Queen Anne Elementary just north of Pico.

We anticipate sending him to John Burroughs Since he's in the dual language program. He's only 5 and has years ahead to commute to school. Right now we bike him to school.

If this train route had already existed it would be life changing for us and so many other families.

As it is, the car situation outside his school is dangerous and it's only a matter of time before someone gets hurt.

We're in another oil crisis.

Climate change is all around us

We should be making it easier to take transit. Please don't disappoint my child and ruin his future.

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

PLEASE READ: As a Culver City resident, having access to the E Line has significantly increased the amount of time and money I've spent in both the Santa Monica and Downtown LA areas. I frequent West Hollywood, the Hollywood Bowl, the Grove and other areas that would be made much more accessible via public transit by this extension. This passes through many of the more traffic congested areas and provides transit access to severely gridlocked parts of town. It will change the way Angelenos get

around this city and vastly improve quality of life for many mid-low income residents who rely on transit day-to-day.

I agree with many others, it's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

Kyle Crowther

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Rich Windisch
Downtown LA Resident

March 23, 2026

Metro Board of Directors
Los Angeles County Metropolitan Transportation Authority
One Gateway Plaza
Los Angeles, CA 90012-2952

Re: SUPPORT for Selecting the Metro Staff Recommended San Vicente-Fairfax Alternative for the Metro K Line Northern Extension LPA Without Delay

Dear Metro Board of Directors,

On behalf of Culver City PRIDE, I am writing to support selecting the Metro Staff recommended San Vicente-Fairfax Alternative as the locally preferred alternative (LPA) for the Metro K Line
Northern Extension Project. Of the three routes under consideration, **only the San Vicente-
Fairfax route would serve all the major destinations and job centers in Central Los Angeles and West Hollywood, while increasing ridership and unlocking local funding.**

The San Vicente-Fairfax route has seen overwhelming public support throughout Metro's
previous studies and outreach and has the best chance of uniting the region. Longstanding
support for this alignment and efforts to generate funding to accelerate its construction through
a potential Enhanced Infrastructure Financing District (EIFD) facilitate getting this project built in
our lifetimes. Timely confirmation of the LPA is a prerequisite to starting the process of

forming
an EIFD.

Culver City PRIDE has its full support for the **San Vicente–Fairfax alignment** as the Locally Preferred Alternative (LPA) for the K Line North Extension, including a future extension to the Hollywood Bowl. We fully back the Metro Staff and Westside/Central Service Council decision selecting San Vicente–Fairfax. **As the longest alignment, it provides more rail access and mobility to iconic destinations and attractions.**

WE MUST BRING THE K LINE TO WEST HOLLYWOOD AND THE HOLLYWOOD BOWL!

West Hollywood and Hollywood Bowl Need Rail Now. West Hollywood has waited decades for direct Metro Rail to its Rainbow District, nightlife, bars, and cultural hubs. The Hollywood Bowl generates massive traffic congestion and air pollution from idling cars during performances. This alignment delivers long-overdue rail connections to these vital LA County landmarks.

Late-Night Safety is Critical. The corridor features bars, clubs, and restaurants along Santa Monica Boulevard, San Vicente Blvd, Fairfax Ave, West 3rd Street, and Mid City/Mid-Wilshire streets. Reliable late-night trains reduce drunk and impaired driving after drinking or cannabis use, enhancing safety for all.

This north–south rail spine links South LA, Mid City, Beverly Grove, West Hollywood, and Hollywood—serving Cedars-Sinai, The Grove, Museum Row, WeHo's Rainbow District, and the Hollywood Bowl. It shifts thousands of trips from polluting cars to clean electric rail, slashing emissions, traffic, and air pollution.

For Phase 3 to the Hollywood Bowl, Culver City PRIDE supports **cut-and-cover construction** where feasible to speed timelines, improve access, and integrate with infrastructure while limiting disruption.

This project benefits **youth, students, seniors, persons with disabilities, low-income residents, hospitality workers, LGBTQ+ communities, and immigrants** hardest hit by pollution, car costs, and traffic violence from unsafe driving.

Culver City PRIDE urges Metro Board Members to **endorse San Vicente–Fairfax as the LPA** and advance the Hollywood Bowl extension (Phase 3 via cut-and-cover) as the next step.

About Culver City PRIDE: Culver City PRIDE is a volunteer-led organization dedicated to celebrating and uplifting the LGBTQ+ community in Culver City through inclusive, community-driven events and programing, with a focus on community connection, local mobility, environmental stewardship, and sustainability.

Signed,
Jack Galanty

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Hello,

Our Metro board members can't seriously be considering delaying a vital transit project that will benefit hundreds of thousands of working class Angelenos to protect 30 homeowners in Lafayette Square from an imaginary problem with tunneling?

It's crazy, our politicians only speak for the rich!

Also Jackie DuPont Walker has been illegally influencing this vote despite needing to recuse herself because she was their homeowners association president. It's pure corruption from our wealthy homeowners and the people WILL SUE!

Karen Bass is the worst mayor in LA history and she will be VOTED OUT this November.

Thank you,

I hope this can be presented as many of the thousands of people who want the K Line not only to happen, but to go through West Hollywood.

____

To the Metro Board,

I have lived in the City of West Hollywood and, therefore, the County of Los Angeles, for 30 years. I have seen the promise of what Metro can be for the county as a whole. And while it's done a service for many, the fact that West Hollywood, West Hollywood East, or the West Hollywood to Hollywood corridor is not within walking distance to a station is a horrible disservice to at least 100,000 residents? If not more?

As someone who works from home and has purposefully been car-less since 2016, the K line through West Hollywood with a San Vicente stop would be a gift from god. Not only would it allow many of us not to have to use rideshare services, but allow tens of thousands of visitors to the City of West Hollywood to avoid parking, clogging up roads, and using those same rideshare services seven days a week. It would also allow tens of thousands to get to LAX without having to pay for a rideshare or ask friends or family for a ride to the airport. The current K line is great, I've taken it several times already, but its final stop is still inconvenient for anyone living above the 10 freeway. It's still paying for an Uber/Lyft/WayMo to get home from that final stop. This extension may not be finished for a decade, but it will still matter then. It may matter even more than it does today.

This is a generational opportunity. Please do not turn your backs on the tens of thousands of West Hollywood/Hollywood residents who would benefit from connecting this vital part of our county. Practically begging for this dream to finally come true.

Many thanks,

Gregory Ellwood

Metro Board,

I am a resident of West Hollywood (1000 N Doheny Dr, 90069) and am writing to voice my support for the K-Line extension that would connect West Hollywood, among other important stops, to the Metro.

It is completely unacceptable that the Mayor of LA is working to kill this crucial project. As our county continues to urbanize and grow, we need public transportation more than ever. I work in Downtown LA and take the bus many days of the week. My trip downtown takes 1 hour 15 minutes, but myself and thousands of others would take the Metro if we were connected to it.

This crucial metro line must be protected and please do not let empty political pressure from NIMBYs stop this once in a lifetime opportunity to turn Los Angeles County into a modern metropolis.

Thank you,
Josh Behrens

I would also like to bring up that I am a member of IBEW Local 11. Not only do I desire a great transit system for LA, I also care because these transit projects give us a lot of good and reliable work. It makes me feel a sense of pride that I could be involved in improving the region I call home with my day job. Any delays to this project could delay good work on top of delaying efficient transit for numerous Angelenos. Please do not let down those that build LA for all to enjoy!

Metro Board Members,

Enough is enough – it's time to approve the K Line Northern Extension! The studies are unequivocal and the science is clear – there are no impacts from the proposed tunneling on residents, and transit agencies all over the world, including Metro, have accomplished it before. The financial aspects of the project are well considered, especially with West Hollywood's extremely generous offer to cover a quarter of the project cost. The demand for this line is abundant among the community.

Simply put, now is the time to approve this extension and move forward with this transformational project.

As a resident of the South Bay, I often find myself headed north to Hollywood for a variety of reasons. Yet, every single time, regardless of the time of day, or the day of the week, I spend my time stuck in glacial traffic on the 110. How often I wished for a Metro line that could get me to Hollywood! Yet now that there's one on the horizon, it's being jeopardized to assuage the nonsense fears of a startlingly small few.

Let me be clear – the cost of another delay is unconscionable. The financial burden of additional studies is just the beginning. The people of Los Angeles are paying for every day of delay with their time spent in traffic, and their health, degraded by the pollution and noise of our overburdened freeways. To delay again is to say to all those Angelenos who suffer those impacts and who would benefit from this project, "Sorry, but you're just not that important." That those who are particularly burdened are some of the least fortunate among us, and that those fighting delays are some of the most only adds insult to injury.

The demand is clear. The science is clear. The benefit is clear. The proposed K Line North Extension project is the missing link the E and B lines that Los Angeles so desperately needs. No more delays! It's time to move forward and build this critical piece of transportation infrastructure!

Sincerely,

Brennan Gray

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

I just gave birth to my newborn at Cedars-Sinai Hospital and had numerous appointments in that area leading up to his birth. It would have been incredible to have a metro connection to this important part of town. Please don’t delay any longer, this is a life changing project for residents of Los Angeles.

Thank you,
Jamie Farrell

Hi Metro Board,

I am writing in favor of the K Line North Extension on the proposed San Vicente-Fairfax alignment.

This alignment creates a true north–south rail spine through South LA, Mid City, Beverly Grove, West Hollywood, and Hollywood, serving Cedars-Sinai, The Grove, Museum Row, WeHo's Rainbow District, and the Hollywood Bowl. It opens up future expansion as well to serve more Angelenos. West Hollywood strongly supports this because they know the positive impact this will have.

The San Vicente-Fairfax will benefit youth, local students, seniors, persons with physical differences/limitations, low-income residents, food and hospitality workers, LGBTQ+ folks, and immigrants who are hit hardest by pollution, car-related costs, and increasing traffic violence to to unsafe driving on LA streets!

I implore you to vote in favor of this alignment especially when it benefits all Angelenos. Please do not listen to the false claims of a select few who state there will be impacts to their homes like perceptible noise and damage to their homes. Metro has done extensive analysis and has scientifically proven this is false. This presentation from last year states "Metro has constructed over 30 miles of tunnels and safely operates below sensitive uses." Since the tunnels will be under 90 feet below there will be no impact like section 3 of the D Line. Please do not jeopardize the future positive impacts this extension will have for greater Los Angeles over the false claims of less than 50 people.

https://www.metro.net/documents/2025/10/kne_oct_tunnel_ppt_251004.pdf/

I'd also ask you to please consider using the cut and cover method for the K Line North as it would avoid the high cost of construction compared to deep boring tunneling.

This has been delayed long enough, I implore you to do what is right and will benefit all Angelenos- approve the K Line North extension on the San Vicenete-Fairfax alignment.

Regards,

Janeli Zendejas

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this

Thank You,
Shaylan Vanmali

Hello!

I am writing to voice my support for the ak Line extension. As a resident who lives in mid-city this line extension would help many residents get across town and addresses the transit desert that is that area. It can take you so long to get there when this would cut Time down and lower congestion.

Thank you,

Dear Metro board and political leaders,

PLEASE APPROVE THE K LINE NORTHERN EXTENSION!

We need this train so badly. All of the stops proposed are some of the busiest destinations in the city, and it's ridiculous that a massive chunk of residences in mid city and West Hollywood have no rail access. This train would fundamentally change LA for the better in one of the most congested areas of the city. The impacts are far reaching, beyond immediate neighbors— I live in Santa Monica but I would absolutely use this train frequently and it would be life changing to be able to take the train to museums, restaurants, professional and social events in this area on evenings when rush hour traffic prevents my attendance.

Stop putting the ridiculous interests of a few rich residents over the needs of millions!

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Dear Metro board and political leaders,

What the heck are you doing? The last time I checked, cities are for the many, not the few. You are costing taxpayers millions of dollars, and countless hours to have a few people not be upset about a non-issue. Do you want this to go through, or do you want more people to laugh at LA's traffic? Do not be influenced by people who are not allowed to influence you.

Thank you,

Dear Metro Board Members,

I am writing to express my absolute OUTRAGE regarding the potential changes to the K-Line North project. It is beyond ridiculous that a vital transit extension—designed to serve nearly 60,000 daily riders—is being held up or altered because of a group of ONLY 30-40 PEOPLE!

This is exactly why major infrastructure projects in Los Angeles continue to fail. We are constantly prioritizing the comforts of the same wealthy people at the expense of the millions who actually need to get around this city.

THE HYPOCRISY IS STAGGERING!!! THESE ARE OFTEN THE SAME PEOPLE WHO VISIT LONDON, PARIS, OR TOKYO AND ARE IMPRESSED BY WORLD-CLASS TRANSIT, YET THEY FIGHT TO BLOCK THAT VERY SAME PROGRESS IN LA THE MOMENT IT INVOLVES THEIR "BACKYARD"!!!!!!!!!

They are worried about a tunnel running deep under their property? HAVE THEY EVER BEEN TO NEW YORK CITY?! I am assuming NO!! In a real world-class city, transit is the lifeblood of the environment, not something you block because you want to keep your neighborhood in a bubble. After seeing how efficient transit functions in international cities, it is exhausting to come home to LA and watch progress get paralyzed by a tiny, wealthy minority.

By entertaining these delays, you are choosing 40 people over the $14 billion investment our city's future requires. I urge you to stand firm on the staff-recommended alignment at the March 26 meeting. Do not let the loudest few dictate the future for the rest of us.

Sincerely,
Alejandro Machado

While in an ideal world, we'd have a line from Century City down Santa Monica Blvd to Sunset Junction then down Sunset to Union Station AND from Crenshaw to the Hollywood Bowl and then on to downtown Burbank, I support any rail line that can get built.

Don't let a few rich land owners in Lafayette Park derail the K-line extention. The tunnel will be so far underground that they will never be impacted by it.

Dear Metro Board Members,

I am writing to express my strong support for advancing the K Line Northern Extension without further delay.

This project is critical to improving mobility, strengthening network connectivity, and supporting long-term growth across Los Angeles County. Delivering it on a timely basis should be a top priority.

At the same time, I recognize that large infrastructure projects have real impacts on surrounding communities. I support thoughtful, transparent mitigation of legitimate concerns related to construction, safety, and neighborhood effects. However, those mitigations should be grounded in evidence and handled in a way that preserves timely implementation.

Delay is not neutral. Each additional delay increases costs, weakens project momentum, and postpones meaningful benefits for riders and the broader region. The standard should be to address real, evidence-based impacts without allowing speculative concerns or extended process to undermine a project of clear regional importance.

In short: build the line as soon as possible, mitigate legitimate impacts responsibly, and keep the project moving forward.

Thank you for your time and for your work on this important decision.

Sincerely,
Adrian Dorsey

Hi, it sounds like powerful people are trying to kill the K Line Extension. This line is absolutely needed for people needing to get to Hollywood, LAX and other west side areas from the Valley. Today our options are busses stranded in the same traffic you're trying to avoid by taking Metro - worse you're waiting on it to get on and off the freeway. The 405 is paralyzed, please approve the underground K Line Extension!

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Alec Aguilera
East Hollywood

Dear Metro board and political leaders,

I have lived long enough to see projects like this unnecessarily be delayed, the D Line extension being the most prominent that comes to mind. Let's not let the K Line follow suit. History shall not repeat itself. Do not be the Henry

Waxman or Zev Yaroslavsky of this project!

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Anthony Aviguetero

I am writing as a resident of Leimert Park, who just moved here during its burgeoning Renaissance of massive investment and opportunity. I own an architectural design firm and I'm already involved in several multimillion dollar projects that are going to bring so much life and resilience to this area.

It benefits everyone to cross pollinate these economies, these cultures. The K line simply must continue into West Hollywood. To not allow this would be an extreme detriment to this city that is already losing its culture day by day. I would venture to argue the only place that has actually retained it is below the 10.

A dedicated LA resident,
Anne

Anne Dereaux

Dear Metro Board Members and Clerk,

I am writing as a West Hollywood resident to express my strong support for the K Line San Vicente Extension ahead of Thursday's vote.
This project is not just a transit improvement: it's a once in a lifetime opportunity to connect communities that have long been underserved by Los Angeles's rail network. The San Vicente corridor runs through the heart of West Hollywood's Rainbow District, one of the most densely populated and culturally vital stretches in the entire region. For far too long, residents here have had to rely on congested surface streets with no meaningful rail connection to the broader Metro grid.

I urge the Board to reject any effort to delay or kill this extension and to vote YES on Thursday. The residents of this corridor deserve the same quality of transit access as the rest of Los Angeles.

Thank you for your consideration and your service to the region.

Sincerely,
Mattia Simioni, a West Hollywood resident

Hello Metro board and political leaders,

The wealthy homeowners who don't want metro tunnels underneath their homes are fighting a losing battle. They and you can't expect people to constantly accept immiseration, a lack of quality transit, and the financial, physical, and health burdens of car dependency for the sake of chauvinist homeowners who are afraid of poor people even existing near them, even 80+ feet underneath them on trains.

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

This comment is for the regular board meeting held on 2026-03-26:

It is vital that the K northern extension project be accelerated and built as soon as possible. This project will be a cornerstone of a Metro light rail system, likely becoming the most used rail line in the country. As such, alignments must be decided to maximize utility, and there is a clear and obvious winner; the DEIR alignment of San Vincente - Fairfax. Any other option is just pandering to vocal, misinformed residents who have repeatedly tried to delay this project. Do not delay this project, do not give in to cowardly, selfish NIMBYs, help to build a rail network that Los Angeles can be proud of.

Dear Metro Board Members,

My name is Baldomero Estrada and I am an LA County resident, taxpayer, and Metro rider. I rely on the Metro bus system to access medical care in Van Nuys. A well connected, properly funded transit grid is not abstract to me — it is how I get to my doctor.

As someone who contributes to Measures R and M and depends on this system, I urge the board to approve the K Line Northern Extension hybrid alignment without further delay. The science on tunneling impacts has been thoroughly studied and is clear — there are zero detectable effects on surface structures. Further delays do not serve riders. They serve a small group of constituents acting on misinformation.

West Hollywood has committed extraordinary local funding to accelerate this project. Turning that down would be a failure of leadership and a betrayal of the thousands of Angelenos who depend on a connected, functional transit grid.

The people who need this system most cannot afford to wait until 2041. Delay is not a compromise. Delay is a decision to abandon the future of this city.

Please vote yes on Thursday.

Respectfully,
Baldomero Estrada
Sun Valley, CA

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Charles MacConochie
West Hollywood (santa monica/fairfax)

To the LA Metro Board,

I am writing as a long-time Metro rider and Los Angeles resident to strongly urge you to move forward, without further delay, on the K Line Northern Extension.

LA is in the midst of largest growth of any transit system in the country, and the K Line would provide a crucial North-South connection allowing movement on the west of the city without going through Downtown. This is a transformational piece of the system.

My own life reflects the need for this line. I have lived in West Hollywood, worked near The Grove, commuted to Westwood and Downtown, and regularly traveled to destinations like the Hollywood Bowl, Fairfax District, and Wilshire corridor museums. I now live in Studio City and rely on the B Line daily to cross the hills. I, and thousands of riders like me, will use this extension constantly. I will use this line!

The K Line would connect to four major rail lines and six of the highest ridership bus lines in LA County, improving access to jobs, services, and regional destinations. Once built, this would be the busiest light rail line in the country, and connect the region to key destinations like The Grove, Farmers Market, the Beverly Center, Cedars Sinai, nearly all of West Hollywood, and the Hollywood Bowl! This would create a huge demand in ridership! We want this!

Meanwhile, the concerns driving continued delays are not supported by the evidence. Do not delay the crucial project that would affect the lives of hundred of thousands of riders over the unfounded concerns of a few dozen residents. We know their homes wont be affected. After more than 18 months of study and over $2 million in analysis, Metro has already demonstrated that the tunneling at depths of 80–120 feet will not impact surface properties. Cities around the world, and here in Los Angeles, routinely construct infrastructure at these depths safely and successfully.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Stop delaying this crucial project! Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Delaying this project further risks increasing costs, reducing rider experience, and undermining public confidence in Metro’s ability to deliver critical infrastructure.

We are ready for this line. Please move forward.

Best,
Ben Wendel

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

Steven Stanton

I'm voicing my support for the San Vicente option to the K Line Northern Extension. With West Hollywood being one of the most densely populated parts of the city and with so many residents choosing to forgo cars, it's a part of the city that should not be underserved by Metro.

Dear Metro board and political leaders,

Please approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's safe - we've done this before! And the board should take advantage of West Hollywood sharing the cost - a rare opportunity.

Connecting to Cedars-Sinai one of the areas biggest employment centers, The Grove, and the Hollywood Bowl, it will do *wonders* for the system.

NO MORE DELAYS OR STUDYS. The need is desperate. Approve the K Line Northern Ext

San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Hello,

It is unbelievable that such a tiny group of people have the ability to cripple critical infrastructure that will serve thousands daily. Additionally, this rail project would move the public transit available in Los Angeles to that of less and equally developed cities across the world. Everywhere in the world where there has been tunneling for subway systems, there have existed structures and homes above said projects. Across the world, NO impact from tunneling ~100 ft underground can be felt ESPECIALLY in comparison to everyday street level traffic (WE ARE DOING THIS RIGHT NOW WITH THE D LINE ANYWAYS).

The original plan prior to the project delay in October 2024 should be the only option going forward. There has been enough delays which showed no impact to the residents and any other proposed path will cost tax payers 100s of millions of dollars in addition to countless of collective hours lost for commuters.

I despise how you all do not work for the people. Do better.

Hello everyone,

We already delayed approval of the LPA on the K Line Northern Extension by 18 months and spent $2.3M to prove definitively that there are no impacts to homes above ground when tunneling.

Metro knows how to tunnel safely under homes and has been doing so for decades!

The simple truth is that a tunnel 100 feet below ground does not impact the homes for communities on the surface, it's simply invisible.

We cannot further delay this project any longer and risk West Hollywood's 25% contribution, an amazing feat for such a small city.

I ask that you stop playing politics and APPROVE the San Vicente-Fairfax alignment. And since there are no impacts to tunneling, I ask that you switch back to the original DEIR alignment, which is $165M cheaper and saves transit riders nearly 30 seconds per trip, every day, in perpetuity.

Let's start making decisions in the best interest of our transit system, and stop bowing to NIMBYism.

Thank you,
Michael Schneider

Dear Metro board and extended stakeholders,

« Despite there being no impact, Metro modified the alignment through Mid City at a cost of $165M and adding nearly 30 seconds of travel time to go up Crenshaw to reduce tunneling under homes. »
—
That 30 seconds per trip sounds bad already, but then you realize that results in 100,000 hours per year of transit riders time that is lost forever— Time that could be spent with family, working, etc.

Plus, due to the 350' longer walk to the platforms from the station entrance at Crenshaw/Adams required by the alignment change, it also adds ~2 minutes each way for every rider that uses

the station. The ridership estimate for that station is 2,200 riders/day, so you can add another ~25,000 hours per year of lost time.

All-in-all a total of ~125,000 hours per year of transit riders time wasted (people who skew lower income overall) just to appease a few wealthy homeowners (who are not even appeased).

As such:

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Wendy Wang

K Line modifications forced on Metro:
To be clear you are willing to WASTE hundreds of thousands of hours EVERY YEAR of people's (transit riders) time by moving the station slightly off its preferred path, causing a 30 second delay, in order to appease 20 people who are not even serious in their concerns in the first place.

Insanity.

That 30 seconds per trip sounds bad already, but then you realize that results in 100,000 hours per year of transit riders time that is lost forever— Time that could be spent with family, working, etc.

Plus, due to the 350’ longer walk to the platforms from the station entrance at Crenshaw/Adams required by the alignment change, it also adds ~2 minutes each way for every rider that uses the station. The ridership estimate for that station is 2,200 riders/day, so you can add another ~25,000 hours per year of lost time.

All-in-all a total of ~125,000 hours per year of transit riders time wasted (people who skew lower income overall) just to appease a few wealthy homeowners (who are not even appeased).

Do the right thing. Be **public servants**. Approve the initial design. Tunnels are built with no impact on the surface every day. There is a greater good here.
Stop acting like a small suburban town and stop treating the public / transit riders like second class citizen, bearing the brunt and wasting their time going forward… for the sake of? Whom?!

History will judge.

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood. The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo’s

Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input *[I recommend watching Nandert's latest video on YouTube or any social media platform at your earliest convenience*] and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Sincerely,
Auguste Miller

To the Metro Board and Project Team,

Hello, I am a local Angeleno writing to strongly urge you to vote yes on the K Line Northern Extension.

This project is critical for improving connectivity in some of the densest and most active parts of our city, including West Hollywood and surrounding communities. Expanding rail access will make it easier for residents to move between neighborhoods, access jobs, and stay connected without relying on cars.

As someone who lives in Los Angeles, I have personally witnessed the dangers of our car-dependent infrastructure. I have seen multiple car accidents in my community, and I also live with asthma, which is made worse by car and gas pollution. Expanding public transit is not just about convenience—it is about public health, safety, and environmental justice.

The K Line Northern Extension represents an opportunity to create a more affordable, accessible, and sustainable transportation system. Reliable public transit reduces transportation costs for working people while also decreasing traffic congestion and harmful emissions.

I urge you to prioritize this investment in our city's future and vote yes on the K Line Northern Extension.

Thank you for your time and consideration.

Best,
Michael

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Selene Betancourt

Hi, I am writing in support of the K-Line Northern Extension San Vicente-Fairfax Route to The Grove, Cedars and West Hollywood at next Thursday's Metro Board Meeting.

I am a long-time West Hollywood resident and would prefer to take Metro to LAX or the beach or downtown LA, avoiding the notoriously bad LA vehicular traffic, but am currently only serviced by congested bus lines that are not separated from regular car traffic. If LA truly wants to be a 21st century city, it needs to get the subterranean K-line into the most touristed, traveled, work-dense places in Central LA as soon as possible.

Unfortunately, I am HIGHLY concerned with the Metro Planning & Programming Committee's recent kowtowing to completely fabricated Lafayette Square Homeowner Association fearmongering, voting the route out of committee without an endorsement. As Beverly Hills High School discovered with the D-Line litigation, Lafayette Square's concerns about tunneling are unwarranted, threaten to increase the budget and trip-length of the K-Line, and I believe the full Metro Board should ignore these scared millionaire homeowners for the greater good of the public.

Thank you,

Kyle McNally

Hello,

I am writing this comment in support of the LPA of the K-Line North extension. METRO has done studies confirming the lives of the NIMBYS of Lafayette Square would not be affected by the tunneling that would take place during Section 1 of this line, also proven by the D-Line extension we are currently building, which will generate immediate ridership for the agency.

Connection to 3 different rail lines through one of the densest parts of LA County will only bring the organization more riders and more opportunities for growth. Nightlife goers in WeHo could take Metro home and make the roads safer at night, patients at Cedars can take Metro to get to-from doctor's appointments, people living in West & Central LA can take the train directly to LAX with only 1 transfer. The opportunities that this will create outweigh the nonsense of people who are so scared of foot traffic that they public roads.

Why let fear win, when opportunity rises above all?

Good Afternoon,

I am writing to you to express my disappointment, bordering on disgust.

Today, at approximately 11:00AM, the B/D train was pulling in from Westlake into the 7th Street Metro station. Along the way, a tall (6+ft) black man was threatening to beat a young shorter (~5`6) Hispanic male. The Hispanic male attempted to create distance and a woman with children attempted to intervene. I got off the train to report the situation to metro ambassadors. They congregated and said they filed a report.

A few minutes later, after the assailant threatened to kill at least 2 other passengers, Metro Security Officers Sanchez (badge 60560) and Cortez (badge 60564) walked past the assailant and proceeded to shelter on the other side of the stairs.

After several more minutes, another passenger approached them to inform them of the situation. They claimed to know the assailant to be a repeat offender. However, rather than offering support, they took the next train out of the station. This suggests to me that their actions were willfully negligent.

If we are to make for a safe transit system, I believe that it is unacceptable to allow threats of violence and murder to persist. I find it disgusting that Metro Security would prioritize their own comfort over the safety of passengers. I also felt ashamed of the system as a whole for allowing this situation to persist.

Please demonstrate that this was an anomaly and not standard operating procedure by taking appropriate action. My (now traumatized) guests and I will be impatiently awaiting an update.

Sincerely,
Jonathan Gomez Martinez

Dear Board Clerk and Members of the LA Metro Board of Directors,

I am writing in support of Agenda item #7 regarding the K Line extension. Please record my position as: FOR.

I am a Mid-City resident who lives near the area where concerns about tunneling have been most vocal, and I want to make clear: those concerns do not represent our neighborhood. There are many of us here who are not worried about tunneling and who are eager for a fast, reliable, and modern public transportation option in our community.

I am troubled that a small but loud group of opponents has been able to dominate the conversation on this project. The opposition's claims about vibrations, noise, and structural damage to buildings above the tunnel are not supported by evidence — and more importantly, they are contradicted by Metro's own studies and presentations. Metro's analysis has shown that perceived vibration and noise impacts are negligible, and that the risk of damage to structures above the alignment is not a credible concern.

The voices opposing this project represent a fraction of the community. The K Line extension would benefit hundreds of thousands of people — residents, workers, and visitors who deserve better transit connectivity. It is time for the Board to move this project forward.

Thank you for the opportunity to comment. I urge the Board to vote FOR Agenda item #7.

Sincerely,

Jason Willardson

Dear Metro Board,

I am a Los Angeles resident and a daily user of the LA Metro system, and I am writing in strong support for Item #7 on the March 26th agenda. Our system has made great improvements in recent years, but one of its flaws remains limited geographic coverage, especially with rail lines that provide efficient, affordable, and green transportation that is competitive with driving. The K line North Extension along the San Vicente-Fairfax Alignment, which has the LA Metro staff recommendation and the support of West Hollywood, is crucial to making Los Angeles' transit system more effective. This extension has a projected daily ridership of nearly 60,000 people, and would provide critical north-south connections for the West Side. It would link LAX to the two major east-west rail lines in West LA, serve one of the densest neighborhoods in the country, provide access to cultural and entertainment venues, decrease traffic congestion and air pollution, and increase economic growth. It is my understanding that some Mid-City communities are opposed to this extension because of tunneling under their properties, but this concern is completely unfounded. LA Metro has reported that, since tunneling would occur 80 to 120 feet below the properties, there would be no perceptible noise or vibration, no damage to buildings, no effect on oil or mineral rights, no effect on easements, and no decrease in property values. This complaint is ungrounded in fact, and it should not be allowed to derail a critical infrastructure project that will provide over 20 million rides a year.

Sincerely,
Ethan Kahn

Dear Metro Board,

I am writing to voice my full support for Item #7 at next week's board meeting - the K Line northern extension alignment. As someone who regularly commutes from East Hollywood to the Leimert Park area for work, I can tell you that this is a rail line that was needed yesterday.

It is therefore unfortunate that it appears this project is at risk because of baseless and unfounded concerns about tunneling by residents in Lafayette Square. It's my understanding that Metro's own staff produced a report last year outlining and explaining their safe tunneling methods. At this point, they have also completed by my count 3 major tunneling projects without incident or complaints about vibrations from construction or trains.

It's unbelievable that a major city like Los Angeles would be willing to allow baseless complaints from a comparatively small and loud minority to threaten and / or delay the construction of a critical piece of infrastructure that would benefit the entire region. It smacks of the kind of shortsighted decision making that prevented the city from completing the Wilshire subway line in the 90's. Your own trains now run beneath Walt Disney Concert Hall, so if it's good enough for the LA Phil, it should be good enough for Lafayette Square.

Please don't repeat the same mistakes again - if you do, we'll be debating this again 30 or 40 years from now instead of enjoying a fast, underground alternative to the gridlock on San Vicente and Fairfax. Approve the K Line hybrid alignment so that this line can become a reality in our lifetimes.

Respectfully,

Evan Manning

Dear Metro Planning and Programming Committee,

I'm a native Angeleno, but spent 12 years in Washington, DC, where I didn't need a car because I could ride the extensive rail and bus system. It was amazing to have an affordable, safe, and easy way to get around the city and region. Since moving home to LA in 2015, I've tried to ride the bus and train as much as possible but often it's too inconvenient to get me where I am going.

This is why I enthusiastically support staff's recommendation for the K Line Northern Extension San Vicente-Fairfax route, and encourage you to approve it! Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system. Please approve this item so we can move this project forward.

Thank you, Amelia Wong, Venice

Dear Metro Board Members,

As a resident, transit advocate, and intentionally car-free resident of DTLA, I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Henry Gnoza
DTLA/South Park Resident

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Lynne Daniels

I live at Adams and Crenshaw and own a home. I desperately want the K Line Extension north to happen.

My son currently attends Queen Anne Elementary and will likely attend John Burroughs Middle School some day. We commute by bus or by bike.

Extending the K Line north would be life changing.

More people need to commute by rail, bus, bike and we can't keep putting these desperately needed improvements off.

Have some vision!

Thank you!

Dear Metro Board of Directors,

I voted for Measure M. I did my part. Now do your job!

I have to commute from DTLA to Burbank with no real transit option.

On weekends I'd love to take the train to see friends for a beach day on the Westside or catch a show in Hollywood.

Instead, I have to drive or uber because this city's rail network still has gaping holes that Measure M was supposed to fill. The K Line Northern Extension would start closing those gaps.

I've lived in Taipei and London. I know what good transit does for a city. It changes everything.
LA has the money, the voter mandate, and the technical plan.
What it lacks is the political courage to stand up to NIMBYs.

Prove me wrong on Thursday.
Vote yes.

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente–Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente–Fairfax alignment would serve the greatest number of residents, businesses, regional destinations, and job centers across Central Los Angeles and West Hollywood.

This route best meets the needs of our communities by expanding transit access to new areas in Mid City, West Hollywood, and Hollywood, while strengthening connections between Metro equity-focused communities and key regional destinations. It would provide improved access to major employers, schools, healthcare facilities, and cultural institutions, as well as seamless connections to four Metro rail lines. As someone who works for the City of West Hollywood, I would personally benefit from the improved transportation connectivity this route would provide, making it easier and more reliable to access jobs and regional destinations.

The San Vicente–Fairfax route has garnered overwhelming public support and is projected to attract nearly 100,000 daily riders, delivering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. Notably, the nine proposed K Line North stations along this alignment would be within walking distance of three times as many jobs and six times as many residents compared to the La Brea alternative.

In addition, this route would significantly expand access to major cultural and economic destinations, including LACMA, Museum Row, the Miracle Mile, The Grove, the Original Farmers Market, CBS Television City, the Beverly Center, West Hollywood's Rainbow District, and the Pacific Design Center. It is also the only alignment that improves proximity to critical healthcare services, including Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Sincerely,

Dear Metro Board Members,

Metro's own project documents show that it does not treat every property above a tunnel the same. It uses different vibration and groundborne noise criteria depending on how "sensitive" a building or space is considered. In the Regional Connector documents, Walt Disney Concert Hall's most sensitive spaces were treated as "special buildings" with far stricter limits, including 65 VdB for groundborne vibration and 25 dBA for groundborne noise in the main auditorium and other performance spaces used for recording. By contrast, a residential property in the same project area, Hikari Lofts, was treated under Category 2 Residential criteria with less stringent limits of 72 VdB, 75 VdB, or 80 VdB depending on frequency of events, and 35 dBA, 38 dBA, or 43 dBA for groundborne noise. That difference matters because it shows Metro has a framework for deciding who gets stronger protection and who does not.

Metro also did not rely on ordinary tunneling methods beneath Disney Hall. Its own consultants found potential noise impacts there and recommended specialized mitigation. The records state that Metro developed a special criteria methodology for Disney Hall's performance spaces, some of which were used for recording, after additional testing for nearby Colburn School. Metro's specifications then required floating slab trackbed for Walt Disney Concert Hall and required verification testing inside the Main Auditorium and Choral Hall to confirm that the mitigation actually worked. Metro also required that the design used for Colburn and Disney Hall follow whichever was the most stringent requirement over the relevant section of track. In plain English, Disney Hall was not protected by routine residential level standards. It received

enhanced engineering, enhanced criteria, and enhanced verification because Metro recognized that ordinary measures were not enough.

That is why Metro's repeated public line that it "tunneled under Disney Hall" is so misleading. The statement is technically true, but it leaves out the most important fact: Disney Hall was not treated like an ordinary property. Metro's own studies identified potential operational and construction related groundborne noise impacts there, and the solution was not simply to tunnel deeper and hope for the best. The solution was to apply stricter sensitivity standards and spend more on mitigation such as floating slab trackbed, resilient fasteners, and testing tied to actual performance spaces. When Metro cites Disney Hall as reassurance for La Fayette Square without also disclosing that Disney received special treatment, it creates the false impression that all tunneling situations are comparable. They are not. Disney Hall proves the opposite. It proves Metro knows some sites require more protection, and it knows how to provide it when it chooses to do so.

La Fayette Square should make it clear this is not about rejecting science. It is about demanding that Metro apply its own science honestly and consistently. If Metro believes historic, aging homes in La Fayette Square can safely be treated under an ordinary residential rubric, then it should say exactly why. And if Metro wants to use Disney Hall as a shield against criticism, then it should also be forced to admit that Disney Hall received a higher sensitivity classification, stricter performance thresholds, and stronger noise and vibration mitigation than ordinary residential properties. Anything less is not transparency. It is selective storytelling.

Respectfully,

Wade Eck

On Wed, Mar 18, 2026 at 6:28 PM Wade Eck [redacted] > wrote:
Dear Metro Board Members,

Unfortunately my call was not taken today and I was unable to share my concerns.

West Hollywood representatives tried to portray La Fayette Square homeowners as just being "anxious" or "anti science." **It is about unequal burden and unequal loss.**

West Hollywood is just 1.9 square miles, yet their residents have at least **eight major grocery options within city limits**: two Ralphs locations (9040 Beverly and 1233 N La Brea), two Trader Joe's locations (8611 and 7310 Santa Monica), Gelson's (8330 Santa Monica), Whole Foods (7871 Santa Monica), Pavilions (8969 Santa Monica) and Bristol Farms (9039 Beverly). They also have **multiple pharmacy options** in West Hollywood, including CVS Pharmacy, Walgreens Specialty Pharmacy, West Knoll Pharmacy, Capitol Drugs, APLA Health Pharmacy, Curson Pharmacy, Fairfax Pharmacy, Spaulding Pharmacy, plus pharmacy services at Ralphs and Pavilions.

So let’s be clear about what is actually being asked of our community. West Hollywood supporters have every right to want expanded subway access. But they do not get to dismiss La Fayette Square residents as irrational simply because we are defending our neighborhood. Our community is being asked to absorb the loss of our immediate area’s **only full service grocery store**, with bakery, deli, butcher, and full produce, as well as our **only nearby drug store**, so that a community with far more existing choices can gain even more convenience and access. That is not equity. That is not fairness. And it should not be brushed aside as “anxiety.”

If Metro wants to talk about justice, then it needs to explain why a historic neighborhood with fewer essential resources is being asked to lose even more, while a much better served community demands more and calls us unreasonable for objecting.

Respectfully,

Wade Eck

Hi Metro Board,

For next Thursday, every single one of you needs to review these slides from LA Metro on why tunneling under historical sites is not a concern.

THIS IS METRO'S DOCUMENT (read it!):
https://www.metro.net/documents/2025/10/kne_oct _tunnel_ppt_251004.pdf/

The fact we gave any oxygen to this misinformation that is so easily verifiably wrong today is incredibly shameful. I do not see how we can cast any sort of judgement on the politicians running our country in DC right now when we give airtime to this crap.

I did some research on the VdB scale used to measure vibration, and it is a 20log scale, meaning steps of 10 VdB correspond to a 3x change in vibration amplitude.

According to the report, since the minimum is 60 VdB for human perception and Metro estimates the rail tunnels would produce 49-52 VdB at the surface, that corresponds to a little over 3 TIMES LESS powerful vibration than necessary for human perception.

THREE TIMES LESS VIBRATION than necessary to even be perceived. And 316 TIMES LESS VIBRATION THAN NECESSARY TO DAMAGE BUILDINGS.

Do your homework and come prepared to shoot down these tunneling concerns at the next Thursday's Metro Board Meeting!!!

Dear Metro Board members,

The K Line Northern Extension has already been studied extensively. Further postponement only drives up costs (remember the Hawthorne Alignment?) and keeps potential riders car-dependent, filling our air with carbon and our oceans with microplastics.

It is deeply frustrating to see progress jeopardized by a small group of rich homeowners raising bad-faith fears about well-established, safe tunneling practices. Metro's own technical analysis makes clear that the tunneling will not impact surface properties. Giving these unappeasable NIMBYs veto power over vital regional infrastructure in deeply undemocratic.

Los Angeles cannot continue to postpone projects that benefit millions. The Board has a responsibility to lead, not to yield to obstructionists.

Approve the staff-recommended alignment and move this project forward. Los Angeles needs more transit *now*, not years from now.

Sincerely,
Luke Elderkin

Hello,

I am a resident of LA county and a frequent rider of Metro. The K line extension north would greatly benefit myself and countless others who live in and visit Los Angeles.

I live in the south bay (Torrance) and having a faster and more direct way to get to K-town, West Hollywood, the Hollywood Bowl, and all the other great places the K line north locally preferred alternative would allow access to, without sitting in traffic for hours, would be a game changer for the entire city. It would provide businesses with more customers, ease traffic, help alleviate pollution, boost tourism, among so many other benefits. The C/K line extension south opening promptly would also benefit myself and others greatly but that is another item.

I hope the Metro voting committee is not swayed by a small percentage of residents from Lafayette Square who are worried about potential vibrations from construction and operation. Metro has proven through its other projects and studies that tunneling at depths of 80-120 ft below these structures has no effect on historic buildings, residences, businesses, new or future construction. It is below the threshold of human perception according to Metro studies for this project.

Please do not let this project get bogged down by complaints from a small minority that are not based in reality. I would really love to see this project and others in the Metro pipeline complete within my lifetime so I can travel this great city more easily and efficiently.

Thank you for your time,
Eric Loew

Hi Metro Board,

For next Thursday, every single one of you needs these slides from LA Metro on why tunneling under historical sites is not a concern.

https://www.metro.net/documents/2025/10/kne_oct_tunnel_ppt_251004.pdf/

The fact we gave any oxygen to this misinformation that is so easily verifiably wrong today is incredibly shameful. I do not see how we can cast any sort of judgement on the politicians running our country in DC right now when we give airtime to this crap.

Do your homework and come prepared to shoot down these tunneling concerns at the next meeting.

Colin

GENERAL COMMENT AGENDA #7: FOR K North Extension (KNE) LPA Approval

Dear LA Metro Board,

I implore you to approve the K North Extension LPA with the Hollywood Bowl station. Do not listen to unfounded and ridiculous claims about "vibrations" and "subsidence". Studies have shown again and again that projects that deep underground do not affect houses on the surface. There is no scientific basis to those concerns. Moreover, the route for the LPA already takes into account public comments and runs almost entirely underneath streets instead of homes. We have appeased nonsensical concerns enough. This project is too important to LA to have it undermined by foolishness.

- The KNE LPA has the highest projected ridership among all alternatives.
- It has three times more jobs located in walking distance compared to the La Brea route.
- It has six times more residents located in walking distance compared to the La Brea route.
- And including a stop for the Hollywood Bowl would further increase ridership on the metro system.

Increasing metro ridership, by choosing the highest ridership alternatives like the LPA, should be our goal. These high ridership choices cascade into many positive outcomes:

- It decreases fossil fuel emissions, improving the health of our communities, reducing healthcare costs, and making our lives more affordable
- It reduces traffic, giving us savings on auto repair costs, auto insurance, and gas costs
- It decreases traffic accidents, further reducing healthcare costs, and saving lives

Please choose to improve communities and save lives today by approving the K North LPA with a Hollywood Bowl terminus station.

Thank you,

My name is Chase Cohen and I live in Koreatown. I'm looking forward to the K line north connecting the D line to the E as well as LAX. You need to support the K line north San Vicente alignment. It's insane to think that you would vote against such an important backbone of our future rail system. Do not bend to the NIMBYs. Science has proven that tunneling is very safe. You must vote to support K line north San Vicente hybrid alignment next week.

Best,
Chase Cohen

GENERAL COMMENT AGENDA #7: FOR K North Extension (KNE) LPA Approval

LA Metro Board,

Due to unfounded and ridiculous claims about "vibrations" and "subsidence" regarding the KNE LPA tunneling, it's worth quoting LA Metro's own "K Line Northern Extension" presentation.

"Additional Analysis on Tunnel Safety & Property Concerns"

- "Modern tunneling construction techniques are safe with pre-construction studies, use of advanced tunnel boring machines, mitigations and monitoring."
- "Tunnels are proposed at depths of 40 to 120 feet below the surface in project area, and ~80 to 120 feet below Mid-City."
- "At these depths, noise and vibration are estimated to be below threshold of damage to structures and human perception."
- "Metro has successfully tunneled in similar ground conditions (e.g. gases, high groundwater) and depths with settlement below thresholds for damage to buildings above tunnels."
- "Tunnel easements would not affect"
    - "Property and structures above"
    - "Ability to remodel/develop property"
    - "Historic designation or zoning"
    - "Underground oil and mineral rights"
    - "Property values"

So there we have it. Concerned homeowners can breathe a sigh of relief! **They cannot perceive the noise and vibrations. Their homes will not be damaged.** And the city will be better off with better transit. Now please improve this city by approving the KNE LPA with a Hollywood Bowl terminus station.

Thank you,
Andrew

Hello Board Clerk,

Thanks for reading all these.

I'm at peace with Weho funding and population density being major boosters to rail going places people are and want to be. That's great.

I'm at Universal and I love connecting to "The grid" of rail. Today I'm on K headed to Douglas, and changing my South Bay trips from three lines to two will be great… but when my only options to go south are west through WeHo or east through downtown, the 7-10min delays or additions feel a bit ridiculous. And these are hours if not years of my life for my weekly commute and routines.

Nobody deserves these kinds of odd side winding paths. "But this is the best option today" - true, but also damning decades from now for future generations.

My request is small, but important as we begin construction. I'm not fighting WeHo any more, but I do want accommodations for my children someday (if I'm so lucky) when they try to improve our rail further.

We always circle back to requests for a Santa Monica or sunset line east/west, and requests for a la Brea or La Cienega line north/south.

!!! Above all, please build the stations on these lines in a way that makes it possible to build future rail with transfers and connections here, or extension stubs in the stations, punch out track walls etc, so that someone in 2065 or 2075 can vote on TBM construction for lines that we need long term to make LA a viable rail city instead of just a car city and the mythical "one transfer grid" solution.

Vermont brt, Lincoln BRT, ESFV LRT, Pasadena BRT, g line, b line, d line, e line, c line, k line, j line, and a line are all clearly getting closer to a future where everything south of 101/134, east of the Pacific, north of c line (or the Pacific if K really does extend south), and west of Union Station is connected by a grid of metro stations such that no where

other than the hills within those four walls is more than 2mi (a 1hr walk or 20min last mile ride) from a metro rail or BRT line. The freeway grid of the 60's divided our mega city and country into the most incredible urban sprawl of neighborhoods, each with their own downtown instead of a classic city layout. "The grid" is the only long term solution to metro rail in LA.

So please build K North friendly to this idea, instead of a 7 min detour for folks passing through mid city North/South for forever, so our kids' kids don't have to spend a trillion to allow a third of SFV <-> LA North/South commuters to go directly (physically) to their single transfer point.

Thank you,
Brian

I live in Los Angeles by the border with West Hollywood and I am emailing to express my support for the K Line San Vicente Extension. This extension would be transformative and the add numerous key connections for residents to jobs, amenities, and healthcare. In 2007, I was fortunate enough to live off the red line and work off the red line. It was wonderful to be able to take the subway to and from work each day. I then moved to Boston and NYC and rode the subway daily for 10 years. I've met so many Angelenos who ride the subway when they're in other cities like NY or SF, but have never taken it in LA. The system doesn't currently connect enough neighborhoods, so driving remains more convenient. I returned to LA in 2017 and have not lived or worked off a subway line since my return. My kids love taking the bus and subway, so we take them sometimes for the adventure, but it doesn't fit into our daily lives. We wish it did. My husband has a bumper sticker on his car that says "I'd rather be riding public transit".

If we're going to spend this kind of money, let's make the connections that will create a transit system people can ride daily. I know completion would be decades off, but I want this for my kids, for future generations, and for myself when I am no longer able to drive. We appreciate the Board's leadership and vision.

Please vote to approve the K Line San Vicente Extension.

Thank you,

Sara

Hello!

I am writing to emphasize my support for the K line extension as presented to the board recently. I am a resident of Mid-City who frequents WeHo and the Bowl. This line would be LIFE CHANGING. Please do not let a handful of fearful homeowners bulldoze an entire city's infrastructure and progress towards a better future.

Thank you!
Rachel

Dear Metro Board Members,

I've lived in LA for 25+ years, 16 of them in 90046. I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood. The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route. In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center. I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative. Thank you for considering public input on this important decision.

