3. RECEIVED Oral Report on Transit Operations and Maintenance (C. Cheung)

Because of the large closure, had to replace with 60-70 busses and 100 operator assignments. Additionally, 300 buses are reaching 18 years old and we are having to extend their use. Numbers will come up as we receive our new buses.

The Board passed a motion last month to form a working group with LADOT to look at speed and reliability issues. Added a bus lane on Spring Street to improve speed. Replaced all original Blue Line cars so miles between problems is improving.

Member Campbell asked the volume of bus v. rail. Conan Cheung responded that it is about 850,000 vs. 350,000 or 2/3 bus vs. 1/3 rail.

Member Briskman asked about the conversion from bus to rail when a new line opens.

Conan said there is some drop, but when aggregated there is always higher ridership.

Enterprise Transit Asset Management State of Good Repair

### Transit Asset Management (TAM)

"TAM is a business model that uses condition of assets to guide optimal prioritization of funding at transit properties in order to keep our transit networks in a State of Good Repair" --- FTA

### Per FTA's TAM Rulemaking – A Capital Asset is in a State Of Good Repair if it Meets The Following Objective Standards:

- The capital asset is able to perform its designed function;
- The use of the asset in its current condition does not pose an identified unacceptable safety risk; and
- The life-cycle investment needs of the asset have been met or recovered, including all scheduled maintenance, rehabilitation, and replacements.

### **Metro's TAM Policy Defines**

An SGR asset as one that is currently in use in operation and its rehabilitation or replacement needs shall be included in the asset inventory.

**An SGR capital project involves** rehabilitating or replacing an existing asset. *Excluded from this definition are capital projects for capacity enhancements or expansions to existing projects or new services.*