Sincerely,

Matt Clendenin

Dear Metro Board of Directors,

Item #7
Position: FOR

I am writing in support of the approval of the San Vicente-Fairfax alignment as the Locally Preferred Alternative for the K Line Northern Extension.

Please approve this item as recommended by staff, without amendment.

The San Vicente-Fairfax route serves the most riders, connects to the most jobs, and has the strongest local funding commitments of any alternative. Metro staff spent $2.3 million in additional analysis and modified the alignment specifically to address tunneling concerns from Mid-City residents. The technical evidence is clear: deep-bore tunnels at 80-120 feet produce no measurable impact on surface properties.

I am troubled that private meetings between a small group of homeowners and the Mayor appear to be carrying more weight than the extensive public process that generated 1,300+ comments and years of technical study. Infrastructure decisions that affect millions of transit riders should not be driven by the concerns of a few dozen property owners, especially when those concerns have already been thoroughly studied and addressed.

Measure M voters funded this project to serve the public good. Please honor that mandate.

Sincerely,

Maria Olsen

Hi Metro Board,

As a daily user of Metro, I urge you to approve the staff recommendation of the LPA San Vicente Alignment for the northern extension. Riders need a grid system sooner rather than later in order to improve our daily experience, and delays that center the unfounded fears of tunneling under Lafayette Square should be ignored in favor of the deep analysis already conducted by Metro staff. Trust the Metro team and their diligent work.

Do the right thing for the thousands of Metro users and vote to approve the LPA San Vicente Alignment.

Thank you,

Good afternoon,

I am unable to attend the Thursday Metro board meeting so I am writing to share my support of the K Line North extension through West Hollywood (San Vicente route). I am FOR item #7.

As a West Hollywood resident, this section of the city needs rail connection. Connecting Cedars to the rest of the LA region via rail would be a game changer for workers getting there car-free. Commuting through the Cedars area at rush hour is a nightmare and this could help alleviate some of that pain by getting some commuting cars off the road. Additionally, as someone that worked in case management at Cedars for several years, a huge issue with patient appointment attendance is transportation. Patients didn't have reliable transportation and often scoffed at taking the bus because of how long it can take. A train to Cedars that connects to several other lines would have a positive impact on patients access to health care appointments. You'd be shaving so much time off of people's public transportation travel by building rail. I know that people are upset that they would be boring a tunnel under their "historically preserved" homes but as someone who lived above the D Line extension on Wilshire and La Brea (literally on Wilshire and Cloverdale) as it was being tunneled, they will be fine. The benefits to a large number of commuters and patients FAR outweighs the negative impact of a few homeowners. Do not let this extension fail; it is vital to the cities of West Hollywood and Los Angeles, and to the county of Los Angeles!

Thank you,
hillary layer

Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Robert Berlin-Williams

I'm writing to express my support FOR the K Line Northern Extension and firmly reject any further delays. It is unacceptable to risk the highest ridership light rail line in the country, and hundreds of millions of taxpayer dollars, over the scientifically unfounded fears of a few homeowners. Please vote to ADVANCE THE PROJECT without delay.

Thank you.

Dear Metro Board & non-politician experts - Please find below why you must approve the original Metro recommended K Line alignment with no deviations and no more delays:

« Despite there being no impact, Metro modified the alignment through Mid City at a cost of $165M and adding nearly 30 seconds of travel time to go up Crenshaw to reduce tunneling under homes.»

—

That 30 seconds per trip sounds bad already, but then you realize that **results in 100,000 hours per year of transit riders time that is lost forever** — Time that could be spent with family, working, etc. Plus, due to the 350' longer walk to the platforms from the station entrance at Crenshaw/Adams required by the alignment change, it also adds ~2 minutes each way for every rider that uses the station. The

ridership estimate for that station is 2,200 riders/day, so you can add another ~25,000 hours per year of lost time.

All-in-all a total of ~125,000 hours per year of transit riders time wasted (people who skew lower income overall) just to appease a few wealthy homeowners (who are not even appeased).

And then there is the added $150m cost. Unbelievable.

Act now!

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

To whom it may concern -

Kindly, approve the K Line Northern Extension San Vicente-Fairfax alignment! We've been waiting long enough and another study for a made up reason is absurd.

It is clear that there are a handful of residents who are seeking more studies in bad faith, with the goal of delaying in perpetuity. There are no impacts to their homes or daily lives if Metro is tunneling 100+ feet below ground, which they know since Metro has done this safely many times before.

West Hollywood is handing out a HUGE help with their ownership of a quarter of costs. Take

them up on it now because I’m sure the offer won’t be there forever.

This is a massive piece of the puzzle for the Metro system. We need this corridor built to make the whole thing more useful.

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done

safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
[YOUR NAME]

Hello,

I am writing to Voice my support for the San Vincente – Fairfax option for the K Line Northern extension. I am a 19 year resident of West Hollywood and a public transit supporter. I firmly believe this route would be strongly supported by the residence of West Hollywood, and serve as a great economic engine for the entire region. I hope that the board selects this option at the upcoming meeting.

Thank you,
Jon Kolbeck

Dear Metro Board,
I strongly support the proposed K Line Northern Extension and applaud the Board's efforts to bring more rail transit options to Los Angeles and the surrounding communities. This vital link will provide an important option to connect downtown with other neighborhoods and enable workers to commute without the burden of driving. Please support this important project.
Regards,
Jessica Kinnahan Foley

Please vote yes on the K Line Northern Extension using the current locally preferred option. Do not delay its approval or add any motionals that would further delay the project. We urgently need more and better public transit in Los Angeles, and this line will bring traffic relief in a part of the city that desperately needs it. Let's get it approved now!

Thank you,
Audrey Diehl

FOR Agenda Item 7

RE: K Line Northern Extension

Dear Metro Board Members,

I am submitting a comment on behalf of Bruins for Better Transit, the transit advocacy organization that represents undergraduate students at UCLA. We are members of the Undergraduate Students Association Council at UCLA, which represents 33,000+ students.

We are writing to express our strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. This route will best serve the needs of UCLA students and connect more regional destinations and job centers in Central Los Angeles and West Hollywood.

Every day, students travel along the proposed corridor to get to and from class, family, employment, and recreation. A fast, reliable, consistent transit option will massively increase ridership and reduce dependency on vehicles. The costs of transportation — both time and money — are among the biggest burdens students face every day. Given the imminent opening of the Metro D Line Extension in Westwood, it would be prudent to select an alternative that meets the immense needs of the student body and maximizes the existing investments Metro is making.

We urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative. As with the Sepulveda Transit Corridor, we continue to urge Metro to examine innovative funding and construction strategies to deliver this project faster and at a lower cost.

We recognize that certain communities have expressed concerns about tunneling. They have the right to express their opinions. But this decision needs to be grounded in facts.

Metro staff and engineers have extensively analyzed the impacts of deep-bore tunneling. The fact is that tunnels can be bored today with no perceptible impacts on homes, businesses, and communities. This is not theoretical. Here in Westwood, homeowners expressed similar concerns about tunneling for the D Line, yet Metro received no substantiated complaints because of tunneling during construction.

Some homeowners were surprised by how well Metro minimized impacts from tunneling. (video, 1:46:37 - 1:47:43)

Are we going to ignore not only the scientific findings of your staff, but also the lived experiences of homeowners who experienced no impacts from other Metro tunneling projects?

Requesting an "independent third party" to assess these claims directly undermines the important, factual work your staff has done. Science is science. **Metro's study is peer-reviewed**, meaning it has **already been verified by an independent third party.** Another party will not find a different result from your scientists and engineers. It will only delay the final alternative selection of this project and hobble the County's ability to propose an EIFD for Section 1 of the project. Just because the motion claims this will not delay this project does not actually mean this will not add delays. Adding costs and increasing travel times will increase construction time and degrade the experience of using the line.

What is too often ignored in decisions around transit is that there are real and measurable costs to the absence of reliable, frequent mass transit in our communities. How much does it cost all of us

to sit in traffic, or to rely on rideshare options because we don't have the transit we need? How much economic activity has been lost while we wait?

The more we delay, the more this project will cost, and the longer communities will continue to suffer from inadequate transit. Concerns about traffic and affordability are real and immediate. Concerns about tunneling, on balance against extensive technical analysis and real-world experience, are not.

If homeowners remain unsatisfied with the Crenshaw Blvd alignment, the Board must consider returning to the original DEIR alignment, which will save Metro $165 million.

There are serious concerns around conflicts of interest behind any motion to further modify this project. We represent 33,000 undergraduate students at UCLA, and we will seriously fight to make sure that this decision is made fairly without unlawful interference. There are implications for this decision beyond the K Line. Students will not take this decision lying down. In this election year, we will be watching each board member's vote carefully.

Subject: (EXTERNAL) Public Comment - Agenda Item #7 - Position: FOR

Dear Board Clerk,

Please record the following public comment for the March 26, 2026, Board of Directors meeting regarding Item #7 (K Line Northern Extension):

Position: FOR

1. Project Support: I strongly support the San Vicente-Fairfax alignment. This K Line Northern Extension is a critical infrastructure necessity for regional transit equity and must be prioritized immediately.
2. Expedite the Timeline: I urge the Board to eliminate all delays and accelerate the project schedule. Postponing this alignment fails our regional climate and accessibility targets; it must be operational as soon as possible.
3. Implement Proven Air Quality Standards: The Board must mandate that all new procurement and existing rail match or exceed the same technology and specifications that SF-BART has successfully installed and proven across 100% of its fleet for over the last 5+ years:

    - Filtration: Upgrade to MERV-14 (95% capture of 0.3-micron viral particles) to replace Metro's current MERV-8/13 baseline.
    - Air Turnover: Achieve 50 Air Changes per Hour (ACH), which is a full cabin refresh every 70 seconds, and 10x the CDC recommendation of 5 ACH and double Metro's current 2–4 minute cycle.
    - The Mix: Guarantee high-volume 4,300 CFM airflow with a constant 25% fresh outdoor air intake.
    - Sanitation: Move from "pilots" to full UV-C integration in all HVAC units for automated, continuous air and surface disinfection.

Do not settle for less than the standard already set by our northern neighbors. Our riders deserve the same level of safety and air quality that has been standard in San Francisco for years.

Sincerely,

Sara Johnson

As a West Hollywood resident, I need to express my support for the San Vicente-Fairfax alignment of the K Line Northern Extension. It provides the best access to some of the densest neighborhoods and jobs, while connecting multiple east/west running lines. It would be incredibly additive for transit in Los Angeles.

Thank you.

Dear Metro Board Clerk,

Please submit this email as written public comment for the upcoming Board of Directors meeting on March 26, 2026.

I am writing to express my strong support for the K Line Northern Extension and to urge the Board to vote in favor of selecting the San Vicente-Fairfax alternative.

This project is crucial for connecting our communities, improving access to jobs and housing, and providing a viable transit alternative to the 405 freeway. The San Vicente-Fairfax route offers the highest ridership potential and directly serves dense residential and employment areas that need this infrastructure most.

It is time to move past delays and finish the line. I urge the Board to approve this extension and move it into the next phase of planning and design.

Thank you for your time and consideration.

Sincerely,
Tony Da Silva

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood. This route will be a game-changer by creating connectivity where it is desperately needed and will benefit the entire Los Angeles community.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center. It will also give these communities a valuable transit route to LAX.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Karen Canady

Dear Metro board and political leaders,

I'm writing to ask that you approve the K Line Northern Extension San Vicente-Fairfax alignment.

I've lived in Los Angeles for almost a decade, always within the metro deadzone. Hollywood, Mid City, West Hollywood. With the cost of gas rising exponentially with no end in sight, we desperately need alternative transit options. Not to mention the other costs and physical dangers of driving cars, and the impact on community building in car centric cities. It's embarrassing at this point that Los Angeles continues to have an underdeveloped public transit system, as one of the largest cities in the nation, and we have a real opportunity now to change

that and positively impact future generations! Please don’t lose sight of that in the face of short term annoyance. This is the type of legacy I hope and wish you are focusing on. Its impact would be monumental, forever changing our beautiful city for the better.

Some facts from Streets For All:

There are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

Your community members are asking for NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this

board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Morgan Lovejoy

Attention: Metro Board Members

Please approve the San Vicente/Fairfax transit extension of the Metro K line to West Hollywood, Hollywood and eventually to the Hollywood Bowl. It will provide great benefit to a maximum number of people accessing the ever expanding Cedars-Sinai hospital complex and so many other important destinations along the way including our cultural treasure,the Hollywood Bowl.

Thank you for your consideration and support,

Hello,

I cannot attend the community meeting this Thursday, but wanted to share my concern about the potential delays for the K Line Nothern Extension. This will be a transformational transit project running through my neighborhood, connecting fellow neighborhoods, building economic opportunity, advancing climate goals, reducing congestion, and making this city beautiful. My neighbors and I will benefit directly from it, we all support it, but many of us cannot have our voices heard because we work during the board meeting hours. Please don't let this historic advancement get derailed by baseless claims from a few homeowners.

Please, please, please do not delay this project. A year+ ago I attended a meeting at Pan Pacifc Park where the completion date was estimated for 2047, which is heartbreaking as is. Our transit system has excellent East-West connections that need a North-South spine. Please be a hero in our city's history and advance the K Line Extension with as much urgency as is possible.

Los Angeles with the K Line Extension will be transformational and all of us will LOVE to see it!!

Thank you for your consideration. I'm happy to provide more feedback / answer questions / pursue other avenues to share my opinion.

All the best,
Ben

Dear LA Metro
We urge you to delay the decision on which option through West Hollywood until we as residents have a clearer understanding of the costs involved for each route option.
If you are to make a decision on March 26th, then we hope you decide on the cheapest route as we do not believe West Hollywood really needs 3 subway stations.
Sincerely

Hello,

I'm writing to express my support for the proposed K Line Northern Extension (specifically the San Vicente-Fairfax rout) while also raising concerns about transparency and public trust in the decision-making process; particularly regarding the City of Los Angeles segment.

I strongly support the expansion of the Los Angeles Metro K Line. Extending high-quality transit through West Hollywood and into Hollywood is a generational investment that will improve mobility, reduce congestion, and support long-term sustainability goals for our region.

At the same time, I'm concerned about the perception of undue influence in the alignment decision process, specifically as it relates to the role of a specific member's conflict of interest in this matter. We need to stop unnecessary studies for tunneling selection perpetuated by NIMBY opposition and pick the Draft EIR (Option 1) path. The science is clear, please believe your own studies on perceived vibrations from underground tunneling and approve this expansion now. Speaking as a resident of West Hollywood, we are eager and excited to see this project completed.

Thank you for your time,

Steven Collard

Hello,

I am a disabled constituent and rely heavily on the metro for transportation in the city. The metro K line extension would allow residents like me to move with a greater level of autonomy throughout the city. All Los Angeles citizens deserve the freedom and convenience that a more robust transit system can provide.

Please vote yes this Thursday to keep, the plans for the extensionovimg forward without delay. I implore you to show others like myself the city supports and champions all of it's residents regardless of economic status or background.

All the best,
Sky

Dear Board Clerk,

I am a resident of the Los Angeles area writing to urge the Metro Board to vote YES on the K Line northern extension this Thursday.

LA's public transit system has long struggled with infrequent service, poor connectivity, and infrastructure that simply hasn't kept pace with the needs of our region. Too many Angelenos are left without reliable options, forced to depend on cars in a city already overwhelmed by traffic and congestion. This is exactly why investments like the K Line northern extension matter.

Expanding the K Line is a step toward building the robust, connected transit network that LA desperately needs. It would bring more communities into the fold, reduce car dependency, and signal a real commitment to a more sustainable and equitable city.

LA's transit challenges didn't develop overnight, and they won't be solved without bold action. I urge the Board to vote yes this Thursday and help move our city in the right direction.

Thank you for passing along my comments to the Board of Directors.

Sincerely,
Nicholas tipple

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Ray Duran

Hello,

I am writing in support of the K-Line Northern Extension San Vicente-Fairfax Route to The Grove, Cedars and West Hollywood at next Thursday's Metro Board Meeting.

I am a long-time Los Angeles resident (15 years) but lived in Tokyo before then. In Tokyo, you go everywhere on train or bus, and I have been thrilled to see LA getting closer to that world. If LA truly wants to be a 21st century city, it needs to get the subterranean K-line into the most traveled and work-dense places in Central LA as soon as possible.

Unfortunately, I am VERY concerned with the Metro Planning & Programming Committee's recent bowing to Lafayette Square Homeowner Association fearmongering, voting the route out of committee without an endorsement. As Beverly Hills High School discovered with the D-Line litigation, Lafayette Square's concerns about tunneling are unwarranted, threaten to increase the budget and trip-length of the K-Line, and I believe the full Metro Board should ignore these scared millionaire homeowners for the greater good of the public.

Thank you,
Nadia Kanagawa

These are my thoughts:

This project would fill a major gap in the Metro Rail network by extending the existing Metro K Line light rail service further north with new connections to the Metro D and B Lines and six of the region's top ten busiest bus lines while constructing new stations in iconic neighborhoods. It would create opportunities by connecting equity-focused communities to jobs, opportunities, cultural institutions, and quality healthcare resources in West Hollywood, Mid City, and Hollywood.

The San Vicente-Fairfax Alternative would serve more residents, businesses, and key regional destinations than the other routes. This route has garnered the most public support and offers a unique opportunity to enhance access to vital destinations, including Cedars-Sinai Medical Center, Museum Row, and other cultural and commercial centers in WeHo and Mid City. By choosing this option, we can ensure fast, reliable transit that could achieve nearly 100,000 daily trips, two-thirds of which would be made by low-income riders.

Let's face reality - how many more cars can you cram onto the streets in this area before it becomes a "used car lot" with cars being unable to move through the area.The "You build it and they will come" worked. The area is overbuilt and they have come and the traffic is unbearable - and unbelievable!! It's almost like no one did a traffic impact study before over-building the area. This seems to be the theme song of Los Angeles planners. Basically, lack of traffic impact planning!

Yours,

--

Subject: Lafayette Square/Metro extension

Dear Metro Board Member,

I am a resident of Lafayette Square, and I strongly oppose LPA Option 2 for the K Line Northern Extension.This alignment deviates from the original plan following the elimination of the Crenshaw/Wilshire station, and it unfairly shifts the burden onto our historic residential neighborhood. LPA Option 2 would create approximately 22 subsurface easements beneath homes, raising serious concerns about property rights, structural impacts, and construction disruption.
It would also remove our local grocery store and the only pharmacy serving our community within miles—cutting off access to essential services.
Our neighborhood should not bear the brunt of accommodating changes made to meet the needs of other communities. We ask Metro to reject LPA Option 2 and pursue an alternative that avoids unnecessary impacts to residential areas and preserves critical local resources.

Thank you for your consideration.

Sincerely,

Max Wheeler

Lafayette Square Resident

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Nick Kleinert

Subject: LPA Option 2

To Whom It May Concern,

As a resident of LaFayette Square, I am writing again to express my strong opposition to the LPA Option 2 for the K Line Northern Extension. In fact, I also object to any proposal that includes tunneling under our historic 100-year-old homes in LaFayette Square.

My primary concern is about Metro's construction record and reliability risks. With a little research, I can document a consistent and verifiable pattern across Metro's major tunneling projects in which the agency minimizes foreseeable impacts, disclaims direct responsibility, and implements mitigation only after harm occurs. This pattern is institutional rather than incidental and can be supported by credible, verifiable evidence.

1. **Structural and Property Damage**
   • *Crenshaw/LAX Line:* 166 homeowner damage claims for cracked walls and foundation movement were reported by **Curbed LA (2017)** citing contractor records; Metro directed residents to contractors rather than assuming liability.
   • *Regional Connector / Little Tokyo:* Business owners reported vibration, access loss, and subsidence despite repeated Metro assurances that impacts would be "limited" (**Curbed LA 2016; Los Angeles Times 2016**).
   • *Los Angeles Times Building (2020):* Tunneling caused visible cracking that Metro publicly minimized as "cosmetic" (**Los Angeles Times, Nov 27 2020**).
   • *Historic Liability:* Earlier rail projects produced approximately 2,440 insurance claims totaling $120 million (**Los Angeles Business Journal, Dec 12 2005, "Argonaut Settles With MTA Over Damage Claims"**).
2. **Safety and Oversight Failures**
   • *Purple Line Extension (2022):* Work halted for "serious safety concerns" following dozens of worker injuries (**Los Angeles Times, Oct 24 2022; NBC Los Angeles 2022**).
   • *Mid-Wilshire Fatality (2022):* A tunneling worker was killed on site (**Los Angeles Times, Mar 7 2022**).
   • *Metro Office of Inspector General (2023):* Found recurring weaknesses in contractor oversight, risk management, and internal safety enforcement (**Metro OIG Report #23-004, 2023**).
3. **Economic and Community Impacts**
   • *Crenshaw and Little Tokyo Corridors:* Sustained business closures and lawsuits forced Metro to create a Business Interruption Fund—an explicit acknowledgment that prior mitigation failed (**Metro Board Report 2015-0705; Streetsblog LA 2015**).
4. **Institutional Pattern**
   Across successive projects—Blue, Green, Red, Crenshaw, Regional Connector, and Purple—Metro's operational behavior has remained constant:

• Assure the public impacts will be “minimal.”
• Experience significant structural or economic damage.
• Attribute responsibility to contractors or external causes.
• Offer compensation or new mitigation only after prolonged dispute.

This cumulative record undermines the reliability of Metro’s self-certified findings. The issue is not one project’s misstep but a recurrent management pattern that casts substantial doubt on the credibility of Metro’s current assurances of “no significant impact.”

The potential for similar damage to historic homes, many of which have stood for over a century, is deeply concerning. These buildings are not only architecturally significant but also integral to the character and identity of Los Angeles neighborhoods. Once damaged, the restoration of such structures is both challenging and expensive, often failing to restore the original beauty and craftsmanship. In addition, the subsidence caused by vibrational drilling can lead to long-term structural instability that may not be immediately evident but can degrade the integrity of these homes over time.

Metro has stated that it employs a "robust construction mitigation program," but the ongoing damages to the Saban Theatre, coupled with tenant disruptions and lost business revenue, demonstrate that these measures are insufficient. The community deserves stronger assurances that historic buildings will not suffer the same fate if new subway tunnels are constructed under their foundations. We must preserve our city's history and ensure that homes and landmarks are not sacrificed for the sake of urban development.

I respectfully urge Metro to reconsider this proposal and explore alternative routes or construction techniques that would protect the homes and cultural assets of our city. In cases where tunneling is deemed essential, a more rigorous set of protective measures must be implemented, and compensation for any damage caused must be readily available and substantial enough to cover actual repair costs. Failure to do so risks irreparable harm to our historic neighborhoods.

Thank you for your attention to this matter. I hope that Metro will prioritize the preservation of Los Angeles' historic homes and landmarks in all future planning.

Sincerely,

Deb Valenti

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this

board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDIES. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

I would like to be able to take the metro further!

Thank you,
Samaya Rubio

Subject: Metro Line | Lafayette Square

Dear Metro Board Member,

I am a resident of Lafayette Square, and I strongly oppose LPA Option 2 for the K Line Northern Extension.

This alignment deviates from the original plan following the elimination of the Crenshaw/Wilshire station, and it unfairly shifts the burden onto our historic residential neighborhood.

LPA Option 2 would create approximately 22 subsurface easements beneath homes, raising serious concerns about property rights, structural impacts, and construction disruption.

It would also remove our local grocery store and the only pharmacy serving our community within miles—cutting off access to essential services.

Our neighborhood should not bear the brunt of accommodating changes made to meet the needs of other communities. We ask Metro to reject LPA Option 2 and pursue an alternative that avoids unnecessary impacts to residential areas and preserves critical local resources.

Thank you for your consideration.

Sincerely,
Hasan Foster

Dear Sir or Madam.

My name is Nashir Hirjee, and I am a resident of Los Angeles County.

Please accept this email as my expression of support for the northbound K line extension through West Hollywood all the way to the Hollywood Bowl. The goal to build this train through populated areas for access by people who live and work in the area is long overdue.

Also, please accept this as my request to expedite the construction of the train as soon as possible at a cost-effective method.

Finally, please upgrade the air filters being used on trains to the MERV-14 filters to optimize air quality and health quality for riders.

Keeping the trains that transit major population centers safe, clean and frequent will support ridership and maximize benefit.

Thank you.

Subject: Lafayette Square Objection to Metro K Line North Extension LPA

Dear Metro Board of Directors,

Lafayette Square formally objects to **Option 2** of the Metro K Line North Extension LPA, which proposes tunneling beneath **22 homes** in our neighborhood, a historic preservation overlay zone.

While we support expanded transit access for the greater Los Angeles region, we strongly oppose solutions that sacrifice established neighborhoods, local businesses, and community stability. Additionally, the route maps provided do not clearly demonstrate meaningful or efficient connections to other Metro lines. Lafayette Square has consistently advocated for complete removal from any route requiring neighborhood easements.

Regardless of the route ultimately selected, Lafayette Square requests the following community protections:

- Codification of existing neighborhood gates at Victoria Ave, Wellington Rd., Virginia Rd., and Buckingham Rd. (Washington Blvd. and Venice Blvd.)
- Preferred Parking designation within Lafayette Square
- Repairs to sidewalks along Crenshaw, Washington, and Venice Boulevards, and within Lafayette Square

We are prepared to work collaboratively with Metro to improve regional transportation access. However, we will not support an approach that does so at the expense of our homes, our businesses, or the long-term well-being of our community.

Respectfully,

Lafayette Square Neighborhood Association Residents

Hello!

I'm an LA resident (I live in Silver Lake at 2301 Glendale Blvd) and I wanted to express my strong support the K Line Northern Expansion and the hybrid alternative.

That line would be so heavily utilized and do so much for LA's public transportation. I know lots of people who are looking forward to riding.

LA transportation and traffic is so bad right now - it's one of the few things our amazing city does so poorly. We should be taking every opportunity to improve it.

Dear Board Clerk,

Please submit this email as written public comment for the upcoming Board of Directors meeting on Thursday, March 26th, 2026.

As a born and raised Angeleno, Im reaching out to the board to vote YES on the K-line northern extension, and urge the board of directors to select the San Vincente/Fairfax alternative. Approving this extension and alternative would help provide viable alternative to the 405 freeway, and also connect communities and improve access to jobs and housing. It also provides massive economic potential, with the San Vincente/Fairfax alternative offering the highest ridership potential and interconnects high residential and employment areas that desperately need the infrastructure. It is time to move past delays for desperately needed infrastructure and complete the line. I urge the board to approve the extension and move it forward to the next stage.

Best,
Tatiana Rosen

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before with the B and D lines. There are countless examples worldwide, as presented by Metro staff in their presentation to the Metro board, where tunneling has gone under actual historic structures with no perceptible impacts or damage to said structures.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board

should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system, making the system more grid-like and serving a wider array of destinations that are not necessarily in DTLA.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Dear Directors Najarian, Butts, and Bass,

The Mayor released a public statement on Monday, March 23 saying that she supports the K Line Northern Extension and would be voting for it to move "full steam ahead" while at the same time drafting a motion that would delay the project by delaying the likelihood of West Hollywood and LA County moving the required funding forward. Jackie Dupont-Walker has also improperly been influencing the vote behind the scenes while claiming publicly she is recused.

ENOUGH! I demand you pull this motion to amend and support staff's recommendation. Furthermore, we should save $165M and go back to the DEIR route through Mid City, since tunneling has ZERO impacts. The Metro D line is proof there is NO IMPACTS from tunneling. Ms. Dupont-Walker and her neighborhood needs to back off from influencing the Metro board.

Please stop playing games with a $15B light rail project, and vote to move it forward cleanly, without delays or amendments, and without collaborating with a "recused" board member.

The nonsense that happened on the K Line's Hawthorne "option" Torrance alignment is bad enough with the politics played back in January 2026 Metro board meeting. K Line Northern Extension deserves to go forward. Please no more backroom politics. The voters who believe in transit will remember this vote and the betrayal to their trust already inflicted leading up to this. I hope a corruption probe happens.

Dear Metro Board Member,

I am a resident of Lafayette Square, and I strongly oppose LPA Option 2 for the K Line Northern Extension.

This alignment deviates from the original plan following the elimination of the Crenshaw/Wilshire station, and it unfairly shifts the burden onto our historic residential neighborhood.

LPA Option 2 would create approximately 22 subsurface easements beneath homes, raising serious concerns about property rights, structural impacts, and construction disruption.

It would also remove our local grocery store and the only pharmacy serving our community within miles, cutting off access to essential services.

Our neighborhood should not bear the brunt of accommodating changes made to meet the needs of other communities. We ask Metro to reject LPA Option 2 and pursue an alternative that avoids unnecessary impacts to residential areas and preserves critical local resources.

Thank you for your consideration.
Sincerely,

Subject: Oppose LPA Option 2 and protect Lafayette Square

Dear Chair Fernando Dutra and Members of the Metro Board,

My name is Malcolm Johnson, and I have lived in the historic Lafayette Square neighborhood in Mid-City Los Angeles with my family since 2010. My wife and I chose this neighborhood intentionally as the place to raise our three children because we wanted them rooted in history, stability, beauty, and a living legacy of Black excellence in Los Angeles.

I write in strong opposition to LPA Option 2 for the K Line Northern Extension, and to any alignment that tunnels beneath or materially harms Lafayette Square and neighboring historic residential communities.

This is not simply a transit routing decision. It is a decision about whether Metro will protect or burden a historic neighborhood that families like mine have worked hard to preserve. Lafayette Square is a protected historic district. Metro's own materials confirm that the Mid-City segment under consideration would tunnel beneath private properties in Mid-City and Lafayette Square, and that Metro later studied 12 additional Mid-City options specifically to reduce subsurface easements beneath homes in historic neighborhoods. Metro knows these impacts are serious.

The concerns are obvious and substantial: years of construction disruption, noise, vibration, heavy truck activity, risks to historic homes, impacts on private property rights, and the long-term reality of rail infrastructure operating beneath a protected residential neighborhood. Metro's own recent community engagement summary reflects resident concerns about tunneling beneath historic homes, structural impacts, vibration, earthquakes, and business disruption, including possible impacts at Midtown Crossing involving Ralphs and CVS.

I support better transit for Los Angeles. What I do not support is a version of progress that once again asks an established Black community to absorb disproportionate harm. My family chose Lafayette Square because places like this matter. They do not come back once they are compromised. Gentrification is real. Displacement is real. The erosion of historic Black communities is real. Metro should not accelerate that pattern under the banner of public infrastructure.

I also want to be clear about something else. The families of Lafayette Square vote. Our neighbors vote. We are engaged, we are organized, and we are vocal in our support for elected officials who protect their constituents, respect historic communities, and refuse to treat our neighborhood as expendable. Many of you on this Board are elected leaders or directly accountable to elected leadership. This decision will be noticed, remembered, and discussed in our homes and throughout our community.

We are asking you to do the right thing. Reject LPA Option 2. Choose an alternative that avoids unnecessary impacts to Lafayette Square and other historic residential neighborhoods, preserves critical community resources, and demonstrates that Metro's stated commitment to equity includes communities like ours.

Please protect Lafayette Square.

Sincerely,

Malcolm & Joanne Johnson

Subject: K Line Northern Extension impact on Lafayette Square

Dear Metro Board Member,

I am a resident of Lafayette Square, and I strongly oppose LPA Option 2 for the K Line Northern Extension.

This alignment deviates from the original plan following the elimination of the Crenshaw/Wilshire station, and it unfairly shifts the burden onto our historic residential neighborhood.

LPA Option 2 would create approximately 22 subsurface easements beneath homes, raising serious concerns about property rights, structural impacts, and construction disruption.

It would also remove our local grocery store and the only pharmacy serving our community within miles—cutting off access to essential services.

Our neighborhood should not bear the brunt of accommodating changes made to meet the needs of other communities. We ask Metro to reject LPA Option 2 and pursue an alternative that avoids unnecessary impacts to residential areas and preserves critical local resources.

Thank you for your consideration.

Sincerely,
James Cooper

Hello,
I am writing to voice my overwhelming support for the Fairfax San Vicente alignment for the K Line Extension. I moved to Los Angeles 7.5 years ago from South Carolina, but grew up in Seattle. I grew up utilizing public transit and it really gave me a lot of freedom and access to a wide variety of experiences that inspired me, educated me, and shaped me. When I moved to Los Angeles, I was very excited about all the Metro lines and how much easier it was to get around many parts of the city, and into neighboring cities, but was always disappointed that the South Bay was, in comparison, so neglected by rail access. I live in Hollywood, and have for a little over 7 years now. If someone from Hollywood wants to go visit the South Bay (and all it has to offer) via public transit, it can take HOURS. Extending the K Line up to Hollywood would make it significantly easier for people in Hollywood to go down and visit the South Bay (which would also increase tourist visits to the area) and it would allow people in the South Bay to visit Hollywood without having to fight traffic or take half the day taking the J line to the B line and back. They'd get more time to enjoy Hollywood!
Making it easier for everyone across the wonderful, vast mixing pot that is Los Angeles to visit other parts of the city brings us all closer together, and greenlighting the Fairfax San Vicente alignment of the K Line is the way to do that.
Thank you for your time
Morgan

Dear Metro Board Members,

I am writing to express my strong **OPPOSITION** in selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project.

There is a huge untrue belief that the City of West Hollywood's residents and business are supportive of this decision.

Quite the opposite, the community is not in support of this decision and the community is nearly completely in the dark about the scope, timeline and impact of the K-Line in West Hollywood.

Certain officials (mostly those with personal political aspirations such as Councilmembers Erikson and Hang or Supervisor Horvath) have "hoodwinked" and mislead the Metro and anyone listening that so many residents in Weho supports this extension. **It does not**. This is about being able to campaign on being the person who was responsible for bringing public transportation to a city in 20 years. It's pure marketing BS.

We residents have gotten virtually NO information about this. There has been almost no outreach for such a large and impactful project. The residents truly know very little about this project. They don't know where the line is destined to go or how it will be used, albeit in 20 years.

This project is being used as a pawn for developers to be able to build today in an affluent part of town, thus yielding large profits (with the declaration of a transit line is within ½ mile) which is a payback and winfall to the same developers who have and who continue to support their campaigns. The Metro is being "used."

We have a situation where a very small handful of individuals are making huge decisions for the entire city without consulting the residents in a meaningful way. Why else would West Hollywood need to waste $3,000,000 to suck up to the Metro Board.

Additionally and importantly, there are many neighborhoods in Los Angeles that are far more deserving of a Metro line than West Hollywood. There are neighborhoods that are disadvantaged by having a tremendous need for public transportation for its residents, where the residents do not have the luxury of adequate parking or where they cannot afford cars/insurance and thus depend on public transport to get to work. They are commuting for hours per day by going bus to bus.

Is Metro doing anything for the long range to help their quality of life and prosperity?

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the other areas of Lois Angeles that will be of much greater benefit than West Hollywood as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Sincerely,
Arthur Bernstein

Subject: Re: K line expansion Reject Options 1, 2, and 4

Dear Metro Board Member,

I am a resident of Lafayette Square writing to express serious concerns about LPA Option 2 for the K Line Northern Extension — and to urge the Board to pursue a better path forward that is not Option 1, 2, or 4.

Let me be clear: our community strongly supports expanded transit. We want the K Line extension to succeed. That's precisely why we've spoken up the last few years and are again speaking up now — because a flawed alignment will ultimately harm the project, delay the timeline, and undermine public trust in Metro's planning process.
LPA Option 2 raises significant technical and equity concerns that deserve careful scrutiny:

Property and structural impacts. The alignment would require approximately 22 subsurface easements beneath private homes — an extraordinary intrusion that raises legitimate questions about property rights, structural integrity of historically designated homes, and long-term liability for both residents and Metro.

Loss of essential community services. This option would displace our neighborhood grocery store and the only pharmacy serving this community within miles. For many residents — including seniors and those without vehicles — these aren't conveniences, they're lifelines. Transit is supposed to expand access to services, not eliminate them.

An inequitable burden shift. LPA Option 2 results directly from the elimination of the Crenshaw/Wilshire station — a change made to address the needs of other areas. It is not appropriate to resolve that tradeoff by concentrating impacts onto one historic residential neighborhood that had no role in creating the problem.
We are not asking Metro to abandon this project. We are asking Metro to do it right. We urge the Board to reject LPA Option 2 and direct staff to develop an alternative alignment that avoids unnecessary impacts to residential properties and preserves the critical services our community depends on.
A transit system that works for everyone shouldn't be built by overburdening any one neighborhood. We trust Metro can find a solution that reflects that principle.
Thank you for your consideration.
Sincerely,

Good morning, Metro Board Members,
As a homeowner and resident of Lafayette Square (1669 Virginia Road), and **I strongly oppose LPA Option 2 for the K Line Northern Extension**.

This alignment deviates from the original plan following the elimination of the Crenshaw/Wilshire station, and it unfairly shifts the burden onto our historic residential neighborhood.

LPA Option 2 would create approximately 22 subsurface easements beneath homes, raising serious concerns about property rights, structural impacts, and construction disruption.

It would also remove our local grocery store and the only pharmacy serving our community within miles—cutting off access to essential services for residents who have been historically targeted.

Our neighborhood should not bear the brunt of accommodating changes made to meet the needs of other communities. **We ask Metro to reject LPA Option 2** and pursue an alternative that avoids unnecessary impacts to residential areas and preserves critical local resources.

As a homeowner in LaFayette Square — which, as you know, is part of an architecturally protected HPOZ and consists of many homes (including my own) with additional Mill's Act protection status — I urge you to reconsider this alignment for many significant reasons. I hope you will stand with us on the right side of history, and consider these crucial and compelling points:

1) The destructive and alarming impact of underground transit beneath residential communities — including recent studies (some from Metro itself) documenting severe vibrations, noise and structural damage.
2) This risk could be easily mitigated by choosing an alignment along a major road such as Crenshaw Blvd. This alternate route would achieve the same goals for extending the K Line while minimizing disruptions to historically protected residential zones.

3) The historic homes in our neighborhoods — many of which date to 1910s and 1920s — were constructed using techniques that did not account for modern noise, vibration, or seismic resilience. **Many of these homes have deteriorating cripple walls and heavy foundation settlement on expansible clay sub-surfaces. These structures, along with their below-grade basements and pools, are extremely sensitive to any subsurface disturbances**. The financial and safety risks to residents above a proposed transit tunnel are substantial, regardless of the tunnel's depth. Aligning the extension along Crenshaw Blvd would significantly reduce these risks.

4) Our historic Black communities have been repeatedly targeted for disruptive mass transit solutions. The construction of the Santa Monica Freeway, for example, obliterated some of the most historic neighborhoods in our city, including Berkeley Square, Sugar Hill, Gramercy Park, Wellington Square, and Lafayette Square. **These decisions have left deep psychological scars on our communities, which have already suffered from redlining, housing covenants, and eminent domain abuses. It is imperative that we do not allow history to repeat itself.** Choosing an alignment that minimizes impact on these communities is not just a matter of practicality but of justice.

I appreciate your careful consideration in taking this feedback from homeowners and community stakeholders. We strongly support mass transit in LA — but there are clear solutions that would provide the same transit expansion without devastating some of LA's most treasured homes and communities. An alignment underneath an existing corridor (such as Crenshaw Blvd.) reduces the devastation while still serving the greater good.

As a journalist, I will also be following this matter closely and encouraging my Los Angeles media colleagues to do the same.

Thank you for your help and attention — as a city leader, we trust you will make a decision that reflects the best interests of our greater community and the principles of equity and justice.

Thank you for your consideration.
Sincerely,
Carrie Seim

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

KIRSTEN JUDSON

Subject: Support for the San Vicente-Fairfax Route for the K Line Extension!

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Chase Cohen

Sent: 3/20/2026, 4:19 PM
To: klinenorth@metro.net
Subject: Support for K line northern extension

To the Metro Board of Directors and Planning and Programming Committee:

I am writing in strong support of the K Line Northern Extension project and to directly address concerns about construction vibrations and tunnel boring that have been raised by some community members.

These concerns are not supported by Metro's technical studies or modern engineering practices. The Draft Environmental Impact Report contains comprehensive analysis showing that contemporary tunnel boring machine (TBM) technology, combined with modern vibration mitigation measures, results in negligible and acceptable vibration levels at surface properties and buildings.

Key facts:
- Modern TBM technology is fundamentally different from older drilling methods. Today's machines are engineered with vibration damping systems that did not exist decades ago.
- Metro's technical studies evaluate vibration using industry-standard metrics and building damage criteria. These studies conclude that vibrations will be well within acceptable thresholds established by engineering codes.
- Countless transit projects worldwide - including recent extensions in major cities - have successfully employed these technologies with no documented property damage.
- Mitigation measures including ground treatment, building monitoring, and design adjustments are standard practice for Metro and ensure additional protection.

The real issue is not whether this project can be safely built - it demonstrably can - but whether we will allow unfounded fears to block critical transit infrastructure that would serve 110,000+ jobs, provide access to major medical centers like Cedars-Sinai, connect underserved communities to opportunity, and reduce traffic congestion.

Time and time again, this metro board has proven to give in to NIMBYS and advocate for anti transit positions. This needs to change.

West Hollywood, Mid-City Los Angeles, and Hollywood need this connection. I urge the Board to select the Locally Preferred Alternative and move forward with this essential project.

Respectfully,
Lindsey Larsen

Subject: K Line North Mar 26 meeting alignment decision comment

Hello,

I support the locally preferred alignment for the K Line North Metro project, the hybrid corridor along San Vicente & Fairfax, as staff has recommended. Alternative 1, which tunnels directly north off the Crenshaw alignment towards Midtown Crossing.

Thank you,
Robert

Subject: I Support the Fairfax-San Vicente Hybrid Alignment for Crenshaw North

Hello Board Staff and Directors,

I support the Fairfax-San Vicente Hybrid alignment for the Metro Crenshaw Northern Extension Project.

The Fairfax-San Vicente Hybrid alignment would serve ALL the major destinations in Mid City and WeHo, including the Grove, the Farmers Market, Cedars-Sinai Medical Center, the Beverly Center, the CBS Television City Site, LACMA and Museum Row, WeHo nightlife, the Pacific Design Center, West Hollywood Park, and a range of underserved communities and job centers along the way. The Hybrid alignment would directly serve four times as many jobs and twice as many residents than the La Brea alignment.

It's important that we get this right and ensure that Crenshaw North creates a new north-south connection from LAX and Inglewood through Mid City and West Hollywood to Hollywood where it will connect with the Metro Red Line (B) and potentially even the Hollywood Bowl!

I urge Metro to advance the Fairfax-San Vicente Hybrid alignment in the environmental process.

Let's get it right the first time. Let's pick the Hybrid. And let's #FinishTheLine!

Thank you,
Erik Rodriguez

Subject: Public comment: K line

Hello,
As a LA resident who can't take off work on Thursday mornings, I need to make my voice heard. Los Angeles is held back from being the country's best city by lack of useful public transit. NIMBYs have bullied amazing proposals out of consideration. We can't let that happen again.

The Fairfax San Vicente alignment makes the most sense. We have no time to delay. We want usable, convenient metro routes.

Subject: Support for Metro K Line Northern Extension

Hello Metro,

I am a resident and homeowner in the View Heights neighborhood of the City of Los Angeles, represented by Holly Mitchell and Marqueece Harris-Dawson. I live within walking distance to two K-line stations in Hyde Park and Fairview Heights. I am writing to express my support for the Metro K line northern extension alignment through West Hollywood. I do not support selecting an alternative alignment.

I am, primarily, a driver. However, I take the bus and metro rail whenever I can, especially to destinations like West Hollywood, the Miracle Mile and DTLA where I know I will be going out to dinner or to a bar and will be having alcohol. I am also a part of the Cedars Sinai medical group, and would love to be able to take rail someday to my doctors appointments. I am still waiting for bus priority lanes on La Brea south of Olympic, which were promised years ago and are still not built.

Please don't let a small group of vocal residents in La Fayette Square ruin this opportunity to connect South LA to Central LA. Jobs, health care, destinations. These residents are concerned about vibration and property value loss, even though Metro's own evidence shows that there is no way the deep tunneling will impact their homes.

Please don't let the Mayor's representatives (who should recuse themselves for conflict of interest) stop this project from happening. If Mayor Bass tanks this project, she will tank her career.

Opinions expressed are solely my own and do not express the views or opinions of my employer.

Thank you,
Kate Kigongo

To the Board in charge of the K line northern extension,

YES. We WANT this extension!

Imagine a place where you can easily access the entire country via train, where every train station is a hub of commerce for grocery stores, restaurants, pharmacies, and shopping where people dont have to wander far from the train route to access their basic necessities and can still make it to their destination easily and conveniently. Guess where that place exists? Japan. I loved there for several years during my young adult years and it changed my view on how public transit COULD be.

LA is not known for convenience nor for easy transit. It is known for sitting in traffic and wasting half of your life in gridlock. But you have the opportunity to improve on that by moving forward with the K Line extension. I would even urge you to start now and complete by the Olympics to take advantage of that major financial opportunity for the K line extension. This expansion would present an affordable alternative to driving or the bus routes. And get more cars off the roads. Especially with gas rising above $6/gallon now. There are only positives for the public good with this expansion.

This extension should happen sooner rather than later and I urge you to take some serious lessons from how the Japanese handles their train transit and their train stations with all the conveniences available and implement it here. Please do not listen to the few who would fight against the betterment of LA. We need this extension. Badly.

Thank you for your time,
Kristen Morici

Dear Metro Board Members,

As a homeowner and resident of the Tri-West neighborhood of West Hollywood, I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines. This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents (including our family) when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative. Thank you for considering public input on this important decision.

Sincerely,
Jonathan Strauss
West Hollywood

Hi there,

Please do not delay the wonderful K Line Extension! This is a proposal that is well researched and GOOD for workers, businesses, entertainment, and consumers! People who live and work in West Hollywood would love to see this. PLEASE do not delay this train, it's kind of insane it doesn't ALREADY exist.

Why is it the hardest to build infrastructure when most people actually want it? It's always those with the deepest pockets who get the most power and sway over your board and plans for this city, determining when and where we can access public transit, and it's just not fair. YES on K Line Extension!!! This is a huge packed corridor and I can't wait to ride.

Current resident,
Emily Moncata

Hi,

Hope you are doing well, I am not sure if there is meant to be a specific format to the comment, but my comment is, ensure that this project, K Line Northern Extension, is done and completed without additional delay. Individuals arguing in bad faith, and whom Karen Bass seems to value over the people of LA, are trying their hardest to stymy, run up costs, and delay the project that would increase the quality of life and work of thousands. 36 people. Over thousands. Do the math, trust the science, and get it done. People who don't believe in science shouldn't dictate policy, they should go back to school and get an education.

Thank you,

Los Angeles Resident, Cesar Christopher Garcia

AGENDA #7: **FOR** K North Extension (KNE) LPA Approval Part 3

LA Metro Board,

Regarding the planned motion / addendum for the KNE, you have already wasted 18 months and over $2 million delaying the project. And now you're introducing a motion to waste more taxpayer dollars to do what you've already done!

You've already engaged residents and stakeholders in both the initial public comment period, and during the 18 month delay. You've already had metro staff study several additional alignments to reduce easements. You've already identified a community-informed path forward that had the fewest easements. You've already had a 3rd party peer review metro staff's tunneling study. And what facts has your agency revealed? **Noise and vibrations of subway tunnels that deep are beyond the threshold of human perception! They are unnoticeable!** Furthermore:

- "Tunnel easements would not affect"
  - "Property and structures above"
  - "Ability to remodel/develop property"
  - "Historic designation or zoning"
  - "Underground oil and mineral rights"
  - "Property values"

But despite the facts, you're planning on wasting more time and taxpayer money on more discussions, planning, studies, and route options with this motion!

And what's more, your motion is a blatant attempt to indefinitely delay the project! First, it makes the reinitiation of project activities contingent on funding. Second, it delays a phase 1 alignment selection, and asks for EVEN MORE alignment options for the phase 1 section. You can't know how much funding the project needs if there's no alignment chosen!

Homeowners afraid that the tunnels would affect them are like children afraid of a monster under their bed. There is absolutely no factual basis for these fears!

It is shameful to continue to waste millions of taxpayer dollars on these unfounded concerns. Especially when two of the metro board members live in one of the neighborhoods above the tunnel, and one was a former head of the HOA there.

It is also a clear violation of Dupont-Walker's recusal that she attended meetings with Bass and residents regarding the KNE LPA. That is grounds for a corruption probe.

This project is projected to be the busiest light rail line in the country, and you're threatening its completion with these delays for the baseless fears of a few dozen people. You need to read your own staff's studies so that you'll see how ridiculous the concerns of these NIMBY's are.

Approve the KNE LPA with a Hollywood Bowl station, and without addendum.

Andrew

Good evening,

My name is James. I was born in West Hills, raised in Winnetka, and grew up visiting the greater Los Angeles area from Santa Monica to West Hollywood to Koreatown. I am in full support of the proposed K Line extension but the timeline needs to be expedited. Karen Bass claims to show support for the line and her constituents that are in dire need of improved public transit, but is taking action that will only delay the process to 2041 and beyond. We need the project to be expedited and open much sooner.

Please also include MERV-14 filters in this upgrade as clean air is of dire importance with air pollution, seasonal allergies, and disease control.

Thank you for your time.

Best regards,
James

Hello,

I am writing to comment on the upcoming board agenda meeting set for Thursday March 26 concerning item #7 and express my support of the K-Line metro extension. A expanded metro train system, especially ahead of the 2028 Olympics, will greatly help alleviate the growing and notorious traffic problem in LA. Additionally, borrowing from other transit systems like San Francisco's BART, I would urge Metro to adopt the usage of MERV-14 air filters to help minimize environmental emissions and pollution from the trains. Thank you!

Best,

Frederick Gonzalez

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

Jacob Furgason

Dear Metro Board and Political Leaders,
Enough delay—approve the K Line Northern Extension San Vicente-Fairfax alignment now!

As a high school mathematics teacher and a resident of the [redacted] zip code, I live just a short distance from the E Line Expo/Crenshaw stop. My family and I rely on our bikes and public transit to navigate Los Angeles, and we see daily how vital a connected, high-capacity transit network is for our city's future.

It has become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground—a process Metro has executed safely many times before. We cannot afford to prioritize the unfounded concerns of a few over the urgent needs of the many, especially given the escalating dangers of climate change and the inherent risks of a society overly dependent on cars.

West Hollywood is impressively willing to provide 25% of the project cost, a commitment this board should not take for granted. Once built, this will be the busiest light rail line in the country, connecting our region to essential destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North-South link between the B Line and the E Line, and it will have exponential positive effects across the entire Metro system.

For the sake of our environment, our safety, and our students' futures, we need action. NO MORE DELAYS OR STUDIES. Approve the K Line Northern Extension San Vicente-Fairfax alignment. Even better, switch back to the DEIR option so transit riders aren't delayed

during every trip and we don't waste $165M to address non-issues.
Please move this project forward immediately.
Thank you,
Cesar Garcia

To whom it may concern,

I am a resident of greater Los Angeles and a daily Metro transit rider. I believe it is in the best interest of the greater public of Los Angeles that the K Line northern extension staff recommendation is advanced without delay. LA is in desperate need of this crucial transit line which will be the most popular line by ridership once completed. I am FOR Item #7 without ANY AND ALL delays, including further extensive and costly studies. Please consider the needs of millions of your current and future LA constituents, who will reap major economic and social benefits from this vital project.

Thank you,

Andrew Portugal

Dear Metro board and political leaders,

I encourage you to approve the K Line Northern Extension San Vicente-Fairfax alignment, particularly as West Hollywood is amazingly willing to put up 25% of the project cost — an opportunity this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line, and will create great access to the D line expansion as well! This will have exponential positive effects across Metro's system and ease access to (and reduce vehicle traffic in) areas frequented both by locals and tourists.

Don't delay. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip.

Thank you,
Jason Enright

To the Metro Board of Directors and current mayor Karen Bass specifically,

It is not lost on me that these board meetings occur at a time that is extremely inconvenient if not impossible for the vast majority of people to attend in person, particularly those most reliant on public transportation.

That being said, I am writing to express my frustration and outrage regarding the pace and prioritized alignments of the K Line Northern Extension. For decades, LA has been promised a world-class, connected transit system, yet we are still waiting for a line that actually goes where people need it to go.

Prioritizing a miniscule group of loud residents over the ten million other residents (and millions of taxpaying voters) of this county is ridiculous.

Every year of delay forces residents to endure grueling commutes, unreliable bus transfers, and a lack of access to the economic hubs in West Hollywood and Hollywood. We don't need more studies or "options" that water down the project and waste millions of taxpayer dollars; we need the most direct, high-capacity route, specifically the San Vicente/Fairfax alignment, and we need it built **now**.

Stop prioritizing political convenience over the needs of riders. We need a commitment to:

- **The San Vicente/Fairfax Alignment:** The only choice that maximizes ridership and justifies the cost.
- **A Realistic, Accelerated Timeline:** Stop pushing the finish line further into the future.
- **Direct Accountability:** Show us that LA's mobility is actually a priority, not an afterthought.

The community is tired of excuses. It's time for the Metro Board to stop talking about equity and start building it.

Sincerely,

Michael Totka, Los Angeles Resident

Hi, my name is Ethan Furman and I am a resident of East Hollywood, Los Angeles.

I'm emailing about the Metro Board meeting this Thursday, Mar 26. I'm urging the city to SUPPORT the staff recommendation for the K Line Northern Extension and firmly OPPOSE any further delays.

It is unacceptable to risk the country's highest ridership light rail line and hundreds of millions of taxpayer dollars over the scientifically unfounded fears of a few wealthy homeowners.

I am also asking the board to consider the "Cut and Cover" method for constructing this Metro line as it offers numerous benefits over deep tunnel boring. It will cost billions less and be less disruptive to neighborhoods.

Please vote to ADVANCE THE PROJECT without delay. Thank you.

I live very nearby to where the K Line extension is supposed to be built. I'm writing because I am beyond frustrated that our city's transit is being delayed.

It is both appalling and fiscally wasteful that the needs of 29 households are currently being weighed equally against the needs of 50,000+ daily riders. We are talking about 18.2 million rides per year and nearly a billion riders over the life of the project. To jeopardize that level of public benefit, and to waste thousands of commuter hours daily, simply to accommodate the preferences of a few dozen homeowners, is a complete insanity.

I want to address the Lafayette community's concerns directly:

- **Proven Safety:** Metro's own independent Tunnel Advisory Panel has already confirmed that modern pressurized boring machines at depths of 80-120 feet result in zero perceptible impact to surface structures. (See: *Metro Tunneling Safety Report, 2025*).
- **Property Values:** Study after study (including those made on behalf of Southern California Association of Non-Profit Housing) shows that proximity to high-quality fixed-rail transit increases property values and market demand. These homeowners aren't just blocking transit; they are blocking their own neighborhood's economic growth. Literally this project is being funded off the basis of expected increases in property values, concerns otherwise aren't based in reality!
- **Fiscal Insanity:** LA is facing a massive budget deficit. The proposed 18-month delay alone will inflate project costs by millions, and the "options" being discussed to address these 29 homeowners' complaints would add millions more in construction costs for absolutely no public benefit. This preferential treatment is costing the rest of us money we do not have while we are already a billion dollars underwater.

There is absolutely NO reason to delay the line any further or to deviate from the original metro plans. We WANT transit. The city should be listening to the thousands of us who live here and want progress instead of a few with nonsense complaints. Stop wasting time and money.

Ellie

Dear Metro Board Members,

My name is Marco Santana, current CAC Member (for ID purposes), but I write to you today in my personal capacity. I'm writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood. The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route. In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Please approve the K line northern extension. This line cannot be allowed to wither on the vine to appease a few unfounded worries like has happened for the southern extension. Tunneling has proven to be safe, non-disruptive and cost effective all over the world and here in LA for decades. It is unconscionable to consider delaying or modifying the alignment of this critical project any longer because metro leadership refuses to listen to the scientifically sound conclusions of its own engineers in deference to a few residents that will never know if the line is being built or running.

As a South Bay resident living near the southern terminus of the line, this extension would open up access so much more of the city without resigning to a soul sucking congested drive. The northern extension has the potential to become the crown jewel of LA light rail, it needs to happen!

Thank you for the consideration and for continuing to propose rail expansion and access. Let's build a better LA!

Dear Metro Board Clerk,

Please submit this email as written public comment for the upcoming Board of Directors meeting on March 26, 2026.
I am writing to express my strong support for the K Line Northern Extension and to urge the Board to vote in favor of selecting the San Vicente-Fairfax alternative.
This project is crucial for connecting our communities, improving access to jobs and housing, and providing a viable transit alternative to the 405 freeway. The San Vicente-Fairfax route offers the highest ridership potential and directly serves dense residential and employment areas that need this infrastructure most.
It is time to move past delays and finish the line. I urge the Board to approve this extension and move it into the next phase of planning and design.
Thank you for your time and consideration.
Sincerely,

Noel Almani
North Hollywood California

Hello,

I am writing to urge the Metro Board to approve the staff recommendation for the selection of a Locally Preferred Alternative (LPA) for the K Line Northern Extension. This project has great benefits to the city's residents that should not be blocked by unevidenced claims. We are decades behind other cities in having a modern public transit system, and connecting areas like West Hollywood would be a huge step forward in the coverage of public transit.

Please approve this recommendation.

Thank you,

Kathryn Ryan

Hi there,

I'm writing to voice my support for the K Line extension. This train would service parts of LA that desperately need more transit options. I truly believe that as a world class city, LA is severely behind when it comes to transit, and the excuse of the city being too spread out instead of dense is not good enough. We can and should continue to build options that will make a huge difference in the daily lives of Angelenos.

Sincerely,

Genevieve Projansky

There is a blatant influence of Jackie DuPont-Walker on Mayor Karen Bass, who is on the metro board. There is a MAJOR conflict of interest, as the already extensively studied and disproven to be less disruptive alignment specifically avoids Lafayette Square, including DuPont-Walker's residence, a blatant violation of California State Law, as shown in this link (https://www.instagram.com/reel/DWSAmU8Enw4/?igsh=NTc4MTIwNjQ2YQ==). Please take this conflict of interest into account during discussion and voting

Dear Board,

I am writing in strong support of the San Vicente-Fairfax alignment as recommended---with no amendments and no delays.

This project will be transformational — connecting our rail system, strengthening our economy, and finally serving one of the densest parts of Los Angeles.
It will create over 10,000 union jobs and connect people to 125,000 jobs within walking distance of stations.
For people without a car — seniors, young people, people with disabilities — this is access to opportunity.
We've heard commitments to move this project forward full steam ahead.
Full steam ahead means no delays. No changes that slow this down.

Enough with delays and studies. Stop the politics.

Move forward with the project and do right by the city of Los Angeles and its residents.

Kindly,
Helen Eigenberg

Vote NO.

Instead, look into PRT as an alternative. Its faster and cheaper to build, and has a smaller footprint.

I'm writing in favor of the above.

As now a former Angeleno and a new WeHoite, I believe that this proposal is critical for ensuring Los Angeles City and County shift towards both saner transportation culture/habits/infrastructure and moreover a saner, healthier urban environment.

Karen Bass is an incompetent, backwards-minded idiot, which is as plain as any ordinary sunny L.A. day, given the ever faster deterioration of the City's infrastructure, economy and socio-cultural life and image. What's more, I can say with practically 100% certainty that the homeowning opponents to this proposal in Mid-City are privileged, economically and likely racially prejudiced individuals (due in part to the ongoing socio-political-economic cancer that was/is Prop 13).

In case they are textually or visually illiterate or both, someone (not Karen Bass) should inform them that we are living in the 21st century. Hence even with and despite the seismological issues that are part and parcel of our lives here, there must certainly be engineering solutions that the City and County can both reassure these opponents with and provide to their communities that will ensure both reliable rapid transit service in their midst and the stability and safety of their homes.

Dear LA Metro Board Members,

Please approve the K Line Extension using the San Vicente–Fairfax route. Do not delay. Finish the line!

Your staff have already done the work. They are trained professionals using data and planning expertise, and they recommend this alignment. The Board should follow that recommendation.

West Hollywood wants transit and is willing to support it. This route serves real demand and connects a major gap in the system. That is exactly where we should be investing.

We cannot keep letting a small group of opponents slow down projects that benefit the region. Concerns about construction can be managed. They are not a reason to stop or delay a project that will serve the city for decades.

With the Olympics coming, it is still not possible to get from LAX to major destinations like West Hollywood by rail. That's unacceptable for a global city.

I lived more than a decade without a car. I only bought one recently because it's not possible for me to get to work by transit in Los Angeles. That needs to change. Approve this route and move forward.

Padric Gleason

Dear Metro board and political leaders,

Enough delay—approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing north-south link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDIES. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option, so transit riders aren't delayed each trip, and we don't waste $165M to address non-issues.

Thank you,
Soren David Gabriel Larsen-Dierking

To whom it may concern,

I'm writing in **support** of the proposed
K Line Northern Extension (KNE) and encourage prioritizing this critical infrastructure for immediate transit equity.

Further, I encourage LA Metro xpedite and eliminate all delays and accelerate the schedule to meet regional climate and accessibility targets.

I also encourage LA Metro to install MERV14 filters on all their trains. Currently the MERV8 filters being used are insufficient and require upgrading. BART trains in San Francisco are already supplied with MERV14 filters. Let's match their standard.

Kind regards,
Sarinea Meserkhani

Dear Metro Board Clerk,

Please submit this email as written public comment for the upcoming Board of Directors meeting on March 26, 2026.

I am writing to express my strong support for the K Line Northern Extension and to urge the Board to vote in favor of selecting the San Vicente-Fairfax alternative.

This project is crucial for connecting our communities, improving access to jobs and housing, and providing a viable transit alternative to the 405 freeway. The San Vicente-Fairfax route offers the highest ridership potential and directly serves dense residential and employment areas that need this infrastructure most.

It is time to move past delays and finish the line. I urge the Board to approve this extension and move it into the next phase of planning and design.
Thank you for your time and consideration.

Sincerely,
Brian Clark, Metro Rider
Downtown Los Angeles, CA

I am a resident of Jefferson Park, a member of the WGA union, and a mother of two. I have lived in LA for over a decade and have the good fortune to be raising two young children in this beautiful city. My only regret about building my life here has been the fear that my children will not experience the sense of freedom, autonomy, and community that I had when I was a teen in a midsize city with a robust and comprehensive public transit system. REAL public transit—not the gerrymandered, delayed, spotty patchwork that this city has suffered under until so recently—does more than deliver a passenger from Point A to Point B. It communicates a city's identity and creates new possibilities for a broader, more inclusive, more innovative civic life. I want my teenagers to be able to safely get themselves to a show at the Hollywood bowl with a group of friends, wander around WeHo without a chaperone burning gas on a side street, experience all the sights and sounds of this beautiful city under their own steam, without an out-of-touch adult determining the itinerary. Young people plus public transit is the equation for a city's longevity and its sparkle, and I desperately want my own kids to be a part of that future. Please don't delay the train. We are so close to finally doing the right thing for LA, and my kids are only young once.

Hi!

I am a Mid City resident ([redacted] and I was so excited to learn about the proposed extension of the metro up San Vicente to big, impactful stops for jobs and culture. We could even take it to the Hollywood Bowl which always causes absolute gridlock and is ideal for mass transit.

I also learned that there are a handful of NIMBY folks in Lafayette Square who don't like the proposal because they worry about their property values? That is insane. The tunnel will be so so deep, and if they don't like it, they can sell their properties in the next 15 years before work begins.

I would be IRATE if this incredible opportunity of city planning were thwarted by an emotional few who have complaints that are not even backed by data. Please please have a backbone and do what's right for millions of people in this city.

I am incredibly excited to support the future of Los Angeles. I hope you will too!

Sincerely,
Stephanie Dziczek

Dear Metro Board of Directors,

I am a resident of Los Angeles and I am writing to strongly SUPPORT the staff recommendation for the K Line Northern Extension Locally Preferred Alternative and to urge you to vote YES at the March 26, 2026 Board meeting.

This project will provide a critical north–south rail connection from the E Line to Hollywood, linking to the B, C, D, and E Lines and serving major destinations, jobs, and neighborhoods in Mid-City and West Hollywood. It will improve access to employment, healthcare, and entertainment while reducing traffic and emissions in some of the region's most congested corridors.

I am very concerned that construction funding is not scheduled until 2041, with service not expected until approximately 2047–2049. Please do everything possible to avoid any further delay and to pursue strategies to accelerate funding and delivery of the K Line Northern Extension so that these communities do not have to wait decades longer for high-quality transit.

Thank you for your consideration and for your work to improve mobility for all Angelenos.

Sincerely,
Christopher Kearney

Please know that a lot of people want this project to be finished without appeasing a few people that won't impact them one bit. Mayor Bass' own reports have proven that the depth they are tunnelling will not affect them or their property. But having to do more unnecessary studies that delay the project will affect the lives of millions of people in LA.

My name is Joaquin Gonzalez and I work in the South Bay near the K line, with my closest station to work being Mariposa station. I am writing in support of the San Vicente-Fairfax alignment for the K Line Northern Extension, as it was presented in the Draft Environmental Impact Report (DEIR). This project will be transformative to the area. Personally, I am especially excited about the prospect of the K line connecting to the D line and the B line, which will greatly expand options for travel on the Metro system. I am also excited about the K line extending to the Hollywood Bowl as Metro Staff recently recommended, as it would be excellent for avoiding traffic to events at the Bowl. The San Vicente-Fairfax alignment clearly has the most potential ridership owing to the large number of important destinations it reaches as was found by the studies done for the DEIR.

The DEIR alignment with the Hollywood Bowl station is in my opinion the best of the options before the Board and I urge the Board to approve that alignment at their Thursday March 26th meeting. At this point, there have been years of studies put out by Metro Staff on the many possible alignments for this line and it is clear that the quickest, most fiscally responsible option is the DEIR alignment. Delays have also been shown to result in cost increases for major infrastructure projects, so in the interest of taxpayers, it would be best to approve the DEIR alignment now so that funding can be procured and construction can start.

Thank you,

Joaquin Gonzalez

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Andrew Weisz

Dear Metro Board of Directors,

My name is Diego Tamayo and I am a Westwood resident and UCLA student who relies on the LA Metro rail network every week. **I am FOR Agenda Item #7: approving the K Line Extension Locally Preferred Alternative (San Vicente-Fairfax) without delay.**

I urge board members considering voting for Bass's motion to reconsider. Jacquelyn DuPont-Walker's lobbying of LA Metro Board members while simultaneously owning property within the LPA alignment is a conflict of interest. **Voting in favor of Bass's motion would undermine public trust and transparency. I instead encourage board members to support building high-quality transit for riders like myself and millions across Los Angeles without delay.** The San-Vicente Fairfax vital corridor is essential for accessing jobs, education, and major destinations such as LAX, Cedars-Sinai, West Hollywood, and the Hollywood Bowl.

Metro staff have conducted extensive analysis to identify the LPA that minimizes community impacts, including tunneling at 90-ft depths designed to avoid surface disruption. **Similar noise and vibration concerns were raised during the D Line Extension in Beverly Hills, and tunneling has proceeded successfully without harm to surrounding properties.**

Delaying this project's construction start date *from 2029 to 2041* despite these findings would undermine years of technical study and hundreds of millions in taxpayer investments. **I urge the Metro Board to approve the K Line Extension now to begin construction on what will become the most ridden light rail in the U.S.** I hope to

ride the K Line to the Hollywood Bowl in my lifetime.

Thank you for your consideration.

Sincerely,

Diego Tamayo

Hello,

As an LA county and LA city resident I **SUPPORT** the **K LINE NORTHERN EXTENSION (KNE) - LOCALLY 2025-0846 PREFERRED ALTERNATIVE (LPA).**

MY POSITION IS **FOR** ITEM **2025-0846** K LINE NORTHERN EXTENSION (KNE) - LOCALLY 2025-0846 PREFERRED ALTERNATIVE (LPA).

The city of Los Angeles needs an extended and accessible subway, the city is overwhelmed by traffic. People are exhausted from the noise pollution and the traffic jams. We deserve a better way of commuting!

Additionally, the city of West Hollywood is completely disconnected from the subway system, this proposal will connect the residents to the main subway line and to the Metro Transit Center of LAX, which is NEEDED.

Best,
Hrach Sargsyan

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Aryan Ray

Dear Metro board and political leaders,

I encourage you to approve the Metro Staff-recommended K Line Northern Extension San Vicente-Fairfax alignment, particularly as West Hollywood is amazingly willing to put up 25% of the project cost — an opportunity this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Medical Center, LAX Airport, The Grove, West Hollywood, the Hollywood Bowl. This line is the missing North/South link in Central LA between the B Line and E Line, and will create great access to the D line expansion as well! This will have exponential positive effects across Metro's system and ease access to (and reduce vehicle traffic in) areas frequented both by locals and tourists. Plus with gas prices going up - this is needed. And a lot of people would rather take the K line instead of drinking and driving from West Hollywood.

Please don't delay. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip.

Thank you,
Michelle Stevens

Dear Chair and Members of the Metro Board,

I am writing as a resident of the Mid-City area to express my strenuous opposition to the proposed **"Crenshaw ROW: Option 2"** (the $136M Diversion) for the K Line Northern Extension. While I fully support the staff-recommended San Vicente-Fairfax alignment, the inclusion of a costly "S-curve" to bypass 33 homes in Lafayette Square is an unacceptable use of public funds.

This diversion is deeply concerning for several reasons:

- **Lack of Scientific Justification:** Metro's own peer-reviewed tunneling studies and decades of operational data from the B and D Lines prove that deep-bore tunneling at 80–120 feet is undetectable at the surface. There is no engineering or safety data to suggest that these 33 homes require a $136M bypass while thousands of other Angelenos safely reside above Metro's existing 35-mile tunnel network.
- **Preferential Treatment:** Approving a hundred-million-dollar diversion for a small group of influential residents—at a time when Metro is facing significant budgetary pressures—smacks of preferential treatment. It sets a dangerous precedent that specific neighborhoods can "opt-out" of regional infrastructure at the expense of the general taxpayer.
- **Economic Impact on the Pico Corridor:** The K Line is the primary engine for the long-overdue redevelopment of the Pico Boulevard corridor. By diverting funds and increasing the complexity of the "direct" route, you risk delaying the revitalization of Midtown Crossing and the surrounding business district.
- **Degradation of Service:** Metro's own reports indicate that this diversion adds unnecessary travel time for every future rider. We should be prioritizing the fastest, most efficient connection between South LA, the Museum District, and Hollywood, not compromising the rider experience to satisfy unverified vibration concerns.

I urge the Board to reject **"Option 2"** and any further motions for delay. Please approve the staff-recommended alignment as originally studied in the 2024 Draft EIR. Our community deserves a project built on data and equity, not on special favors.

Sincerely,

Sarah Jackson

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

Hello Metro Board,

I am writing to express my support for extending the K Line, particularly north through West Hollywood. I've ridden the metro since I first moved to Los Angeles, and seeing the recent growth over the past several years has been a breath of fresh air.

Los Angeles has been in need of alternative forms of transportation for a very long time, and it is great to see plans to expand rail within the city. However, I've noticed a worrying trend within the metro board: cowardice in the face of NIMBY rage. In the case of the K line south extension, a small but angry contingency of homeowners was able to add hundreds of millions of dollars and years of delay to the project, despite its plan to use existing rail ROW. It is simply illogical to have added cost to a project when a viable alternative exists.

It appears the K Line North Extension may be subject to a similar fate. A loud, but small contingent of homeowners have again thrown around baseless claims casting doubt on certain parts of the project.

Remember:

1. An underground rail is the least disruptive form of transportation infrastructure to the existing neighborhood. The days of Robert Moses bulldozing neighborhoods to build interstates is long behind us. This project is not that.
2. Construction is temporary, and modern tunneling practices are mindful of hazards, including vibration and land movement. The D Line extension tunneled through literal tar pits and under some of the most precious museums in the city successfully.
3. Metro routinely goes out of its way to be mindful of the neighborhoods in works and expands in. The K Line South LPA included walking paths and replacing existing freight train grade crossings, and the K Line North plans include similar concessions.

Thank you for considering my comments. Please vote logically, reasonably, and approve this project's extension to the north (and also south, but that's not being voted on currently).

Dear Metro Board Member,
I am a resident of Lafayette Square which is a historical Black neighborhood in Mid City, and I strongly oppose LPA Option 2 for the K Line Northern Extension.

This alignment deviates from the original plan following the elimination of the Crenshaw/Wilshire station, and it unfairly shifts the burden onto our historic residential neighborhood.

LPA Option 2 would create approximately 22 subsurface easements beneath homes older than 100 years old, raising serious concerns about property rights, structural impacts, and construction disruption.

It would also remove our local grocery store and the only pharmacy serving the Mid City community within miles—cutting off access to essential services which will cause a food desert.

The Mid City neighborhood should not bear the brunt of accommodating changes made to meet the needs of other communities especially West Hollywood which has full access within a small radius to grocery stores and pharmacies. We ask Metro to reject LPA Option 2 and pursue an alternative that avoids unnecessary impacts to residential areas and preserves critical local resources.

Thank you for your consideration.
Sincerely,

Ryan Byrd

Greetings,

My name is Asari and I am a college student in Claremont, and a frequent commuter on the LA Metro system. I'm calling about the Metro Board meeting this Thursday, March 26. I'm urging Kathryn Barger to support the staff recommendation for the K Line Northern Extension, item# 2025-0846, and firmly oppose any further delays.

It is unacceptable to risk the highest ridership light rail line in the country, and hundreds of millions of taxpayer dollars, over the scientifically unfounded fears of a few homeowners. Please vote to advance the project without delay. Thank you.

Sincerely,
Asari

To whom it may concern,

It has come to my attention that everyone who is involved w/ expanding public transit isn't really trying to expand public transit at all. I'm still livid that the K Line South Extension will have the possibility of the Hawthorne alignment due to fearmongering, and we are doing this again with the K Line North project. I also fear that this group is colluding w/ this and many other projects that we ***should*** be expanding elsewhere: such as, but not limited to: Southeast Gateway, the E Line extension to Whittier, and the possible Vermont Heavy Rail Line to alleviate the ridership from Line 204.

Leading the collusion is Jacquelyn Dupont-Walke, who is leading the Lafayette Square "coalition" and is letting her people know that they would rather implement a freeway in their backyards because they love their cars instead. With that being said, if there really is collusion, there should be an independent investigation as to why that is because this isn't working. We need competent people who will run this agency; not to mention, cancelling or postponing this proponent will set a precedent that you are not into expansion and that you don't want to create more jobs within the Metro Rail system - custodians, track inspectors, train operators, supervisors, controllers, etc.

I urge you to vote for the extension and to help West Hollywood out plus having a branch for a possible light rail line on Santa Monica Boulevard because they also need improvements to get around town. We need options to get around town, not being handicapped by a few "homeowners" who are worried for absolutely nothing.

From,

Manuel H.

To the LA Metro Board clerk,

My name is Aaron Ball, and I am writing this letter to express support for extending the Metro K Line through West Hollywood to the Hollywood Bowl. I think that this is an absolute necessity for the city of LA, and can help to reduce traffic especially in this area.

I understand with your current timeline, the project may not be completed until 2049. This must not be the case. This project must be given high priority and be developed within the decade, as public transport will only become more and more necessary.

Los Angeles just needs more trains, increased bus service, and overall more low fare public transportation.

Aaron Ball

Dear Metro Board Members,

I urge you to approve the K Line Northern Extension using the San Vicente–Fairfax alignment without further delay.

The community process has been thorough. Metro has repeatedly demonstrated that deep-bore tunneling — over 100 feet below grade — poses negligible surface impact, consistent with its track record across the system. Continued study cycles are unlikely to produce new information, and each one costs time and public trust.

West Hollywood's commitment to fund 25% of project costs is extraordinary and should not be treated as indefinitely patient. This level of local investment deserves a decisive response.

The completed extension will connect the B Line and E Line with a north-south spine the system currently lacks, serving Cedars-Sinai, The Grove, West Hollywood, and the Hollywood Bowl. The ridership projections make the case on their own — this has the potential to become one of the highest-performing light rail corridors in the country, with network effects that strengthen the entire system.

I would also encourage the Board to revisit the original DEIR alignment, which avoids the operational penalties and estimated $165 million in additional costs introduced by later alternatives to address concerns that tunneling evidence does not support.

As a resident of the 90035 area who has waited over a decade for the D Line to reach my part of the city, I ask that you not let the K Line follow the same path of indefinite deferral. Approve this alignment and build it.

Thank you,
Julian Hicks

Hi there,

I'm writing to express my support in construction of the K-Line Northern extension. As a lifelong Angelino, I want to live in a city with a robust public transit network. In constructing the K-line extension, Los Angeles will be one step closer to having a metro service that rivals other world-class cities. In doing so, access to healthcare, jobs, and housing will become more available to the average individual. And amid rising gas prices, having a viable alternative to driving is a no-brainer.

I strongly urge approval of this project.

Thank you for your consideration.

Best,

Julian Bertet

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Joe Lujan

MEETING NAME: Board of Directors - Regular Board Meeting

MEETING DATE: 10:00 AM Thursday, March 26, 2026

ITEM # 7: GENERAL COMMENT

SUMMARY: Support the DEIR alignment and stop delaying K Line North over unscientific concerns.

FULL COMMENT:

Dear Metro Board of Directors,

I am writing to express my serious concern regarding the motion to amend currently circulating ahead of the Metro Board's vote on the K Line Northern Extension.

On Monday, March 23, Mayor Bass issued a public statement declaring her support for the project and her intention to vote for it to move "full steam ahead." It is therefore deeply troubling that she has simultaneously drafted a motion to amend that would undermine that commitment — specifically by reducing the likelihood that West Hollywood and LA County will advance the required funding in a timely manner.

I urge the board to adopt the DEIR-recommended alignment through Mid City. The alternative routes carry an additional cost of at least $165 million — a figure that exists solely to accommodate the objections of a small number of property owners along the surface alignment. Environmental and engineering analyses consistently demonstrate that properly constructed transit tunnels produce vibration levels well within accepted safety thresholds, with negligible impact on surface structures. To spend $165 million in scarce public funds to accommodate objections that are unsupported by the evidence — funds that could otherwise be directed toward additional stations, improved service frequency, or other critical infrastructure needs — is an indefensible use of taxpayer money, particularly for a project intended to serve hundreds of thousands of Angelenos who depend on reliable regional transit.

The K Line Northern Extension is a $15 billion investment in the future of this city. It deserves to be treated as such. I urge the board to pull the motion to amend, support staff's original recommendation, return to the DEIR alignment, and vote to move this project forward without delay and without further deference to a small number of objectors whose concerns are wholly contradicted by the available science and engineering record.

Respectfully,

Ryan Steppe, M.P.H.

Hello Metro Board,

For item # 2025-0846, I am very much For the proposal, as the recommended San Vicente-Fairfax alternative with a Hollywood Bowl station scores the best on all relevant factors and will serve the community in a way the others simply cannot.

For item # 2026-0042, I am For the proposal to ensure access to the meeting for those who cannot attend, as well as to ensure transparency.

For item # 2026-0015, I am For the proposal as it ensures that many necessary transit projects are funded by the FTA.

For item # 2026-0120, I am For the proposal to ensure all advisory committees are ethically above board.

For item # 2026-0232, I am For the proposal to ensure LA Metro and the necessary projects it is overseeing are funded properly.

For item # 2026-0234, I am For the proposal to ensure a new station to allow Pico Rivera commuter/regional rail access.

For item # 2026-0159, I am For the measure to allow LA Metro stakeholders access to ensuring LA Metro board transparency and representation.

Thank you so much.

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Daniel Huynh

Dear Metro board and political leaders,

Enough delay - approve the locally preferred alignment K Line Northern Extension San Vicente-Fairfax alignment!

The NIMBYs of Lafayette Square do not have the right to derail (sorry for the pun) the success of the K Line because they choose to believe in conspiracy theories. It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before. Adjusting the alignment will add over $150 million to the project and increase travel times for

every traveler on the line.

It is also greatly disturbing the Metro Board Member Jackie Dupont-Walker has been influencing the decisions of the K Line extension while being a resident of Lafayette Square. There is risk of serious corruption here by Dupont-Walker with her own financial benefit affecting how she approaches board meetings. According to reports in the LAist she has still been influencing decision-making behind the scenes.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted. ANY DELAY could jeopardize their EIFD resources and destroy any hope of starting this project in our lifetimes.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Ann Semonco

Dear Board Clerk,

Please record the following public comment for the March 26, 2026, Board of Directors meeting regarding Item #7 (K-Line Northern Extension):

Position: FOR

I am writing to express my strong support for the K-Line northern extension. There is a great need for the San Vicente-Fairfax alignment. This extension is long overdue and a step toward the critical need for public transit within Los Angeles.

This project must be prioritized immediately. I urge that the Board eliminate all delays and expedite and accelerate the building process, as well as MERV-14 filters, with 50 air changes per hour. This is dire for the health maintenance of the public.

Sincerely,
Pardis Eslamieh

ITEM # 7
SUBJECT: K LINE NORTHERN EXTENSION
POSITION: FOR

The extension of this line should be approved. This would connect other metro lines without the necessary extra step of going downtown to connect to any other line for inner-city travel, and it would reduce congestion of vehicular traffic if there were another way to commute without needing the 405 in West Hollywood.
The claims that there is any concern about individuals' property being affected by this are unfounded by the metro's own board of experts, and this claim was only brought up to further delay this project. This city needs more public transportation options, and this project would much greater benefit the public than a few homeowners in one neighborhood who weren't going to use the train anyway.
Thank you for your time.

Casper De Luna,
Los Angeles Resident

Dear Metro Board,

I am writing to express my strong support for the K Line Northern Extension and urge you to vote **YES**to move the project forward without further delay.

Delaying this project until 2041 would significantly impact mobility, access, and economic opportunity for residents across Los Angeles. Expanding the K Line is critical to improving connectivity, reducing traffic congestion, and supporting a more sustainable transportation system.

This project represents a long-term investment in our communities, and timely progress is essential to ensure its benefits are realized sooner rather than later.
Please prioritize advancing the K Line Northern Extension and avoid any additional delays.

Thank you for your time and consideration.

Hello LA Metro, my name is Faraz, and I'm a resident of Downey who uses LA Metro buses and trains almost daily to work.

I strongly urge LA Metro Board Directors to **approve all of Item #7 (staff recommendation) as is and without any additional motions/amendments.** I support the K Line San Vicente-Fairfax alignment as is, and I love the proposed terminus Hollywood Bowl station as the Hollywood Bowl is a very busy venue that would benefit greatly by having a train station that can transport large amounts of people quickly to & from the venue without causing traffic jams in the area or clogging up parking lots.

I am disappointed/angry that some members of the LA Metro Board are seeking to add unnecessary additional costs and delays to the project. A proposed motion by Mayor Karen Bass (that I read) seeks to modify the staff recommendation by proposing "alignment options" and having a "3rd party peer technical review of tunneling impacts". But what's confusing is that LA Metro staff have already spent 18-months delay studying many alignment options (see slide #8) and their studies/presentation shows that tunneling has no negative noise/movement impact on residential homes (see slides #8-12 and the other existing A/B/D/E Line trains). And even with all that, Item #7 has a Section B & C to address the concerns of Lafayette Square residents. So it appears that the amendment motion by Mayor Karen Bass is indeed a delay tactic for this project that will increase costs and push the opening even further back from the 2047-2049 opening date (which will increase the likelihood that this project gets killed).

But I am further angry that there appears to be corruption taking place with the proposed motion by Mayor Karen Bass. There is evidence being shown that one of the Board Members who had to recuse herself (Jackie Dupont-Walker) has been lobbying Mayor Karen Bass for this proposed motion/amendment because she was the ex-HOA president of Lafayette Square and doesn't want property prices to drop (although I'd counter that having property near rail actually has the opposite effect because property value increases near rail). So because of this conflict of interest, there is a real legal risk that can result in this project should a proposed motion/amendment to delay/do additional studies on this project be approved (which can unfortunately range from the city of West Hollywood suing, to the Trump Department of Justice investigating LA Metro Board Members).

Therefore, I strongly beg LA Metro to not delay or add any more additional studies to the K Line Northern Extension project, and **approve Item #7 (staff recommendation) as is.** We'll already be waiting till 2047-2049 for this portion of the K Line to open, so if you truly believe in advancing the K Line "full steam ahead" (as quoted by Karen Bass) then you will **support approving Item #7 as is (**and without additional motions/amendments).

Thank you for your time in reading my comment.

Sincerely,
Faraz Aqil

Dear Metro Board Members,

I am writing to provide public comment ahead of your upcoming Board meeting scheduled for Thursday, March 26, 2026 at 10am, specifically regarding the K Line Northern Extension under the Agenda Final.

As a resident of Los Angeles, I am very interested in seeing this project moving forward beyond the planning stage and into the groundbreaking and building stage.
The K Line Northern Extension represents a critical once in a generation opportunity to improve connectivity between Hollywood, Mid-City, South LA, and LAX, which are key parts of the region, reduce traffic congestion, and expand equitable access to reliable public transportation.

I am most concerned about the possibility of rerouting or detouring of the line due to opposition from residents in the Lafayette Square area between Washington and Venice Boulevards, including concerns raised about tunneling beneath homes. I understand the importance of community input in this project, but this tunneling is 100 feet below and it should be noted that Metro has successfully constructed subway tunnels in the recent past, most notably along Wilshire Boulevard in Beverly Hills and Westwood, without significant long term impacts to those communities, and this should be considered in the evaluation process. There have been reports suggesting that changes to the alignment could delay this project by up to 10 years. Such a delay will significantly impact mobility goals, climate commitments, and equitable access to transit access across Los Angeles. The alignment that I prefer the most is the Draft EIR that tunnels directly underneath Lafayette Square because it has the shortest tunnel length (3.77 miles), the shortest travel time (6 minutes, 52 minutes), and NO additional tunnel costs. All other alignments have longer travel times ranging from 30 seconds to a minute and a half, and have additional costs ranging from $150 million to $646 million dollars, which would detrimentally set this project back even further than it already has, and this corridor through the Mid-City area needs a fast alternative to driving as soon as possible.

Additionally, there has also been lots concerns about the Midtown Crossing stop at San Vicente and Venice Boulevards disrupting the Ralph's supermarket there, which some

people claim that it is the only supermarket in the neighborhood", but that is NOT true because I want to inform you of other supermarkets that are nearby such as Smart and Final Extra in the Midtown Crossing shopping center on the opposite side of the street from Ralphs, Superior Grocers on Washington near Crenshaw, an African Produce Market on Washington near West Boulevard, and plenty of small fresh food markets on Pico Boulevard between West Boulevard and Arlington Avenue, and with the Midtown station planned to be built near to the corner of Venice and San Vicente, I don't anticipate much disruption to the Ralphs, and this is clearly a play by the wealthy and NIMBY Lafayette Square residents along with Mayor Karen Bass herself to try to kill or stall this important rail project.

Finally, I strongly urge the Board to consider the Fairfax-San Vicente alignment as far as the options north of Wilshire are concerned and the EIR for Lafayette Square because those alignments not only serves the highest ridership corridors and key destinations, but also save costs and travel times. The long-term success of the K Line Northern Extension depends on connecting people to where they live, work, and travel most frequently. Prioritizing ridership and connectivity will maximize the return on investment and ensure the line is used to its full potential.

Thank you for your time and consideration.
I appreciate the Board's commitment to improving transit in the Los Angeles region and urge you to make a decision that reflects the best interests of not just residents in the immediate area but for the greater good of the region as a whole.

Sincerely,
Ken Russell

Dear Members of the Metro Board,

I am writing as a concerned Los Angeles resident to urge you to vote YES on the K Line northern extension and to oppose any further delays.

Los Angeles has waited long enough. Pushing this project to 2041 is not a bureaucratic inconvenience; it is a disservice to the Angelenos who depend on reliable transit to get to work, school, and essential services every single day.

More public transportation is not a luxury for this city, it is a necessity. Every year of delay means more congestion, more emissions, and more residents left without alternatives to driving. The time to act is now.

Please vote YES and move this project forward.
The people of Los Angeles are counting on you.
Thank you for your consideration.

Sincerely,

Lindsay Huston

Dear all,

My name is Sona and ad an Los Angeles county resident I SUPPORT the K LINE NORTHERN EXTENSION (KNE) - LOCALLY 2025-0846 PREFERRED ALTERNATIVE (LPA).

MY POSITION IS FOR ITEM 2025-0846 K LINE NORTHERN EXTENSION (KNE) - LOCALLY 2025-0846 PREFERRED ALTERNATIVE (LPA).

The city of Los Angeles would highly benefit an extended and accessible subway, the city is overwhelmed by traffic and it is not fun to be behind the wheel at all times. We all are extremely tired for the amount of time we spend commuting from A to B and the pollution is just unbearable.

Additionally, the city of West Hollywood is completely disconnected from the subway system, this proposal will connect the residents to the main subway line and to the Metro Transit Center of LAX, which is NEEDED.

Best,
Sona

Dear Metro Board Clerk,

Please accept this written public comment for **Item #7** of the 3/26/2026 Regular Board Meeting.

Position: FOR

I strongly support approval of **Item #7: K Line Northern Extension (KNE) – Locally Preferred Alternative Recommendation**.

The **San Vicente-Fairfax alignment** is the right choice to move this long-needed project forward. Approving this item will improve transit access, strengthen connections across the Metro system, and deliver major benefits to riders, workers, residents, and visitors.

This project will help reduce traffic congestion, expand access to jobs and essential destinations, and make Los Angeles a more connected, accessible, and sustainable city for the future. Investments like this are critical to supporting economic growth and giving people real alternatives to driving. Pass this Item!

Los Angeles **needs faster progress on high-quality transit infrastructure**. Please vote **YES** on **Item #7**.

Thank you,
Cody-Michael Gan
Los Angeles Resident

Dear Chair and Members of the Metro Board,

I am a resident of Oxford Square. I urge the Board to approve the **San Vicente-Fairfax alignment** as studied in the 2024 Draft EIR. **Reject 'Crenshaw ROW: Option 2' and its $136M diversion.** We want the direct route that brings redevelopment and regional connectivity to the Pico/San Vicente area without further delays for special interests.

Thank you.

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Marco Innao
Hollywood

Hello,

I am writting in support of the K Line northern extension. Overall, I prefer the San Vicente-Fairfax route, though I generally support any of the three alternatives. In particular, I hope whichever line is chosen will include a stop at the Hollywood Bowl.

I live near a future D line stop--the K line extension will be crucial to make our system functional for those of us living on the westside that look forward to taking metro rail. In my case, I moved to my current home specifically to be close to the future stop. The K line extension would be a huge improvement to the westside's connectivity. With it, I would actually be able to take the train to LAX (instead of needing to ride the D line to downtown, then backtrack on the E line to finally get to the K--which is not practicle at all). Similarly, the northern extension will allow me to connect with West Hollywood (and hopefully the Bowl), which is currently either impossible or impractical without the K line northern extension.

Please support this critical piece of transit infrastructure. It will be a crucial to help connect housing supply with job centers, and help our region as we continue to recover from the pandemic, strikes, and the fires.

All the best,
Mark Fugina

Dear Metro Board,

I am writing as a lifelong Angeleno and I am urging you to vote YES on the K line extension and deny any further delays.

Pushing a project OVER ANOTHER DECADE is not inconvenient it is kneecapping a great city of the transit it deserves and allowing bribery and special interests to dictate the whims of a city of millions. We must expand our public transit to become the city we deserve to be. Every year you delay you economically hobble millions of people, as temperatures soared to summer extremes for an entire week in March we must be fierce and proactive in cutting emissions in this city.

You must vote YES and move this project forward immediately. To do otherwise shows your cowardice, allowing two people to control the outcomes of millions.

Best,
Austin Fresh

Dear Metro Board Clerk,

Please submit this email as written public comment for the upcoming Board of Directors meeting on March 26, 2026.

I am writing to express my strong support for the K Line Northern Extension and to urge the Board to vote in favor of selecting the San Vicente-Fairfax alternative. This project is crucial for connecting our communities, improving access to jobs and housing, and providing a viable transit alternative to the 405 freeway. The San Vicente-Fairfax route offers the highest ridership potential and directly serves dense residential and employment areas that need this infrastructure most.

It is time to move past the delays and finish the line. I urge the Board to approve this extension and move into the next phase of planning and design.

Thank you for your time and consideration,

Sincerely,

Mitchell Pumar

Dear Chair and Members of the Metro Board,

I am writing as a resident of the Mid-City area to express my strenuous opposition to the proposed "Crenshaw ROW: Option 2" (the $136M Diversion) for the K Line Northern Extension. While I fully support the staff-recommended San Vicente-Fairfax alignment, the inclusion of a costly "S-curve" to bypass 33 homes in Lafayette Square is an unacceptable use of public funds.

This diversion is deeply concerning for several reasons:

Lack of Scientific Justification: Metro's own peer-reviewed tunneling studies and decades of operational data from the B and D Lines prove that deep-bore tunneling at 80–120 feet is undetectable at the surface. There is no engineering or safety data to suggest that these 33 homes require a $136M bypass while thousands of other Angelenos safely reside above Metro's existing 35-mile tunnel network.

Preferential Treatment: Approving a hundred-million-dollar diversion for a small group of influential residents—at a time when Metro is facing significant budgetary pressures—smacks of preferential treatment. It sets a dangerous precedent that specific neighborhoods can "opt-out" of regional infrastructure at the expense of the general taxpayer.

Economic Impact on the Pico Corridor: The K Line is the primary engine for the long-overdue redevelopment of the Pico Boulevard corridor. By diverting funds and increasing the complexity of the "direct" route, you risk delaying the revitalization of Midtown Crossing and the surrounding business district.

Degradation of Service: Metro's own reports indicate that this diversion adds unnecessary travel time for every future rider. We should be prioritizing the fastest, most efficient connection between South LA, the Museum District, and Hollywood, not compromising the rider experience to satisfy unverified vibration concerns.

I urge the Board to reject "Option 2" and any further motions for delay. Please approve the staff-recommended alignment as originally studied in the 2024 Draft EIR. Our community deserves a project built on data and equity, not on special favors.

Sincerely,

Rebecca Campbell

Dear Members of the Metro Board,

I hope this message finds you well. As a deeply invested and concerned resident of Los Angeles, I am reaching out to urge you to vote YES on the K Line northern extension and to resist any further postponements to this crucial project.

Our city has already waited far too long for meaningful improvements in public transportation. Delaying the K Line extension until 2041 is far more than a bureaucratic inconvenience—it directly impacts Angelenos who rely on accessible transit every day to reach their workplaces, schools, and vital community services. This project is not simply a matter of convenience; it is an essential lifeline for thousands of residents.

Los Angeles desperately needs more robust public transportation—not as a luxury, but as a fundamental necessity. Every year that passes without this extension means increased congestion, higher emissions, and countless people left without reasonable alternatives to driving. The opportunity to make a difference is right in front of us, and the time to act is now.

I urge you to vote YES and help move the K Line northern extension forward without any further delays. The people of Los Angeles are counting on your leadership and commitment to a more connected, sustainable future.

Thank you very much for your time and thoughtful consideration.

Sincerely,

John "Wesley" Eatman

Dear Chair and Members of the Metro Board,

As a more than 60 year resident of the Mid-City area (Oxford Square - Windsor and Victoria) I fully support the staff-recommended San Vicente-Fairfax alignment for the K Line Northern Extension. But I am writing to express my opposition to the proposed **"Crenshaw ROW: Option 2"** for several reasons:

- **Lack of Scientific Justification:** Metro's own peer-reviewed tunneling studies and decades of operational data from the B and D Lines prove that deep-bore tunneling at 80–120 feet is undetectable at the surface. There is no engineering or safety data to suggest that the homes of Lafayette Square require a $136M bypass, while thousands of other Angelenos safely reside above Metro's existing 35-mile tunnel network.
- **Preferential Treatment:** Approving a hundred-million-dollar diversion for a small group of influential residents—at a time when Metro is facing significant budgetary pressures — sets a dangerous precedent that specific neighborhoods can "opt-out" of regional infrastructure at the expense of the general taxpayer.
- **Economic Impact on the Pico Corridor:** The K Line is the primary engine for the long-overdue redevelopment of the Pico Boulevard corridor. By diverting funds and increasing the complexity of the "direct" route, you risk delaying the revitalization of Midtown Crossing and the surrounding business district.
- **Degradation of Service:** Metro's own reports indicate that this diversion adds unnecessary travel time for every future rider. We should be prioritizing the fastest, most efficient connection between South LA, the Museum District, and Hollywood, not compromising the rider experience to satisfy unverified vibration concerns.

I urge the Board to reject **"Option 2"** and any further motions for delay. Please approve the staff-recommended alignment as originally studied in the 2024 Draft EIR. We want the direct route that brings redevelopment and regional connectivity to the Pico/San Vicente area without further delays for special interests.Our community deserves a project built on data and equity, not on special favors.

Hello

My name is Erik Larsen. I am writing FOR agenda item 7. The K line northern extension will further knit our rail system together and provide far more options for easily getting around than exist currently. All researchand experience, both by Metro and other agencies, shows that we can tunnel this route with minimal to no disruption to people on the surface. We as a city need to stop giving into the loud voices of the privileged few and their nonsensical claims of potential harm that fly in the face of all existing evidence. This line will benefit countless Angelenos, and we should be doing everything in our power to get this project moving. I look forward to being able to ride this train.

Respectfully

Erik Larsen

Hello,

I'm a Los Angeles resident and local realtor who strongly supports the northern extension of the K Line. My work takes me all over the city, and I look forward to the day I can rely on rail instead of a car to get where I need to go. This extension would make that possible.

In addition to my own needs, I am a parent of two young children. I'm thinking about the future we're building. I want them to grow up in a Los Angeles that prioritizes public transportation. A city that's more connected, sustainable, and accessible for everyone.

Please approve the K line extension with no delays.

Thank you,

Angie Greenspan

Hello,

I am a Mid-City/Miracle Mile resident that would be directly served by the proposed K Line northern extension, and I am urging you to vote **YES** on advancing the project without further delay.

This project is not abstract to the common, working Angeleno, especially those living in the corridor it would serve. It represents meaningful reductions in travel time, improved access to jobs, increased economic freedom, a greener future, improved public health, and movement toward a less car-dependent and equitable city. These are goals that both Metro and the common person share.

Concerns being raised about impacts around the corridor, especially regarding tunneling and reduced property values. However, it's important to recognize that these concerns do not reflect the day-to-day needs of riders and working Angelenos who would rely most on the K Line.

Delaying the project further, especially given an already distant timeline, risks weakening public trust in Metro and slowing progress toward our broader vision for a connected city. A 2041 opening date is very difficult to accept for communities that are ready to rely on this infrastructure.

I appreciate the work Metro does in a challenging bureaucratic environment, and I strongly support the agency's mission. I also believe the people of Los Angeles deserve a healthy, well-connected city. That's exactly why I'm urging you to move this project forward decisively.

Thank you for your time and your public service.

Sincerely,

Nathan R.
Miracle Mile resident

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Asa Slayton

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Kate
Burbank

Dear Members of the Metro Board,

I am writing as a concerned Los Angeles resident to urge you to vote YES on the K Line northern extension and to oppose any further delays to this critical project.

Los Angeles has waited long enough. Our city's public transportation infrastructure has historically lagged behind the needs of its residents, and the K Line northern extension represents a meaningful step toward correcting that. Pushing this project to 2041 is not just a bureaucratic inconvenience it is a disservice to the hundreds of thousands of Angelenos who depend on accessible, reliable transit to get to work, school, and essential services every single day.

More public transportation is not a luxury for this city it is a necessity. Every year of delay means more cars on already-congested freeways, more carbon emissions, and more residents left without viable alternatives to driving. The time to act is now, not decades from now. I respectfully but firmly urge the Board to vote YES and move this project forward without further delay.

The people of Los Angeles are counting on you to prioritize their mobility, their time, and their future. Thank you for your service and your consideration.

Sincerely,

Majdouline

Hello,

I'm writing in strong support of the K Line Northern Extension. I am a resident of Palms/Culver City, and I work in Hollywood. My commute is 45 minutes by driving or an hour and a half if I took the train to DTLA and Hollywood. If there were a train to work instead that would get me to work on time, I would take it.

This matter is extremely urgent and cannot be delayed. Please vote YES!

Thanks,
Ethan Mullen

Dear Board Clerk,

Please record the following public comment for the March 26, 2026, Board of Directors meeting regarding Item #7 (K-Line Northern Extension):

Position: FOR

I am writing to express my strong support for the K-Line northern extension. There is a great need for the San Vicente-Fairfax alignment. This extension is long overdue and a step toward the critical need for more public transit within Los Angeles.

This project must be prioritized immediately. I urge that the Board eliminate all delays and expedite and accelerate the building process, as well as MERV-14 filters, with 50 air changes per hour. This is dire for the health maintenance of the public.

Sincerely,

Roya Gowhari

Esteemed Board Clerk and Members of the Board and such,

I am emailing saying you should support the extension to the K line that extends the line into West Hollywood and ends at the Hollywood Bowl, and you simply cannot delay.

Traffic is always a nightmare in West Hollywood, and this serves as a way to alleviate that on a very large scale. From the days of the red car being stripped out in favor of highways, we have been robbed as a city. I remember watching Who Framed Roger Rabbit as a child and having this imprinted on my little consciousness, and here I am at age 32 metaphorically on my knees.

We have waited decades for robust train lines in Los Angeles, and any delay is delaying a dream and a reality that all Angelenos deserve. Please support the extension, post haste.

Sincerely,

Atlas Novack

Hello,

Once again we find ourselves starting down a delay in a metro project because a few rich homeowners don't understand how tunnels work. The have that a board member recused herself and is still lobotomy lobbies to Friday the project is illegal and upsetting.

Do not delay the K line extension. It must move forward. If you do, every board never should be investigated and I will support any and all action to make all of your lives increasingly difficult until there is a metro board that prioritizes the majority over a few rich idiots.

Thank you,

Carter McGowen

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this

board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

Hi there,

My name is Aaron Butwinick and I'm a Los Angeles resident and frequent metro train user.

Please vote YES on the K line extension and do not allow any more delays. We cannot be delayed until 2041 to have a train line that runs through the central neighborhoods of our city. There are hundreds of thousands of people in West Hollywood and Central LA that would use metro to get to work, stimulate the economy, and connect with other parts of the city. Please do not let a very, very small community of people keep this from happening. LA is a community, not a sole person.

We NEED better metro in Los Angeles, and this train line will help with tourism, job placement, and overall well-being and morale in our city.

NO MORE DELAYS!

Thank you very much. I greatly appreciate your help and support for this extension.

Sincerely,
Aaron

Dear Metro Board Member,
I am a resident of Lafayette Square which is a historical Black neighborhood in Mid City, and I strongly oppose LPA Option 2 for the K Line Northern Extension.

This alignment deviates from the original plan following the elimination of the Crenshaw/Wilshire station, and it unfairly shifts the burden onto our historic residential neighborhood.

LPA Option 2 would create approximately 22 subsurface easements beneath homes older than 100 years old, raising serious concerns about property rights, structural impacts, and construction disruption.

It would also remove our local grocery store and the only pharmacy serving the Mid City community within miles—cutting off access to essential services which will cause a food desert.

The Mid City neighborhood should not bear the brunt of accommodating changes made to meet the needs of other communities especially West Hollywood which has full access within a small radius to grocery stores and pharmacies. We ask Metro to reject LPA Option 2 and pursue an alternative that avoids unnecessary impacts to residential areas and preserves critical local resources.

Thank you for your consideration.
Sincerely,

Tonia Byrd

Build the K Line north. No compromises. It's one of the most important transportation projects you've ever considered for LA. Pause any freeway expansion and fast-track the K Line to Hollywood Bowl. Don't give into a handful of NIMBYs who don't believe in science. Don't let corruption win.

AND find a way to tie the E and K together so folks can take a one seat ride from LAX people mover to DTLA.

Don't mess this up for an entire generation.

Thank you.

-David

Hello Metro Board,

Please proceed to vote yes on the K line extension northbound. As someone who would be able to take the E line and connect to the K and then D to access Koreatown if this existed, it would greatly increase my ridership and decrease my car usage which i desperately want.

I believe the addition 2.3 million dollars spend to do an impact report and the adjustments to shift the path to go under as few homes as possible is more than sufficient proof that this project would be safe to complete. We shouldn't let the opinions of a few people affect a decision grounded in facts that would help millions of LA residents live a safer and more enjoyable life.

I ask you to vote yes and not delay this project any further

Dear Members of the Metro Board,

I am writing as a concerned Los Angeles resident to urge you to vote YES on the K Line extension and to oppose any other delays.

Los Angeles has waited long enough. Pushing this project to 2041 is not a bureaucratic inconvenience; it is a disservice to the Angelenos who depend on reliable transit to get to work, school, and essential services every single day.

More public transportation is not a luxury for this city, it is a necessity. Every year this project is delayed it means more congestion, more emissions, and more residents left without alternatives to driving. The time to act is now.

Please vote YES and move this project forward. The people of Los Angeles are counting on you. Thank you for your time and consideration.

Sincerely,
Tabytha Griffin

Hello! Regarding the K Line extension proposal on #7 of the agenda for tomorrow's meeting, I would like to voice my full support of the extension WITHOUT the delay.

I am a lifelong resident of Los Angeles, and the K Line extension just makes sense. There is a huge demand for greater access to areas of LA with the most destinations. Greater connectivity and transit access will support my neighbors with lower incomes to be able to get around without a car. It will help relieve other metro and bus lines, allow greater resilience if there are delays on other lines, and ease traffic in some of the most densely populated areas of the city.

Los Angeles has waited a very long time for more usable transit, and we should not pass up this opportunity to provide essential city services for the majority of Angelenos just to prioritize the interests of a minority of extremely wealthy neighbors (whose needs the city can also address through this project!).

I urge you to support the K Line extension ASAP without further delay so we can meet our wonderful city's potential.

Thank you for your time!
Kaitlyn McQuown

Hello!

I'm writing in regarding Item #7. I'm am FOR the staff recommendation regarding the San Vicente-Fairfax alignment and it should NOT be delayed because of a tiny group of NIMBY homeowners.

Looking forward to riding from my closest K-line stop to major city hubs along this alignment soon!

Dear Metro board and political leaders,

I'm exhausted by the endless delays and deep corruption that continue to cripple the growth and potential success of Metro's rail system. **I urge you to approve the K Line Northern Extension San Vicente-Fairfax alignment!**

No amount of delays or studies will placate a handful of residents who choose to ignore facts about the impacts of this extension project. The time and energy to provide thorough research and community engagement has been taken and **it is enough**. **Move forward for the sake of the hundreds of thousand riders whose lives will be improved by this extension.**

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

As a carless, daily transit commuter, this project will allow me and other transit riders to more easily access the middle of the city, a place I now actively avoid because of how difficult it is to get to. This area is rife with car congestion and slow bus service, with few safe alternatives for biking and walking. As someone who worked at the Bowl and the Ford for years, the additional service to the Bowl would be incredible. I spent so many hot summer days climbing 30 minutes from the Hollywood/Highland station up to venues with little shade, zero food options, crazy drivers, and no usable bus alternatives.

NO MORE DELAYS. NO MORE STUDYS. NO MORE WASTED TAX-PAYER DOLLARS. Approve the K Line Northern Ext San Vicente-Fairfax alignment and switch back to the DEIR option so transit riders aren't delayed each trip. **Don't waste $165M to address non-issues.**

Thank you,
Virginia

Please stop delaying the K line and deny the Mayor's Motion.. The unwarranted fear of a few powerful people in Lafayette Squate should not hurt the future of Los Angeles. The possible routes might go under my house and/or neighborhood. Yet I trust the findings of our city that tunneling 100 feet underground will not have a negative impact. We need the K line, we have spent a fortune planning it. We need to build it! Vote Yes. Deny Bass's motion.

Hello!

I'm reaching out to show my support for the K Line Northern Extension accelerated timeline and Hybrid alternative.

Sadly, do not have the money to buy your vote, so all I can do is appeal to your humanity! This project will greatly improve the quality of life for myself and my fellow citizens as the highest ridership light rail line in the country. I understand a wealthy minority wants to stand in the way for personal reasons, but ultimately it is up to those in positions of power (yourself) to make the best choice for the community as a whole. This rail will improve the area and lifestyle of LA for generations to come. Please fight hard to make it happen!!

Best,
Beatrice
(miracle mile resident)

Dear Metro Board Members,

I have lived in West Hollywood for 40 years and am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route seems the best route as it would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Rob Goubeaux

Dear Board Clerk,

Please record the following public comment for the March 26, 2026, Board of Directors meeting regarding Item #7 (K-Line Northern Extension):

Position: FOR

I am writing to express my strong support for the K-Line northern extension. There is a great need for the San Vicente-Fairfax alignment. This extension is long overdue and a step toward the critical need for public transit within Los Angeles.

This project must be prioritized immediately. I urge that the Board eliminate all delays and expedite and accelerate the building process, as well as MERV-14 filters, with 50 air changes per hour. This is dire for the health maintenance of the public.

Sincerely,
Harrison

Hello Metro Board,

My name is Matthew Lai, and I'm an 11 year resident of Los Angeles, now residing near Sunset and Crescent Heights. I am in FOR item #7, the K-Line Extension through West Hollywood and up to the Hollywood Bowl.

As the second largest metro in the United States, and in our efforts to be a world class city, we should meet the same global standard of a world class city and have a metro that serves the entire city. We are woefully behind that, but that should not deter any incremental progress as the K Line Extension would bring. Public transportation helps remove car trip miles and allows for a more walkable public, all of which serve a greater share of the population of Los Angeles than is currently served by a car-dominant culture.

I implore you to please vote FOR and approve Item #7, the K-Line Extension. Thank you so much for your attention.

Concerned and sincerely yours,
Matthew

Dear Metro Board Members,

I am writing to express my strong support for the K Line Northern Extension and to urge you to vote **yes** at your March 26 meeting without further delay.

At this stage, further delay is not neutral—it is a decision with real consequences. Costs will continue to rise, timelines will slip, and the people who live and work in these communities will continue to be underserved. Los Angeles has already studied this corridor extensively. The need is clear, the benefits are well established, and the time for action is now.

This project represents one of the most important missing links in Los Angeles' transit system. For decades, the central Westside—particularly West Hollywood, Fairfax, and surrounding neighborhoods—has remained one of the most densely populated and economically vital areas in the region without direct rail access. The K Line Northern Extension is the **long-overdue** solution to that gap; one that will reduce congestion in one of the city's most traffic-choked corridors, expand access to jobs, housing, and essential destinations, support Los Angeles' climate and sustainability goals, str and finally deliver long-overdue rail access to communities that have been underserved for decades.

But beyond the policy arguments, **this is also a question of leadership.**

You have been entrusted with the **responsibility to shape the future of Los Angeles.** That responsibility requires not just careful consideration, but the courage to act with a clear, forward-looking vision for the city. Projects like the K Line Northern Extension are exactly the kind of investments that define whether Los Angeles evolves into a more connected, accessible, and sustainable place—or continues to fall short of that potential.

The residents of this region are not asking for something speculative or unnecessary. **We are asking you to do your job**: to move forward on a project that has been studied, justified, and widely supported, and to use the authority and power you have been given to meaningfully improve this city.

We expect decisive action. We expect leadership. And we expect you to vote yes. Delaying or rejecting this project sends the wrong message and will have devastating

consequences—to residents, to advocates, and to the future of Los Angeles. Advancing it demonstrates that this Board is willing to meet the moment.

I urge you to move this project forward without hesitation.

Sincerely,

Kira Armbrust (West Hollywood Resident)

Public Comment (Item No. 7) March 26, 2026 Board Regular Meeting

(K LINE NORTHERN EXTENSION (KNE) LOCALLY PREFERRED ALTERNATIVE (LPA))

To the Board:

I am a San Gabriel Valley resident who rides another Metro rail line for my work commute; I am represented on the Board by Hilda Solis and Tim Sandoval. I strongly support a motion to APPROVE the San Vicente-Fairfax alignment consistent with the Metro staff recommendation but with amended language approving the draft EIR mid-city alignment, rather than the Crenshaw ROW mid-city alignment.

I understand the project to involve an extremely deep tunnel through mid-city at over 80 feet in depth. HSC § 13210 defines a high-rise building as being over 75 feet in height. The tunnel would sit far, far below surface-level streets and structures. I also understand that Metro has spent approximately two million in taxpayer dollars to complete a peer-reviewed study of the effects of the planned tunnel at surface levels, finding no effects, which is completely unsurprising.

Why, then, does Metro staff recommend going with the Crenshaw ROW alignment over the draft EIR alignment, when metro projects the Crenshaw ROW alignment to add over 160 million in costs to the project and to add 30 seconds to every trip through mid-City on the extended K Line? The only explanation I've found is that well-connected constituents live above the draft EIR mid-city alignment who are vocal and who refuse to accept the conclusions of the peer-review study. The Crenshaw ROW is an unacceptable waste of both taxpayer dollars and Metro riders' time, and I urge Board members Solis and Sandoval to point this out at the public meeting.

In addition, I have read online that Board member Jacquelyn Dupont-Walker lives in Lafayette Square *directly above* the proposed Crenshaw ROW alignment and near the draft EIR mid-city alignment and that she has nevertheless been actively lobbying to kill

this project. This is a disturbing disregard for conflict of interest rules that warrants her removal from the Board.

Thank you,
Matthew Meehan

Dear Chair and Members of the Metro Board,

I am writing as a resident of the Mid-City area to express my strenuous opposition to the proposed **"Crenshaw ROW: Option 2"** (the $136M Diversion) for the K Line Northern Extension. While I fully support the staff-recommended San Vicente-Fairfax alignment, the inclusion of a costly "S-curve" to bypass 33 homes in Lafayette Square is an unacceptable use of public funds.

This diversion is deeply concerning for several reasons:

- **Lack of Scientific Justification:** Metro's own peer-reviewed tunneling studies and decades of operational data from the B and D Lines prove that deep-bore tunneling at 80–120 feet is undetectable at the surface. There is no engineering or safety data to suggest that these 33 homes require a $136M bypass while thousands of other Angelenos safely reside above Metro's existing 35-mile tunnel network.
- **Preferential Treatment:** Approving a hundred-million-dollar diversion for a small group of influential residents—at a time when Metro is facing significant budgetary pressures—smacks of preferential treatment. It sets a dangerous precedent that specific neighborhoods can "opt-out" of regional infrastructure at the expense of the general taxpayer.
- **Economic Impact on the Pico Corridor:** The K Line is the primary engine for the long-overdue redevelopment of the Pico Boulevard corridor. By diverting funds and increasing the complexity of the "direct" route, you risk delaying the revitalization of Midtown Crossing and the surrounding business district.
- **Degradation of Service:** Metro's own reports indicate that this diversion adds unnecessary travel time for every future rider. We should be prioritizing the

fastest, most efficient connection between South LA, the Museum District, and Hollywood, not compromising the rider experience to satisfy unverified vibration concerns.

I urge the Board to reject **"Option 2"** and any further motions for delay. Please approve the staff-recommended alignment as originally studied in the 2024 Draft EIR. Our community deserves a project built on data and equity, not on special favors.

Sincerely,

Mary Beth Fielder

Hello,

I'm writing to express my support for the Metro staff recommendation for the K Line extension alignment, and my outrage about the Mayor's plans to stonewall progress on the project because one of her appointees has a conflict of interest. It is shameful to disregard Metro's study showing that tunneling has no perceptible impact on homeowners above the alignment, which already has cost 18 months and more than 2 million dollars, only to propose more delays and more studies that will show the exact same thing.

We need this project built, now! LA cannot wait decades for rail projects to come online, just because an appointee of the mayor has a *perceived* financial stake in the outcome of the alignment. This is a scandal.

Hi there,

I am a registered voter in Los Angeles county, and I wanted to reach out to express my enthusiastic support for the proposed northern extension of the K Line. This would be a significant and positive change for Los Angeles, and I know many of us are already very excited about it.

Thank you so much for your time, and best wishes!

Dear Metro board and political leaders,

Please approve the K Line Northern Extension San Vicente-Fairfax alignment! Stop delaying.

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDIES. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

Isaac Diskin

Dear Board Members,

I live in the South Bay and the K line is the main way I go north to Los Angeles. I dream of a day when I will not have to change to a different mode once I hit Expo. Please do not delay this train.

Unfortunately, the Mayor released a public statement on Monday, March 23 saying that she supports the K Line Northern Extension and would be voting for it to move "full steam ahead" while at the same time drafting a motion that would delay the project by delaying the likelihood of West Hollywood and LA County getting the required funding forward.

I demand you pull this motion to amend and support staff's recommendation. We've already spent 18 months and $2.3M on detailed technical studies; so now the Mayor wants to do ANOTHER technical study outside of Metro. This is unnecessary. We know that tunneling 100 feet below ground has zero surface impacts.

Like the K Line South, this project might be delayed due to the unwarranted concerns of a small number of people.

In addition, like the K Line South vote, the corrupt and unethical actions of Board members are potentially delaying this project and adding millions if not more to the cost. Jackie Dupont-Walker has improperly been influencing the vote behind the scenes while claiming publicly she is recused.

Furthermore, we should save $165M and go back to the DEIR route through Mid City, since tunneling has zero impacts. Please stop playing games with a $15B light rail project, and vote to move it forward cleanly, without delays or amendments, and without collaborating with a "recused" board member.

Sincerely,
M.C. Guerry

Subject: (EXTERNAL) Public comment - "Crenshaw LRT line northern extension"

CAUTION: This email originated from outside of the organization. Help Metro protect against cyber threats. Verify the sender's email address carefully. Do not click links or attachments unless you trust the sender. Be aware of phishing signs such as urgent requests, unexpected links, or offers that seem too good to be true. Be cautious of spoofed emails that appear to come from trusted sources. Report suspicious emails. Follow Metro policies and update accounts only through official channels.

Dear Metro Board,

I would like to submit public comment in regards to the Crenshaw ("K") LRT line phase II / "northern extension".

Following is my feedback and comment:

(**1**) The line should be referred to as "Crenshaw line" (not "K line"). Generally, please consider reverting back to the traditional rail-line names, not your new senseless "Single Alphabet Letter" line names. Your new line names (e.g. "A line", "B line", etc.) make no sense, and are confusing and rider-unfriendly. The public was totally disregarded when your board made a decision to switch to the "Single Alphabet Letter" line names. On the other hand, the traditional names ("Purple line", "Blue line", "Expo line", "Crenshaw line", etc.) have always worked out great and were incomparably better. Thank you for your consideration.

(**2**) I **support** the proposed "Fairfax / San Vicente" alignment.

(**3**) The plan should also include the "**La Brea**" alignment. As you are aware, La Brea Avenue is a very busy transit corridor, with high transit demand and ridership. Traffic on La Brea Avenue is awful, causing enormous delays and bus wait-time up to 30 minutes during daytime. Bus service on La Brea is extremely unreliable, thus a metro-rail corridor is critically important. Adding La Brea Avenue to the plan will significantly improve our Metro-Rail network and provide a new reliable option for commuters. ***Attached** please find a revised image of the "Crenshaw Line - Northern extension", with my suggestions.

(**4**) Move the proposed "Midtown Crossing" station north-west to be built at "La Brea / San Vicente" (or "La Brea / Pico") location, due to it being a more popular and dense place, including shopping centers;

(**5**) If Metro decides not to include the "La Brea" alignment at the moment, the stations should still be built in such a way so to allow future "upgrades" and seamless integration with the "La Brea" (and/or other corridor) LRT lines.

Thank you.

~ Alek Friedman

Hollywood, California
[redacted]

CRENSHAW ("K") LINE - Phase II Suggestions:

1) Support the "Fairfax / San Vicente" alignment;
2) Consider an additional "La Brea" alignment. It should also be included due to La Brea Avenue being a highly popular north-south corridor. The "La Brea" alignment should also connect to the "Hollywood & Highland" Red line station -- and continue to the "Hollywood Bowl" terminus;
3) Move the proposed "Midtown Crossing" station north-west to "San Vicente / La Brea" intersection, as it's by far more popular than the currently proposed location.

I'm submitting a comment in support of the K Line Northern Extension into West Hollywood, and I urge the board to vote YES on this agenda item.
Building more transit options will alleviate traffic in this area, and further delays to this project will hold Los Angeles from being the world class city we are striving to be.

Say NO to Mayor Bass's Lafayette Sq motion.

Do not screw over the entire city.

On Mar 23, 2026, at 22:42, Auguste Miller [redacted] wrote:

K Line modifications forced on Metro:
To be clear you are willing to WASTE hundreds of thousands of hours EVERY YEAR of people's (transit riders) time by moving the station slightly off its preferred path, causing a 30 second delay, in order to appease 20 people who are not even serious in their concerns in the first place.

Insanity.

That 30 seconds per trip sounds bad already, but then you realize that results in 100,000 hours per year of transit riders time that is lost forever— Time that could be spent with family, working, etc.

Plus, due to the 350' longer walk to the platforms from the station entrance at Crenshaw/Adams required by the alignment change, it also adds ~2 minutes each way for every rider that uses the station. The ridership estimate for that station is 2,200 riders/day, so you can add another ~25,000 hours per year of lost time.

All-in-all a total of ~125,000 hours per year of transit riders time wasted (people who skew lower income overall) just to appease a few wealthy homeowners (who are not even appeased).

Do the right thing. Be **public servants**. Approve the initial design. Tunnels are built with no impact on the surface every day. There is a greater good here.
Stop acting like a small suburban town and stop treating the public / transit riders like second class citizen, bearing the brunt and wasting their time going forward… for the sake of? Whom?!

History will judge.

On Mar 22, 2026, at 13:31, Auguste Miller [redacted] > wrote:

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood. The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input *[I recommend watching Nandert's latest video on YouTube or any social media platform at your earliest convenience*] and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Sincerely,
Auguste Miller

Hello Board Members,

My name is Ethan and I'm a Los Angeles resident currently living in Hollywood, but frequently commuting down to Inglewood via Metro as I'm without a car. Currently, my commute takes upwards of 90 minutes for what would otherwise be a 30-40 minute drive and requires me to switch off between a train and bus at three different points.

With the K line being expanded north to meet the Hollywood/Highland station, this would not only greatly reduce many commuters' time, it would also encourage less people in Central LA to drive as they could more easily traverse the Hollywood/Mid-City regions via the LA Metro. I've discussed this expansion with many friends and colleagues and everybody is in favor of it and excited for the potential of LA becoming a truly walkable, less car dependent city as it once was.

I hope that my message along with many others plays into your consideration of approving this expansion. With the Olympics only two short years away, it would make all the difference in the world for many locals and visitors alike.

Thank you for your time!

Hello there,

As a resident of both Los Angeles County and the City of Los Angeles, I strongly support the K Line Northern Extension (Item 2025-0846) and its Locally Preferred Alternative.

My position is in favor of Item 2025-0846 and the advancement of the K Line Northern Extension project.

Los Angeles is in urgent need of expanded, accessible public transit. Our city continues to struggle with severe traffic congestion and increasing noise pollution, which significantly impacts quality of life. A more efficient and reliable subway system is essential for our growing population.

In addition, West Hollywood remains notably disconnected from the existing subway network. This proposed extension would provide critical connectivity, linking residents to major transit lines as well as the LAX Metro Transit Center—an important and necessary improvement for the region.

Thank you for your consideration.

Best,

Ji Hwang

Please approve K LINE NORTHERN EXTENSION (KNE) - LOCALLY PREFERRED ALTERNATIVE(LPA) as is with no new amendments or changes. Impacts are already studied and understood, please do not waste taxpayer money and time. Route options have been studied and research has been done/peer reviewed, now it's time to act!

Please think of the quality of life -- and literal lives lost -- by delaying this project. A slower delivery means Angelenos go longer with more polluted air and more congested/dangerous commutes. Sadly, it means more deadly car accidents, especially considering the higher likelihood of driving under the influence around nightlife corridors and venues like WEHO and Hollywood Bowl.

Simply pass as is and let's build a cleaner, safer, more affordable LA!

Dear Members of the Metro Board,

I am writing as a concerned Los Angeles resident to urge you to vote YES on the K Line northern extension and to oppose any further delays.

Public transportation is something that connects our communities, helps us make connections and enjoy the city in a more accessible way. It is good for our earth and it is good for our pocketbooks. Please recognize that you are representing your constituents by doing your job and to vote against this is to not support your constituents and instead support your own interests. That is not a noble cause or a noble action.

Los Angeles has waited long enough. Pushing this project to 2041 is not a bureaucratic inconvenience; it is a disservice to the Angelenos who depend on reliable transit to get to work, school, and essential services every single day. More public transportation is not a luxury for this city, it is a necessity.

Every year of delay means more congestion, more emissions, and more residents left without alternatives to driving. The time to act is now.

Please vote YES and move this project forward. The people of Los Angeles are counting on you.

Thank you for your consideration.

Best,
Nicole Cortese

I am writing in support of the K Line extension through the West Hollywood San Vicente-Fairfax alignment and against any obstructions or delays pushed by the small number of homeowners in Lafayette Square over ridiculous concerns that tunneling hundreds of feet below their homes will cause vibrations. These concerns are unfounded and tunneling has been proven safe worldwide. This line would connect LAX, Inglewood, LACMA, The Grove, Cedars Sinai, Beverly Center, most of West Hollywood, Hollywood, and the Hollywood Bowl. Any delay or further study to appease a small number of homeowners is unacceptable. Please approve the project and start now. Thank you.

AGENDA #7: GENERAL COMMENT K North Extension (KNE)

LA Metro Board,

The Mayor has drafted a motion that would delay the project for community outreach that has already been done, research that has already been done, and for finding route alternatives that has already been done. You've already spent over $2 million on this.

LA Metro staff have already identified 3 routes that would avoid Lafayette Square entirely in the Mid-City Additional Alignment Analysis. Options 5, 11, and 12 do not have easements for Lafayette Square residences.

The Mayors motion would indefinitely delay and likely kill the K North Extension as necessary funding cannot be established without a chosen route. Further delays would kill the ability for an EIFD, as well as raise labor / construction costs, and require even more funding. This would be a catastrophic detriment to the cities of WeHo and LA.

It is blatant that the Mayor's goal is to avoid Lafayette Square because 2 of the Metro Board members live there. BUT WE DON'T NEED TO KILL THE EXTENSION!

If you cannot find the courage to stand up to the baseless concerns of a few dozen people in Lafayette Square and approve the KNE LPA without addendum, then choose option 5, 11, or 12 for phase 1 of the KNE.

Do not indefinitely delay and kill what would be the highest ridership light rail line in the country.

Andrew

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Amelia Reyes

To [redacted]
Subject: APPROVE THE K LINE; NO MORE DELAY; PROSECUTE CORRUPTION

To the Board:

I'm a 25 year resident of the Oxford Square neighborhood (nearly adjacent to the K=Line's mid-town station) and president of the Oxford Square neighborhood association.

Over the last 18 months this board has spent millions of dollars and delayed the project with "studies" at the behest of two members with illegal conflicts of interest (Holly Mitchel and Jackie Dupont-Walker). These members should not have even discussed the project let alone vote to delay it. We are asking the attorney general to review this situation.

The K-Line is extremely important to our neighborhood and has broad support here and throughout the service area. It is projected to have the highest ridership of any line, connecting LAX to Wilshire and Hollywood, and increase the usage of the east-west lines (expo, D-line, red line) thanks to the network effect.

Mid-city is blighted and we need the investment the mid-town station will bring.

The City has dramatically upzOned our area on the basis that density will be served by public transportation. If that's the deal, then build it.

Adopt the staff recommendation, and set to the task of ACCELERATING the construction date.

Everyone sees Mayor Bass's amendment for what it is … a delay tactic, for all intents and purposes fatal to the project.

Approve the project through as staff has recommended.

Regards,

Chris Elwell

Dear Directors Najarian, Butts, and Bass-

The Mayor released a public statement on Monday, March 23 saying that she supports the K Line Northern Extension and would be voting for it to move "full steam ahead" while at the same time drafting a motion that would delay the project by delaying the likelihood of West Hollywood and LA County moving the required funding forward.

This is unacceptable - this line will be the most important transit development in a generation. I demand you pull this motion to amend and support staff's recommendation.

Please stop entertaining delay tactics and NIMBY complaints around a $15B light rail project, and vote to move it forward cleanly, without delays or amendments, and without collaborating with "recused" board member Jackie Dupont-Walker.

August Brown

Dear Metro Board Clerk,

Please submit this enail as written public comment for the upcoming Board of Directors meeting March 26, 2026.

I am writing to express strong support for the K Line Northern Extension and to urge the Board to vote in favor of selecting the San Vicente-Fairfax alternative.

The project is crucial to connecting our communities, improving access to job and affordable housing and providing an alternative to freeway travel on the 405. The San Vicente-Fairfax route offers the most ridership potential and directly serves dense residential and employment areas that need this infrastructure the most.

It is time to move past delays and finish this line. I urge the Board to approve this extension and movie it to the next phase of planning and design.

Thank you for your time and consideration.

Sincerely,
Cristina Korzon

Dear Members of the Metro Board of Directors,

I am writing as a Los Angeles county resident and transit advocate to urge your support for the San Vicente-Fairfax alignment as the Locally Preferred Alternative for the K Line Northern Extension.

Los Angeles is a city of multiple, distinct urban centers, not a traditional downtown-centric metropolis. That geographic reality demands a transit network built like a grid, not a hub-and-spoke system that funnels riders through one central point. The San Vicente-Fairfax alignment is the only option under consideration that meaningfully advances that vision. By connecting the E Line, D Line, and B Line through Mid-City, West Hollywood, and Hollywood, it closes a critical north-south gap in our rail network and creates genuine cross-city mobility for riders traveling between neighborhoods that currently have no practical rail connection.

The numbers bear this out. Metro's own estimates project up to 98,000 daily trips on the full line by 2045, which places it among the highest ridership projections for any light rail line in the country. The alignment places over 125,000 jobs within a half-mile of new stations and brings an estimated 325,000 residents into the transit catchment area. It connects four rail lines and six of the ten busiest Metro bus lines, maximizing the utility of our existing network rather than duplicating it.

Beyond ridership statistics, this alignment serves the people who depend most on public transit. It connects riders to Cedars-Sinai Medical Center, the Farmers Market, the Beverly Center, and the heart of the Rainbow District, which are everyday destinations for renters, workers, and residents across socioeconomic backgrounds. West Hollywood, one of the highest-renter-density cities in Los Angeles County, stands to gain enormous quality-of-life improvements from this investment. That is precisely why 86% of West Hollywood voters backed the vision behind this alignment when they supported Measure M.

I understand that the Planning and Programming Committee advanced this item without a formal recommendation. I urge the full Board not to let procedural hesitation or pressure from opponents of transit infrastructure derail a project that Metro staff, county supervisors, and the community have clearly and consistently supported. The alternative alignments offer a fraction of the connectivity and ridership potential of San Vicente-Fairfax. Choosing a lesser alignment to minimize short-term friction would be a long-term failure of this region's transportation future.

As someone who wishes to live along this route upon graduation from college, I really hope that this alignment goes through and is placed as a priority for the county. Los Angeles has an opportunity to make a transit decision that will shape the city's geography for generations. Please vote yes on the San Vicente-Fairfax alignment.

Thank you for your time and your service to our region.

Respectfully,
John Riffle
South Pasadena, CA

Hello metro board,
As someone who went from riding the metro only occasionally 2 years ago to someone who uses it nearly every day - by choice, not even necessity - I know how freeing it is to discover all the places in the city I was going before could actually be reached by metro and that's a feeling everyone deserves. The best way to increase ridership is to expand to places people want (and need) to go to and from, and the K line is going to open up countless amounts of new travelers and travel opportunities. Choosing to put the selfish desires of a small handful of NIMBY's above the thousands and thousands of community members who have been begging and hoping for expanding the metro for years is disgraceful and goes against what this city does best - expanding opportunities in ways that benefit everyone regardless of class structures. Our metro is already falling so behind the expansion efforts of most other major cities, and to willfully keep it from trying to catch up is a bad look (think of the Olympics!). Do the right thing and expand the K Line as soon as possible, it's clearly what the people want, need, and deserve. Thank you.

Sincerely,
A passionate and frequent metro user,
Andi Repke

Dear Metro Board Clerk and Directors,

Please include this statement in the official record for **Item 7** regarding the K-Line Northern Extension on your March 26 agenda.

As a 25-year resident of **West Hollywood**—having been both a homeowner and now a long-term renter—I offer a unique perspective on the proposed K-Line Northern Extension. I live within three blocks of the potential station at Fairfax and Santa Monica Boulevard.

Since February 2025, I have lived car-free, relying on my bicycle and existing transit. While I value our regional transit goals, I am deeply concerned that the current trajectory of the San Vicente-Fairfax alignment and the 75-year EIFD debt will hollow out the core of our community.

In a compact city like West Hollywood, nearly every neighborhood falls within a half-mile of a major transit hub. Under the streamlining of SB 79, this proximity creates an existential threat to our housing diversity and neighborhood character:

- **The Squeeze on the "Great Middle":** Our current development model favors a bifurcated housing market: high-end units with a small percentage of inclusionary affordable units. This leaves no room for the "Great Middle"—the workforce and long-term residents who rely on rent-stabilized housing. With West Hollywood losing approximately 1,000 rent-stabilized units over the last decade, we are systematically removing the ladder of housing stability.
- **Destabilization of Neighborhood Integrity:** The immense pressure to service 75 years of EIFD debt doesn't just threaten renters; it risks the permanent destabilization of our remaining single-family neighborhoods. Administrative streamlining often bypasses the

nuanced planning needed to protect the integrity of these low-density residential pockets where residents have invested decades of their lives.

Furthermore, I urge the Board to commission a comprehensive Anti-Displacement and Neighborhood Integrity Study specifically for the Santa Monica Boulevard Corridor through West Hollywood before finalizing this alignment. We must have a data-driven understanding of how this infrastructure will affect both our existing rent-stabilized housing stock and the long-term residents who sustain our neighborhood fabric.

Transit infrastructure should be a public good, not a catalyst for a net loss of stable housing or the erosion of established neighborhoods. I urge the Metro Board to ensure that any K-Line approval includes specific, enforceable protections for rent-stabilized stock, single-family compatibility, and the middle-income residents who make West Hollywood a functional, diverse community.

Sincerely,

Victor Omelczenko, West Hollywood Center City Resident

Hello,

As a resident of West Hollywood for nearly 11 years, myself, along with my neighbors, are in **FULL SUPPORT** for the extension of the K Line, through West Hollywood ending at the Hollywood Bowl.

This would **improve the quality of life** for everyone in the neighborhood, reduce traffic and traffic related accidents/noise, as well as boost the economy in the neighborhood for local businesses by linking us to folks in other parts of LA.

Not only should this project go through, it should *not* be postponed further, and the decision to break ground should be **expedited.** Let's get this done, and the project/construction started ASAP.

LA is the only major city without a trusted train system, it's time we catch up.

Please **APPROVE the extension** of the K Line through West Hollywood.

Thank you,

Christina Giarmidis

Hello!

My name is Ryan and I've lived in West Hollywood for the last 6 years and I wanted to share that I fully **support** the K Line Northern Extension!! The prospect of having a train service so close to home is very exciting.

The timeline for this project feels extremely long - I feel that it **should be expedited** as it could greatly improve the lives and mobility of West Hollywood residents.

Additionally, I'd love to see the inclusion of MERV-14 filters in all trains. Anything to reduce the spread of pollution and airborne illnesses are a plus in my mind. These filters are used by the BART system in the Bay Area and they're great!

Thanks so much,
Ryan Larson

Hello, I am a resident and regular transit rider in the Los Angeles/Hollywood area and I am writing to support the staff recommendation for the K line Northern Extension and OPPOSE any further delays.

It is absolutely unacceptable to risk or delay any further what will be the highest ridership light rail line in the country and hundreds of millions of taxpayer dollars over the scientifically unfounded fears of a few NIMBY homeowners.

NIMBY's are going to NIMBY but it is your RESPONSIBILITY to vote for the best route that will serve the most amount of people most efficiently while being fiscally prudent and that is Option 1- Draft EIR.

Please support and vote FOR the K line San Vincente LPA Alignment without addendum today.

LA Metro has done a great job with their analysis and has a long history of successful tunneling projects with the B and D lines.

Don't fall for NIMBY baseless lies, Metro will do a great job on the K line Option 1- Draft EIR too.

Dear Metro Board of Directors,

I strongly urge you to approve the staff recommendation of the San Vicente-Fairfax alignment and the Hollywood Bowl terminus for the K Line Northern Extension.

As an urban planner and former transportation planning consultant, I believe this is a generational opportunity to finally build the elusive north-south connection between the B, C, D, and E Lines. By linking LAX, Expo/Crenshaw, Museum Row, The Grove, Cedars-Sinai, the West Hollywood Rainbow District, Hollywood proper, and the Hollywood Bowl/Ford Theatre, this is the transit line to end all lines.

As the staff report confirms, this route delivers the strongest mobility benefits of all options studied:

- Highest Ridership: 59,700 daily project trips, connecting 131,500 residents and 125,700 jobs within a half-mile of its stations.
- Transit Equity: 67% of projected trips will be made by low-income riders.
- Climate Action: Reduces regional driving by 135,000 Vehicle Miles Traveled (VMT) daily.

You also have a highly committed partner ready to act in the City of West Hollywood that is actively pursuing funding for this alignment and accelerating its delivery.

The Metro system was built on compromises that left us with a disjointed network. You are now presented with a monumental opportunity to connect so many major destinations, population centers, and job hubs on a single line. If Metro never builds another line after this, the system would still be complete. Do not squander the opportunity. Our children will thank you for it.

Alvaro Gomez

Hello,

I am writing in SUPPORT of Item #7 - San Vicente-Fairfax alignment for the K Line North Extension. It is a crucial project to Los Angeles' transit future, and I urge the board to support the DEIR or LPA alignment, and approve it at Thursday's board meeting without further modifications or studies. There has been extensive studies done by staff over the last 18 months on the issue of tunneling, and the board needs to trust the same expertise that tunneled under similarly historic neighborhoods with no disruption. Doing otherwise is foolish, and anti-science. This project needs to be shovel ready as soon as possible; the extension's financial outlook will be in jeopardy if additional delays happen. Thank you and have a nice day.

Sincerely,
Jefferson

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Eric Espinoza

Hello,

My name is Katelyn Melton, I have lived in Los Angeles for three years without a car. I rely on Metro almost every day and I am extremely grateful. I've been impressed with Metro's recent efforts connecting the K line to the airport and extending the D line. I've also noticed efforts being made to increase safety in rail stations.

When I first heard about the K line extension through West Hollywood, I was ecstatic. This would connect everything! Every person coming through LAX could access the west side of LA without having to take the roundabout extra long, train after train after train, route through Downtown. And now this week I'm hearing Karen Bass is siding with the wealthy few of our city to block this train's progression. I'm incredibly disappointed with our mayor and she has already lost my vote, but Metro has the chance to save this.

Please, for the sake of our city and our community, approve the K Line extension. Complete the circle of Metro trains through our city, cut commutes in half, connect LAX even more to public transit.

It's the right choice for everyone. Make it.

Thank you for your time and I'm excited to be one of the first D line riders on May 8th.

Regards,
Katelyn Melton

My name is Emma Rauscher, I live in Los Angeles, and I frequently ride the Expo line. I support Item 7, the approval of the K Line Northern Extension. The K Line Northern Extension closes a major gap in our rail network, connecting the South Bay, LAX, and Hollywood into one continuous corridor. This project is expected to generate up to 59,700 daily trips and increase total K Line ridership to nearly 100,000 daily boardings. That level of connectivity will fundamentally change how people move across Los Angeles, and it's the kind of long-term investment our region needs. Please vote to protect and expand our public transit!

Dear Members of the Metro Board,

I am writing as a very concerned Los Angeles resident to earnestly urge you to vote YES on the K Line northern extension and to oppose any further delays to this critical project.

Angelenos have waited long enough. Our city's public transportation infrastructure has historically lagged behind the needs of its residents, and the K Line northern extension represents a meaningful step toward correcting that. Pushing this project to 2041 is a bureaucratic inconvenience AND a disservice to the hundreds of thousands of Angelenos who depend on accessible, reliable transit to get to work, school, and essential services every single day.

More public transportation is not a luxury for this city, it is a necessity. Every year of delay means more cars on already-congested freeways, more carbon emissions, and more residents left without viable alternatives to driving. The time to act is now, not decades from now. I respectfully but firmly urge the Board to vote YES and move this project forward without further delay.

The people of Los Angeles are counting on you to prioritize their mobility, their time, and their future. Thank you for your service and your consideration.

Earnestly,

--

Dear Metro Board and Political Leaders,

I'm writing ahead of tomorrow's Metro Board hearing regarding approval of the K Line Northern Extension San Vicente-Fairfax alignment.

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment.

Thank you,
Jae Choi

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Alexander Boz

I am against the K Line Northern Extension - Locally Preferred Alternative as it includes tunneling under homes in LaFayette Square, a historic neighborhood (HPOZ/Historic Preservation Overlay Zone) where I live. Any route should bypass historic neighborhoods.

Dear Metro Board Members,

As someone who lives and works directly near the proposed line — and who has lived in Los Angeles my entire life, please select the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project.

My wife and I would be thrilled to have better transit access by this route, and those who oppose it are very much in the minority in our neighborhood.

We live between Fairfax/3rd and La Cienega/Beverly, and the La Cienega/Beverly area DESPERATELY needs an injection of public transit. I invite those who haven't to walk — not drive — along 3rd Street toward that intersection just so you can see how the stroads utterly destroy the vibrant urban setting that the area could have, as it exists in nearby areas, even a block away.

The San Vicente route is necessary if Los Angeles wants to be a modern, vibrant city. The La Brea route is entirely inadequate.

Our city cannot rely on cars (and gas) for a variety of health and political reasons. It should not be the case now and certainly cannot be the case in 100 years. If the board really wants to build long-lasting infrastructure, it must be with the goal of making cars a rare luxury commodity, not a necessity for living in LA.

I strongly urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Sincerely,
Rachel Bracker-Naor

Dear METRO Board

I've been a West Hollywood resident for a long time and I feel I need to share with you some important information.

The lobbying by West Hollywood Council for 3 subway stations in the city is not motivated by transportation needs but by West Hollywood City Council's alliance with developers. Under state legislation SB79 and local transit overlay policies, the designation of subway stations will trigger zoning changes that allow significantly larger developments within a one-mile radius. This would open the door to large-scale luxury apartment construction across West Hollywood right now, decades before any subway line is actually built—and with no guarantees of meaningful affordable housing.

WEST HOLLYWOOD RESIDENTS ARE VEHEMENTLY OPPOSED TO THE 3 STOPS LOBBIED BY WEST HOLLYWOOD COUNCIL. These ae some of the reasons:

West Hollywood is one of the smallest cities in Los Angeles County at just 1.9 square miles and barely 35,000 residents. Yet Metro's current planning for the K Line extension includes the possibility of **three separate subway stops within West Hollywood's tiny footprint**. For many residents, this proposal raises serious concerns about cost, necessity, environmental risk, and the future character of our city.

The first and most obvious question is one of scale. While our city is lively and culturally significant, it doesn't have the kind of business centers which generate the commuter volume that would warrant three underground stations within less than two miles.

Then there is the issue of cost. The proposed K Line extension has been estimated at **roughly $16 billion**, with West Hollywood taxpayers responsible for approximately **$4 billion of that total**. At a time when many parts of Los Angeles remain severely underserved by public transit, it is difficult to justify allocating such an enormous share of public funds to a city already surrounded by extraordinary transit options.

The engineering challenges should also not be ignored. The proposed alignment around La Cienega passes through an area historically known for its high water table—so much so that the name "La Cienega" literally means "the swamp." Constructing deep subway tunnels in areas with significant groundwater presents major technical complications and long-term maintenance risks. Nearby structures, including the Beverly Center's parking facilities, were designed above ground in part because of these conditions.

There are also environmental and infrastructure concerns. Large-scale tunneling through water-saturated soil often requires extensive and permanent dewatering. This process can destabilize surrounding ground conditions and threaten nearby buildings and infrastructure. West Hollywood has already experienced localized land subsidence linked to groundwater extraction for underground parking and basements. Expanding such activity on the scale required for a subway tunnel could create long-term structural risks for the community.

A **far simpler solution already exists**. With the May 8 opening of the Metro D Line station at Wilshire and La Cienega, West Hollywood will soon sit just minutes away from a major subway stop. Extending the existing West Hollywood Cityline Shuttle to connect directly to that station would provide residents with immediate access to the regional subway system—without spending billions of dollars or subjecting the city to years of disruptive construction in our narrow streets.

Before committing billions of dollars to three subway stations in a city less than two miles across, Metro should take a step back and ask a simple question: **Is this truly the best use of scarce public transportation resources?**

Thanks so much for your attention to this important matter

Ignacio Darnaude

Good afternoon,
My name is Ryan Berry and I have been living in LA for about 5 years. I regularly take the Metro both to commute to work and just for everyday activities. It is very effective and helpful for everyone to get around the city especially marginalized communities.
I am writing this email to show my support for the K Line extension route that passes through Mid City West, West Hollywood and terminates at the Hollywood Bowl. This route would allow actual train service to the areas of the city that are some of the densest and desirable and allow for more connectivity throughout the entire Metro system.
It would cut traffic times and allow for a more pleasant experience for everyone in LA. Please consider this at the meeting scheduled for tomorrow.
Thank you!

Dear Metro Board Clerk, Please submit this email as written public comment for the upcoming Board of Directors meeting on March 26, 2026.

I am writing to express my strong support for the K Line Northern Extension and to urge the Board to vote in favor of selecting the San Vicente-Fairfax alternative.

This project is crucial for connecting our communities, improving access to jobs and housing, and providing a viable transit alternative to the 405 freeway. The San Vicente-Fairfax route offers the highest ridership potential and directly serves dense residential and employment areas that need this infrastructure most.

It is time to move past delays and finish the line. I urge the Board to approve this extension and move it into the next phase of planning and design.

Thank you for your time and consideration.

Sincerely,
Dani
Hollywood

Hello,

I am a resident of Los Angeles (Franklin Village/Hollywood Hills), and I am writing to express my strong support for an acceleration of the Northern K Line Extension.

This route, connecting the B, D, and E lines, is vital to Los Angeles - it would eliminate the need to go downtown in order to transfer lines for many residents of Hollywood, West Hollywood, and other neighborhoods.

This route, the K, would stand to become the busiest route, and would be a boon to business and to residents and help alleviate traffic.

Especially in a time where oil prices are skyrocketing with no relief in sight, we should be leaning into solutions like this, and building them as quickly as possible.

Thank you,
Mark Charles Smith

Hello!
Regarding the K Line extension proposal on #7 of the agenda for tomorrow's meeting, I would like to voice my full support of the extension WITHOUT the delay.

I am a lifelong resident of Los Angeles, and the K Line extension just makes sense. There is a huge demand for greater access to areas of LA with the most destinations. Greater connectivity and transit access will support my neighbors with lower incomes to be able to get around without a car. It will help relieve other metro and bus lines, allow greater resilience if there are delays on other lines, and ease traffic in some of the most densely populated areas of the city.

Los Angeles has waited a very long time for more usable transit, and we should not pass up this opportunity to provide essential city services for the majority of Angelenos just to prioritize the interests of a minority of extremely wealthy neighbors (whose needs the city can also address through this project!).

I urge you to support the K Line extension ASAP without further delay so we can meet our wonderful city's potential.

Thank you for your time

Lillian Lopez

Subject: (EXTERNAL) Opposition to the K LINE 3 Subway Stops in West Hollywood

CAUTION: This email originated from outside of the organization. Help Metro protect against cyber threats. Verify the sender's email address carefully. Do not click links or attachments unless you trust the sender. Be aware of phishing signs such as urgent requests, unexpected links, or offers that seem too good to be true. Be cautious of spoofed emails that appear to come from trusted sources. Report suspicious emails. Follow Metro policies and update accounts only through official channels.

Dear Metro Board,

I've been a West Hollywood resident for almost 30 years and feel compelled to share a concern.

The City Council's push for three subway stations (San Vicente alignment) appears driven less by transportation need and more by alignment with development interests. Under SB79 and local transit overlay policies, these stations would automatically trigger upzoning within a one-mile radius—opening the door to large-scale luxury development long before any subway is built, and without guarantees of meaningful affordable housing.

Many residents oppose the three-stop proposal.

West Hollywood is just 1.9 square miles with roughly 35,000 residents. Placing three underground stations within such a small footprint raises serious concerns about scale, cost, environmental risk, and the future character of the city. We simply do not have the commuter density or business centers to justify this level of infrastructure.

The cost is also disproportionate. The K Line extension is estimated at $16 billion, with West Hollywood taxpayers responsible for roughly $4 billion—despite the city already being well-served by surrounding transit options.

There are also significant engineering and environmental risks. The proposed La Cienega alignment runs through a high water table area ("the swamp"), where tunneling requires extensive dewatering. This can destabilize soil, contribute to subsidence, and threaten nearby structures—issues the city has already experienced.

A practical alternative already exists. With the D Line station opening at Wilshire and La Cienega, extending the West Hollywood Cityline Shuttle would provide immediate subway access without the cost, disruption, or risk of new tunneling.

Before committing billions to three stations in a city under two miles wide, Metro should ask a basic question: is this the best use of limited public transit funds?

Thank you for your consideration.

Best,

Jim Banks

City of West Hollywood

Hello,
I strongly support the K-Line North Extension Locally Preferred Alternative. It must be approved without the motion submitted by Mayor Bass to not approve an alignment.

We voted in favor of Measure M and Measure R and this project must be built as quickly as possible as it is the lynchpin for the Metro system.

Thank you.
Joseph McDonald

Dear Metro Board,

I'm writing to you as a 8-year (as of June 2026) Angeleno who first moved to Los Angeles County for college in 2014 and has been proud to call the city of Los Angeles home since graduating in 2018.

Let me be a testament to the statement that transit transforms lives. I had no car when I moved to southern California, so my only ticket out of Claremont on the weekends was the Metrolink train. When I graduated, I move to the Little Bangladesh neighborhood in Koreatown, still with no car, and ignorant to the gold mine I had landed in for mobility across the city. Like many new college graduates, I did not have a fancy salaried job lined up waiting for me after college. I needed to work as a barista and complete additional classes at the community colleges to become a more competitive candidate for entry-level jobs. Because of where I lived, I had access to the major rapid transit line for Vermont Avenue, a short walk to Vermont/Beverly station for the B Line, a similarly short walk or bus ride to Vermont/Wilshire station for the B and D lines, and access via the 754 to the E line and the C line. I worked all over LA when I was first starting out - first West Hollywood, then El Segundo, then Santa Monica, all while attending classes at Santa Monica College on my days off from work. NONE of this would have been possible without access to transit. I would have had to pack my bags and leave Los Angeles after two years. It made a world of difference to me. My life was changed by transit in the City. Now I have a stable job doing what I studied at SMC that helps me give back to Los Angeles. I want that for other neighborhoods that aren't currently served by a Metro rail. I want them to have more opportunities and more options to access those opportunities. Mobility is essential to a healthy city.

Angelenos cannot wait for mobility. We voted overwhelmingly to pass Measure M, and the voters' voices matter too. We cannot keep delaying, obstructing, and studying the projects that we already know will transform our City for Angelenos and visitors. The time to act is now: approve the Fairfax-San Vicente alignment of the K Line North, and do not allow the voices of the few to delay this desperately needed project for decades more.

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done

safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Crystal Kan

p.s. I specifically want to call out that I think the San Vicente Fairfax option would best serve the needs of the greatest number of people.

Thanks again!

On Wed, Mar 25, 2026 at 12:44 PM Mark Charles Smith <[redacted] wrote:
Hello,

I am a resident of Los Angeles (Franklin Village/Hollywood Hills), and I am writing to express my strong support for an acceleration of the Northern K Line Extension.

This route, connecting the B, D, and E lines, is vital to Los Angeles - it would eliminate the need to go downtown in order to transfer lines for many residents of Hollywood, West Hollywood, and other neighborhoods.

This route, the K, would stand to become the busiest route, and would be a boon to business and to residents and help alleviate traffic.

Especially in a time where oil prices are skyrocketing with no relief in sight, we should be leaning into solutions like this, and building them as quickly as possible.

Thank you,
Mark Charles Smith

Dear Metro Board,

Item 7 K Line Northern Extension - LPA should be approved without (further) delay. Metro has already conducted studies and engaged with the community. There is no reason to sideline this $15 billion project yet again to appease Jackie Dupont-Walker and her neighborhood, especially when the project will have no actual impact on their homes.

Mayor Bass's motion calls for an "independent third-party peer technical review of tunneling impacts..." ENOUGH WITH THE STUDIES. The motion goes on to say, "This process shall in no way impede or delay any current efforts to expedite or advance the project," which does not make sense in the slightest. How will spending millions more on technical studies not delay the project? Let's approve Item 7 and be done with the nonsense, corruption, and obvious lies.

With less hope than Sophia,

Dear Metro Board Members:

Please support the San Vicente-Fairfax alignment as the Locally Preferred Alternative for the K Line Northern Extension. This route would better connect Central LA and West Hollywood to jobs, healthcare, cultural destinations, and major activity centers while serving more riders and more low-income riders than the alternatives. It reaches key destinations that residents, workers, and visitors actually rely on and would provide the strongest long-term public benefit. Please vote yes on Item 16 and move forward with the alignment that delivers the greatest mobility, equity, and value for the communities this project is meant to serve.

Sincerely,

LA Metro Regular Board Meeting on 3/26/26

FOR Item #7

To Whom It May Concern:

I send this comment in strong support of the K Line Northern Extension and its San Vicente-Fairfax alignment (the locally preferred alternative).

First and foremost, it is not the role of the City of Los Angeles or the LA Metro to prioritize the property investments of private individuals. It's the job of LA Metro and the city to provide services and improve the lives of all of its residents, regardless of whether or not they are lucky enough to already own mansions in Mid City. Denying or delaying the K Line Northern Extension because a limited number of wealthy homeowners might experience (very minor) disruption would unfairly deny transit services to tens of thousands of other Angelenos. The Angelenos who use transit don't have million dollar homes to segregate from the rest of the city. We often don't even have cars, so we rely on a robust, reliable, and comprehensive transit network to fully access our incredible home.

As a young queer person in the city of Los Angeles, connectivity and transit are vital to my community. This extension represents an important investment in our shared future, connecting new communities and alleviating significant traffic along Fairfax, San Vicente, and Santa Monica. At this meeting, LA Metro is at a crossroad. Does it want to struggle as it underserves a wide range of diverse communities because it bends to the will of a wealthy few who want to maintain a discriminatory and ill-defined "neighborhood character"? Or do we want to create a metro system that serves everyone and stands among the other great public transit systems of the world? We make that decision today. I strongly urge the board to approve the K Line Northern Extension.

Thank you for your consideration.

Hello,

My name is Josiah Manzanares. I'm a lifelong Angeleno, currently living in Silver Lake (CD13).

I've been taking the metro for as long as I can remember. I share many fond memories of riding with my parents, family members, friends, and partner throughout the city. The metro is the unsung hero of the city, connecting us together from our diverse neighborhoods and communities, bridging gaps and closing distances that are otherwise traversed through endless bumper-to-bumper traffic.

I support the K line extension for a myriad of reasons, the main one being it is what the City of Los Angeles desperately needs. It is an extension that would bring even more areas and communities together, would promote more ridership for the Metro, and would serve as an excellent means of transportation for LA's upcoming events (i.e. Super Bowl LXI; The 2028 Olympics) which, in turn, would assist in boosting California's economy.

There are more pros than cons to extending the K line. Please do not let the voice of a wealthy minority drown out the pleas of many. Build the K line extension.

Thank you for your time.

Dear LA Metro Board,

I am submitting a public comment for the March 26th, 2026 Regular Board Meeting, Agenda Item 7. It is critical that the Board approve the staff recommendation for Agenda Item 7 either as it is written or with the selection of the EIR alignment for Mid City portion of the K Line Northern Extension. The Board should absolutely not adopt an amendment that would result in additional studies regarding tunnel safety or potential changes to the alignment in Mid City, or conduct additional community engagement beyond what is currently planned.

This entire project, and in particular the connection between the E Line at Exposition Blvd and the D Line at Wilshire Blvd, is critical for filling in a major gap in the regional transit network, and would result in one of the highest ridership rail lines in the country. There is a unique opportunity for additional local funding to support this project from the City of West Hollywood and LA County that it would be damaging to miss out on. Often Metro faces local opposition when building new transit lines, but here there are communities that are greatly supportive of the KNE and willing to contribute to its completion.

As Metro has proven time and time again, tunneling is safe and would not disturb historic communities in Mid City. Many of the same unfounded concerns were raised in Beverly Hills when the D Line extension was in planning, and Metro made the correct choice to move forward with the project anyways. Metro has already worked with the affected communities to address any legitimate concerns, like relocating the Ralph's.

Again, the Metro Board should adopt the staff recommendation for Agenda Item 7 either with no amendment or an amendment that returns to the DEIR alignment, given unfounded concerns about tunneling. An amendment that requests additional studies regarding tunneling as well as community engagement may violate ethics laws given the potential recusal violations of board member Jackie DuPont-Walker.

Regards,

Tanner Vandenbosch

Dear Board Clerk,

Please record the following public comment for the March 26, 2026, Board of Directors meeting regarding Item #7 (K-Line Northern Extension):

Position: FOR

I am writing to express my strong support for the K-Line northern extension. There is a great need for the San Vicente-Fairfax alignment. This extension is long overdue and a step toward the critical need for more public transit within Los Angeles.

This project must be prioritized immediately. I urge that the Board eliminate all delays and expedite and accelerate the building process, as well as MERV-14 filters, with 50 air changes per hour. This is dire for the health maintenance of the public.

Sincerely,

Thank you,

(Bozy) F. E

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,

Cal Reinert

Hello,

I live in near and ride the E and K Lines. I am writing support of Agenda Item 7, the approval of the K Line Northern Extension.

The K Line is the most important in our rail network since it connects to LAX. The Northern Extension closes a major gap, connecting the areas north of the 10 to LAX and the South Bay. This project is expected to generate up to 59,700 daily trips and increase total K Line ridership to nearly 100,000 daily boardings. That level of connectivity will fundamentally change how people move across Los Angeles, and it's the kind of long-term investment our region needs.

Please approve the K Line Extension - Locally Preferred Alternative.

Sincerely,

Breda Lund

Dear Metro Board,

I'm writing to urge the Metro Board to approve the K Line Northern Extension San Vicente-Fairfax alignment! Building this line in a timely manner is absolutely critical to the missing North/South connection that will provide significant improvements to connecting to all the other Metro and bus lines. Once built, this will be the busiest light rail line in the country.

West Hollywood is amazingly willing to put up 25% of the project cost. This is absolutely something this board should not take for granted.

I strongly urge the board to NOT delay and agree to any additional studies on the noise/vibrations of tunneling or alternative route options. It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before. The motion that Mayor Bass is presenting will only delay and even jeopardize this absolutely critical project. There has already been enough taxpayer money spent on public outreach, noise/vibrations from tunneling studies, and alternative route options, of which all options have been exhausted.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

I want to just state my support for the K Line North project.

Tunneling technology has come along way and we are capable of safely tunneling under homes and history location (see Regional Connector and D line extension under Beverly Hills High School)

I do not support any attempts to delay the project by adding any additional unnecessary studies that only function to delay this very vital project that is expected to move 100,000 riders daily.

I hope the Board chooses to move the project forward and does not do a bait and switch like the Torrance Extension decision.

Dear Los Angeles County Metropolitan Transportation Authority Board Members,

I want to extend my strong support for the K Line Northern Extension Project. The draft Environmental Impact Report (DEIR) and subsequent community input showed strong support for the Fairfax-San Vicente (Hybrid) Alignment and has my unconditional support. We can no longer delay this project that will benefit current and future generations of Angelenos because of a few dozen community members in Lafayette Square. Please show your support for this alignment for future generations and do not allow a few dozen people concerned only with their personal financial interests sabotage this project. The K Line northern extension must be approved now. Thank you. James Fox, Burbank, CA.

Hello,

I am writing to express my strong support for the K Line Northern Extension. As a frequent user of the Metro system, this extension would be transformational for me and other riders. This project has had unnecessary and costly delays to assuage the concerns of residents of Lafayette Square and Wellington Square. Metro staff have done the research and proven that this will have no negative impact on their property. The residents there simply refuse to listen to the science when requesting further delay and study.

Additionally, I find Board Member Jackie Dupont-Walker's continued behind the scenes influence on this process to be deeply unethical and likely illegal. Her property's location results in a perceived financial conflict that requires her to recuse herself from official proceedings and from influencing those proceedings. Her continued involvement is a stain on what should be a legal and orderly process.

We, the citizens of LA, should not have to suffer poor transit connectivity because of the phantom concerns of a few dozen property owners. Nor should we be on the hook for tens of millions more in spending.

I demand you pull this motion to amend and support staff's recommendation. Furthermore, we should save $165M and go back to the DEIR route through Mid City, since tunneling has zero impacts.

Stop playing games with a $15B light rail project, and vote to move it forward cleanly, without delays or amendments, and without collaborating with a "recused" board member.

Thank you,
Abrahm Oxley-Hase

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

The only thing I would regret is that it can't be built fast enough.

Thank you for considering public input on this important decision.

Sincerely,
Rob Marohn
Laurel Canyon

To whom this may concern,
I will lose money if the k-line project does not move ahead on schedule. I understand you're trying to help your friends, but there is no place in government for that kind of behavior, so if I lose money because this project is delayed, or stalled, until 2041, I will make it my mission to make ensure that you're never elected to another position of power ever again. That kind of blatant disregard for anyone, other than the people you socialize with, is despicable and should not be in this government. The fact that this is even being discussed at all is unfathomable, this project is supposed to help people get to an accessible area areas for an affordable price during the Olympics. If you can't see the benefit you would receive from that, that our economy would receive from that, then you have no place in government. people who complain about being above the K-line are simply worried that their property valuable diminish, but that has been proven a falsity time and time again in Manhattan. I strongly advise that you rethink your position because if I lose money from having to pay for my employees to get up to Beverly Hills, I promise you it will be your problem, not mine. I have more than enough time on my hands to make sure that your life in the government is extremely unpleasant.

Good day,
Noah Custer

Good afternoon,
I am a Midtown resident who is strongly **AGAINST the Item #7 LPA proposal as it stands**. I am absolutely in favor of public transit as well as the K-line extension to West Hollywood. However, the current alignment route will demolish the ONLY full grocery store and pharmacy FOR MILES. This is not just about a few homeowners, it's about creating a **FOOD AND MEDICINE DESERT in the heart of Midtown Los Angeles, in a zip code that has been historically targeted, with a per capita income of only $43,858 per year and a population that is 70%non-white**. It's about **destroying** a community's only grocery store and pharmacy — which many residents walk to — instead of selecting another viable alignment option only a few streets away.

Despite some Metro board members' false reassurances that this grocery store would be relocated before construction begins, we spoken with **Court Young** yesterday, whose family has owned the Midtown Crossing shopping plaza since the 1970s, as well as representatives from Kroeger and CVS that they have received **zero information or outreach from Metro AND WERE NOT EVEN INFORMED ABOUT THE PLAN TO DEMOLISH THE GROCERY/PHARMACY PLAZA until today.**

Metro has failed to do proper outreach to the greater Midtown community and failed to take into account the absolutely unfair burdens this would create to the large, low-income community in greater Midtown Los Angeles.

I urge you to strongly to consider slow this process until another alignment can be selected that will not take away our only grocery store and pharmacy and that will not destroy a historic — and historically targeted — neighborhood in the heart of Los Angeles.

Sincerely,
Carrie Seim
Midtown Resident

Metro Regular Board Meeting - Thursday, March 26, 10:00 AM
ITEM #7: GENERAL COMMENT

I'm writing this comment in the event I'm unable to speak in person during tomorrow's regularly scheduled board meeting.

I am strongly urging the Metro board members to SUPPORT the DEIR alignment for the K Line Northern Extension. It is ridiculous that the scientifically unfounded concerns of about 20 or so wealthy homeowners would take precedence over what would be the light rail with the highest ridership in the country. Especially when Metro has already supplied a peer-reviewed study back in August 2025 where it clearly states there would be no vibration or sound-related impacts to homes for tunnels 100 ft below ground.

The K Line Northern Extension will be vital to improving mobility options in western LA. It would connect with multiple light rail lines and busways and allow greater travel through the region without having to divert through Downtown. This is also vital to West Hollywood in particular as the city is still recovering from COVID-related impacts.

Thanks,
Hayden Evans

Hi, regarding tomorrow's meeting: I'm a West Hollywood resident who supports the K Line expansion and San Vicente-Fairfax alignment. I support item 7, The San Vicente Fairfax alternative, to connect high density areas and lower congestion and pollution in my neighborhood. I rode the metro frequently when I lived in Koreatown and could walk to the purple line, so I will also use the metro in West Hollywood once it's in walking distance! One day, I'd like to be able to take the metro to the airport, a reasonable thing that I could do in every other major city I've lived in (except this one). Please keep moving towards that goal. Thank you!

I will try to call in tomorrow, but work during the meeting.

Best,
Kelsey DiLaura

I'm writing in support of the proposed metro extension. LA has a serious traffic congestion that no amount of lane expansion is capable of fixing. The only way forward is to invest in public transit options. Making it easier for people to access the west side to reach not just cultural institutions but their work would be invaluable for the city. It would absolutely encourage me to use my car less and take the train more.

This is a true no-brainer. We need these trains!

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

Kat Pickett

Hello,

I am a West Hollywood resident and speak on behalf of many of my neighbors, community members, and peers when I say how much I would love better access to our Metro, public transit, and greater city.

West Hollywood is notoriously well connected by side streets but lacks major freeway access; it is also a central enclave of culture and commerce that brings in folks to work, play, and sightsee from across LA.

I hope that our public leaders consider the immense public benefit of extending the K Line and connecting the city of West Hollywood to our existing metro infrastructure. Thank you for reading this message and representing our community.

Best,
Mariel

Subject: APPROVE THE K LINE; NO MORE DELAY; PROSECUTE CORRUPTION

To the Board:

I'm a 25 year resident of the Oxford Square neighborhood (nearly adjacent to the K=Line's mid-town station) and president of the Oxford Square neighborhood association.

Over the last 18 months this board has spent millions of dollars and delayed the project with "studies" at the behest of two members with illegal conflicts of interest (Holly Mitchel and Jackie Dupont-Walker). These members should not have even discussed the project let alone vote to delay it. We are asking the attorney general to review this situation.

The K-Line is extremely important to our neighborhood and has broad support here and throughout the service area. It is projected to have the highest ridership of any line, connecting LAX to Wilshire and Hollywood, and increase the usage of the east-west lines (expo, D-line, red line) thanks to the network effect.

Mid-city is blighted and we need the investment the mid-town station will bring.

The City has dramatically upzOned our area on the basis that density will be served by public transportation. If that's the deal, then build it.

Adopt the staff recommendation, and set to the task of ACCELERATING the construction date.

Everyone sees Mayor Bass's amendment for what it is … a delay tactic, for all intents and purposes fatal to the project.

Approve the project through as staff has recommended.

Regards,

Chris Elwell

On Mar 24, 2026, at 11:08 PM, Ryan Byrd [redacted] > wrote:

Dear Metro Board Member,
I am a resident of Lafayette Square which is a historical Black neighborhood in Mid City, and I strongly oppose LPA Option 2 for the K Line Northern Extension.

This alignment deviates from the original plan following the elimination of the Crenshaw/Wilshire station, and it unfairly shifts the burden onto our historic residential neighborhood.

LPA Option 2 would create approximately 22 subsurface easements beneath homes older than 100 years old, raising serious concerns about property rights, structural impacts, and construction disruption.

It would also remove our local grocery store and the only pharmacy serving the Mid City community within miles—cutting off access to essential services which will cause a food desert.

The Mid City neighborhood should not bear the brunt of accommodating changes made to meet the needs of other communities especially West Hollywood which has full access within a small radius to grocery stores and pharmacies. We ask Metro to reject LPA Option 2 and pursue an alternative that avoids unnecessary impacts to residential areas and preserves critical local resources.

Thank you for your consideration.
Sincerely,

Ryan Byrd

Dear Metro Board,

I am writing to oppose the **three-station** "San Vicente" proposal. At **just 1.9 square miles**, our city does not have the commuter density to justify three massive underground stations.

This project feels less like a transit solution and more like a giveaway to developers.

Under current laws, these stations would trigger immediate upzoning for luxury high-rises, forever altering our city's character without guaranteeing affordable housing.

Furthermore, the **$4 billion cost to West Hollywood taxpayers is staggering**, especially considering the severe engineering risks. Tunneling through the La Cienega "swamp" (a high water table) threatens to destabilize local soil and existing structures.

We have a better way.
With the new D Line station at Wilshire/La Cienega, we can simply **expand our Cityline Shuttle** to provide subway access. Saving billions while avoiding years of disruption.

Please **prioritize fiscal and environmental responsibility** over unnecessary expansion.

Sincerely,
Michael Fisk
City of West Hollywood resident and homeowner

When the Metro Board meets on March 26, you will be expected to vote on the staff recommendation for the northern extension of the K-Line along the hybrid route, San Vicente to Fairfax to Beverly. We urge you to put off that vote because it rests on risky financial assumptions.

Metro's own cost benefit analysis puts the San Vicente Fairfax route dead last at 3.1 out of 7. Metro staff papered over this fundamental flaw by claiming $4 billion of additional funding from the City of West Hollywood -- just over one-quarter of the projected total budget.

West Hollywood has proposed establishing an Enhanced Infrastructure Financing District (EIFD) to raise the $4 billion by 2041 – at the earliest. Meantime, that leaves Los Angeles on the hook.

West Hollywood's citizenry caught wind of their officials' $4 billion pledge, and they are growing restless. As pressure continues to build, West Hollywood may have to walk back that pledge. If Los Angeles is left holding the $4 billion bag, our citizenry will be restless, too.

Earlier this year, many County of Los Angeles residents shunned proposed new public transit because it would expose their neighborhoods to SB 79's damaging re-zoning. Commendably, the Metro Board pushed back on Sacramento. Nonetheless, as of July 1, SB 79 rezones L.A. neighborhoods based on proximity to public transit.

A growing number of Angelenos now see new public transit as the tip of the spear. Imagine their feelings about Metro if they also associate public transit with a $4 billion burden they never agreed to.

The state legislature and the governor assaulted established neighborhoods and intact communities with SB 79, a blunt instrument as damaging as the urban renewal schemes of the last century. They will be held accountable for the outcome.

The Metro Board will select the route for the northern extension of the K-Line, and you will be held accountable for that outcome. If the reality falls short of rosy projections, the fiscal damage will cast a long shadow over new public transit.

We urge the Metro board to defer selecting the extension route until the funding plan and regulatory environment are on a solid footing.

Respectfully,

Danielle Peters, President, Beverly Grove Neighborhood Association

Brent Kidwell, President, Carthay Circle Neighborhood Association

Greg Goldin, President, Miracle Mile Residential Association

Dale Kendall, President, Save Beverly Fairfax

To the Los Angeles County Metropolitan Transportation Authority Board of Directors,

Writing to you as a LACMTA dependent resident of LAC, Please vote **YES** today to approve the San Vicente-Fairfax alignment as the Locally Preferred Alternative for the K Line Northern Extension — and to do so without further delay.

This project has been in discussion since the late 2000s. Angelenos have been patient. We have attended community meetings, submitted comments, participated in study after study. LA Metro has now evaluated more than a dozen alignment options. The analysis is complete. Your own staff has reviewed the Draft EIR, the Mid-City Additional Alignment Analysis, the Cost-Benefit Analysis, and extensive public input — and has recommended the San Vicente-Fairfax alignment. The time for study is over. The time to decide is now.

The case for San Vicente-Fairfax is overwhelming:

Ridership. The San Vicente-Fairfax alignment is projected to attract 60,000 daily trips — the highest of any route studied. More riders means more farebox revenue, more justification for the investment, and a stronger regional transit network.

Connectivity. This alignment connects to four other Metro rail lines and six of the ten busiest Metro bus lines. It closes a critical north-south gap in our rail network, linking the E Line at Expo/Crenshaw directly to the B Line at Hollywood/Highland.

Job access. More than 125,000 jobs would fall within a half-mile of the nine proposed stations. Stations would serve Cedars-Sinai Medical Center, The Grove, the Original Farmers Market, the Beverly Center, and the Rainbow District — destinations that attract workers, patients, shoppers, and tourists every single day.

Equity. West Hollywood has one of the highest proportions of renters in Los Angeles County. These are residents who depend on reliable transit, and who have been passed over by the rail network for far too long. The city of West Hollywood voted 86% in favor

of Measure M in 2016 — the highest rate in the county.

Economic impact. An independent analysis by the Los Angeles County Economic Development Corporation found that the San Vicente-Fairfax alignment would generate $22.5 billion in total economic output during construction, create over 123,000 jobs, and contribute $2.65 billion in tax revenue. Once open, annual ridership is estimated to generate nearly $500 million in economic output.

Delay is not the answer — delay is a cost in its own right. Every year of inaction inflates construction costs, defers economic benefits, and leaves communities without the transit connections which would significantly improve their quality of life.

Your staff has done the work. The LA Metro board should be clearing the path for this sustainable economic powerhouse of a project. The alignment that serves the most riders, connects the most jobs, and has the broadest community support is the San Vicente-Fairfax alignment. Please vote to approve the San Vicente-Fairfax alignment as the K Line Northern Extension LPA.

Let's finish the line!

Respectfully,
Kelly Pilarski

hello,

my name is kim turner. i live off melrose & highland zip 90038 and i vote.

i do not think i'm technically in weho but basically i am and it makes zero sense to not run metro line k thru weho. we're on the east edge of weho & need more reliable access than the current bus system provides.

running straight up labrea & connecting to highland does nothing for the staff & patrons of weho stores, bars & restaurants.

it makes growing a business harder than it should be because access is constrained w/out metro service & adding a single stop at labrea & santa monica changes nothing.

it also makes commuting out of weho (downtown, santa monica, universal etc) a challenge because the metro busses through weho are often cancelled or so crowded that you have to wait for the next & the next depending on the day/time.

please make the san vicente - fairfax route the route that actually gets build as it's the only one that will help traffic, help businesses in weho & decrease DUIs because folks can get in & out without needing to drive!

thank you,

kim turner [redacted]

Good afternoon,

I am a Midtown resident who is strongly **AGAINST the Item #7 LPA proposal as it stands**. I am absolutely in favor of public transit as well as the K-line extension to West Hollywood. However, the current alignment route will demolish the ONLY full grocery store and pharmacy FOR MILES. This is not just about a few homeowners, it's about creating a **FOOD AND MEDICINE DESERT in the heart of Midtown Los Angeles, in a zip code that has been historically targeted, with a per capita income of only $43,858 per year and a population that is 70%non-white**. It's about **destroying** a community's only grocery store and pharmacy — which many residents walk to — instead of selecting another viable alignment option only a few streets away.

Despite some Metro board members' false reassurances that this grocery store would be relocated before construction begins, we spoken with **Court Young** yesterday, whose family has owned the Midtown Crossing shopping plaza since the 1970s, as well as representatives from Kroeger and CVS that they have received **zero information or outreach from Metro AND WERE NOT EVEN INFORMED ABOUT THE PLAN TO DEMOLISH THE GROCERY/PHARMACY PLAZA until today.**

Metro has failed to do proper outreach to the greater Midtown community and failed to take into account the absolutely unfair burdens this would create to the large, low-income community in greater Midtown Los Angeles.

I urge you to strongly to consider slowing this process until another alignment can be selected that will not take away our only grocery store and pharmacy and that will not destroy a historic — and historically targeted — neighborhood in the heart of Los Angeles.

Sincerely,
Lindsay Seim

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Sau Phuong Loc

Dear Board Members,

I wholeheartedly support the K Line Northern Extension San Vicente-Fairfax hybrid alignment.

Metro has spent enough time and money studying this. No alignment will satisfy every single stakeholder. This alignment was not my first choice, but West Hollywood put their money where their mouth is and are willing to front 25% of the costs to get it started fifteen years ahead of schedule. That benefits everyone.

So to my friends in West Hollywood, I say thank you for your generosity. And to the Board I ask that you consider that 71% of LA County voters voted to raise the sales tax to fund this line. It's time to approve it and get it built.

Thank you,

Matt Stauffer

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line, D Line, and E Line and will have exponential positive effects across Metro's system.

I want to note that while I reside in Orange County, I regularly travel into LA County and want to use the Metro system more when I do. Projects like the K Line Northern Extension are exactly what would make that a practical choice — a connected, reliable network that serves visitors and commuters from neighboring counties, not just local residents. Regional ridership should be part of this board's calculus.

NO MORE DELAYS OR STUDIES. Approve the K Line Northern Extension San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

Subject: I Support the San Vicente-Fairfax Route for K Line North!

Hello there!!

I am a lifelong West Hollywood resident that would love a Santa Monica/Fairfax transit hub. West Hollywood has a great variety of buses but the lack of trains makes traveling neighborhood to neighborhood without a car difficult and time consuming. I used to take the train home from school and it was always kind of a bummer having to exit Hollywood/Highland and wait for the bus (sometimes 20+ minutes) when a train could have gotten me to Santa Monica/Fairfax in just 3 minutes more.

West Hollywood was also originally named Sherman due to the presence of the South Hollywood-Sherman streetcar that ran along what is now Santa Monica Blvd. The city owes a large part of its development to accessible transit and it's time to honor that legacy and increase our available transportation options.

I would love to be able to get across all of Los Angeles by train!! Driving is often dangerous, expensive, and time-sucking polluter and I would much rather have the option to take public transit to run errands, visit my friends, and generally get around.

Very excited for the K Line expansion!!! Laying the track will help create much needed jobs and the completed train will help others get to work, see their loved ones, and more. I think this would be a move that would benefit West Hollywood residents, our fellow Angeleno neighbors, and out-of-towners alike.

Thank you so much and have a lovely week!

Best,
Audrey

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

We have had many car accidents over the last few years in West Hollywood and the best solution to this would be to give more people more options besides driving in their individual cars. I'm sure I don't need to tell you in the midst of both a heat and fuel supply crisis that more public transportation is desperately needed.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Matt Payton

Dear Metro Board Members and Planning Committee,

I am writing as a West Hollywood resident, as well as a strong advocate for public transit, to express my support for the San Vicente–Fairfax alignment of the K Line Northern Extension.

This is a decision that will have a pivotal impact on the future of Los Angeles. It is critical that we get this right—not only for our current communities, but for future generations who will depend on a more connected, sustainable, and equitable transportation system.

Los Angeles has long struggled with car dependency, and projects like this are how we change that narrative. Choosing the San Vicente–Fairfax alignment is a meaningful step toward a more accessible and transit-oriented city.

Thank you for your leadership and for considering public input on this important decision.

Sincerely,
Grant Lacey

24/7 Shuttle: The Real Solution to No Subway in West Hollywood

By Jerome Cleary

Whether it's the "City of the Future" or a masterclass in fiscal fantasy, the debate over the West Hollywood subway extension—specifically the K Line Northern Extension—has reached a fever pitch. While proponents dream of sleek underground tunnels, a cold look at the ledger suggests that the most logical path forward isn't a multibillion-dollar dig, but a high-frequency, 24/7 "Gold Standard" shuttle connecting the heart of West Hollywood to the existing subway infrastructure.

The $15 Billion Question

The current "San Vicente Hybrid" alignment, which would snake through West Hollywood, carries a staggering price tag of nearly $15 billion. For perspective, the distance from the intersection of La Cienega and Santa Monica Blvd down to La Cienega and Wilshire (where the D Line/Purple Line subway already lives) is a mere 1.5 miles.

To insist on a full subway extension for this corridor is to argue that spending billions per mile is a better investment than a dedicated, high-capacity shuttle system that could be implemented for a fraction of the cost.

Comparative Financials: Shuttle vs. Subway

Feature	24/7 Dedicated Shuttle (La Cienega)	K Line Subway Extension (WeHo)
Capital Cost	~$10M - $50M (Vehicles + Lane Tech)	~$11B - $15B

Feature	24/7 Dedicated Shuttle (La Cienega)	K Line Subway Extension (WeHo)
Construction Time	6–12 Months	10–15 Years
Operating Cost	~$200 - $300 per hour	~$500+ per car-hour (estimated)
Flexibility	Route can adapt to demand	Fixed infrastructure
Disruption	Minimal (Signage & Paint)	Decade of street closures & "vibrations"

Stacking the Deck Against WeHo

By insisting that only a subway "makes sense," the City of West Hollywood is effectively being backed into a financial corner. The city is currently exploring Enhanced Infrastructure Financing Districts (EIFD) to capture property tax growth to fund their share of the rail. Essentially, the city is betting its future tax revenue on a project that won't be operational for a decade, all while ignoring a solution that could solve the "last mile" problem today.

The "Ghost Line" Reality

The K Line extension is facing significant headwinds:

- The Funding Gap: Measure M only allocated $2.2 billion for this project. The $13 billion delta remains a massive "if."
- The NIMBY Wall: Neighborhoods like Lafayette Square are already fighting the "vibration" and "tunneling" aspects, threatening to tie the project up in litigation for years.
- The Wilshire Connection: The D Line (Purple Line) is already a high-capacity heavy rail line. A dedicated 24/7 shuttle from West Hollywood's "Rainbow District" straight down La Cienega to the Wilshire/La Cienega station would provide a 5-minute "bridge" to the entire LA rail network without moving a single shovelful of dirt.

The Rational Alternative: The "La Cienega Express"

Instead of a $15 billion tunnel, the City could invest in a Bus Rapid Transit (BRT) Lite or an autonomous shuttle fleet.

1. Dedicated Lanes: Turn the right lanes of La Cienega into 24/7 transit-only lanes between Santa Monica and Wilshire.

2. Frequency: A shuttle every 3 minutes. At that frequency, "waiting" for a bus becomes a thing of the past.
3. Cost-Effectiveness: Even if the shuttle ran at a loss, the subsidy required to keep it free for riders for 100 years would still be billions of dollars cheaper than the interest on the debt for a subway tunnel.

To build a subway for a 1.5-mile gap when a robust shuttle could do the job is a triumph of vanity over arithmetic.

By decoupling the "prestige" of rail from the "utility" of transit, West Hollywood could provide immediate relief to its residents and visitors. It’s time to stop stacking the deck for a project that may never arrive and start moving people today.

Sincerely,
Jerome Cleary [redacted]

Dear Board Clerk,

I am a resident of West Hollywood West, the quiet single-family home neighborhood immediately in between the Beverly Center and the Pacific Design Center. I am generally in favor of increasing metro rail options across LA, and in favor of extending the K line northward. But my concern is how a K Line extension could trigger development under SB79, particularly with the San Vicente-Fairfax alignment since the proposed stops at San Vicente & Beverly (Beverly Center) San Vicente & Santa Monica (Weho central) would open up mass development in uniquely quiet neighborhoods that hold remarkable charm and character. Its not fair to burden residents of these neighborhoods with decades of construction projects that will redefine the scale and density of their neighborhoods because they coincidentally sit near locations Metro has decided are best for new stations. There are other nearby areas within West Hollywood where multifamily / large apartment buildings are already the norm and adding density to those areas would not radically change the scale of the neighborhood, it just happens that the blocks closests to these new stations are the last remaining quiet single family streets left in West Hollywood and they should be protected.

Unless Metro can decouple this route approval from SB79 implementation, I oppose the San Vicente-Fairfax alignment. If Metro can secure a commitment from West Hollywood or the appropriate governing authority to implement an Alt Plan whereby the added density required by SB79 is relocated to other parts of West Hollywood where multifamily larger apartment buildings are already the norm, then I would support the San Vicente-Fairfax alignment.

Thank you,
Philip Matthys

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project.

Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente-Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities.

If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route. In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

A project of this scale, done right, would be transformative for this part of the city. Too often, Angelenos are told that real public transit is something other cities get to have. Selecting the San Vicente-Fairfax route is a chance to prove otherwise: that local government can deliver infrastructure that actually reaches the people and places that need it most. The ridership projections, the equity impact, and the sheer density of

destinations along this corridor all point to the same conclusion. This is the route that justifies the investment and earns public trust in what Metro can accomplish.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente-Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Sincerely,

Brandon Panaligan

West Hollywood

Dear Metro Board Members,

I am writing as a concerned West Hollywood resident to strongly urge you **not to approve the K-Line extension as currently proposed** until critical issues affecting our community are fully addressed.

1. Lack of meaningful community outreach
While Metro has engaged with residents in other areas, there has been **no substantial outreach to West Hollywood residents**, including the homeowners and business owners who will be directly impacted. This project is being presented as if our city is unified in support—it is not. Many residents with serious, legitimate concerns have not been heard, while local officials and lobbyists actively push this forward.

2. Unaddressed environmental and structural risks
A critical issue that has not been adequately studied or addressed is the impact on West Hollywood's **high water table (aquifer)**.

Subway stations—and potentially the tunnels themselves—would require **continuous dewatering** beneath hundreds, if not thousands, of homes and businesses. This is not a theoretical concern. West Hollywood is **already experiencing land subsidence** from groundwater removal associated with basements and subterranean parking, including:

- Cracks in buildings
- Sticking doors and windows from shifting frames
- Compromised foundations
- Sinkholes and broken underground pipes

An aquifer is a slow-forming, limited groundwater resource that supports the land above it. When water is removed, the ground loses stability, compresses, and sinks. Expanding dewatering on the scale required for a subway system, including stations, poses **serious long-term risks to structures and infrastructure throughout the city**.

Despite this, these risks appear to be largely overlooked in favor of development priorities. At a time of accelerating climate change, it is irresponsible to proceed without fully understanding the environmental consequences.

At a minimum, Metro must complete thorough, site-specific hydrological, geological, and land-subsidence studies—covering both stations and tunnels—before any approval or advancement of this project.

3. Scale, cost, and necessity concerns
West Hollywood is a **1.9-square-mile city of roughly 35,000 residents**, yet current plans include **up to three subway stations within less than two miles**. This raises serious questions about necessity and proportionality, particularly given the absence of major commuter hubs that would justify such density of stations.

The project is estimated at **approximately $16 billion**, with a significant financial burden falling on taxpayers. At a time when many areas of Los Angeles remain underserved by transit, this allocation of resources is difficult to justify.

6. Displacement and overdevelopment (SB79 impacts)
The proposed stations are closely tied to zoning changes under SB79 and related policies, which would enable **large-scale upzoning within a one-mile radius of each stop**. This creates significant risk of:

- Displacement of rent-stabilized tenants
- Impacts to fixed-income and disabled residents
- Loss of existing affordable housing
- The end of neighborhoods

Even the proposal itself can destabilize neighborhoods by accelerating speculation and redevelopment pressures—**long before any transit benefits are realized**.

There is a widespread concern that the push for three stations is driven less by transit need and more by the opportunity it creates for **large-scale luxury development**.

6. A practical, lower-impact alternative
With the opening of the Metro D Line station at Wilshire and La Cienega, West Hollywood will already be located just minutes from a major subway connection. Extending the existing **West Hollywood Cityline Shuttle** to that station would provide immediate transit access **without the cost, disruption, environmental risk, loss of neighborhoods, or decades of construction** associated with the K-Line extension.

Before committing billions of dollars and exposing an entire community to potential environmental and structural harm, Metro must take a step back and ensure that this project is safe, necessary, and truly in the public interest.

We respectfully urge you to delay any approval of the K-Line extension until:

- Meaningful community outreach in West Hollywood has been conducted
- Comprehensive, site-specific environmental and subsidence studies are completed
- The full impacts of SB79-related upzoning and displacement are transparently addressed
- Lower-cost, lower-impact alternatives have been seriously evaluated

The safety, stability, and character of our community depend on it.

Sincerely,
Jay Jacobson
West Hollywood Resident

Hello,

I am writing out of a concern for the potential outcome of this board meeting. The development of a better transit infrastructure within LA is something very important to me and so many others, and cannot stand to be postponed for what I feel are concerns based outside the realm of reality. The realization of this line would alleviate concerns as to whether or not one could attend school or work in the instance that their car unexpectedly breaks down (if they are so fortunate to have that luxury), without funds for to repair or buy another. I do not believe these reasons to delay the K Line Northern Extension are justified given the scientific support that the project will not be so intrusive contrary to the fears of those 22 individuals in Lafayette Square.

Hello LA Metro Board,

I'm writing in strong support of the San Vicente-Fairfax option for the K Line extension. This option would connect Angelenos to the most major job centers, easing the commute for transit riders and drivers alike. I myself could finally take the train to work if this option were built, as I work at the restaurant A.O.C. across the street from Cedars Sinai. Many of my coworkers bike to work, which can be dangerous at night when we leave work. Please choose the San Vicente-Fairfax option as it is in the best interest of the people who live and work in the city.

Thank you,
Lora Hakanson

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

For those of us who live, work, and move through Los Angeles every day, this option reflects how people actually experience the city. The San Vicente–Fairfax route connects neighborhoods that are active and underserved by rail today, while linking people to where they work, access services, and spend time with their communities.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

At a time when Angelenos are facing rising costs, long commutes, and the urgent need for more sustainable transportation options, we must invest in transit that meets people where they are and takes them where they need to go.

I urge the Metro Board to prioritize long-term regional benefits by selecting the San Vicente–

Fairfax route as the Locally Preferred Alternative and against any amendments that would delay this route.

Thank you for considering public input on this important decision.

Sincerely,
Emmanuel Alcantar

Hello Metro Board Members,

I would like to express my support for the K-line extension and completion of the extensions planning process.

I am against the push for continual research and termination of the project. The project must begin construction soon!

As a non-native frequent visitor to Los Angeles, I am heavily dependent upon Metros extensive transit network (Along with Metrolinks passenger rail transit network). I use metro to explore and discover Los Angeles attractions along the Metro routes.

Thank you for your consideration,

Austin Estrada from Riverside, CA

To whom it may concern,

It has come to my attention that everyone who is involved w/ expanding public transit isn't really trying to expand public transit at all. I'm still livid that the K Line South Extension [Item #7] will have the possibility of the Hawthorne alignment due to fearmongering, and we are doing this again with the K Line North project. I also fear that this group is colluding w/ this and many other projects that we ***should*** be expanding elsewhere: such as, but not limited to: Southeast Gateway, the E Line extension to Whittier, and the possible Vermont Heavy Rail Line to alleviate the ridership from Line 204.

Leading the collusion is Jacquelyn Dupont-Walke, who is leading the Lafayette Square "coalition" and is letting her people know that they would rather implement a freeway in their backyards because they love their cars instead. With that being said, if there really is collusion, there should be an independent investigation as to why that is because this isn't working. We need competent people who will run this agency; not to mention, cancelling or postponing this proponent will set a precedent that you are not into expansion and that you don't want to create more jobs within the Metro Rail system - custodians, track inspectors, train operators, supervisors, controllers, etc.

I urge you to vote for the extension and to help West Hollywood out plus having a branch for a possible light rail line on Santa Monica Boulevard because they also need improvements to get around town. We need options to get around town, not being handicapped by a few "homeowners" who are worried for absolutely nothing. This is urgent and I urged you to approve Item #7 immediately.

From,

Manuel H.

Dear Members of the Los Angeles County Metropolitan Transportation Authority Board,
I am writing to express my strong support for advancing the K Line Northern Extension using the San Vicente alignment as the Locally Preferred Alternative.
First and foremost, t**his project should NOT be delayed any longer.** Los Angeles needs this, and the thought that a small group of homeowners and LA politics can delay this even further is a dis-service to Los Angeles constituents. Build this line by 2035 so the people of LA get what they deserve!
As a resident of Los Angeles, I can confidently say that an extension like this opens up transit opportunities on an entirely different level. Today, many of us are forced to rely on driving for trips that could and should be served by efficient rail. The opportunity cost of this is significant—time lost in traffic, increased transportation expenses, and reduced access to jobs, services, and community amenities. A direct, well-aligned transit corridor like San Vicente has the potential to fundamentally shift how people move across the city and reduce that dependency on cars.
From both an infrastructure delivery and economic development perspective, the San Vicente alignment represents the most effective and responsible investment for Los Angeles. It provides a direct, high-demand corridor that will maximize ridership, improve regional connectivity, and deliver long-term value to taxpayers.
Equally important- **the significant impact this decision will have on small and local businesses, particularly within the construction and infrastructure sector. It will directly impact the local, small, disadvantaged business we operate within southern California.**
Projects of this scale are not just transit investments—they are economic engines. The San Vicente alignment will:

- Create meaningful opportunities for **small, local, and disadvantaged businesses (DBE/SBE firms)** to participate in construction, procurement, and long-term maintenance
- Drive job creation across skilled trades, field operations, and professional services
- Support workforce development and provide pathways for local hiring and apprenticeship programs
- Strengthen the local construction ecosystem by ensuring consistent and equitable access to public infrastructure work

As someone directly involved in construction operations and project delivery, I have seen firsthand how critical projects like this are in sustaining small businesses. The San Vicente alignment stands out not only for its operational and ridership advantages, but also for its ability to support a broader ecosystem of contractors, suppliers, and local businesses that are essential to delivering this project efficiently and successfully.

I respectfully urge the Board to approve the San Vicente alignment as the Locally Preferred Alternative. This decision will not only strengthen our transit system, but also invest in the people, businesses, and workforce that build and sustain our city.

Thank you for your leadership and consideration.

Sincerely,

Best,

Lucas Silva

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
James Esser

Good afternoon,

I am a resident of Los Angeles and as someone who lives and works in LA I urge the board to please vote yes on the K-Line northern extension.

We are in a climate crisis, we don't need anymore vehicles on the road. We don't need anymore surveillance cameras either. If we prioritize Metro extensions and fast and efficient public transit we won't need to employ speeding cameras.

Please vote to extend the K line and stop delaying Metro extensions.

Thank you,

Dear Board Members,

I am unable to attend the board meeting but would like to express my strong support for the K Line Extension.

Please pull the Mayor's motion to amend and support the staff's recommendation WITHOUT DELAY. Furthermore, we should save $165M and go back to the DEIR route through Mid City, since tunneling has zero impacts.

This rail line will be transformative for LA and needs to be moved forward without delay. Requiring additional study will do nothing but imperil funding and delay this critical infrastructure for a decade or more.

Dear Metro Board Members,

I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.
Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.
Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.

We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.
We respectfully ask that you:
Reject the current alignment
Ensure a fair and transparent evaluation of alternatives
Provide meaningful and timely engagement with our community
Restore trust through open communication and accountability
We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.
Thank you for your time and consideration.

Sincerely,

Chelsea Patterson
Mid City Resident

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,

I would like to strongly advocate for the staff's recommendation for the K Line Extension with a tunnel through Crenshaw/Option 2 with no amendments or delays.

I lived in NYC near the construction of the Q line extension that connected a train transit desert to the entire city. I can attest to the fact that construction there was not a nuisance for residents as construction lasted for years without issue. I remember when the train opened and how excited I was to be able to walk mere steps to be transported to another borough in minutes.

I appreciate the lengths that staff has gone, to work for an additional 18 months at millions of dollars of expense to ensure construction is the least disruptive to the residents of Lafayette Park.
Many of the residents of Lafayette Park appear to be focused on their own worries and not the public good. They cannot envision how transit can transform a neighborhood by bringing new businesses, travelers, revenue, and integration of communities because they may not have lived in a city with extensive public train transit. It's your job as a member of the governing body to see these things for the future and sell them to constituents who may not have the experience or vision, and to allay their fears. I hope you vote for transformative change over the fear of perceived inconvenience.

I live in West Hollywood and eventually this "inconvenience" will essentially run under my condo on Santa Monica Blvd. But I am advocating for it because I know public transit can change people's lives for the better. If you care about the climate, the city, the residents and its future you will vote for the staff recommendation without delay.

The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.

Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.

We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.

We respectfully ask that you:

Reject the current alignment

Ensure a fair and transparent evaluation of alternatives

Provide meaningful and timely engagement with our community

Restore trust through open communication and accountability

We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.

Thank you for your time and consideration.
Sincerely,
Mid City Resident

To the Metro Ethics Officer and Members of the Board,

My name is Mary Beth Fielder, and I am a resident of the Oxford Square neighborhood in Los Angeles. I am writing to submit a formal objection to the proposed **$136 million "Option 2" detour** for the K Line Northern Extension (Item 7 on the March 26th Agenda).

I am formally requesting an immediate investigation into a significant **Conflict of Interest** and a **Breach of Fiduciary Duty** regarding the allocation of public funds for this project.

Basis for Complaint:

- **Conflict of Interest:** Public reporting by **LAist** has identified that two Metro Board members reside within the 33-home radius that would benefit from this $136 million detour. Despite their recusal, reports indicate that private "shadow meetings" have occurred to influence this outcome.
- **Misuse of Public Funds:** Metro's own technical staff has recommended the **San Vicente-Fairfax Hybrid alignment** as the most efficient and cost-effective route. Approving a $136 million "private favor" against the recommendation of your own experts constitutes a mismanagement of taxpayer dollars.
- **Endangering Project Viability:** This detour invalidates years of environmental studies, risking our **2029 "Fast-Track" status** and billions in accelerated funding. This would effectively default the project back to **2047**, depriving the public of essential transit for nearly two decades.

I urge the Board to **reject the detour** and uphold the staff-recommended alignment. We are monitoring this vote closely alongside our neighbors in Mid City and P.I.C.O. and expect a full investigation into the reported "shadow meetings."

Respectfully,

Mary Beth Fielder

Hello,
My name is Anne Marie Drolet. I'm a bike mechanic with Bicycle Transit Systems. I'm also the chief shop steward for our union, TWU 320. I am very much in favor of Mod 21. I love the work I do at Bicycle Transit Systems and I know my coworkers would say the same. We want to continue this important service, we want to see a bike share system that thrives, and we want to keep providing an alternative and, arguably, far superior way of getting around the city. We're a strong unionized workforce and we're proud of the work we do at Bicycle Transit Systems. So let's keep this going.

Hello,

As an Oxford Square resident, I am filing this formal objection to the **$136M 'Option 2' detour**.
Public reporting indicates a clear **Conflict of Interest** involving recused Board members who reside within the 33-home area benefiting from this detour. Approving a $136M expenditure of public funds for a 'private bypass'—against the clear recommendation of Metro's own technical staff—constitutes a **breach of fiduciary duty**.
Furthermore, this detour jeopardizes billions in accelerated funding and risks an **18-year delay** to the project. I urge the Board to reject the detour and uphold the **San Vicente-Fairfax alignment**. We are monitoring this vote closely and expect a full investigation into the 'shadow meetings' reported by the press.

Best regards,

Sally Boldt, Oxford Square resident

I am writing in support of the San Vicente-Fairfax hybrid alternative of the K Line Northern Extension.

As a regular user of the LA Metro system, it seems obvious that we really need the transit opportunities and stations that this extension will provide, particularly linking West Hollywood to the rest of the train system.

Thank you,

Keith Jefferies

Dear Metro Board Members,

I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.

Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.

Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.

There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.

Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.

Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.

We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.

We respectfully ask that you: Reject the current alignment Ensure a fair and transparent evaluation of alternatives Provide meaningful and timely engagement with our community Restore trust through open communication and accountability We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.

Thank you for your time and consideration.

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

Hello,

I would like to strongly urge the Metro board to select the staff-recommended Locally Preferred Alternative for the K Line Northern Extension and reject any motion that would not select a route for the entire extension. The tunneling concerns do not have any scientific merit and no more money should be wasted on additional studies.

Best,

To the Metro Board,

As a Los Angeles County resident of 50 years and a West Hollywood resident for over 30, I am writing to express my strong opposition to the proposal for three subway stations within our city. The current outreach has failed to capture the genuine concerns of the residents most affected by this plan.

My opposition is rooted in four critical areas:

- **Scale and Utility:** West Hollywood spans less than two square miles. Placing three stations in such a compact area is unjustified, particularly as we lack the commercial density to support this level of infrastructure.
- **Geological Safety:** Tunneling through a high water table in a known seismic zone is a recipe for disaster. We have already witnessed the damaging effects of land subsidence and dewatering in our neighborhoods. Where are the site-specific hydrological and geological studies to prove this won't lead to cracked foundations or sinkholes?
- **Economic Risk:** With a $16 billion price tag, this project is a staggering expenditure. We must look to the fiscal crises facing systems like BART as a cautionary tale against over-extension.
- **Displacement:** Combined with SB79, this route encourages aggressive upzoning that threatens our rent-stabilized housing. This project prioritizes developer profit over the stability of our disabled and fixed-income residents.

The Alternative: Rather than decades of construction and billions in debt, Metro should expand the **Cityline Shuttle** to connect with the D Line at Wilshire/La Cienega. This is a practical, cost-effective solution that serves residents without destroying the fabric of our community.

I urge you to reject and vote against the three-station subway expansion proposal.

Thank you for your consideration.

Beverly Lund

Subject: I am a Lafayette Square resident and I oppose the K Line extension

Dear Metro Board Member,

I am a resident of Lafayette Square, and I strongly oppose LPA Option 2 for the K Line Northern Extension.

This alignment deviates from the original plan following the elimination of the Crenshaw/Wilshire station, and it unfairly shifts the burden onto our historic residential neighborhood.

LPA Option 2 would create approximately 22 subsurface easements beneath homes, raising serious concerns about property rights, structural impacts, and construction disruption.

It would also remove our local grocery store and the only pharmacy serving our community within miles—cutting off access to essential services.

Our neighborhood should not bear the brunt of accommodating changes made to meet the needs of other communities. We ask Metro to reject LPA Option 2 and pursue an alternative that avoids unnecessary impacts to residential areas and preserves critical local resources.

Thank you for your consideration.

Sincerely,

Grace Park

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Sayer Delk
Fairfax Neighborhood

Dear Members of the Los Angeles County Metropolitan Transportation Authority Board,
I am writing to express my strong support for advancing the K Line Northern Extension using the San Vicente alignment as the Locally Preferred Alternative.
First and foremost, t**his project should NOT be delayed any longer.** Los Angeles needs this, and the thought that a small group of homeowners and LA politics can delay this even further is a dis-service to Los Angeles constituents. Build this line by 2035 so the people of LA get what they deserve!
As a resident of Los Angeles, I can confidently say that an extension like this opens up transit opportunities on an entirely different level. Today, many of us are forced to rely on driving for trips that could and should be served by efficient rail. The opportunity cost of this is significant—time lost in traffic, increased transportation expenses, and reduced access to jobs, services, and community amenities. A direct, well-aligned transit corridor like San Vicente has the potential to fundamentally shift how people move across the city and reduce that dependency on cars.
From both an infrastructure delivery and economic development perspective, the San Vicente alignment represents the most effective and responsible investment for Los Angeles. It provides a direct, high-demand corridor that will maximize ridership, improve regional connectivity, and deliver long-term value to taxpayers.
Equally important- **the significant impact this decision will have on small and local businesses, particularly within the construction and infrastructure sector. It will directly impact the local, small, disadvantaged business we operate within southern California.**
Projects of this scale are not just transit investments—they are economic engines. The San Vicente alignment will:

- Create meaningful opportunities for **small, local, and disadvantaged businesses (DBE/SBE firms)** to participate in construction, procurement, and long-term maintenance
- Drive job creation across skilled trades, field operations, and professional services
- Support workforce development and provide pathways for local hiring and apprenticeship programs
- Strengthen the local construction ecosystem by ensuring consistent and equitable access to public infrastructure work

As someone directly involved in construction operations and project delivery, I have seen firsthand how critical projects like this are in sustaining small businesses. The San Vicente alignment stands out not only for its operational and ridership advantages, but also for its ability to support a broader ecosystem of contractors, suppliers, and local businesses that are essential to delivering this project efficiently and successfully.

I respectfully urge the Board to approve the San Vicente alignment as the Locally Preferred Alternative. This decision will not only strengthen our transit system, but also invest in the people, businesses, and workforce that build and sustain our city.

Thank you for your leadership and consideration.

Sincerely,

Best,

Lucas Silva
Operations Manager

Dear Members of the Los Angeles County Metropolitan Transportation Authority Board,

I am writing to express my strong support for advancing the K Line Northern Extension using the San Vicente alignment as the Locally Preferred Alternative.

This project should not be delayed any further. Los Angeles urgently needs this investment, and continued delays only hold back meaningful progress. Delivering this line by 2035 is critical to meeting the region's transportation needs.

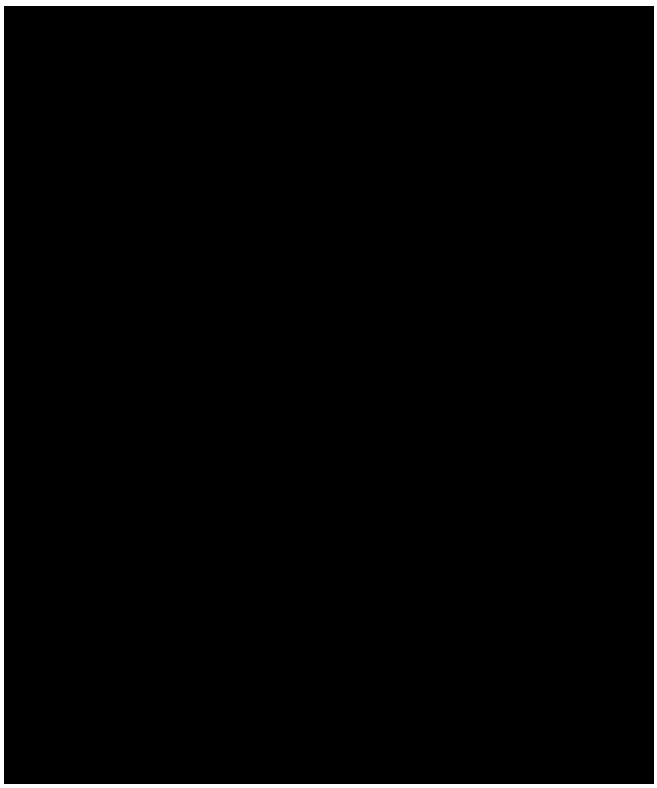

As someone who commutes into Los Angeles, I see firsthand how limited transit options force many trips to rely on driving. A direct corridor along San Vicente would significantly improve mobility, reduce congestion, and expand access to jobs and services.

The San Vicente alignment is also the most effective choice from an economic and delivery standpoint. It will maximize ridership, strengthen connectivity, and provide long-term value to taxpayers.

Equally important, this project will create real opportunities for small, local, and disadvantaged businesses, while supporting job creation, workforce development, and the broader construction industry. Projects like this are essential to sustaining small businesses and driving economic growth across Southern California.

I respectfully urge the Board to approve the San Vicente alignment as the Locally Preferred Alternative. Thank you for your time and consideration.

Best Regards,

From: Ljsmith50 [redacted]>

Dear Metro Board Members,
I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.
Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.
Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.
We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.
We respectfully ask that you:
Reject the current alignment
Ensure a fair and transparent evaluation of alternatives
Provide meaningful and timely engagement with our community
Restore trust through open communication and accountability
We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.
Thank you for your time and consideration.

Sincerely,
Mid City Resident

Subject: (EXTERNAL) Approve the San Vicente-Fairfax Route for the K Line Extension without delay!

CAUTION: This email originated from outside of the organization. Help Metro protect against cyber threats. Verify the sender's email address carefully. Do not click links or attachments unless you trust the sender. Be aware of phishing signs such as urgent requests, unexpected links, or offers that seem too good to be true. Be cautious of spoofed emails that appear to come from trusted sources. Report suspicious emails. Follow Metro policies and update accounts only through official channels.

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.

The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

To the Board,

I'm a resident of 90019, and have come to find out that the current preferred option (Option 2) will relocate the only full-service grocery store and full service pharmacy in the area. I also understand that while there has been talk by Metro about this relocation, but that no site has been affirmed yet. However, I've also come to find out that the owner of that entire lot has stated he is entirely unaware of Metro's plans to relocate his store(s). This is apparently true for many of the other store owners on that lot.

I have recently seen a lot of the social media from West Hollywood residents about this issue, and I believe that they are intentionally misrepresenting the concerns of the entire neighborhood in order to ram through the project despite the concerns of the neighborhood at large. There are tunneling concerns specific to Lafayette Square, but there are larger access to services concerns for the 90019 zip code, and I believe both need more time to be properly addressed.

West Hollywood residents are swimming in the best services LA has to offer, where as 90019 is something of a services desert. WeHo activists have their own agenda about transportation in Los Angeles, and they see any delay as a frustrating disruption of that agenda, regardless of the validity of local concerns. Residents of 90019 are largely working class folks trying to get by who don't as much free time to spend on activism.

I'm asking that you please delay this vote so that both Metro and the neighborhood have time to address all the issues raised, without the disruption of a group of people who have no financial stake in our neighborhood. Please don't let their voices rise above ours, simply because they talk louder.

Thank you,
Neil Uchitel

Dear Metro Ethics Office,

As an Oxford Square resident, I am filing this formal objection to the $136M 'Option 2' detour.

Public reporting indicates a clear Conflict of Interest involving recused Board members who reside within the 33-home area benefiting from this detour. Approving a $136M expenditure of public funds for a 'private bypass'—against the clear recommendation of Metro's own technical staff—constitutes a **breach of fiduciary duty.**

Furthermore, this detour jeopardizes billions in accelerated funding and risks an 18-year delay to the project. I urge the Board to reject the detour and uphold the San Vicente-Fairfax alignment. We are monitoring this vote closely and expect a full investigation into the 'shadow meetings' reported by the press.

Sincerely,
Randolph Palisoc

My name is Connor Maduzia; I am a resident of West Hollywood, and I am writing to support approving the staff recommendation for the K line north with **NO** further studies or community outreach. We have already wasted 18 months and $2.3M of taxpayer money proving that tunnels 70 feet below homes are imperceptible on the surface. The concerns about the supermarket at Mid-Town crossing have been addressed in the staff recommendation. This project would be nothing but a boon to surrounding neighborhoods and delaying it any further to further placate the unsubstantiated fears of a select few homeowners is ludicrous and corrupt.

If the draft motion StreetsForAll (https://www.streetsforall.org/blog/mayor-bass-looks-to-delay-k-line-north-while-claiming-she-isnt) got their hands on goes through, all involved board members belong in prison. Bonta is watching. Do the right thing and approve the staff recommendation without any alterations (unless that alteration is going back to the ORIGINAL DEIR alignment through Lafayette Square).

Genuinely, so furious about this. Don't kill K north like you killed K south.

Hello,

I am writing today to voice my support FOR Item #7 - San Vicente-Fairfax alignment for the K Line North Extension WITHOUT any more route studies and delays.

As a college student that does not own a car, this future rail line will be important for the mobility of people like me, shortening trip times from 1 hour+ to 19 minutes. Therefore, it is imperative for the board to approve the LPA or the DEIR alignment as recommended by metro staff, without any more delays. 18 months of study over un-scientific tunneling fear mongering is already long enough, and delaying it more will put the financial future of the project at risk. Thank you!

Sincerely,
Jack Krencicki

Dear Metro Board Members,

I am a lifelong Angeleno and a 27 year resident of the Mid-City community. I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.

Our community stands to lose its only full-service grocery store and its only pharmacy/drugstore under this proposal—essential resources that residents, some of whom don't have cars/or options to drive elsewhere, rely on every day. For many, especially seniors and families, losing access to food and medication within the neighborhood would have serious and lasting consequences.

Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life. There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member, who has actively supported this alignment and who owns properties that may increase in value as a result, is not recused. This raises legitimate questions about fairness, transparency, and public trust.

Finally, recent developments have deepened these concerns. Metro has stated that discussions about relocating our grocery store are underway, yet the property owner has stated they have not been contacted. Reports that the City may be considering condemning this property as a way to move forward on this project without clear communication only add to the perception of a process that lacks transparency and accountability.Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.

To be very clear, we are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.

We respectfully ask that you:
• Reject the current alignment
• Ensure a fair and transparent evaluation of alternatives
• Provide meaningful and timely engagement with our community
• Restore trust through open communication and accountability

We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.

Thank you for your time and consideration.

Dear Metro Board Members,

I am writing regarding Item 7 #2025-0846 and am strongly FOR approving the San Vicente–Fairfax alignment as the Locally Preferred Alternative (LPA) for the K Line Northern Extension (KNE) Project.

This alignment is the most effective option to maximize ridership, improve regional connectivity, and serve one of the densest and most transit-dependent corridors in Los Angeles, including West Hollywood. Moving forward with this plan, including the initial operating segment from Expo/Crenshaw to Wilshire/Fairfax, is a critical step in delivering meaningful transit improvements in a timely manner.

Years of planning and environmental review have already gone into this project. Further delays or changes that avoid serving West Hollywood would undermine the project's benefits and slow urgently needed transit expansion.

I support approval of the staff-recommended San Vicente–Fairfax alignment, including the proposed Mid-City tunnel adjustments and funding strategy, and urge the Board to move this project forward without delay.

Thank you for your time and consideration.

Dear Members of the Los Angeles County Metropolitan Transportation Authority Board,

I'm writing to express my strong support for advancing the K Line Northern Extension using the San Vicente alignment as the Locally Preferred Alternative.

This project should not be delayed any further. Los Angeles needs this. At some point, we have to stop letting a small group of opposition and politics hold back infrastructure that benefits the entire city. We should be focused on delivering this by 2035 and getting it done for the people of Los Angeles.

As someone who lives and works here, I see every day how limited transit options force people to rely on driving—even for trips that should realistically be served by rail. That comes with real costs: time lost in traffic, higher expenses, and less access to jobs and opportunities. A direct alignment like San Vicente has the ability to significantly improve mobility and actually shift how people move throughout the city.

From both a delivery and long-term value standpoint, the San Vicente alignment is the right choice. It's direct, it serves a high-demand corridor, and it will ultimately maximize ridership and regional connectivity while making responsible use of public funds.

There's also a major economic component here that shouldn't be overlooked. Projects like this directly support small and local businesses—especially DBE and SBE firms like ours that operate in Southern California. This isn't just a transit investment, it's an investment in the local economy.

The San Vicente alignment will:

- Create real opportunities for small, local, and disadvantaged businesses to participate in construction and ongoing work
- Generate jobs across skilled trades, field crews, and professional services
- Support workforce development and local hiring
- Strengthen the local construction industry by providing consistent access to public infrastructure work

From my experience in construction and project delivery, I've seen how important projects like this are to keeping small businesses running and people employed. The San Vicente alignment stands out not just because it makes sense from a transit perspective, but because it supports the broader network of people and companies needed to actually build and maintain it.

I strongly urge the Board to move forward with approving the San Vicente alignment. This is an opportunity to improve our transit system and invest in the people and businesses that keep Los Angeles moving.

Thank you for your time and consideration.

Best,

Mason Miller

Operations Manager

Dear Metro Board Members,

I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.

Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.

Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024.

This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.

There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.

Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.

Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.

We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.

We respectfully ask that you:

Reject the current alignment

Ensure a fair and transparent evaluation of alternatives

Provide meaningful and timely engagement with our community

Restore trust through open communication and accountability

We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.

Thank you for your time and consideration.

Sincerely,

Wade Eck

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Renee Rubin

Hello,
I'm a resident of the Fairfax District, in the K Northern Extension project area, and I strongly encourage the board to approve the staff recommendation without amendment and without delay (or, even better, to return to the DEIR alignment).

This critical project will be the highest ridership light rail line in the country, and I can personally attest that I will use it constantly. It was given a very unfortunate late placement in Measure M, but West Hollywood has generously offered to help finance the line with an EIFD to get it done much sooner and form a critical north-south link in our Metro system.

To turn them down would be *insane*. And yet, that is what Mayor Bass's proposed motion does. West Hollywood has now confirmed that Bass's motion to delay the selection of the southern portion of the alignment will eliminate the possibility of accelerating this line, or even make financing the line impossible altogether, since there is a massive shortfall between the funds that Measure M offers and the funds required, and an EIFD must be done *now* to be done at all.

Why is Karen Bass doing this? Ostensibly at the behest of 22 homeowners in Lafayette Square, who have already had the line delayed *18 months* and had *2.3 million dollars* spent on trying to earn their trust - but they are not engaging in good faith. Mayor Bass never once tried to actually put forward the studied alignment that would totally avoid Lafayette and Wellington Squares, proving that she has no actual interest in finding a solution, but rather that she simply wants the project dead. There is no other way to understand her actions, and her unwillingness to come to a compromise.

The picture becomes clearer, though, when more facts come into focus. Despite living in Lafayette Square themselves, which should have, under state law, caused them to recuse from the project from the start, Holly Mitchell and Jackie Dupont-Walker have been working with Bass to steer the Lafayette Square opposition to the project, causing that 18 month delay and multiple additional studies. Metro went so far as to recommending spending an entirely unnecessary $165M of public funding and wasting 28s of riders' time on every single trip to assuage 36 of these homeowners' completely unfounded anxieties - an absolutely *deranged* use of public money.

What Metro staff undoubtedly did not realize is that that altered tunnel option placed the tunnel directly underneath Jackie Dupont-Walker's house. She appears to be one of the 22 homeowners remaining in the neighborhood with a tunnel beneath her home.

Holly Mitchell, to her credit, went to Metro counsel and requested an FPPC recusal letter, and has since abided by the conditions of the recusal to not influence the vote. Meanwhile, Dupont-Walker went to *personal* counsel so that her communications could be protected by attorney-client privilege, and painted her recusal as 'voluntary' and her conflict of interest as 'perceived.' She then spent the next week participating in meetings on the project and personally lobbying multiple metro board members - a serious violation of what should be the recusal required under state law, since the project could financially impact her, and she appears to believe (erroneously), like her neighbors, that her own property value will be negatively impacted.

The only reading of this is that Karen Bass is trying to spike a $15B public project - again, the *highest ridership light rail line in the country* - because her friend and appointee is afraid of the property value on her house diminishing.

This is **staggering** public corruption. That the Metro Board would even *entertain* the unscientific fears of these neighborhoods, especially after already burning so much public money and time on them, is a total abdication of duty and yet another argument for the state legislature to totally remake and professionalize the Metro Board, removing politicians from it entirely. And let me tell you - confidence is quite high that if this corrupt effort to stall the line succeeds, the state legislature will step in and do their duty. "LA Metro Board kills highest-ridership light rail line in country to financially benefit one of their members" will be a headline you will see in every newspaper in California. The State AG has already had the corruption case referred to him by a great many people.

This is an existential vote for the Metro Board. Are you a corrupt, obstructive, unscientific body? Or is your purpose to actually improve the lives of the citizens of LA county? The only answer is to advance the K Northern Extension - ideally with a return to the higher-benefit and more fiscally-responsible DEIR alignment, to not waste taxpayer money on conspiracy theories just because one of the theorists is your own colleague.

Thank you.
Nick Andert

Dear Mayor Bass, Ms. Dupont-Walker, and K Line Metro team and stakeholders,

Tunneling is actually good, a Metro stop clearly and has always and everywhere benefited the local community in every aspect (including property values!), immediately and especially in the long run; therefore do not cede to the virulent and totally misguided Lafayette Square minority nor Jacquelyn Dupont-Walker's 'absent' recusal. Say no to Mayor Bass' motion.

Hello - I'm a resident of Oxford Square and was really surprised and saddened to see that the K line extension (which we are so excited about! yay Los Angeles!!) may be diverted and we are being charged over a 100 million dollars for it.

That's taxpayer money. My money, your money.

Is that how you want to see taxpayer money spent? I don't. Lets try to expedite the K line anyway we can. There is no subway service through the center of the city - LA's most densely populated neighborhoods.

Please keep the K Line as it is and dont let cronyism muddle and delay a service WE ALL NEED!

Thank you! I'm sure you're getting a lot of emails about this. People are outraged!

Dear Metro board,

This project has been delayed enough, and it is time to approve the K Line Northern Extension San Vicente-Fairfax alignment.

Metro has already spent $2.3M and delayed the project to attempt to appease a tiny number of homeowners, even knowing that tunneling has no impact at all and cannot be felt at ground level. Despite the study ALSO finding no impact, they are still attempting to cost $165M of OUR taxpayer dollars, cost riders 30 seconds of delays, and delay the project for years. This is an inexcusable waste of our time and money which Metro needs to stop encouraging.

West Hollywood is amazingly willing to put up $2.2B for this project, but only if the project is not delayed.

No. More. Delays. The appeasement of bad-faith homeowners cannot continue. Refuse delays, and switch back to the DEIR option. This is an extremely high ridership line capable of reducing traffic in some of the most congested parts of the city, and we can't afford to pick a worse option just because a tiny number of people are politically connected.

Thank you,
David Edmondson

Dear LA Metro Board of Directors,

I urge you to please approve the DEIR alignment of the K line northern extension. I live in Redondo beach just a 10 min bike ride from the southern terminus. The vision of the K line as the highest ridership light rail line in the country, a key north-south connector, greatly excites me. With the EIFD from West Hollywood we have an opportunity to pull in this schedule significantly. I don't want to be nearly twice my current age before I can ride this.

Please do not delay this project with unfounded concerns about tunneling. Reading these concerns, it sounds like we're talking about leveling a neighborhood for at-grade rail. In reality the peer-reviewed analysis by your staff showed that tunnels a hundred feet below houses have imperceptible impact. Spending the last year and a half on alternative alignments was a large waste of time and money in my opinion. Nobody will notice if a tunnel goes under their house, as analysis and past projects have demonstrated. Why is this being made into such a mountain? As a taxpayer, why are millions of our dollars being spent on analysis and outreach for an imperceptible problem? Please do not put the unwarranted and technically disproven "concerns" of a couple dozen homeowners over the needs of the 100,000 daily riders who will benefit from this project. It sounds nice to say "we need to further engage the community and respond to their concerns as a good neighbor," but that has already been done. It is clear no amount of engagement or study will satisfy these fictitious and irrational concerns. Please rescind the alternate motion to ignore your staffs hard work and let's please get it done!

Thank you,

Liam Walsh

Good afternoon,

This might not make it on time, but please for the love of god, do not delay this K Line North extension plan -- please. The amount of homeowners that have too much time on their hands when it comes to opposing plans that quite literally do not affect them in the slightest. This extension for the K Line will be extremely helpful and beneficial for Angelinos that actually rely on public transportation to get from place to place without having to rely on a vehicle.

While I unfortunately cannot make it there in person, please continue forth with your plan on making the K Line extension happen without any further delay. Delaying it to potentially 2041 would not only affect daily riders that need faster transportation, but some might not even get a chance to see it happen with their very eyes. Please. do the right thing and do not bend over backwards to these NIMBYs that oppose the idea -- even if it's Mayor Karen Bass.

Sincerely,
Bruce Elzey

To: Metro Board of Directors

From: Chris Schaper

Date: March 25, 2026

Re: Item 7 – Approval of the Locally Preferred Alternative (LPA)

To the Honorable Members of the Metro Board:

I am writing today as a [resident/commuter/business owner] in Los Angeles to urge the Board to formally approve the staff-recommended **San Vicente-Fairfax alignment** for the K Line Northern Extension during tomorrow's meeting.

It is imperative for the future of Los Angeles that this project moves forward without further delay. For too long, our transit network has lacked a high-capacity North-South connection between the Crenshaw District, Mid-City, West Hollywood, and Hollywood. The San Vicente-Fairfax route is the only option that maximizes our investment by serving the highest number of riders—projected at over 60,000 daily trips—and connecting Angelenos to more than 125,000 jobs.

Selecting the LPA today is a critical step toward:

- **Reducing regional gridlock** by providing a viable alternative to the highly congested Fairfax and La Brea corridors.
- **Meeting our climate goals** by incentivizing transit-oriented living and reducing VMT (Vehicle Miles Traveled).
- **Ensuring economic equity** by connecting historically underserved communities in South LA to the major job centers of the Westside.

We cannot afford to let this project stall in a cycle of perpetual study. The data is clear, the environmental review is comprehensive, and the need is urgent. I ask that

you vote **YES** on Item 7 to move the K Line Northern Extension into the final design and construction phases immediately.

Thank you for your leadership and for prioritizing the future of Los Angeles.

Sincerely,

Chris Schaper

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines
This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.
In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Brittany Stinson
West Hollywood

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Jacob Goss

Dear Metro Board Members,
I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.
Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.
Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.
We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.
We respectfully ask that you:
Reject the current alignment
Ensure a fair and transparent evaluation of alternatives
Provide meaningful and timely engagement with our community
Restore trust through open communication and accountability
We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.
Thank you for your time and consideration.
Sincerely,
Rosha Yaghmai

As a resident, I formally object to the $136M 'Option 2' detour (Item 7). Public reporting indicates a conflict of interest involving recused Board members. Approving this 'private bypass' against staff recommendations is a breach of fiduciary duty and risks an 18-year delay to the project. I urge the Board to reject the detour and uphold the San Vicente-Fairfax alignment.

Dear Metro Board, Metro Ethics Office, LA Times desk, Council Member Hutt, and Mayor Bass's office:

I am writing as a resident of Mid-Wilshire (Oxford Square, CD10) and a business owner in Koreatown to urge you to support the staff-recommended San Vicente-Fairfax alignment for the Metro K line (see 2024 K Line Northern Extension Draft EIR) and reject the "option 2" diversion.

We want the 2029 timeline; we want the San Vicente-Fairfax alignment with no diversion.

In Mayor Bass's words, "the K line will ease congestion, create jobs, and expand access to culture, education, opportunity and housing". Sounds great!

"Option 2" is a bad plan that adds delay, cost, and an "S-curve" to the line in order to satisfy a couple of dozen homeowners at the cost of over $135 million to the taxpayers! Here are a few of the reasons why:

- **No factual justification**: Decades of studies and Metro's data show that deep-bore tunneling is undetectable at the surface. **Even Buckingham Palace has trains running in tunnels below it!**

- **Preferential treatment, conflicts of interest, a breach of fiduciary duty**: Creating a nine-figure diversion for a small group of wealthy residents is unethical. It would increase city liabilities and deepen a perception (and perhaps also a precedent): rich neighborhoods can block city infrastructure at everybody's expense. Notably, this option risks triggering an 18-year delay to the project, jeopardizing billions in accelerated funding.

- **Slower service**: This S-curve would make every train on the line slower, increasing operating costs … permanently.

Please reject "Option 2" and approve the alignment as originally studied in the 2024 Draft EIR. Los Angeles deserves better mass transit now.

We can have the K-line extension in 2029 - don't mess it up in pursuit of a private detour!

Best regards,
Robert Cresswell

Hi,

I'm just an average Angelino who is asking you to quash the dissent against the K Line. Of course we need transit! Even mediocre cities have it and LA needs so much more! Say no to the minority of rich folks trying to keep transit out of their neighborhoods. This is a long overdue expansion of our fundamental access to mobility. Best of all, IT WILL REDUCE TRAFFIC!

Thanks for hearing me and everyone else out there pushing for a better Los Angeles.

Subject: metro k line north extension

hello,

my name is kim turner. i live off melrose & highland zip 90038 and i vote.

i do not think i'm technically in weho but basically i am and it makes zero sense to not run metro line k thru weho. we're on the east edge of weho & need more reliable access than the current bus system provides.

running straight up labrea & connecting to highland does nothing for the staff & patrons of weho stores, bars & restaurants.

it makes growing a business harder than it should be because access is constrained w/out metro service & adding a single stop at labrea & santa monica changes nothing.

it also makes commuting out of weho (downtown, santa monica, universal etc) a challenge because the metro busses through weho are often cancelled or so crowded that you have to wait for the next & the next depending on the day/time.

please make the san vicente - fairfax route the route that actually gets build as it's the only one that will help traffic, help businesses in weho & decrease DUIs because folks can get in & out without needing to drive!

thank you,

kim turner [redacted]

Dear members of the board,

My name is Clayton Becker and I am a resident of Los Angeles. I am also a PhD Candidate in political science at UCLA and my primary area of focus in my research is the public input process.

The fact that the process to approve the staff recommendation has proven this contentious, the fact that I am writing to you at all, is, quite frankly, an incredible microcosm of why, as someone who studies it, I am so disillusioned with the public input process.

Metro Staff have conducted *years* of community outreach, thousands of LA residents have written in, delivered public comment, and come to outreach events. Following the initial, already substantial public input, they then went back out and did a year and a half of additional technical studies and public outreach at the cost of $2.3 million because apparently we needed yet more public input. What resulted already reflects an incredible amount of public input and *already* makes a concession of $165 million to the homeowners of Lafayette square.

At that cost, we might as well just buy the homes of the homeowners who believe (emphasis on the "believe" here, you know as well as I that Metro's additional analyses demonstrate this belief is held in error) they'll be impacted and just move ahead with the direct route from the DEIR. It is unconscionable to me that we are considering delaying this project yet again for no good reason.

You already have the results of your *own* public input process before you. You already have the locally preferred alternative. It already makes substantial concessions to Lafayette Square homeowners despite there being no genuine concern for doing so.

You cannot allow a couple dozen people with unfounded concerns to imperil this project which will serve as many as 100,000 riders every day, serve as a vital link from the South Bay to Hollywood, serve job centers, serve Cedars Sinai (which I believe is the

largest hospital in the county!), and finally connect the E, D, and B lines far to the west of downtown. This rail line has the potential to be a transformative project for Los Angeles, and we cannot afford to wait until 2041 for the project to begin construction.

I urge you in the strongest possible terms to vote in favor of the staff recommendation and reject attempts to slow walk and continue to study the project when it has already been studied within an inch of its life.

Best regards,
Clayton Becker

Hi Metro Board!

I am writing to share my support for the Metro K Line North Extension. I am a Mid-City resident, and also on the Mid-City Neighborhood Council (MINC). I am writing to you as an individual, and not representing the MINC board.

I am disappointed in Karen Bass and Jackie DuPont Walker and the evident corruption surrounding their efforts to delay and potentially tank this project. The K Line North Extension will help Mid City become a destination and ensure healthy economic and community growth.

Any opposition to the forward progress and approval to the K Line North Extension will be viewed as discrimination against less affluent Angelenos.

Angelenos deserve a world class public transit system and Metro is doing a fantastic job to build one. However, Metro Board, it seems that you continue to oppose Metro in fulfilling its job to the best of its ability. Board Members, please vote yes on the K Line North Extension and please begin investigating Karen Bass and Jackie DuPont Walker for spreading misinformation surrounding the safety of the TBM in the neighborhoods of Lafayette and Wellington.

Thank you!

-Jeff Derricott

I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.

Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.

Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.

There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.

Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.

Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.

We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.

We respectfully ask that you:

Reject the current alignment

Ensure a fair and transparent evaluation of alternatives

Provide meaningful and timely engagement with our community

Restore trust through open communication and accountability

We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.

Thank you for your time and consideration.

Sincerely,

Kathie Foley-Meyer, Ph.D.
Mid City Resident

Dear Metro Board of Directors,

Move this project forward. No more delay. **Do not adopt the Mayor Bass motion**.

The K Line Northern Extension is one of the highest-ridership corridors in the region. It closes a major gap and connects directly to the B and D Lines. The case is already made.

What's different now is funding. West Hollywood is prepared to contribute **$2.2 billion through an EIFD**—but that only works if the route is locked. The Bass motion delays that decision. And delay doesn't just slow the project—it jeopardizes the funding that would accelerate it.

You've had years of study. Years of outreach. And Metro has tunneled safely across Los Angeles and around the world.

At this point, more process isn't caution—it's delay. **Transit delayed is transit denied**.

Adopt the staff-recommended San Vicente–Fairfax alignment. Advance the project.

Build the Pink Line to the Pink Pony Club.

Thank you,
Andrew Solomon
West Hollywood resident

Dear Metro Board,

I am writing this email to express my fervent support for the San Vicente–Fairfax Alignment for Metro K Line Extension.

As a Los Angeles resident for the last five years, I am passionate about our transit system. Better access to transit improves the lives of everyone it serves. It makes commuting easier, supports economic growth, supports healthy living, reduces gas emissions, and simply makes our city a better place to live. I am proud to live here in LA, and I want to see this city grow and become more accessible for those who live here. And one of the best ways to do that is to support the development of a better transit system instead of halting progress and sticking our heads in the sand.

While concerns about vibration are often raised in discussions like this, research on underground rail systems consistently shows that these effects diminish quickly with depth and distance. In practice, vibrations from deep-bore tunnels are typically reduced to minimal or imperceptible levels at the surface, particularly when modern engineering standards and mitigation techniques are used. Framing vibration as a major community impact does not align with the broader evidence from existing systems. As someone who would directly benefit from expanded, reliable transit in Los Angeles, I'm far more concerned with access, connectivity, and long-term usability than with impacts that research shows are minimal.

This alignment is a practical and community-centered choice. It supports walkable areas, connects key destinations, and has the potential to reduce traffic congestion in some of the city's busiest corridors. Just as importantly, it ensures that transit investment goes where people are already living, working, and gathering. I appreciate the work that has gone into evaluating these options, and I urge you to prioritize the San Vicente–Fairfax alignment. This line will help build a brighter future for the residents of Los Angeles.

Thank you for your time and for your commitment to improving transit in Los Angeles.
Sincerely,

From: David Gutierrez [redacted]

To Whom it May Concern:

I'm writing to express my strong support for the continued operation and long-term investment in the K Line, one of the most important transit projects in Los Angeles in decades.

The K Line is a vital connector that links historically underserved communities to jobs, education, and essential services. It improves access to LAX, reduces congestion on some of the city's busiest corridors, and offers a reliable alternative to driving in a region that desperately needs it. At a time when Los Angeles is working to meet ambitious climate goals, cutting back on a project like this would be a step in the wrong direction.

Transit infrastructure is most effective when it is consistent, predictable, and allowed to grow. Undermining the K Line now risks eroding public trust in our transportation system and discouraging future ridership. Investments like this require time to reach their full potential, and early decisions to scale back or eliminate service can have long-lasting negative impacts.

Beyond transportation, the K Line represents a commitment to equity. It serves communities that have historically been overlooked in major infrastructure planning, and it helps bridge gaps in opportunity across the city. Maintaining and strengthening this line is about fairness and access.

Los Angeles has already made significant financial and political investments in the K Line. Abandoning or weakening it now would waste those resources and send the wrong message about the city's priorities. Instead, I urge you to support its expansion, improve service frequency, and continue integrating it with the broader transit network.

The future of Los Angeles depends on thoughtful, forward-looking decisions about infrastructure. The K Line is exactly the kind of project that moves the city in the right direction.

Thank you for your time and consideration.

Hello,

I am writing in vehement support of Item # 7 the K Line North extension and vehement opposition to any further delays or taxpayer funded studies. We should not let 22 people decide the fate of such a critical piece of infrastructure for the region. We have wasted 18 months and millions of dollars on studies to appease a miniscule amount of people.

I am also highly concerned with the apparent ethics violations of Board Member Dupont Walker; it appears she has a direct conflict of interest with this project as a previous President of the Lafayette Square Association and who appears to own property in the affected area. Her refusal to recuse herself and continue lobbying to influence the vote is highly questionable and raises concerns of trust with the Board.

In summary, I am a FOR voice for Item #7.

Please make the right choice for ALL of Los Angeles.

Thank you,
Brad Valtman

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente-Fairfax route would serve more residents and businesses as well as more of the regional destinations and job centers in Central Los Angeles and West Hollywood.
The San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

This route has received overwhelming public support and is projected to attract nearly 100,000 daily trips, offering fast, reliable transit and meaningful benefits for low-income and transit-dependent communities. If the San Vicente-Fairfax route is selected, nine much-needed K Line North stations would come within walking distance of three times as many jobs and six times as many residents when compared to the La Brea route.

In addition, this route would expand access to LACMA, Museum Row, Miracle Mile, the Grove, the Original Farmers Market, CBS Television City, the Beverly Center, WeHo's Rainbow District, and Pacific Design Center, and a range of underserved communities and job centers along the way. This route is also the only one to expand access to critical healthcare resources with its proximity to Cedars-Sinai Medical Center.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.
Thank you for considering public input on this important decision.

Sincerely,
Marcos Rodriguez Maciel

I'm writing enthusiastically IN SUPPORT FOR the K Line North San Vincente - Fairfax alignment.

It's time to approve this ASAP. No more delays. LA Metro's tunneling system is PROVEN to not affect street level homes - the arguments against this construction have been debunked per LA Metro's own THROROUGH research and public presentations.

This is a VITAL project for the future of Los Angeles.

West Hollywood is on board and ready to put a significant amount of funds toward this project. The support is OVERWHELMING. Trying to appease the handful of opposing citizens has proven not to satisfy them and disenfranchises hundreds of thousands of current and future riders of the LA Metro system. The DEIR was adjusted to appease them and yet they STILL have "issues" and will continue to find "issues" because they don't want the project to exist at all.

No more delays, no more studies. Approve the K Line North Ext San Vicente-Fairfax alignment and let's get shovels in the ground.

Thank you,

Hi,

I am for the approval of the San-Vicente Fairfax alignment as the LPA for the K Line North extension as it will stand to benefit the overarching LA community rather than a few homeowners.

Best,

Nelson

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

As a South Bay resident, I was devastated that the board decided to forgo the LPA and chose the option that will have more delays, has a large funding gap, and is likely to be abandoned in the end. If we can’t have the Southern extension of the K Line, we should at least get the Northern extension.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Marisa Kimura

The following comment is regarding:
Agenda Item 7: K LINE NORTHERN EXTENSION (KNE) - LOCALLY 2025-0846 PREFERRED ALTERNATIVE (LPA)

Dear Chair and Members of the Board,

I am writing in strong **support of staff's recommendation to approve the San Vicente–Fairfax alignment as the Locally Preferred Alternative (LPA) for the K Line Northern Extension.**

I am both a resident of West Hollywood and a daily Metro bus and rail rider. I experience firsthand the gaps in our system—particularly the lack of a reliable north–south connection through the heart of the Westside. This project directly addresses that gap in a way no other alternative does.

The staff report makes clear that the San Vicente–Fairfax alignment provides the **highest ridership**, the **greatest number of stations**, and the **strongest overall mobility benefits** of the alternatives studied . With projected daily trips approaching 60,000 and nearly 100,000 riders along the full corridor, this is not just a local improvement—it is a **transformative investment in the entire Metro system**.

Just as importantly, this project will finally deliver a true north–south rail **connection linking the E, D, and B Lines,** while also strengthening connections to some of the busiest east–west bus corridors in the region, including **Metro Lines 2, 4, and 720, as well as Big Blue Bus Line 7 along Pico Boulevard**. Together, these connections will significantly improve how people move across Los Angeles County . As someone who relies on transit every day, I cannot overstate how impactful that connectivity will be—not just for commuters, but for access to jobs, culture, and opportunity across the region.

I also want to address concerns raised by some of my fellow neighbors regarding potential land use implications, including those tied to SB 79. Respectfully, this is short-term thinking. Rail projects take decades to plan and build—this project itself is

anticipated to open in the late 2040s . Land use laws, on the other hand, can be changed in a year or less. We should not delay or compromise a once-in-a-generation infrastructure investment based on concerns about policies that can be addressed far more quickly.

We cannot afford to let temporary land use debates stand in the way of permanent mobility solutions.

Finally, I want to commend Metro staff for the extensive community engagement and thoughtful refinements to the project, particularly in response to concerns in Mid-City. The recommended adjustments demonstrate that it is possible to both listen to communities and still move forward with a project that delivers significant regional benefits.

For all of these reasons, **I strongly urge the Board to approve the staff-recommended Locally Preferred Alternative and continue advancing this critical project.**

Thank you for your consideration.

Sincerely,
-josh

Dear Metro Board Members,
I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.
Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.
Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.
We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.
We respectfully ask that you:
Reject the current alignment
Ensure a fair and transparent evaluation of alternatives
Provide meaningful and timely engagement with our community
Restore trust through open communication and accountability
We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.
Thank you for your time and consideration.
Sincerely,

Mid City Resident
Jennifer Maisel

Dear Metro Board Members and Elected Representatives,

Enough delay. Approve the K Line Northern Extension San Vicente-Fairfax alignment, restoring the Draft EIR alignment recommended by staff.

It has become clear that no amount of community meetings, technical studies, or good-faith concessions will convince a handful of Lafayette Square residents that tunneling 100+ feet below ground poses zero risk to their homes — as Metro has done safely, repeatedly, across this city and as other transit agencies have around the world. Metro

spent $2.3 million and 18 months proving exactly that. The board then went further, modifying the Mid City alignment at a cost of $165 million and adding nearly 30 seconds of travel time — changes made to address concerns the studies already showed were unfounded.

That $165 million and that 30 seconds belong to transit riders, not to a vocal minority whose objections have no technical basis. I urge the board to restore the Draft EIR staff-recommended alignment.

This board should also recognize what is at stake politically. West Hollywood has committed to covering 25% of the project cost — an extraordinary show of good faith that should not be taken for granted or squandered by continued inaction.

Once built, this will be the busiest light rail line in the country, and it is the critical north-south link between the B Line and E Line that will have system-wide benefits for every Metro rider.

I also should mention that the Board's members, majority of whom don't even use public transit, are playing fast and loose with millions of dollars of taxpayer funds in ways that call to question their ethics and fiduciary responsibility. The delayed processes, behind-the-scenes deal-making, and lack of recusals by members with glaring conflicts of interest open Metro up to potential legal actions and payouts we should not be on the hook for!

No more delays. No more studies. Approve the K Line Northern Extension, and make it the best version of this project that riders and taxpayers deserve.

Thank you,

Dear Metro board and political leaders,

The K-line would be the highest ridership light rail line in the entire country. It would transform this city and improve the lives of tens of thousands of residents. I love this city. I thought that the mayor and the people on the Metro Board loved this city too. But I cannot imagine robbing my city, my community, my neighbors, and our environment of this life-changing project for the imaginary, yes, IMAGINARY, problems of 22 homeowners. Metros around the world have built tunnels much shallower with no impacts. MetroLA is doing it right now with the D line with no impacts. Countless studies have shown that these

tunnels are so deep that they do not create disturbances at the surface, unlike cars and traffic. This is a scientifically provable fact.
Metro has already committed to relocating the Ralphs before construction begins. And the area is surrounded by multiple grocery stores. So this isn't about permanently losing any grocery stores.

The only reason this line is in jeopardy is because Karen Bass and Lafeyette Square residents Holly Mitchell and Jackie Dupont-Walker (who legally should have recused herself) have already delayed this line 18 months to conduct $2.3 MILLION of studies for alternative routes. And instead of seriously considering these alternatives, Karen Bass wants to delay this even further while lying to her constituents, saying she supports the line when the text of her motion shows she plans to delay it again. This is textbook corruption. Shame on you, Metro board and Karen Bass, for putting the interests of 22 people over the rest of your city, for letting corruption win, for letting deliberate misinformation win. We will remember at the voting booth.

Thank you,
Alison Elliott

To whom it may concern at LA Metro and relevant policy makers,

As a City of Los Angeles employee and weekly public transportation user via LA Metro and Metrolink I urge you to approve the full K Line extension all the way to the Hollywood bowl.

The K line extension is a generational opportunity to transform the Los Angeles region of 10 million people to a train system that regular people will actually want to use. The only way to accomplish that is to make it faster, more convenient, and a better option than using their cars.

I love spending a night at the Hollywood bowl. And yet every time I make plans on how I'm going to get there, I am angry that there is not a good quality transportation option. That anger only increases at the end of the night after a wonderful concert at the Hollywood bowl when there are thousands of people with thousands of cars going absolutely nowhere meanwhile our peer cities in Seattle, in Chicago, in Boston, and across the world in Tokyo, Taiwan, Singapore, Florence, Paris, Berlin, have figured out there is only one way to move a massive amount of people; it is with trains.

The Los Angeles region has 10 million people 14 million people if you include Orange County and Ventura County. Do you not feel shame at the thought of denying 14 million people a good transit option because 30 wealthy homeowners have crossed their arms and stamped their feet and shouted no?

There's a great line in the movie who framed Roger rabbit. One of the characters in the film says why would I need a car in Los Angeles? We have the best public transportation system in the world. This is a joke now, but at the time period for this movie that was correct. We ripped it out and destroyed our train system for profit and for selfishness. I have a map of the old red car street trolley system. I can see it going all the way from Pasadena to downtown Los Angeles to Long Beach to Orange County even to San Bernardino.

Do not allow the shortsightedness, the cruelty, the selfishness of a few ridiculous people in Los Angeles to set the tone for another generation of Californians.

Build the K line extension build it now build it as soon as possible. Put everything you've got into making our city work. Get people out of their cars. We need a transit system with people who actually want to use the transit, that starts with policymakers at the top. Do you not want to feel

proud of your city when you travel to other countries and other cities? You should feel the shame that I feel when I travel and consider the world class city of Los Angeles, and the way that it is pathetically underdeveloped in comparison to the rest of our peer cities. Do not continue in the glorious tradition of transit mediocrity in Los Angeles. Choose to have pride in your city, choose abundance, Choose transit excellence.

Thank you.

Dear Metro Board,

On behalf of the Strong Towns Los Angeles local conversation, we are writing to express our enthusiastic support for the K Line North Extension.

To build a world-class transit system that serves the greatest city in the world, we must prioritize the needs of the many over the narrow concerns of a few. Our members have reviewed the safety data and are confident that this project will be a safe, transformative asset for the Lafayette Square and Wellington Square communities.

To ensure this project succeeds for all Angelenos, we urge the Board to address the following:

- **Prioritize Equitable Representation:** Mid-City residents who are unable to attend mid-day meetings deserve an equal seat at the table. We ask that Metro weigh the needs of the broader traveling public as heavily as those of affluent neighborhood associations.
- **Ensure Procedural Integrity:** We are deeply concerned by reports of private meetings and lobbying efforts involving Board Member Jackie DuPont-Walker. These actions risk wasting millions in public funds and unnecessarily delaying progress. We request a formal investigation into these potential violations of protocol to restore public trust.
- **Expedite Construction:** Any further delay incurs significant costs and denies Angelenos essential mobility. We ask Metro to resolve current friction points and move toward construction without further hesitation.

We believe in a Los Angeles that is connected, fiscally resilient, and accessible to everyone. The K Line North is a vital step toward that vision.

Thank you for your dedication to our city's future.

Sincerely,

Strong Towns Los Angeles

ITEM #7: FOR

To Whom it May Concern,

The Mayor released a public statement on Monday, March 23 saying that she supports the K Line Northern Extension and would be voting for it to move "full steam ahead" while at the same time proposing an amendment that would delay the project by reducing the likelihood of West Hollywood and LA County moving the required funding forward. Jackie Dupont-Walker has also improperly been influencing the vote behind the scenes while claiming publicly she is recused.

As a resident of the Westside who works near the proposed terminus of this extension, I know how important this will be for the over 100,000 people who will ride it every day once it's built. I spend over $15 on gas every workday, almost an hour's worth of wages, just to commute, totalling nearly $400 every month. Delaying this project at all to appease a few dozen homeowners making the same bogus arguments that rich Beverly Hills residents used to delay the D line extension and rich Bel Air residents are trying to use to kill the Sepulveda Pass subway will result in tens of thousands of working class people being forced to spend thousands of dollars a year we can barely afford for god knows how much longer.

ENOUGH! I demand that you pull this motion to amend and support Metro staff's recommendation. Furthermore, we should save $165M and go back to the DEIR route through Mid City, since tunneling has zero impacts.

Please stop playing games with a $15B light rail project, and vote to move it forward cleanly, without delays or amendments, and without collaborating with a "recused" board member. Not doing so would be a travesty of economic justice. Do the right thing.

I am writing today to urge you to approve the San Vicente-Fairfax Alignment as the Locally Preferred Alternative for the K Line North Extension

I live three blocks from the intersection of San Vicente and Fairfax and I whole-heartedly approve this route. In the 30+ years I have lived here I have only seen the traffic get worse and worse. As more density and developments are approved, we desperately need transportation projects like this one to give people practical and efficient alternatives to using their cars. Think of all the people who will be able to access West Hollywood, Cedars-Sinai, The Grove, Farmer's Market, and many other locations through the K Line and all the other trains/buses that will connect to it.

Please approve Item 7 and begin the project without delay. My neighborhood, and the city, will be better for it.

Thank you for your time and attention,

Donald Vanderweit

Members of the Board of LA Metro,
I believe that this project needs a lot more study. I urge LA Metro to delay any decision until everyone fully understands what this is going to really cost West Hollywood and its residents. And why 3 subway stops? At the very most the Fairfax or La Brea route should be chosen
Thank you

Dear Metro Board Members,

I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.

Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.

Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.

There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.

Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.
Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.

We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.
We respectfully ask that you:
- Reject the current alignment
- Ensure a fair and transparent evaluation of alternatives
- Provide meaningful and timely engagement with our community
- Restore trust through open communication and accountability

We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.

Thank you for your time and consideration.

There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.

Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.

Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust. We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.

We respectfully ask that you:

- Reject the current alignment
- Ensure a fair and transparent evaluation of alternatives
- Provide meaningful and timely engagement with our community
- Restore trust through open communication and accountability

We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves. Thank you for your time and consideration.

Sincerely,

Ben Pratt
Mid City Resident

Dear Metro Board Members,
I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.
Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.

Dear Metro board and political leaders,

Don't delay! Approve the K Line Northern Extension San Vicente-Fairfax alignment!

No amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

It's bad enough that delays already occurred on other similar projects. Don't let this get delayed.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board

should not take for granted.

It will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl once built. It’s the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Nothing gets done and money is wasted if projects like these get delayed. Make the right choice and approve item 7!

Thank you,
Santiago

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It is clear that Lafayette square residents will not listen to the proof that metro tunnels 100+ feet below ground will have no impact on their houses or neighborhood. The arguments reject fact and are not in good faith. LA Metro CANNOT AFFORD to listen to these arguments. If Metro continues to delay this project, it will be to the detriment of millions of Angelinos and cost millions more down the line. Even worse, this will set a precedent that Metro will put the irrational fears of a wealthy few before the needs of the average Angelino, who have needed

better transit for decades.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted. No other part of LA has been this eager to welcome transit.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system. Furthermore, LA desperately needs more transit to offset gridlock, meet our environmental goals, and keep our streets safer by providing alternatives to driving.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address counterfactual non-issues. LA is ready for transit, and we will remember Metro’s decision in the next election.

Thank you,

Dear Metro Board Members,

I am writing to express my strong support for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. Of the three routes under consideration, the San Vicente–Fairfax route best serves the needs of our communities by serving new areas in Mid City, West Hollywood, and Hollywood while connecting Metro equity-focused communities to key regional destinations, major employers, schools, healthcare facilities, cultural centers, as well as four Metro rail lines.

While the destinations are exciting, what's more important here is the communities and riders this would reach. The San Vicente-Fairfax route would serve 6,000 more riders than the next option. That means nearly 100,000 daily trips–more than any other light rail line in the Country. Metro estimates this route would put over 125,000 jobs within a half mile of new stations–not to mention connections to four other Metro rail lines and 6 of the 10 busiest Metro bus lines.

It may be tempting to dismiss this project as for the more affluent Westside, but the reality is that this route would serve tens of thousands of transit-dependent riders along the existing K Line and underserved communities along the extended route. Metro has proved time and time again that Metro's decades of experience and adherence to international best practices demonstrate that modern tunneling is safe. Additionally, this would mean community members who are housekeepers with illnesses living in South LA and work in Hollywood would have reduced stress and improved health.

I urge the Metro Board to prioritize community input and long-term regional benefits by selecting the San Vicente–Fairfax route as the Locally Preferred Alternative.

Thank you for considering public input on this important decision.

Best,
Kathy

Dear Metro Board,

I am writing to voice my support for the staff recommendation for the K Line Northern Extension, the San Vicente-Fairfax alignment. I am a daily Metro rider, and as someone who does not own a car, I not only ride Metro, but I rely on it. The expansion of Metro Rail is important to my quality of life, and is why I urge the board to adopt the alignment that will move the project forward, that being the staff recommend San Vicente-Fairfax alignment.

The K Line will one day be the highest ridership light rail line in the entire *country*. Building this project as fast as possible is critical for the many Angelenos who rely on transit, like myself, as well as for our goals to reduce emissions, pollution, traffic, and automobile deaths. The extension must be built quickly, and in the manner that is best for transit riders.

The staff recommendation is clearly the best way to do this. I urge the board to adopt this, and to not even consider any other motions that would further delay this project, or cause the route to be slower and costlier. Please vote to choose the staff recommended San Vicente-Fairfax alignment.

Bobby Garrity

Hello,

My name is Kyle Hansen, and I am a Los Angeles resident who works primarily in the Hollywood area. I am writing to formally express my strong support for the K Line Extension and to urge its accelerated implementation.

Like many working Angelenos, I regularly experience significant travel delays when commuting across central Los Angeles — particularly within the corridor between the 405, 110, and 10 freeways. Limited fast transit options in this region make reliable cross-city travel difficult and place added strain on workers, businesses, and overall mobility.

Expanding and prioritizing high-speed public transit infrastructure such as the K Line Extension would help improve regional connectivity, reduce congestion, support economic activity, and provide more equitable access to employment centers. Investments like this are essential for a growing city that must move people efficiently and sustainably.

I respectfully urge you to prioritize and fast-track the implementation of this project. Improving transit reliability and accessibility will have a meaningful impact on daily life for residents like myself and will help strengthen Los Angeles' long-term infrastructure and economic vitality.

Thank you for your consideration.

Sincerely,

Kyle W. Hansen

I am writing this email to express my fervent support for the San Vicente–Fairfax Alignment for Metro K Line Extension.

As a Los Angeles resident who relies on public transportation daily, I am passionate about our city's transit system. Better access to transit improves the lives of everyone it serves. It makes commuting easier, supports economic growth, supports healthy living, reduces gas emissions, and simply makes our city a better place to live. I am proud to live in LA, and I want to see this city grow and become more accessible. And one of the best ways to do that is to support the development of a better transit system rather than halting progress and sticking our heads in the sand.

While concerns about vibration are often raised in discussions like this, research on underground rail systems consistently shows that these effects diminish quickly with depth and distance. This issue does not have a significant community impact based on evidence from similar existing transit systems. As someone who would directly benefit from expanded, reliable transit in Los Angeles, I'm far more concerned with access, connectivity, and long-term usability than the potential impact, which has already been proven insubstantial.

This alignment is a practical and community-centered choice. It supports walkable areas, connects key destinations, and has the potential to reduce traffic congestion in some of the city's busiest corridors. Just as importantly, it ensures that transit options will exist where people are already living, working, and gathering. I appreciate the work that has gone into evaluating these options, and I urge you to prioritize the San Vicente–Fairfax alignment. This line will help build a brighter future for the residents of Los Angeles.

Thank you for your time and for your commitment to improving transit in Los Angeles.

Sincerely,
Amber Eusebio

To Metro Leadership,

My name is Amado Castillo and I am a Southern California native who graduated from UCLA in 2021 and live and work in the area that will direct benefit from the K-line extension. I am submitting public comment to ensure that the Metro Board knows of my support for the K-Line extension as I believe that Los Angeles should continue it's unprecedented investment in public transportation infrastructure and build up our city so that our subway and light rail systems match those of the other great metropolises of the world. Millions of angelenos, some of whom have yet to be born will benefit from this project and it is being delayed out of unfounded fear. be courageous today and vote in favor of the Northern K-Line extension

Best,
Amado C.

Below is a GENERAL COMMENT for item #7 of tomorrow's board meeting:

Regardless of tunnel route selected for the KNE project, please prioritize burying the E line station platform at Expo/Crenshaw during Phase 1 construction.

This would create a greatly enhanced, pedestrian-friendly connection between the E and K Lines, which will become increasingly vital as ridership grows.

If tunneling under certain neighborhoods adds tens of millions in costs with no clear benefits, redirect those additional funds to convert the street-level E Line portion at Expo/Crenshaw to subterranean grade.

Expo/Crenshaw is already a key transfer hub for residents and visitors, and will only grow in importance.

Delaying the northern extension of what would be the busiest light rail line in a part of the county that is dense, walkable, and has been begging for rail transit during a climate change emergency and energy crisis is not just a bad look but should be criminal. We've already spent so much money studying community impacts etc. We cannot let wealthy homeowners continue to hold progress in this city hostage. It's bad to appease made up concerns (re: tunneling) that are made in bad faith from people that have direct financial incentives to delay delay delay and eventually get this project cancelled.

WeHo is holding up their end of the bargain and we should too. People going to a place where they go out and drink should definitely have options for getting home than just driving or Ubers.

I support that the board moves forward with the staff recommendation and vote to get this project moving along ASAP, we've wasted enough time and money already. Let's get this done for a better LA tomorrow.

Best,
Moses

I'm literally riding the 210 right now.

Since most of the board doesn't actually RIDE public transit, that's the bus that goes up Crenshaw. I'm taking it from where my son goes to school off Pico down to where we live, off Adams.

This extension would be life-changing for us and for the region. We need more connections that don't rely on going through downtown. We need more options beyond cars. Our children deserve this.

Don't delay any more, embrace a positive, green future.

Support the K Line Northern Extension. Do whatever it takes to build this as fast as possible.

Dear Metro board and political leaders,

I am writing you to please approve the K Line Northern Extension with the San Vicente-Fairfax alignment.

Your staff at Metro have produced comprehensive and peer reviewed studies definitively proving that the proposed tunnel of the K line north will have zero negative impacts to any residences or businesses above ground, both during construction, and once in operation. Cities across the world have built much shallower tunnels under monuments and neighborhoods far more historic than any residential neighborhood in LA County with no issues and no impact to surface structures.

I recognize the great importance of hearing voices from locals and the surrounding community. However, in this case, the concerns raised by residents above the future tunnel are not at all based on facts. Any comparisons made between the K line construction and the demolition of the Sugar Hill neighborhood to build the 10 are completely untrue and irrelevant. The construction of the 10 resulted in the demolition of an entire neighborhood, while the K line north will not negatively affect a single residence in Lafayette Square in any way. To propose any additional studies or realignments would be a great waste of our county's resources.

The city of West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

Please approve the K Line Northern Ext. San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Jake Shaffer

Dear Metro Board members and Metro staff,

I am writing in strong support of the staff recommended K Line Northern Extension.

No more delays.

The fears of local homeowners are not based in reality, as cities around the world manage underground systems much bigger and shallower than this project.

This is a project that benefits all of Los Angeles and the region and, just like a tiny number of local homeowners should not stop the Sepulveda Pass project, a small number of homeowners on this route must not outweigh the needs of hundreds of thousands of citizens across Los Angeles and West Hollywood and other cities.

This route would allow riders across all of western Los Angeles County to move north and south from Hollywood, West Hollywood, UCLA, the VA, Mid-City, the Crenshaw District, along Inglewood along the route, especially to LAX, *without going through downtown*.

We need leaders who have the vision and fortitude to make decisions that will benefit the broad populace for decades to come.

Please vote to make this happen.

Respectfully,

Glenn Johnson-Grau

For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.
Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.
We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.
We respectfully ask that you:
Reject the current alignment
Ensure a fair and transparent evaluation of alternatives
Provide meaningful and timely engagement with our community
Restore trust through open communication and accountability
We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.
Thank you for your time and consideration.

Sincerely,
Mid City Resident

Dear Metro Board Members,

Even thou I feel the original proposal of having the K line run on La Brea Ave. would have been more cost effective, less complicated and I may have been able to ride it in my lifetime, it seems the new San Vicente/Fairfax (Norther Extension) alternative will be approved.

I do want to strongly abject to the Metro tunnels running under private residential properties especially ones in HPOZ neighborhoods where the houses are around 100 years old. My house is one of the few houses in the Miracle Mile HPOZ that is planned to have a Metro tunnel running under it. I'm also concerned that I have a oil line that runs under my property and I receive dividends from an oil company for it. Since the Metro line is for Public transportation, I believe the Metro Tunnels should be under public property.

Thank you for your consideration,

Lisa

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this

board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Diego Rodriguez

To whom it may concern,

I'm a former New Yorker turned Angelino and I'm fully in favor of the K Line Expansion.

I grew in a city with a massive public transit system. I had family in the MTA. I even studied transit and traffic when I got to college. A program like the K Line Expansion is another step in the right direction to help more Los Angeles residents and tourists navigate and travel through this city, a city that once had a public transit system that could rival New York's.

Don't let this project get stalled any further, and continue developing and growing and interconnecting and reconnecting the city, the county, and the state.

Dear Board Members,

Please include the following statement in the official record for Item 7 on the Agenda for the Board of Directors Meeting on March 26, 2025:

I don't think the Board is in a position at this point for a final vote on the Locally Preferred Alternative (LPA) for the K Line Northern Extension (KNE) Project for the following reasons:

1. Very little public input has been given on the three options as the significant assumptions for the respective options are just coming to light now regarding the costs of each option and the requirement for an Enhanced Infrastructure Financing Districts (EIFD) by the City of West Hollywood in coordination with the Los Angeles County to provide additional local sources of funding (at least 25% of the capital cost estimate) per the Early Project Delivery Strategy. The San Vicente option is the most expensive option at approximately $15 billion and has the worst benefit-cost ratio at 34 cents back for every dollar vs. $3.70 for both the Fairfax and La Brea options. On cost and delivery it scored 3.1 out of 7 - last place. There are many unanswered questions as to how much of the EIFD will be the responsibility of the City of West Hollywood. The costs are overwhelming for one of the smallest cities in Los Angeles County at just 1.9 square miles and barely 35,000 residents.

2. At least one member of West Hollywood's City Council is on record to utilize SB79 to drive development to finance the EIFD. Given the small size of West Hollywood, nearly every neighborhood falls within a half-mile of a major transit hub with the San Vicente option. Here's how SB79 impacts building heights: up to 5 to stories within a half-mile of a station and up to 8 stories immediately adjacent to a station. Through the streamlining of SB79, this will radically change the character of our neighborhoods, destabilize residential areas, and destroy the quality of life residents moved here to protect.

I urge the Board of Directors to postpone a vote on Item 7 until further consideration is given to West Hollywood residents' feedback and not just elected officials, the financial viability of the EIFD (including the exact amount that West Hollywood will be responsible for and how realistically that will be raised), and to the two lower cost options that have a better benefit-cost ratio.

Best regards,

Michael J. Holtzman
West Hollywood Resident for nearly 40 years

Good Afternoon!

My name is Ari Yaffe-Inoue, and I'm a resident from North Hollywood, writing to urge the Metro board to approve the San Vicente-Fairfax alignment for the K-North project at tomorrow's board meeting.

This project has a number of clear benefits to Angelenos:

1. It will serve as an invaluable North-South link, allowing residents to travel from Hollywood to West Hollywood, Mid-City, LAX, and everywhere in-between without needing to pass through downtown. This will significantly cut down on commute times, making the Metro a much more viable option for residents who don't currently use it.
2. This alignment will serve up to 6000 more daily riders than the next highest ridership option, with two-thirds of them being low-income.
3. The alignment will relieve traffic congestion on key North-South corridors, including San Vicente, Fairfax, and La Brea.
4. The alignment will relieve congestion to and from the Hollywood Bowl during concerts and other events, offering a more cost-effective and time-saving option for event-goers.

A recent proposal from Mayor Bass to postpone consideration of the Lafayette Square portion of the alignment is extremely concerning to me. This fits into a recent pattern of prioritizing the needs of the wealthy few over the millions of Angelenos that would benefit from this project, including myself. I don't own a car, and it has made a measurable, positive difference in my life. It is a privilege that I wish for as many Angelenos to experience as possible. After all, how can we expect to be the sustainable, future-forward city that I know we can be if we double down on car ownership as the only valid means of transportation? Thus, it is the ethical, moral, and civic duty of the Metro board to approve this alignment without delay.

I appreciate the opportunity to submit my comments and concerns, and I sincerely hope that the Metro board makes the right choice.

Sincerely,
Ari Yaffe-Inoue
Resident, North Hollywood

Good Afternoon Metro Boardmembers and extinguished guests. My name is Alex and I am an avid Metro rider. I currently reside in Torrance, California and am extremely excited for the Metro K line extension north to Hollywood. I am also extremely frustrated that a handful of NIMBYs are trying to delay a project that would benefit hundreds of thousands of an annual riders. This thread has been studied already and does not need to be delayed any further. Please build the K line north that will benefit all Angelinos. And also, please look into board member Jacqueline Dupont Walker, who has an active conflict of interest in this project and is trying to delay its buildout. Her conflict of interest should not mean that all Angelinos need to suffer.

Alex

Dear Metro Board Members,

I am writing to express my strong support for advancing the K Line Northern Extension project, specifically the La Brea alignment option.

This project represents a critical investment in Los Angeles' transportation infrastructure. Advancing the La Brea alignment will significantly improve connectivity across key areas of the city while providing a more direct and efficient transit option for riders. In particular, it offers a meaningful alternative that reduces the need to route through Union Station and transfer between multiple lines, ultimately saving travel time and improving the rider experience.

I also want to emphasize the importance of maintaining project momentum. Any delays in moving forward will have real consequences on the overall timeline, potentially postponing much-needed transportation improvements for the communities this project is intended to serve. Los Angeles is in urgent need of expanded, reliable transit options, and this extension is a major step in that direction.

For these reasons, I respectfully urge the Board to move forward without further delay and to support the La Brea alignment as part of the K Line Northern Extension.

Thank you for your time and consideration.

Sincerely Los Angeles County Resident,
Rigoberto Arenas

To the Metro Ethics Officer and Members of the Board,

My name is Mary Beth Fielder, and I am a resident of the Oxford Square neighborhood in Los Angeles. I am writing to submit a formal objection to the proposed **$136 million "Option 2" detour** for the K Line Northern Extension (Item 7 on the March 26th Agenda).

I am formally requesting an immediate investigation into a significant **Conflict of Interest** and a **Breach of Fiduciary Duty** regarding the allocation of public funds for this project.

Basis for Complaint:

- **Conflict of Interest:** Public reporting by **LAist** has identified that two Metro Board members reside within the 33-home radius that would benefit from this $136 million detour. Despite their recusal, reports indicate that private "shadow meetings" have occurred to influence this outcome.
- **Misuse of Public Funds:** Metro's own technical staff has recommended the **San Vicente-Fairfax Hybrid alignment** as the most efficient and cost-effective route. Approving a $136 million "private favor" against the recommendation of your own experts constitutes a mismanagement of taxpayer dollars.
- **Endangering Project Viability:** This detour invalidates years of environmental studies, risking our **2029 "Fast-Track" status** and billions in accelerated funding. This would effectively default the project back to **2047**, depriving the public of essential transit for nearly two decades.

I urge the Board to **reject the detour** and uphold the staff-recommended alignment. We are monitoring this vote closely alongside our neighbors in Mid City and P.I.C.O. and expect a full investigation into the reported "shadow meetings."

Respectfully,

Mary Beth Fielder

Hello. My name is Brian Gonzalez. I'm a Los Angeles resident. I am writing to express my support for the K-Line north extension.

Online, I've read that the K-Line North extension is projected to be the light rail line with the highest ridership in the country. I believe that adding this line will help connect the metro system, increase ridership, and reduce traffic.

Rumors are currently going around online that certain powerful and well-connected people are trying to disrupt and delay the K Line North extension. This is very disappointing to hear. Many areas within Los Angeles, including affluent areas like Beverly Hills, are all doing their part to help build out Los Angeles' subway system. That they are doing their part, but others are able to avoid doing so, purely because of the political connections they may have, is very disheartening to hear. As a voter, this sounds like corruption to me. And if this happens, I will be voting against any politicians that support these measures where I'm able to do so. And I will look into writing to my state legislators about reforming the LA Metro board so that this type of corruption is not possible in the future.

Thanks for your time.

Best.

-Brian

Dear LA Metro Board,
I urge you to support the San Vincente LPA for the K line northern extension without delay. And that last part is important. We already had 18 months of studies for alternative tunnel alignments for unscientific concerns that have been disproven by various tunneling Metro projects and studies. This fills a major hole in the LA Metro network on the west side that could be the difference between having the highest ridership light rail line in the country or decades more delays.
This line will connect WeHo to Mid City and Crenshaw, and WeHo is a major cultural and jobs center. WeHo and LA's EIFD's are necessary to accelerate this project and can only happen if the alignment is set in stone and thus the costs known. Any additional studies or modifications beyond what's already studied is the same thing as voting for no build.
And the people have not missed Jackie Dupont Walker's illegal influence of the vote. Mitchell is in the same circumstance as her and had to recuse. Walker has refused to get Metro counsel and has been attending board meetings lobbying to kill this project despite her obvious conflict of interest. But refusing to get counsel does not make illegal actions legal. The people are watching.
Deliver one of the most important project's in LA's history that will transform how people get around, or fall for Walker's illegal delay tactics.
The choice is yours, and the people are watching.
Sincerely,
James

Subject: (EXTERNAL) PLEASE VOTE NO ON THE K-LINE EXTENSION UNTIL STUDIES ARE DONE ABOUT THE IMPACT ON WEST HOLLYWOOD

CAUTION: This email originated from outside of the organization. Help Metro protect against cyber threats. Verify the sender's email address carefully. Do not click links or attachments unless you trust the sender. Be aware of phishing signs such as urgent requests, unexpected links, or offers that seem too good to be true. Be cautious of spoofed emails that appear to come from trusted sources. Report suspicious emails. Follow Metro policies and update accounts only through official channels.

Dear Metro Board Members,

I am writing as a concerned West Hollywood resident to strongly urge you not to approve the K-Line extension as currently proposed until critical issues affecting our community are fully addressed.

1. Lack of meaningful community outreach

While Metro has engaged with residents in other areas, there has been no substantial outreach to West Hollywood residents, including the homeowners and business owners who will be directly impacted. This project is being presented as if our city is unified in support—it is not. Many residents with serious, legitimate concerns have not been heard, while local officials and lobbyists actively push this forward.

2. Unaddressed environmental and structural risks

A critical issue that has not been adequately studied or addressed is the impact on West Hollywood's highwater table (aquifer).

Subway stations—and potentially the tunnels themselves—would require continuous dewatering beneath hundreds, if not thousands, of homes and businesses. This is not a theoretical concern. West Hollywood is already experiencing land subsidence from groundwater removal associated with basements and subterranean parking, including:

Cracks in buildings

Sticking doors and windows from shifting frames

Compromised foundations

Sinkholes and broken underground pipes

An aquifer is a slow-forming, limited groundwater resource that supports the land above it. When water is removed, the ground loses stability, compresses, and sinks. Expanding dewatering on the scale required for a subway system, including stations, poses serious long-term risks to structures and infrastructure throughout the city.

Despite this, these risks appear to be largely overlooked in favor of development priorities. At a time of accelerating climate change, it is irresponsible to proceed without fully understanding the environmental consequences.

At a minimum, Metro must complete thorough, site-specific hydrological, geological, and land-subsidence studies—covering both stations and tunnels—before any approval or advancement of this project.

3. Scale, cost, and necessity concerns

West Hollywood is a 1.9-square-mile city of roughly 35,000 residents, yet current plans include up to three subway stations within less than two miles. This raises serious questions about necessity and proportionality, particularly given the absence of major commuter hubs that would justify such density of stations.

The project is estimated at approximately $16 billion, with a significant financial burden falling on taxpayers. At a time when many areas of Los Angeles remain underserved by transit, this allocation of resources is difficult to justify.

6. Displacement and overdevelopment (SB79 impacts)

The proposed stations are closely tied to zoning changes under SB79 and related policies, which would enable large-scale upzoning within a one-mile radius of each stop. This creates significant risk of:

Displacement of rent-stabilized tenants

Impacts to fixed-income and disabled residents

Loss of existing affordable housing

The end of neighborhoods

Even the proposal itself can destabilize neighborhoods by accelerating speculation and redevelopment pressures—long before any transit benefits are realized.

There is a widespread concern that the push for three stations is driven less by transit need and more by the opportunity it creates for large-scale luxury development.

6. A practical, lower-impact alternative

With the opening of the Metro D Line station at Wilshire and La Cienega, West Hollywood will already be located just minutes from a major subway connection. Extending the existing West Hollywood Cityline Shuttle to that station would provide immediate transit access without the cost, disruption, environmental risk, loss of neighborhoods, or decades of construction associated with the K-Line extension.

Before committing billions of dollars and exposing an entire community to potential environmental and structural harm, Metro must take a step back and ensure that this project is safe, necessary, and truly in the public interest.

We respectfully urge you to delay any approval of the K-Line extension until:

- Meaningful community outreach in West Hollywood has been conducted
- Comprehensive, site-specific environmental and subsidence studies are completed
- The full impacts of SB79-related upzoning and displacement are transparently addressed
- Lower-cost, lower-impact alternatives have been seriously evaluated
- The safety, stability, and character of our community depend on it.

My deepest thanks for your time and review.

Carolyn Campbell

40-year resident of West Hollywood

[redacted]March 25, 2026

Dear Members of the Board,

I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension. Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. Equally concerning is the lack of fair and timely community engagement. There are also serious concerns about governance and equity in decision-making. Recent developments have only deepened these concerns. Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust. We are not opposed to the K Line Extension. We want to see it succeed. We respectfully ask that you: • Reject the current alignment • Ensure a fair and transparent evaluation of alternatives • Provide meaningful and timely engagement with our community • Restore trust through open communication and accountability

Thank you for your time and consideration.

Sincerely,

Jolie Kingsley Ceo

I am writing to express my support for the K-Line and its expansion into West Hollywood. As an Angelino who lives right on the West Hollywood border, the proposed expansion would be life changing for my, my friends, and my neighbors. I strongly urge the Board not to add millions of dollars in fees and years in delays to reroute or further "study" the proposed route simply because of a noisy group of naysayers who seek all methods at their disposal to delay the line for millions of Los Angeles residents. Please give the city its desperately needed "missing link."

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this

board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,

Erin Lattimer

Good Afternoon,

I just wanted to email in support of item #7 for the K-Line extension. I live in LA county but up north in 93536 and would love to take more transit when I come down. The reason I don't do it as often as I would prefer is bc many times it takes more time than driving. With this K-line extension I think it would make more sense to take a lot more trips using transit.

Thank you,
Jeremy Donahue

As a long time West Hollywood resident, my call is to beg METRO not to get fooled by the people attending this meeting paid by lobbyists to support the K Line having 3 spots in West Hollywood. I can assure you without a doubt that WEST HOLLYWOOD RESIDENTS DO NOT WANT THESE SUBWAY STOPS.

Our City is just 1.9 square miles, and it doesn't have the kind of business centers which needs them. Also, the $4 billion cost that would be allocated to OUR taxpayers is disproportionate with any potential upside.

West Hollywood's push for 3 stops is tied to developers who, under SB79, would build luxury apartments near these stops, destroying affordable housing in the process.

A better option is for West Hollywood to connect its free shuttle to the D LINE subway station on Wilshire and La Cienega saving billions of dollars and decades of construction.

The proposed 3 stops is not how metro should use its scarce resources. Thank you.

To: Metro Board

Meeting Date: March 26, 2026

Agenda Item: 7, K Line Northern Extension (KNE) Locally Preferred Alternative (LPA) Needs More Consideration

Greetings,

I have been a resident of West Hollywood for over 38 years. Living in West Hollywood we have many options for non-automobile transit including local shuttles, walking, and buses. I regularly take the 4, the 20 and the 2 to get across our sprawling county and to get downtown, and to these meetings here at Metro headquarters.

I want you to know that the proposed **LPA is NOT LOCALLY PREFERRED**!!! My neighbors and I are vehemently opposed to the San Vicente route as there has been no community outreach to the actual people who live along that route, the people who would have to sacrifice their daily quality of life, not for a subway ride, but for the greater intensification of an already demanding development environment.

The lobbying by West Hollywood Council for 3 subway stations in the city (San Vicente option) is not motivated by transportation needs but by West Hollywood City Council's alliance with developers. Under state legislation SB79 and local transit overlay policies, the designation of subway stations will trigger zoning changes that allow significantly more intense developments within a one-mile radius. This would open the door to large-scale apartment construction across West Hollywood right now, decades before any subway line is actually built, ruining the low height, low scale homes and apartment complexes in the area.

Metro's past history about property cannot be considered here because of the impacts of state legislation, including SB79 and AB130. *The City of Los Angeles voted to delay SB79 for several years and Metro itself has not been positive about the legislation. Yet, approving this LPA would in effect enable the negative impacts of SB79 across West Hollywood. This is not a good legacy for Metro.*

***Today, C*ouncilmember Chelsea Byers said in the article below that "A quick vote Thursday is "critical" to West Hollywood's The City has a "huge list" of redevelopment projects coming that feed the EIFD mechanism. Delay costs money. Every month the route isn't locked down is a month the City can't start building the financing district that's supposed to pay for it."**

https://wehoonline.com/k-line-vote-west-hollywood-metro-board-bass-derailed/

Council member Byers leaves no doubt their lobbying is not about transportation access but about their alliances with developers.

The reality of the billions of dollars is that the financing district would be paid for by the new developments. The proposed LPA would enable the systematic displacement of residents and businesses, and destroy thriving neighborhoods. This is not a positive legacy for Metro.

WEST HOLLYWOOD RESIDENTS ARE OPPOSED TO THE 3 STOPS LOBBIED BY WEST HOLLYWOOD COUNCIL.

West Hollywood is one of the smallest cities in Los Angeles County at just 1.9 square miles and barely 35,000 residents. Yet Metro's current planning for the K Line extension includes the possibility of three subway stops within West Hollywood's tiny footprint. For many residents, this proposal raises serious concerns about cost, necessity, environmental risk, and the future character of our city.

West Hollywood has many developments that are not being completed due to the economic climate; approving this LPA would result in much more attempted development, that is holes in the ground for several years. Residents have to deal with the empty lots on a daily basis because the thriving businesses were driven out. These are indirect impacts from the proposed LPA. Again, not a positive legacy for Metro.

The environmental studies do not adequately analyze the impacts of the proposed three stations, both for construction and ongoing operations. There are significant water issues here in West Hollywood, especially along the proposed San Vicente route. The proposed stations would exacerbate the subsidence issues in our homes every day. How many claims and lawsuits has Metro received regarding subsidence and property damage? **To whose attention at Metro should property owners send the increased insurance bills?**

I urge you to send this proposal back for further consideration. This LPA is not preferred nor ready for planning.

Thank you for your consideration.

Regards,

Anita Goswami

Dear Metro Board Members,
I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.
As a mother of 3, this Ralphs location is the closest, affordable grocery store closest to me. I don't drive and this store and pharmacy is very convenient for my family and many of my neighbors. This Ralphs closure is very concerning to me and many more people in the area.
Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.
Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.

We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.

We respectfully ask that you:

Reject the current alignment

Ensure a fair and transparent evaluation of alternatives

Provide meaningful and timely engagement with our community

Restore trust through open communication and accountability

We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.

Thank you for your time and consideration.

Sincerely,

Mid City Resident

Hello,

The K Line northern extension is one of the most crucial and exciting opportunities in public transit that is feasible within my lifetime (I'm only 36). This must be expedited and not delayed.

The 18 months and millions of dollars that has already been wasted on appeasing unscientific concerns of less than 30 homeowners is criminal enough. I am flabbergasted that this was allowed to happen. We all see through these actions for exactly what they are - blatant and corrupt attempts to delay this project until it's no longer feasible.

Attn Karen Bass: We're all watching. Any attempts to delay or falsely claim that you're so moved by the public comment that additional time and resources are necessary - will directly affect just how hard I campaign for Nithya Raman in the coming months.

Thank you,
-Jesse Banwart

I want to make a comment on the K line northern extension. Agenda item number 7.

I urgent the metro board to approve the the preferred alignment at the next board meeting. We don't need any further delays. The studies are clear that there will be no negative effects from tunneling and we have study enough alignment. Do not waste my tax dollars on further delays for political points.

Include item #7 FOR Support of the staff recommendation WITHOUT delay.

Personal Opinion:
NO further delays on the K-line. Make the decision and stop wasting our money and time on this. We want this and we are the majority. If Bass wants to get elected again, she won't continue to delay for her donors. We are a city of cities and we need these connections to prosper in the future like many other major cities. These folks opposing always say "not in my neighborhood," but we say GO AHEAD AND BUILD FOR THE FUTURE OF LOS ANGELES! Karen Bass will not have our vote if she delays this project. No amount of donor funds will make us change our mind.

Thanks,

Dear Metro Board of Directors and Planning Staff,

I am writing to express my strong support for the expeditious construction of the Metro K Line. This project represents a critical investment in the future of Los Angeles — one that will benefit millions of residents, workers, and visitors for generations to come. It is seriously so embarrassing to keep delaying this project and related votes.

The environmental and safety benefits of expanded transit are well-documented. Every new rail line reduces vehicle miles traveled, lowers greenhouse gas emissions, decreases traffic fatalities, and improves air quality across our communities. Transit-oriented development strengthens local economies, increases housing options, and creates more walkable, livable neighborhoods. These are outcomes that align directly with Los Angeles's climate goals and Vision Zero commitments.

I respectfully urge the Board not to allow the objections of a small number of opponents — roughly 30 individuals — to derail a project that serves the public good of a region home to nearly 10 million people. While community input is valuable and should always be heard, the needs of the broader population must take precedence when weighed against localized opposition. Allowing a handful of voices to delay or diminish this project would set a damaging precedent for transit expansion citywide.

Los Angeles has spent decades underinvesting in public transit. The K Line is an opportunity to correct that trajectory and demonstrate that this city is serious about building a world-class transportation network. Every month of delay means more congestion, more emissions, and more preventable traffic injuries on our roads.

I urge you to move forward with construction as swiftly as possible. The future of transit in Los Angeles depends on bold leadership today.

Thank you for your time and consideration.

Respectfully,

Jack Armstrong | **Founder & Managing Director**

Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.
Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.
We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.
We respectfully ask that you:
Reject the current alignment

Ensure a fair and transparent evaluation of alternatives
Provide meaningful and timely engagement with our community
Restore trust through open communication and accountability
We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.
Thank you for your time and consideration.

Sincerely,
Mid City Resident

Dear Metro Board Members,

South Bay Forward is a grassroots group of residents in the South Bay region of Los Angeles County and a Metro CBO for the K-Line to Torrance. Our mission is to expand housing and transportation choices for a more inclusive, equitable, affordable, and sustainable community. Together we learn, identify solutions, educate, and mobilize for positive change.

As a coalition member of the All On Board Coalition, we are writing to express strong SUPPORT for selecting the San Vicente-Fairfax route as the Locally Preferred Alternative (LPA) for the Metro K Line Northern Extension project. This line is complementary to the recently approved K-Line to Torrance diverting traffic to transit.

We ask the board to support the staff recommendation to move the project forward without delay. See full letter attached.

Sincerely,

Sheana Ahlqvist, Chair
South Bay Forward
Representing ~ 900 South Bay Residents

Dear Metro Board Members,
I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.
Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. Hello to those who are reading, I'm Braeden Day with the Metro Youth Council.

I'm sure it's pretty obvious where the public favor is when it comes to extending the K Line to Hollywood.

Unfortunately, Mayor Karen Bass and some of her appointees (Butts and Najarian) are attempting to derail this project simply because of a paper they refuse to read, and push this project well into the 2040's when it should have stared construction yesterday.

Please, do NOT amend the construction because of your fear of a nonexistent property value reduction.

Supporting the Staff Recommendation is the better way to go, through West Hollywood.

This is about money as much as it isn't.

Do not let your own money influence your decision. This is an extremely important project and cannot wait.

-Braeden

24/7 Shuttle: The Real Solution to No Subway in West Hollywood

By Jerome Cleary

Whether it's the "City of the Future" or a masterclass in fiscal fantasy, the debate over the West Hollywood subway extension—specifically the K Line Northern Extension—has reached a fever pitch. While proponents dream of sleek underground tunnels, a cold look at the ledger suggests that the most logical path forward isn't a multibillion-dollar dig, but a high-frequency, 24/7 "Gold Standard" shuttle connecting the heart of West Hollywood to the existing subway infrastructure.

The $15 Billion Question

The current "San Vicente Hybrid" alignment, which would snake through West Hollywood, carries a staggering price tag of nearly $15 billion. For perspective, the distance from the intersection of La Cienega and Santa Monica Blvd down to La Cienega and Wilshire (where the D Line/Purple Line subway already lives) is a mere 1.5 miles.

To insist on a full subway extension for this corridor is to argue that spending billions per mile is a better investment than a dedicated, high-capacity shuttle system that could be implemented for a fraction of the cost.

Comparative Financials: Shuttle vs. Subway

Feature	24/7 Dedicated Shuttle (La Cienega)	K Line Subway Extension (WeHo)
Capital Cost	~$10M - $50M (Vehicles + Lane Tech)	~$11B - $15B
Construction Time	6–12 Months	10–15 Years
Operating Cost	~$200 - $300 per hour	~$500+ per car-hour (estimated)
Flexibility	Route can adapt to demand	Fixed infrastructure
Disruption	Minimal (Signage & Paint)	Decade of street closures & "vibrations"

Stacking the Deck Against WeHo

By insisting that only a subway "makes sense," the City of West Hollywood is effectively being backed into a financial corner. The city is currently exploring Enhanced Infrastructure Financing Districts (EIFD) to capture property tax growth to fund their share of the rail. Essentially, the city is betting its future tax revenue on a project that won't be operational for a decade, all while ignoring a solution that could solve the "last mile" problem today.

The "Ghost Line" Reality

The K Line extension is facing significant headwinds:

- The Funding Gap: Measure M only allocated $2.2 billion for this project. The $13 billion delta remains a massive "if."
- The NIMBY Wall: Neighborhoods like Lafayette Square are already fighting the "vibration" and "tunneling" aspects, threatening to tie the project up in litigation for years.
- The Wilshire Connection: The D Line (Purple Line) is already a high-capacity heavy rail line. A dedicated 24/7 shuttle from West Hollywood's "Rainbow District" straight down La Cienega to the Wilshire/La Cienega station would provide a 5-minute "bridge" to the entire LA rail network without moving a single shovelful of dirt.

The Rational Alternative: The "La Cienega Express"

Instead of a $15 billion tunnel, the City could invest in a Bus Rapid Transit (BRT) Lite or an autonomous shuttle fleet.

1. Dedicated Lanes: Turn the right lanes of La Cienega into 24/7 transit-only lanes between Santa Monica and Wilshire.
2. Frequency: A shuttle every 3 minutes. At that frequency, "waiting" for a bus becomes a thing of the past.
3. Cost-Effectiveness: Even if the shuttle ran at a loss, the subsidy required to keep it free for riders for 100 years would still be billions of dollars cheaper than the interest on the debt for a subway tunnel.

To build a subway for a 1.5-mile gap when a robust shuttle could do the job is a triumph of vanity over arithmetic.

By decoupling the "prestige" of rail from the "utility" of transit, West Hollywood could provide immediate relief to its residents and visitors. It’s time to stop stacking the deck for a project that may never arrive and start moving people today.

Sincerely,
Jerome Cleary [redacted]

Dear Metro board and political leaders,

Enough delay - approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Patrick King

Dear Mr. Chairman and Board Members,

I write to urge that Metro enhance proof-of-payment fare checks on Metro trains and buses. Fare checks should be routine. All passengers should be checked.

I am an A Line rider and holder of a Senior TAP Card. Riding the train or buses is often an unpleasant experience. Too many riders do not pay, and some of those who don't pay behave in an anti-social manner.

Riders deserve a safe and welcoming transit experience. They deserve equity and respect. Checking on trains and buses to make sure riders are paying will ensure equity for those riders who do pay, like me. Metro has plenty of options for lower fares, including for low and fixed income riders, including senior like me.

Progressive jurisdictions can and do practice routine proof-of-payment fare checks. Denver's RTD, with around 100 officers in 2025, conducted 4.8 million fare checks in 2025, 300,000-400,000 per month, a 500 percent increase since 2024 (data from Denver RTD, via Claude). And this was with initial fare evasion levels initially at around only six percent, unlike the 20-40 percent for LA Metro.

Route proof-of-payment checks of all passengers are a best practice, and one Metro used to do routinely. Doing so again is important to make your customers - Metro riders - have a pleasant experience. They deserve no less..

Thank you.

Respectfully,

P.A. Brown

Subject: NO MORE K LINE DELAYS

The games that are being played with the most transformative light rail transit project in the entire country are absurd and embarrassing. A handful of wealthy property owners have already caused 18 months of delay and cost millions of our tax dollars to study the non-existent impacts of tunneling 80+ feet below their homes. When that wasteful study showed that there would be no impacts, you still placated them by realigning the tunnels away from their homes, which will cost millions more of our tax dollars and cause a slower, less functional transit line. Now I see this ridiculous motion that would delay things even more, waste even more of our tax dollars, jeopardize federal funding for the project, and delay project start by decades? ENOUGH!!

You have been placating a handful of homeowners at the immense expense of an entire region, and apparently that still isn't enough based on this motion. The cost of the actions of these people goes far beyond dollars and cents. Every additional day that we don't have a functioning K Line extension is literally costing lives. That's additional days of deaths by traffic collisions that could be avoided by people using mass transit instead of cars. That's additional days of carbon emissions that will hasten a climate catastrophe that could be avoided with people using mass transit instead of cars. That's additional tax dollars and debt obligations that could go toward other programs that could improve quality of life and/or save lives. That's additional days that the people of this region must allocate their earnings toward car ownership instead of toward better food, housing, or medical care because there isn't a feasible method to live without a car.

The demands of this handful of wealthy people are costing the rest of us millions upon millions of dollars, and literally countless lives. Stop this lunacy and just approve the damn project as-is! While you're at it, approve the original routing under Lafayette Square, where those residents will feel ZERO IMPACTS per your own $2 million+ study!

Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.

There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.

Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.

Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.
We are not opposed to the K Line Extension. We want to see it succeed. But it must be

planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.

We respectfully ask that you:

- Ensure a fair and transparent evaluation of alternatives
- Provide meaningful and timely engagement with our community
- Restore trust through open communication and accountability

We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.
Thank you for your time and consideration.

Sincerely,
Kathleen and Kief Davidson
Lafayette Square residents since 2015

Dear Mr. Chairman and Board Members,

I SUPPORT the staff's recommendation to APPROVE the San Vicente-Fairfax alignment evaluated in the 2024 Draft Environmental Impact Report (EIR) as the Locally Preferred Alternative (LPA) for the K Line Northern Extension (KNE).

Moving forward on the K Line Northern Extension to serve dense areas, which the San Vicente-Fairfax alignment will do, will bring many new riders into the system. Getting the extension built as soon as possible should be a priority.

Thank you.

Respectfully,

P.A. Brown

We oppose the k line coming to West Hollywood at the Santa Monica and San Vicente intersection. This is problematic for the community, the sheriff department and all residents. The La Cienega and Wilshire station is sufficient and to do another location creates a severe waste of money and resources.

Dear Metro Board Members,
I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.
Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. Hello,

I am messaging in support of the LPA alternative for K Line North extension. For the future of the City of Los Angeles, we need more rail lines that connect the city and reduce traffic. Our current infrastructure does not support Angelenos in the project area to get around town easily. I worry if we delay this extension any longer, people's view of LA local government will continue to sour and nothing will get built in my lifetime.

Traffic makes it difficult to get anywhere. Using public transportation can take double or triple the time it does to travel by car depending on your start destination. If I wanted to go from the Valley to Fairfax, I would have to take a long, bumpy bus ride after transferring from the B Line. This is not a bus ride i would not willingly take, unless as a last resort. With the K Line Extension however, I would consider taking public transportation to visit Fairfax and areas I haven't explored often like Crenshaw and Inglewood. This would also make getting to LAX easier as well by taking the B to the K, instead of taking the B to downtown, transfer to the E, then transfer to the K. With a potential 100,000 new riders taking the train instead of driving, LA can reduce its traffic on our freeways and streets.

We need to invest in improving our infrastructure now. I have been riding the Metro since I was 12. I've been following Metro's expansion plan since former Mayor Garcetti announced the Twenty-Eight by '28 initiative. I've experienced the frustration of project delays and I've felt the neglect to our public transportation. All I want now is progress, because I need to believe there is a positive future for LA.

From,

Jose Martinez

Dear Metro Board Members,

As a LaFayette Square resident, I strongly support the current proposed alignment of the extension of the Kline thru midcity and my neighborhood. The best way to solve the traffic, climate, and housing crisis is with more equitable oublic transit and this will help serve our neighborhood.in the proposals for the metro station, please include multi-family housing, a grocery store, pharmacy, and paid parking for those that wish to be multimodal. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences, so please include these in the station. Thank you for reaching out and working with our community, espcially the 2.5 million dollar study. I am sorry so many of my neighbors have been ill-informed and are holding our public transit hostage. This proposed extension would benefit all Angelinos.

Thank you for your time, Allison Bellon

To the Metro board, I support the staff recommendation unequivocally. Although I still believe that the Fairfax alternative is the most cost effective and most efficient alternative, the City of West Hollywood has stepped up to the plate and offered billions of dollars in an enhanced infrastructure finance district that will essentially cover the cost of deviating the train to serve their city AND accelerate the project. We should not look this gift horse in the mouth and delay it further with additional studies for a solved issue miles away in Mid City. Metro has already done extensive outreach for years all along the corridor. The project is ready to be designed and built. Metro must approve the staff recommendation without delay.

Sincerely,
Henry Fung

Dear Metro board —

I am an educator and lifelong Angelino born and raised in the city of Los Angeles. Much like the more than 2 million daily users, for many years I depended on public transportation to get to and from work and school. I would continue riding the metro system daily if the routes expanded to ensure I'd be able to arrive to my destination on time.

Alas, I am writing to **urge you to vote in FAVOR of the NORTH EXPANSION of the K LINE.**

Expanding the K Line and subsequent Metro routes is more than just making the Valley more accessible to working class communities, but it will also help decrease toxic air pollution, curve global warming, and decrease freeway traffic congestion in the region.

The vote in support of the K LINE is simple. It's a commonsense vote that overwhelmingly outweighs any minor alleged noise inconveniences for wealthy NIMBY objectors claim.

In a county where **74 percent of the population are Black, Indigenous, Latino, and other people of color**, millions of which are from working-class backgrounds that relied on public transportation to secure economic resilience, it makes absolutely no sense to allow a slim minority to adversely affect and limit the economic resilience and prosperity of the multicultural majority of our region.

A vote in favor of the expansion is a vote in support of economic justice, resilience and prosperity for 74 percent of the county's population. An expansion of public transportation will directly contribute to more job opportunities and economic resilience of Black, Indigenous, Latino and other people of color communities.

Thank you,
Ahuatl Amaro, MFA

To whom it may concern,

I'm writing to express my strong support FOR Agenda Item #7, the staff-recommended San Vicente-Fairfax Hybrid alignment for the K Line Northern Extension, **with NO amendments, delays, or additional studies.** Furthermore, we should save $165 million by reverting to the DEIR route through Mid City, since tunneling has zero impacts to the surface. Concerns about tunneling impacts on historic properties are unfounded, and throughly addressed by the multimillion dollar peer-reviewed studies commissioned by Metro over the last 18 months as a part of the DEIR process. Metro correctly stood by the D Line Phase 2 alignment, whose tunnels pass under Beverly Hills High School in much more challenging conditions, so **there is no geotechnical basis to re-route the San Vicente-Fairfax alignment proposed in the DEIR.**

Given that Director Jackie DuPont-Walker is an homeowner in Lafayette Square, her ongoing and efforts to influence this vote are probably illegal. Failure to cleanly advance the staff recommended alignment or the DEIR alignment could result in state corruption investigation of the Metro Board. Beyond the potential legal exposure, **it is plainly unethical and immoral to privilege the concerns of a few dozen wealthy homeowners over the mobility of tens of thousands of Angelenos.** The poorest people in L.A. rely on Metro. Voting to delay, and potentially kill, a project that would massively expand their mobility on the basis of unfounded "concerns" from wealthy homeowners would be profoundly shameful chicanery.

Stop hiding behind "community concerns." Do right by the working class people who rely on Metro. Do right by the 70% of L.A. County that voted YES on Measure M. Do the right thing and **vote to move the San Vicente-Fairfax alignment forward, without delays or amendments,** and without collaborating with a "recused" board member.

Best,
Adam Aitoumeziane

Hello,
I am writing to show my support for the K Line northern extension via the San Vicente-Fairfax alignment, as recommended by the Metro staff from the 2024 Draft EIR, as the locally preferred alternative build out of this transit line.

I am a resident of Los Angeles, living near the soon-to-open Wilshire/La Cienega station on the D Line, and have used Metro as my primary means of transportation for the past 9 years. In that time, I have needed connections to reach offices in Century City, El Segundo, and Agoura Hills, along with many other neighborhoods for errands and leisure.

One obvious need of this city's system is the ability to connect between transit lines outside of downtown. Currently, there are no north/south transit or BRT lines west of downtown, making these transfers a logistical headache. The proposed Sepulveda Line and this K Line northern extension are vital to creating the grid that this city and its residents need for everyday use, not to mention the many popular tourist sites these lines would connect.

I am also aware of the potential conflicts of interest with Metro Board members Jacquelyn Dupont-Walker and Holly Mitchell, and the baseless arguments by a small number of residents in Lafayette Square regarding tunneling in their neighborhood, but I expect these concerns have been raised by more than enough transit advocates and news outlets to avoid my need to dig into them here.

LA Metro has made wonderful progress towards creating a more transit-friendly future in recent years. It would be a shame and a disservice to the people who rely on public transportation throughout this city to indefinitely delay this crucial project that has the ability to transform Los Angeles for generations to come.

Sincerely,
Jake Maddox

Dear Metro board and political leaders,

Enough delay - Switch back to the DEIR option, and approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before. There are Metro studies that have been conducted showing tunneling 100+ feet below ground has minimal impact on residents above ground.

Changing the alignment will add unnecessary delays and budget overruns, further burdening the local communities with no access to reliable public transit options. West Hollywood is willing to put up 25% of the project cost, something this board should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment and switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Leon Gu

I support the Metro staff recommendation for the K Line project and ask that the project move forward without delay and with *no additional motions or amendments*. The objections raised regarding tunneling under homes are without merit, as previous studies have concluded that such tunneling does not carry any risk for the depths proposed. There is no sense in undertaking further studies on something already shown to not have adverse consequences. Delaying this project further will only unnecessarily increase costs.

Dear Metro board,

My name is Jan-Michael Sanchez, and I am 24 years old. I am a daily transit rider, renter, and lifelong resident of Torrance. I am writing in support of the Crenshaw DEIR alignment for the San Vicente-Fairfax route. Please consider this a "for" comment for Item #7.

Please stand up for current and future K Line riders. Approving an unnecessary additional $165 million on top of the extra $740 million that the Hawthorne alignment is already costing is only going to delay the project. Further delaying the K Line Northern Extension project is not an option, especially when Lafayette Square homeowners' concerns have already been addressed. According to the facts, tunneling deep below their homes will have no impact on their lives.

Recently, the board helped dozens of retired NIMBY homeowners in Lawndale delay the K Line to Torrance indefinitely by making a suspicious last-minute switch to Hawthorne Boulevard. It was all due to unfounded fears that had already been addressed in the Final EIR, and left thousands of South Bay transit riders with a broken promise of light rail to LAX by March 2036.

This disastrous decision must not be replicated for the thousands of Central LA, WeHo, and Hollywood transit riders who have been begging for Metro rail. Please, listen to your riders, not a comparatively small amount of NIMBY homeowners who only delay these transformational light rail projects, only to never ride transit in the future.

Sincerely,
Jan-Michael Sanchez
Torrance resident
Barista

Dear Metro Board of Directors and Board Clerk,

My name is Jesus Haquet and I am a resident of Mid-City. I am writing to express my strong opposition to **Item #7**, the staff recommendation for the **San Vicente-Fairfax route** for the K Line Northern Extension.

While I support transit expansion, I am deeply concerned that the proposed station at the Mid-City Shopping Center (Midtown Crossing) will displace the **Ralphs grocery store** and **CVS pharmacy**. These are essential lifelines for our community.
While Metro staff has "committed to working with" the owner to relocate the Ralphs, **this language is too vague.** I urgently request the Board **amend this motion** to include a legally binding requirement that:

1. **Both Ralphs and CVS** must be fully relocated and operational—ideally using the **underutilized lot near the Yoshinoya**—**BEFORE** any demolition or construction staging begins at the current site.

2. The **CVS pharmacy** must be given the same relocation guarantee as the Ralphs to prevent a healthcare "pharmacy desert" for our seniors and a "food desert" for the community.

Without a signed, binding agreement ensuring zero gap in service, this project threatens the basic food and health security of Mid City. I urge the Board to **delay this vote** until a concrete relocation plan is finalized and shared with the public.

There is also the possibility of using other existing large empty lots such as the:
Crenshaw and Olympic- Empty lot where houses and a gas station once stood. Across from it is an empty store that used to be the Rite Aid.
This is a major transit point.

1102 Crenshaw Blvd (Crenshaw and County Club) - Empty lot that once housed the Legal Aid Foundation years ago. It has been sitting empty for many years after the demolition of the building. Approx more than 20,000 SF.

Tax Increase
Will the surrounding properties be hit with a tax increase to cover this item that West Hollywood is pushing for?

The plan requires that LA city and county join as full partners and there is mention of a potential 0.75% sales tax increase a backup for funding.

Food Dessert Continued
The surrounding stores do not meet the inventory that, variety, and price points that Ralph's provides.
Target - This is a very small Target with a low variety of groceries.
Sprouts - A more specialized store with potentially higher price points.
Smart And Final - Focusing on bulk items and serving store and business owners.

These stores that were just mentioned are a great compliment to a grocery ecosystem with an existing major grocery store like the current Ralph's. It is like a pyramid, the foundation is needed in order to build on top of it.

We don't have too many major stores. Just as an example (Without advocating for it or against it) we don't have a Walmart in the city of Los Angeles.

Thank you for your time and consideration.

Thank you,
Jesus Haquet

Dear Metro Board Members,
I am writing to respectfully urge you to reject the currently proposed alignment for the Metro K Line Extension.
Our community stands to lose its only full-service grocery store and its only pharmacy under this proposal—essential resources that residents rely on every day. For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.
Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.
We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.
We respectfully ask that you:
Reject the current alignment
Ensure a fair and transparent evaluation of alternatives
Provide meaningful and timely engagement with our community
Restore trust through open communication and accountability

We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.
Thank you for your time and consideration.
Sincerely,
Mid City Resident

For many, especially seniors and families who don't drive, losing access to food and medication within the neighborhood would have serious and lasting consequences.
Equally concerning is the lack of fair and timely community engagement. While other impacted communities have had the benefit of public hearings and input over the past eight years, our neighborhood was not meaningfully notified or brought into the process until 2024. This disparity has left us at a significant disadvantage in understanding and responding to decisions that directly affect our homes and quality of life.
There are also serious concerns about governance and equity in decision-making. Our two local representatives are required to recuse themselves from voting, leaving our community without direct representation in this process. At the same time, a board member who has actively supported this alignment and who owns properties that may increase in value as a result is not recused. This raises legitimate questions about fairness, transparency, and public trust.
Finally, recent developments have deepened these concerns. We have learned the discussions Metro testified about regarding relocating our grocery store before construction, have not taken place. The property owner has stated they have not been contacted. The owner of the land reported the City may be considering condemnation without clear communication only add to the perception of a process that lacks transparency and accountability.
Taken together, these issues reflect a pattern of decision-making that has excluded our community and undermined trust.
We are not opposed to the K Line Extension. We want to see it succeed. But it must be planned and implemented in a way that is transparent, equitable, and responsive to all affected communities.
We respectfully ask that you:
Reject the current alignment
Ensure a fair and transparent evaluation of alternatives
Provide meaningful and timely engagement with our community
Restore trust through open communication and accountability
We are ready to work collaboratively toward a solution that expands transit while preserving essential resources and respecting the communities it serves.
Thank you for your time and consideration.

Sincerely,
Mid City Resident

Members of the Board:

My name is Greg Greene, and I'm a recently minted resident of Los Angeles after years living in other transit-connected communities such as Chicago and the city of Washington, D.C., and its environs.

I understand the impulse to hear out community input and concerns. I would implore the board, however, to recognize that substantial time, effort, and resources have already been given to hearing such concerns — and would note, from personal experiences, that the concerns about injury to residential property value by a rail easement lack all validity.

First, the personal experience. In Chicago I lived within a half-block of the elevated tracks of the city's Red Line — a heavy-rail route that runs, as it ran when I lived there, 24 hours per day and seven days a week. Using the older technology and standards in 1900, when the line was first built, the trains there were noisy — but one could carry on a conversation as trains passed, and one could sleep in peace as the night trains went to and fro. As for property value, that home has appreciated by over 100 percent since I lived there in 1998.

Inside the Beltway, my last home before settling in Los Angeles was one block from commuter rail and heavy rail lines in Alexandria, Va.. Those trains were also elevated, but they ran on a separate easement and created little visual obtrusion. The noise from those tracks was hardly more noticeable than that of a passing car. The presence of multiple rail transit options only, if anything, aided the property's value — with the value of my home jumping by over 400 percent between the oldest easily pulled public sale record, from 1995, and when I sold it three years ago.

Given my experiences, I find that it beggars belief to argue that a rail tunnel built close to 100 feet below homes will somehow produce damaging vibrations or noise. Sure, I'm merely one person saying this — but I don't ask residents along the locally preferred route for the K Line Northern Extension to take my word. Far from it: I ask them to trust the peer-reviewed research, conducted specifically to address residents' concerns, that tunnel boring and train operation below their homes will have no perceptible impact on their properties or quality of life.

Now, to zoom out: while the comfort of the public with proposed public works matters, assessment of comfort can't only include those of nearby residents. As a taxpayer, I find it worrying that after the expense of 18 months and $2.7 million to look into allaying concerns of residents along the Mid-City alignment, the Metro board would contemplate causing further delay to this project and flirt with alignments that could result in tens or hundreds of millions of dollars of unnecessary expense. I further find it worrying that the cost-benefit discussion about the Mid-City alignment appears to ignore the experiences of riders who would benefit from direct, swift connections to the employment centers that the K Line Northern Extension would link to the Metro rail system.

Last, I know that cost-benefit analyses were often used, in the past, as a way to dismiss the concerns of disempowered communities affected by public works — such as those of Black residents of Sugar Hill, when the Santa Monica Freeway was first built. But this comparison is totally inapposite. No residences will be demolished to make way the locally preferred alignment in Mid-City. No noise pollution, air pollution, or vibrations that could affect property values will ensue. It bothers me, as a Black person, to hear equity concerns invoked in a way that dismisses facts and logic — because such arguments, when made in questionable faith, increase the risk of legitimate and observable equity concerns, in the future, being dismissed.

I urge you to accept the staff recommendation and to move forward with this project, in the spirit of serving the *whole* public interest — not just the already addressed concerns of a few. Thank you—

Greg Greene

Dear Metro board and political leaders,

I am writing to urge you to approve the K Line Northern Extension San Vicente-Fairfax alignment!

It's become apparent that no amount of community meetings or studies will convince a handful of residents that there are zero impacts to tunneling 100+ feet below ground, as Metro has done safely many times before.

West Hollywood is amazingly willing to put up 25% of the project cost, something this board

should not take for granted.

Once built, this will be the busiest light rail line in the country, connecting the region to key destinations including Cedars-Sinai Hospital, The Grove, West Hollywood, and the Hollywood Bowl. This line is the missing North/South link between the B Line and E Line and will have exponential positive effects across Metro's system.

NO MORE DELAYS OR STUDYS. Approve the K Line Northern Ext San Vicente-Fairfax alignment; even better, switch back to the DEIR option so transit riders aren't delayed each trip and we don't waste $165M to address non-issues.

Thank you,
Abbey Campbell

To whom it may concern,

I was born and raised in LA and am a common metro user. Ridesharing is something I have always wanted to see expanded in LA and the K-line was supposed to be a good start to having better metro (at least starting to form a grid instead of a downtown based metro)

after doing some research and hearing about the delays that Mayor Bass has put into place, I am concerned that this project will never finish.

research shows that tunneling underneath homes won't affect the homeowners much or at all and it will save hours of time and millions of dollars.

many people, including myself, have wanted an expanded metro line for years now and delaying it to 2040 is a horrible decision that i hope that the board will reconsider.

Matt

(Note: Please send all of my comments to all councilmembers and staff)

So, regarding the K Line Northern Extension, I strongly urge you to go with the San Vicente-Fairfax alignment because the San Vicente-Fairfax alignment is a better option to serve many new areas including Beverly Center, Cedars-Sinai Medical Center, and the new West Hollywood Recreation Center located near San Vicente/Santa Monica. Regarding the segment between the Crenshaw/Adams and the future D Line Extension, hopefully you should always keep the Midtown Crossing Station because of the connection with the Rimpau Transit Center and depending on the housing conditions along the extension route I'm going to stay neutral on the alternatives for now and hopefully whatever they would end up picking the final alignment located between Crenshaw/Adams and the future D Line Extension then I'll support that final alignment that they would end up picking for the one between Crenshaw/Adams and the future D Line Extension.

In closing, I strongly urge you to strongly approve the San Vicente-Fairfax Alignment now instead of delaying the decision for the K Line Northern Extension

Thank you

Dear Members of the Finance, Budget, and Audit Committee,
My name is Isabel Tecum, SAJE , Watts. I am writing to submit a public comment regarding Agenda Item 12 (2025-0128), concerning the proposed contract with Cubic Transportation Systems, Inc. for TAP third-party vendor management and support services.
While I understand the need to maintain and improve fare payment infrastructure, I strongly urge the Committee to prioritize policies that move toward free public transit and to reject any future fare increases tied to operational costs such as this contract.
Public transit is an essential service that supports working families, students, seniors, and people with disabilities. Increasing fares places a disproportionate burden on those who rely on transit the most, especially during a time when many are still facing financial hardship. Instead of raising fares, Metro should explore equitable funding solutions that expand access and ridership.
Investments in systems like TAP should ultimately support a vision of seamless, barrier-free transit—not reinforce a system that requires riders to continually pay more. Free or reduced-fare transit has been shown to increase ridership, reduce traffic congestion, and improve air quality, benefiting the entire region.
As you consider this contract, I ask that you to continue expanding fare-free programs and pilot initiatives, and centering on equity and accessibility in all transit funding decisions.
Thank you for your time and for considering the needs of transit riders across our community.
Sincerely,
Isabel Tecum, SAJE member

Estimados miembros de la Comisión de Finanzas, Presupuesto y Auditoría:
Mi nombre es [Su nombre, organización, lugar de residencia]. Les escribo para presentar un comentario público sobre el punto 12 del orden del día (2025-0128), relativo al contrato propuesto con Cubic Transportation Systems, Inc. para la gestión de proveedores externos y los servicios de asistencia de TAP.
Aunque comprendo la necesidad de mantener y mejorar la infraestructura de pago de tarifas, insto encarecidamente a la Comisión a que dé prioridad a las políticas que avancen hacia el transporte público gratuito y a que rechace cualquier futuro aumento de tarifas vinculado a los costes operativos, como este contrato.
El transporte público es un servicio esencial que da apoyo a las familias trabajadoras, los estudiantes, las personas mayores y las personas con discapacidad. El aumento de las tarifas supone una carga desproporcionada para quienes más dependen del transporte público, especialmente en un momento en el que muchos siguen enfrentándose a dificultades económicas. En lugar de subir las tarifas, Metro debería explorar soluciones de financiación equitativas que amplíen el acceso y el número de usuarios.
Las inversiones en sistemas como TAP deberían, en última instancia, respaldar una visión de un transporte público fluido y sin barreras, y no reforzar un sistema que obliga a los usuarios a pagar cada vez más. Se ha demostrado que el transporte público gratuito o con tarifas reducidas aumenta el número de usuarios, reduce la congestión del tráfico y mejora la calidad del aire, lo que beneficia a toda la región.
Mientras estudian este contrato, les pido que sigan ampliando los programas de transporte gratuito y las iniciativas piloto, y que se centren en la equidad y la accesibilidad en todas las decisiones de financiación del transporte público.
Gracias,

Dear Members of the Finance, Budget, and Audit Committee:
My name is [Your Name, Organization, Place of Residence]. I am writing to submit a public comment regarding Agenda Item 12 (2025-0128), concerning the proposed contract with Cubic Transportation Systems, Inc. for third-party vendor management and TAP support services.
While I understand the need to maintain and improve fare payment infrastructure, I strongly urge the Committee to prioritize policies that advance toward fare-free public transit and to

reject any future fare increases linked to operational costs—such as those associated with this contract.

Public transit is an essential service that supports working families, students, seniors, and people with disabilities. Raising fares places a disproportionate burden on those who rely most heavily on public transit, especially at a time when many continue to face economic hardship. Instead of raising fares, Metro should explore equitable funding solutions that expand access and ridership.

Investments in systems like TAP should ultimately support a vision of seamless, barrier-free public transit, rather than reinforcing a system that compels riders to pay increasingly higher amounts. Fare-free or reduced-fare public transit has been shown to boost ridership, reduce traffic congestion, and improve air quality—benefits that extend to the entire region.

As you consider this contract, I ask that you continue to expand fare-free transit programs and pilot initiatives, and that you prioritize equity and accessibility in all public transit funding decisions.

Thank you,

Subject: Let's Move Metro Bike Share Forward: Investing in LA's Transportation Future!

Dear LACMTA Board Members,

It is time for LA Metro to invest boldly in the future of Bike Share in Los Angeles, ensuring it is a reliable, equitable, and world-class system that meets the needs of all Angelenos and reflects a culture that values health, safety, and wellbeing.

For too long, the promise of Metro Bike Share has been delayed. Transit-reliant communities—those who would benefit most—have waited years for meaningful expansion into their neighborhoods. These are areas where few people own cars, where families walk their kids to school and ride the bus to work. Without nearby stations, affordable pricing, and reliable equipment, the system remains out of reach.

To unlock bike share's full potential, Metro must ensure dedicated funding and strong local partnerships within the contract under consideration. This includes investments in updated hardware, modern technology, and sustained community engagement. Monthly education and encouragement activities led by trusted community-based organizations are essential to building a system that is accessible, welcoming, and reflective of the people it is meant to serve. A successful system must work for both the people who rely on it and those who operate it.

With this contract award, Metro must ensure that equity and accountability are prioritized from the outset. This includes a clear commitment to station electrification and e-bike expansion by the end of 2026 to improve bike availability, reduce emissions, and support a healthier, more sustainable Los Angeles—especially in neighborhoods that have waited far too long.

The recent updates on the RFP process and intent to award the contract mark a critical transition point. This impending decision follows years of delays, during which advocates and community members have called on Metro to build a system that centers the needs of Angelenos who walk, bike, and rely on transit every day. The inclusion of the unionized BikeHub workforce and community partners like the groups below offers a foundation for broader access, but only if paired with meaningful oversight, sustained public investment, and a commitment to high-quality reliable service.

This is a defining moment for Los Angeles to show what is possible when public infrastructure reflects community priorities. The upcoming World Cup, Super Bowl, and 2028 Olympic and Paralympic Games offer a rare opportunity to showcase Los Angeles as a city that takes care of its people. Connecting Metro Bike Share to rail lines, bus routes, and active transportation corridors like the proposed Festival Trail can create seamless, zero-emission mobility options for residents and visitors alike.

To realize this vision, it is essential Metro approve and fully fund this contract without delay, prioritizing system expansion, and empowering all partners—within Metro and beyond—to deliver on these goals. The future of transportation in our city is full of promise. Now is the

time to move bike share forward, expanding access, centering equity, and building a more connected Los Angeles for everyone.

We appreciate your consideration and support for a better bike share program in our city.

Hello,

I am sending in my written public comment for the 3/26/2026 Metro board meeting regarding agenda item 30. Metro Bike Share. I am submitting my comment here in case I am not able to appear in person.

My comment is below:

Hi, my name is Shane Quentin, General Manager of BTS, we have been operating Metro Bike Share since 2016.
I am grateful for Metro's continued support of this first-mile, last-mile solution with this interim contract extension. Not only does Metro Bike Share support people seeking flexible, healthy, and green transportation; it provides dozens of union jobs. At BTS we work every day to support bikeshare customers and add reduced fare passholders, all while providing high quality operations.
I know our fiscal situation is tight. As a show of BTS' commitment and partnership, we offered a voluntary cost reduction starting late last year, and recently we have loaned 150 additional e-bikes to the program at no additional cost to Metro. This will ensure program sustainability, and boost ridership while Metro and its partners plan the long-term direction of Metro Bike Share.
Thank you for your time and thank you for continuing to support this essential form of transit.

Shane Quentin
General Manager, Metro Bike Share
Bicycle Transit Systems
[redacted]

Leading the bike share revolution, one ride at a time.

Subject: (EXTERNAL) Ongoing Accessibility Failures Across Metro System (Braille Signage & Announcements) General Comment / Item 7

CAUTION: This email originated from outside of the organization. Help Metro protect against cyber threats. Verify the sender's email address carefully. Do not click links or attachments unless you trust the sender. Be aware of phishing signs such as urgent requests, unexpected links, or offers that seem too good to be true. Be cautious of spoofed emails that appear to come from trusted sources. Report suspicious emails. Follow Metro policies and update accounts only through official channels.

Dear Metro Board Members,

I am writing to formally document ongoing accessibility issues across the Metro system that have persisted for years without resolution. While I had intended to provide public comment, the scope and consistency of these issues warrant a more detailed written record.

We are not dealing with a single issue, but a pattern of accessibility failures affecting blind and visually impaired riders.

First, braille and tactile signage remains inconsistent or missing. Along the A Line, particularly between 7th Street Metro Center (upper level) and Downtown Long Beach Transit Mall, many stations lack adequate braille signage. In addition, signage along the Red and Purple Lines has been faded and difficult to read for approximately a decade. These issues were previously reported to accessibility staff, yet remain unresolved.

Second, station announcements are unreliable. Multiple stations, including Glendora and several along the A Line, do not consistently provide audible announcements. At Union Station, particularly during evening hours around 21:00, announcements are often unclear or not audible enough to identify arriving trains.

Third, onboard announcement systems continue to fail riders. There are ongoing inconsistencies between interior and exterior announcements. Some newer A Line trains appear unable to produce external announcements, and operators do not consistently compensate for this—especially at shared platforms where identifying the correct train is critical. This creates significant barriers for blind riders attempting to navigate the system independently.

These issues have been reported multiple times through Customer Relations and other channels over the years, yet conditions remain largely unchanged.

As Metro continues to expand the system and invest in new infrastructure, it is critical that accessibility be treated as a foundational requirement—not an afterthought. Accessibility features such as braille signage and audible announcements must be fully functional and validated prior to project openings and maintained consistently across the system.

We should not be building new stations while longstanding accessibility failures remain unresolved.

I appreciate your attention to these concerns and look forward to meaningful progress on these issues.

Sincerely,
Jared Rimer

General Public Comment

Hello,

I am a resident of DTLA, and I am a frequent rider of LA Metro. I am extremely grateful for all the progress made to make the system better since 2020. The regional connector in particular has been a game changer. Also looking forward to the D line extension.

One thing I would really like to see express service on the Metro A and E lines. After a short trip to NYC, it was abundantly clear that express services from DTLA to Long Beach, Pasadena, Pomona, East LA, and Santa Monica are much needed. These light rail lines travel 10s of miles in each direction. Having a service that stops at half or less of the stops would make taking the A or the E line so much faster. It could even make the light rail lines competitive with driving and take drivers off the roads.

I understand this is request that costs billions of dollars, double tracking both routes entirely, and years to complete. However, it could be really worth it. It seems like LA Metro hasn't figured out how to really get people to take the trains instead of drive, and making the commute times shorter would be a good step in the right direction.

Thanks!

Subject: (EXTERNAL) GENERAL PUBLIC COMMENT - for March 26 Metro Board Meeting: Fare Enforcement

CAUTION: This email originated from outside of the organization. Help Metro protect against cyber threats. Verify the sender's email address carefully. Do not click links or attachments unless you trust the sender. Be aware of phishing signs such as urgent requests, unexpected links, or offers that seem too good to be true. Be cautious of spoofed emails that appear to come from trusted sources. Report suspicious emails. Follow Metro policies and update accounts only through official channels.

Dear Chair and Members of the Metro Board,

I am writing to urge Metro to restore regular onboard fare checks.

Metro has reduced fare checks by approximately 98 percent since 2018. Transit Security Officers once conducted more than 300,000 onboard fare checks per month. In 2025, that number fell to about 5,000 per month. That is not a minor operational change. It is the near-disappearance of a basic function of system management.

If Metro is going to raise fares, it cannot continue allowing fare payment to be optional for a large share of riders. Without enforcement, fare increases fall primarily on the people who already pay. That is unfair, and it is not sustainable.

This is not an argument against equity. Metro already has the LIFE program and other reduced-fare options to help lower-income riders, including free rides for qualifying individuals. The issue is not whether affordability programs should exist. They should. The issue is that when fare payment is not meaningfully enforced, Metro loses revenue that could support better service, and riders experience a system that feels less safe, less orderly, and less well-managed.

Metro also has the staffing to do better. The agency previously conducted far more fare checks with fewer officers than it has today. The Board did not vote to eliminate fare enforcement, yet fare enforcement has effectively vanished. That should be corrected.

I respectfully ask the Board to direct staff to restore regular onboard fare checks and to treat fare compliance as a basic part of operating a safe, fair, and financially responsible transit system.

Thank you for your consideration.

Sincerely,

Josh Gray-Emmer
Carfree transit rider who lives and works in DTLA

Hello Board Clerk,

We are ensuring that our Statement & Open Letter on the January 22nd Metro Board Vote (C Line Extension to Torrance) has been received by the board. This is attached here and published on 1/29/26 on our website: https://www.southbayforward.org/blog/statement-on-january-22nd-metro-board-vote

As longtime supporters of transit to the South Bay, our advocacy on the K Line to Torrance will continue, and our South Bay On Board Coalition (15+ pro-transit organizations) continues to coordinate.

We celebrate FEIR certification and moving forward with the project. However, our members and advocates were disappointed by the sudden alignment change, missed opportunities, and lack of transparent public process in the Board's decision.

Our goals are to:

1. Hold public officials accountable—including Metro Board Members and the Cities of Lawndale, Redondo Beach, and Torrance—to a higher standard of transparency and a commitment to delivering the K Line Southern Extension expeditiously.
2. Ensure first-last mile planning for this project improves mobility for all near stations.
3. Preserve public ownership of the rail corridor at minimum until the project is operational. Phase the project to start early work.
4. Push for Board reform so future decisions are determined by experts in the field who prioritize transit best practices over political dynamics.

We will remain engaged to ensure the K Line to Torrance is built expeditiously and with the most safety, mobility, and accessibility benefits. We are speaking with supporters of

the Hawthorne alignment to find common ground to deliver transit, rail, and mobility benefits to our communities. We hope going forward Board Members provide:

- Open transparency
- Equal time and weight to all stakeholders
- Safe and accessible transit that is not further delayed

We will continue to be in communication and engaged in this next phase to ensure the project is funded and built expeditiously. We appreciate your responsiveness, engagement, and partnership in the past few years. We hope for productive collaboration with Board Members to deliver on promises and make the strongest beneficial impact in our communities.

In community,
South Bay Forward

SOUTH BAY
FORWARD

5. SUBJECT: ADOPT THE 2027 FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM FOR LOS ANGELES COUNTY **2026-0026**

ADOPTED ON CONSENT CALENDAR the resolution for the 2027 Los Angeles County Transportation Improvement (TIP) Program.

6. SUBJECT: FEDERAL TRANSIT ADMINISTRATION SECTION 5310 GRANT PROGRAM AWARDS **2026-0015**

APPROVED ON CONSENT CALENDAR:

A. Federal Transit Administration (FTA) Section 5310 funding awards totaling $10,752,739, made available to Metro through the Section 5310 Enhanced Mobility for Seniors and Individuals with Disabilities Program;

B. AUTHORIZING the Chief Executive Officer (CEO) or their designee to negotiate and execute pass-through funding agreements with the subrecipient agencies receiving the approved awards;

C. DELEGATING to the CEO or their designee authority to administratively approve minor changes to the scope of approved Section 5310 awards;

D. CERTIFYING that the Section 5310 funds are fairly and equitably allocated to eligible subrecipients and, where feasible, that projects are coordinated with transportation services assisted by other federal departments and agencies; and

E. CERTIFYING that the Section 5310 projects selected for funding are included in the Board-adopted 2025-2028 Coordinated Public Transit-Human Services Transportation Plan (Coordinated Plan), in compliance with federal requirements.

7. SUBJECT: K LINE NORTHERN EXTENSION (KNE) - LOCALLY PREFERRED ALTERNATIVE (LPA) **2025-0846**

APPROVED AS AMENDED BY BASS, HORVATH AND BARGER the San Vicente-Fairfax alignment evaluated in the 2024 Draft Environmental Impact Report (EIR) as the Locally Preferred Alternative (LPA) for the K Line Northern Extension (KNE) Project contingent upon the formation of an Enhanced Infrastructure Financing District (EIFD) by the City of West Hollywood in coordination with Los Angeles County to provide additional local sources of funding (at least 25% of the capital cost estimate) per the Early Project Delivery Strategy with:

(continued on next page)

(Item 7 – continued from previous page)

A. an initial operating segment (IOS) from the Expo/Crenshaw Station at the E/K Line to Wilshire/Fairfax at the D Line;

~~B. an adjusted tunnel alignment in Mid-City to continue to maximize use of public rights-of-way (ROW) to reduce subsurface easements, described as Crenshaw ROW: Option 2 in the Mid-City Additional Alignment Analysis Report (2025);~~

B. upon reinitiation of project activities, the Mid-City alignment will be finalized and approved by the Board within the first 12 months. The alignment shall be informed by meaningful engagement with residents and stakeholders; prioritizing preservation of historic neighborhoods through the avoidance and minimization of residential subsurface easements; and include an independent third-party peer technical review of tunneling between Crenshaw/Adams and Wilshire/Fairfax, including potential impacts to historic residential structures, with findings shared publicly to support transparency, community confidence, and informed participation. This process shall in no way impede or delay any current efforts to expedite or advance the project, but shall be a means to get people where they need to go and put Metro in a position to be a trusted neighbor;

C. a commitment to work with the owner of the Midtown Crossing Shopping Center to preserve the opportunity to relocate the supermarket at an alternate location on acquired property adjacent to the construction site, prior to the start of construction; ~~and~~

D. a terminus station at the Hollywood Bowl;

E. undertake a robust value engineering analysis, including but not limited to the use of cut-and-cover, in Segments 2 and 3 of the proposed project alignment to bring down costs as much as possible;

F. report back on the feasibility of establishing an Initial Operating Segment for the Project from the Hollywood Bowl terminus to San Vicente/Santa Monica;

G. direct staff to provide input to the City of West Hollywood as it evaluates the potential formation of an EIFD by responding to requests for information about preliminary project cost information, using currently available project information and defined project endpoints and planning-level cost ranges, including the identification of a preliminary funding plan. Continue to coordinate with West Hollywood as the project advances and costs and alignments in the Mid-City neighborhoods are refined; and

H. upon reinitiation of project activities, federalize the environmental process.

JDW	KB	IP	KY	LH	HS	KRB	HJM	TS	JH	AJN	JB	FD
A/C	Y	Y	Y	Y	Y	Y	A/C	Y	Y	Y	Y	Y

9. SUBJECT: K-LINE EXTENSION TO TORRANCE **2025-1032**

AUTHORIZED ON CONSENT CALENDAR the Chief Executive Officer (CEO) to:

A. AWARD a cost-plus fixed fee contract, Contract No. AE130368000, for a period of five years, with two, three-year options, to Hill International, Inc., for Program Management Support Services (PMSS) for the K-Line Extension to Torrance Project (formerly referred to as the C (Green) Line Extension) in an amount Not-To-Exceed (NTE) $89,198,548 for the base term, subject to the resolution of any properly submitted protest(s), if any; and

B. EXECUTE individual Contract Modifications within the Board-approved CMA.

10. SUBJECT: DOWNTOWN INDUSTRIAL BUSINESS IMPROVEMENT DISTRICT RENEWAL 2027 **2026-0013**

AUTHORIZED ON CONSENT CALENDAR the Chief Executive Officer (CEO) or their designee to execute a Petition to Renew Los Angeles County Metropolitan Transportation Authority's (LACMTA) participation in the Downtown Industrial District Property-Based Business Improvement District (BID) for a seven (7) year term commencing January 1, 2027 and expiring December 31, 2033, for a total estimated amount not to exceed $802,365.79 over the term of the BID renewal.

11. SUBJECT: WORKERS' COMPENSATION MEDICAL BILL REVIEW SERVICES **2025-0882**

AUTHORIZED ON CONSENT CALENDAR the Chief Executive Officer to execute Modification No. 3 to Contract No. PS61721000, with Lien On Me, Inc. for workers' compensation medical bill review services to exercise the second, two-year option in the amount of $2,541,000, increasing the total contract amount from $5,160,225 to $7,701,225, and extending the period of performance from July 1, 2026, to June 30, 2028.

12. SUBJECT: TAP THIRD PARTY VENDOR MANAGEMENT AND SUPPORT SERVICES **2025-0128**

AUTHORIZED ON CONSENT CALENDAR the Chief Executive Officer to award a firm fixed unit rate Contract No. PS123711(2)000 with Cubic Transportation Systems, Inc. to provide TAP third party vendor management and support services, in the not-to-exceed (NTE) amount of $584,937 for the two-year base term, $285,176 for the first one-year option, $293,063 for the second one-year option and $301,190 for the third one-year option for a total combined NTE amount of $1,464,366, effective May 1, 2026, subject to the resolution of any properly submitted protest(s), if any.

13. SUBJECT: INVESTMENT POLICY **2026-0105**

APPROVED ON CONSENT CALENDAR:

A. ADOPTING the Investment Policy;

B. the Financial Institutions Resolution authorizing financial institutions to honor signatures of LACMTA's Officials; and

C. DELEGATING to the Treasurer or their designees, the authority to invest funds for a one-year period, pursuant to California Government Code ("Code") Section 53607.

15. SUBJECT: MUNICIPAL ADVISORY SERVICES BENCH **2025-1079**

AUTHORIZED ON CONSENT CALENDAR the Chief Executive Officer to award eight, six-year task order-based bench contracts for Municipal Advisory Services and execute task orders under these contracts for a total Not-To-Exceed (NTE) amount of $7,100,000, effective May 1, 2026, subject to the resolution of properly submitted protest(s), if any:

- PFM Financial Advisors LLC (PS133271000)
- Montague DeRose and Associates, LLC (PS133271001)
- Public Resources Advisory Group (PS133271002)
- Frasca & Associates, LLC (PS133271003)
- KNN Public Finance, LLC (PS133271004)
- Sperry Capital Inc. (PS133271005)
- Fieldman, Rolapp & Associates, Inc. (PS133271006)
- Backstrom McCarley Berry & Co., LLC (PS133271007)

16. SUBJECT: PROPOSITION C BONDS **2026-0108**

ADOPTED a Resolution that authorizes the issuance and negotiated sale of up to $450 million in aggregate principal amount of Proposition C Sales Tax Revenue Senior Bonds (the "Bonds"), in one or more series, to finance capital projects, refund the Proposition C Senior Sales Tax Revenue Refunding Bonds, Senior Bonds, Series 2016-A (the "Refunded Bonds"), and to take of all other actions necessary in connection with the issuance of the Bonds.

19. SUBJECT: UNLOCKING POSSIBILITIES: ENHANCING THE FINANCIAL AND COMMUNITY VALUE OF KEY METRO STATIONS TO SUPPORT LONG-TERM REVENUE GENERATION MOTION **2026-0233**

APPROVED ON CONSENT CALENDAR Motion by Yaroslavsky, Bass, Dutra, Sandoval, and Solis that the Board direct the Chief Executive Officer to report back within 180 days with a strategic framework for implementing a Metro Station Commercial District Strategy across the Metro system, positioning stations as active commercial hubs with retail, services, and mixed-use development integrated above, within, and adjacent to stations to support long-term non-fare revenue generation. The report back should include progress on the following components:

A. System Assessment - an evaluation of opportunities and constraints for station retail across the Metro system, including:

   1. Review of international best practices;

   2. Review of previous and existing retail activations within Metro facilities and lessons learned from both successful and unsuccessful efforts, including but not limited to operational barriers, location factors, and design challenges;

   3. Evaluation of passenger circulation, station design, and other factors affecting retail viability;

   4. Identification and prioritization of potential locations suitable for initial pilot implementation;

B. Strategic Framework - a proposed strategy for developing station-centered commercial districts across the Metro system, including:

(continued on next page)

(Item 19 – continued from previous page)

1. Opportunities for commercial development above, adjacent to, and integrated within stations, including underground concourses, mixed-use development, and connections to surrounding districts;

2. Distinct approaches for new stations currently in development and existing stations within the system;

3. Identification of potential partnership structures with experienced retail operators or commercial management firms experienced in station retail environments;

4. Identification of implementation approaches consistent with Metro funding restrictions, including private investment, public-private partnership, concession agreements, and tenant-funded improvements;

C. Implementation Recommendations and Revenue Potential Assessment - a set of recommendations for implementing station retail opportunities, including:

1. Identification of governance structures to ensure long-term success;

2. Execution strategy for a phased pilot program at a limited number of high-ridership stations to test retail concepts, operational models, and revenue performances; and

3. Estimates of potential revenue generation, including a preliminary assessment of start-up and operational costs and revenue potential based on comparable benchmarks from other transit-oriented rail operations.

20. SUBJECT: ENERGY AND CLIMATE CONSULTANT SERVICES **2025-1049**

AUTHORIZED ON CONSENT CALENDAR the Chief Executive Officer to:

A. AWARD a cost-plus fixed fee, task order-based Contract No. AE131392EN088, with TRC Engineers, Inc. (CA) for Energy and Climate Consultant Services, for a three-year base term in an amount Not-To-Exceed (NTE) $18,078,000, plus two, one-year options in an amount not to exceed $3,111,000 for each option year, for a total NTE amount of $24,300,000, subject to the resolution of any properly submitted protests, if any;

B. AWARD individual Task Orders and modifications up to the authorized NTE contract amount of $3,900,000 or the project's authorized budget, whichever is less.

21. SUBJECT: ADOPTION OF CODE OF CONDUCT FOR METRO ADVISORY BODIES **2026-0120**

APPROVED ON CONSENT CALENDAR amendment of Title 5 (Ethics) of Metro's Administrative Code to include the "Code of Conduct for Metro Advisory Bodies", applicable to all members of Metro's advisory bodies.

22. SUBJECT: INFORMATION TECHNOLOGY DISRUPTION POLICY **2026-0042**

AMENDED the Board Rules and Procedures to include the Information Technology (IT) Disruption Policy as required by State law.

JDW	KB	IP	KY	LH	HS	KRB	HJM	TS	JH	AJN	JB	FD
Y	Y	Y	Y	Y	Y	Y	Y	A	Y	Y	Y	Y

24. SUBJECT: SENATE BILL 667 **2026-0160**

ADOPTED the following staff recommended position:

SB 667 (Archuleta) - Railroads: Safety. Wayside Detectors. As amended January 22, 2026. - SEEK AMENDMENTS

JDW	KB	IP	KY	LH	HS	KRB	HJM	TS	JH	AJN	JB	FD
Y	Y	A	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y

25. SUBJECT: METRO-LA28 MEMORANDUM OF UNDERSTANDING **2026-0047**

APPROVED ON CONSENT CALENDAR the Memorandum of Understanding (MOU) with the Los Angeles Organizing Committee for the Olympic and Paralympic Games 2028 (LA28).

26. SUBJECT: PUBLIC-PRIVATE PARTNERSHIPS (P3) TO SUPPORT REVENUE GENERATION MOTION **2026-0232**

APPROVED ON CONSENT CALENDAR Motion by Dutra, Sandoval, Najarian, Horvath, Yaroslavsky, and Dupont-Walker that the Board direct the Chief Executive Officer to return to the Board with a comprehensive P3 and Innovative Financing Strategy and Implementation Roadmap Plan with an initial report in July 2026 that includes a status on:

(continued on next page)

(Item 26 – continued from previous page)

A. Engaging the private sector to gauge industry interest and conditions needed for successful P3 participation, including market trends analysis to establish a refined conceptual framework for advancing P3 opportunities;

B. Engaging organized labor to understand workforce considerations, concerns, and conditions necessary to support potential P3 delivery models, including dialogue to inform the development of a refined conceptual framework for advancing P3 opportunities;

C. Evaluating P3 as a mechanism for schedule acceleration, financing, risk transfer, and private sector innovation, establishing when P3 delivery models can provide value compared to other delivery methods, informed by current private market capacity and conditions; and

D. Project-specific updates, including outcomes for active workstreams discussed at the Budget Workshop, including the ongoing Sepulveda Transit Corridor financial assessment and other candidate transit capital projects.

WE FURTHER MOVE, that the Board direct the CEO to report back to the Board every six months on progress in developing and advancing the P3 Innovative Financing Strategy and Implementation Roadmap Plan.

27. SUBJECT: COMMUTER RAIL STATION IN THE CITY OF PICO RIVERA 30% DESIGN AND ENVIRONMENTAL CLEARANCE MOTION 2026-0234

APPROVED ON CONSENT CALENDAR Motion by Hahn, Dutra, and Solis that the Metro Board direct the Chief Executive Officer to advance the following objectives pertaining to the Pico Rivera Regional Rail Station:

A. Continue coordination with CAHSR to ensure that their Final EIR/EIS and/or Supplemental EIR/EIS of the LA-to-Anaheim Project Section reflects a local decision regarding the Commerce Metrolink Station relocation mitigation in Pico Rivera;

B. Identify and program resources, as funding allows, to advance up to 30% engineering design and preliminary environmental assessments;

C. Coordinate with CAHSR to identify and program mitigation funding toward the station relocation in conjunction with the schedule for environmental clearance of this segment of the CAHSR;

D. Coordinate with CAHSR on the necessary levels of environmental review they would undertake to ensure appropriate CEQA and NEPA clearances;

(continued on next page)

(Item 27 – continued from previous page)

E. Work collaboratively with corridor stakeholders and support robust community outreach and engagement throughout the 30% engineering design and preliminary environmental assessment phase; and

F. Incorporate the Pico Rivera station location in the Metrolink work plan, the Regional Transportation Plan/Sustainable Communities Strategy, and other related planning documents.

WE FURTHER MOVE, that the CEO report back to the Board no later than the September 2026 Board cycle with progress and next steps for the above-requested items.

28. SUBJECT: PARTS WASHER LEASING AND MAINTENANCE SERVICES **2026-0003**

AUTHORIZED ON CONSENT CALENDAR the Chief Executive Officer to execute Modification No. 4 to Contract No. PS7235000 with FRS Environmental, Inc., to continue to provide parts washer leasing and maintenance services, increasing the total Not-To-Exceed (NTE) contract value by $356,513.62 from $1,587,712.50 to $1,944,226.12, and extending the period of performance for the duration of one year, from May 1, 2026, through April 30, 2027.

29. SUBJECT: FENCE REPAIR AND MAINTENANCE SERVICES **2026-0048**

AUTHORIZED ON CONSENT CALENDAR the Chief Executive Officer to execute Modification No. 5 to Contract No. OP1788370008370 to exercise the two-year option with Deco Fence Company to provide fence repair and maintenance services in the Not-To-Exceed (NTE) amount of $1,654,560, increasing the total contract NTE amount from $2,290,068 to $3,944,628, and extending the period of performance from May 1, 2026, to April 30, 2028.

30. SUBJECT: METRO BIKE SHARE **2026-0127**

AUTHORIZED ON CONSENT CALENDAR the Chief Executive Officer (CEO) to:

A. EXECUTE Modification No. 21 to Contract No. PS272680011357 with Bicycle Transit Systems, Inc. (BTS) to exercise up to six, one-month options, each separately as needed from June 1, 2026, to November 30, 2026, to continue Metro Bike Share (MBS) program services in the Not-to-Exceed (NTE) amount of $6,505,955, increasing the total contract value from $131,155,423 to $137,661,378; and

(continued on next page)

(Item 30 – continued from previous page)

B. EXECUTE individual contract modifications within the Board-approved contract modification authority.

33. SUBJECT: METRO EXPRESSLANES BACK OFFICE SYSTEM **2026-0062**

AUTHORIZED ON CONSENT CALENDAR the Chief Executive Officer to:

A. AWARD a firm fixed unit rate contract, Contract No. PS53258000 to BRiC-TPS, LLC, for implementing, operating, and maintaining a new ExpressLanes Back Office System (BOS) in the Not-To-Exceed (NTE) amount of $114,749,473 for the eight-year base period, excluding contract options, and which shall be authorized as follows, subject to the resolution of any properly submitted protest(s), if any:

1. The Design and Implementation phase of the new BOS will be authorized immediately upon contract execution in an amount NTE $15,583,030;
2. The Operations and Maintenance (O&M) phase of the new BOS will be authorized at the completion of the BOS Implementation in an amount NTE $99,166,443; and

B. EXECUTE individual contract modifications for Contract No. PS53258000 within the Board-approved contract modification authority.

40. SUBJECT: COMMUNITY AND STAKEHOLDER ENGAGEMENT PLAN REGARDING BOARD COMPOSITION **2026-0159**

APPROVED ON CONSENT CALENDAR the Community and Stakeholder Engagement Plan for the Metro Ad Hoc Board Composition Committee, to support informed, transparent, and inclusive deliberations regarding governance considerations.

41. SUBJECT: CLOSED SESSION **2026-0242**

A. <u>Conference with Legal Counsel - Existing Litigation - G.C. 54956.9(d)(1)</u>
