Metro

Los Angeles County Metropolitan Transportation Authority
One Gateway Plaza
3rd Floor Board Room

Agenda - Final

Thursday, July 18, 2019 9:00 AM

One Gateway Plaza, Los Angeles, CA 90012, 3rd Floor, Metro Board Room

Operations, Safety, and Customer Experience Committee

Mike Bonin, Chair Mark Ridley-Thomas, Vice Chair Jacquelyn Dupont-Walker John Fasana Robert Garcia John Bulinski, non-voting member

Phillip A. Washington, Chief Executive Officer

METROPOLITAN TRANSPORTATION AUTHORITY BOARD RULES

(ALSO APPLIES TO BOARD COMMITTEES)

PUBLIC INPUT

A member of the public may address the Board on agenda items, before or during the Board or Committee's consideration of the item for one (1) minute per item, or at the discretion of the Chair. A request to address the Board must be submitted electronically using the tablets available in the Board Room lobby. Individuals requesting to speak will be allowed to speak for a total of three (3) minutes per meeting on agenda items in one minute increments per item. For individuals requiring translation service, time allowed will be doubled. The Board shall reserve the right to limit redundant or repetitive comment.

The public may also address the Board on non agenda items within the subject matter jurisdiction of the Board during the public comment period, which will be held at the beginning and/or end of each meeting. Each person will be allowed to speak for one (1) minute during this Public Comment period or at the discretion of the Chair. Speakers will be called according to the order in which their requests are submitted. Elected officials, not their staff or deputies, may be called out of order and prior to the Board's consideration of the relevant item.

Notwithstanding the foregoing, and in accordance with the Brown Act, this agenda does not provide an opportunity for members of the public to address the Board on any Consent Calendar agenda item that has already been considered by a Committee, composed exclusively of members of the Board, at a public meeting wherein all interested members of the public were afforded the opportunity to address the Committee on the item, before or during the Committee's consideration of the item, and which has not been substantially changed since the Committee heard the item.

In accordance with State Law (Brown Act), all matters to be acted on by the MTA Board must be posted at least 72 hours prior to the Board meeting. In case of emergency, or when a subject matter arises subsequent to the posting of the agenda, upon making certain findings, the Board may act on an item that is not on the posted agenda.

CONDUCT IN THE BOARD ROOM - The following rules pertain to conduct at Metropolitan Transportation Authority meetings:

REMOVAL FROM THE BOARD ROOM The Chair shall order removed from the Board Room any person who commits the following acts with respect to any meeting of the MTA Board:

- a. Disorderly behavior toward the Board or any member of the staff thereof, tending to interrupt the due and orderly course of said meeting.
- b. A breach of the peace, boisterous conduct or violent disturbance, tending to interrupt the due and orderly course of said meeting.
- c. Disobedience of any lawful order of the Chair, which shall include an order to be seated or to refrain from addressing the Board; and
- d. Any other unlawful interference with the due and orderly course of said meeting.

INFORMATION RELATING TO AGENDAS AND ACTIONS OF THE BOARD

Agendas for the Regular MTA Board meetings are prepared by the Board Secretary and are available prior to the meeting in the MTA Records Management Department and on the Internet. Every meeting of the MTA Board of Directors is recorded and is available at www.metro.net or on CD's and as MP3's for a nominal charge.

DISCLOSURE OF CONTRIBUTIONS

The State Political Reform Act (Government Code Section 84308) requires that a party to a proceeding before an agency involving a license, permit, or other entitlement for use, including all contracts (other than competitively bid, labor, or personal employment contracts), shall disclose on the record of the proceeding any contributions in an amount of more than \$250 made within the preceding 12 months by the party, or his or her agent, to any officer of the agency, additionally PUC Code Sec. 130051.20 requires that no member accept a contribution of over ten dollars (\$10) in value or amount from a construction company, engineering firm, consultant, legal firm, or any company, vendor, or business entity that has contracted with the authority in the preceding four years. Persons required to make this disclosure shall do so by filling out a "Disclosure of Contribution" form which is available at the LACMTA Board and Committee Meetings. Failure to comply with this requirement may result in the assessment of civil or criminal penalties.

ADA REQUIREMENTS

Upon request, sign language interpretation, materials in alternative formats and other accommodations are available to the public for MTA-sponsored meetings and events. All requests for reasonable accommodations must be made at least three working days (72 hours) in advance of the scheduled meeting date. Please telephone (213) 922-4600 between 8 a.m. and 5 p.m., Monday through Friday. Our TDD line is (800) 252-9040.

LIMITED ENGLISH PROFICIENCY

A Spanish language interpreter is available at all <u>Committee</u> and <u>Board</u> Meetings. All other languages must be requested 72 hours in advance of the meeting by calling (213) 922-4600 or (323) 466-3876.

CALL TO ORDER

ROLL CALL

19. SUBJECT: OPERATIONS EMPLOYEES OF THE MONTH

2019-0474

RECOMMENDATION

Operations Employees of the Month

<u>Attachments:</u> <u>Presentation</u>

20. SUBJECT: ORAL REPORT ON NEW BLUE PHASE 2

2019-0475

RECOMMENDATION

RECEIVE oral report on New Blue Phase 2.

<u>Attachments:</u> <u>Presentation</u>

21. SUBJECT: METRO BUS FLEET FORECAST AND ZERO EMISSION

2019-0458

BUS PROGRAM UPDATE

RECOMMENDATION

RECEIVE AND FILE status report on the Zero Emission Bus Program and Bus Fleet Management Plan (BFMP) which summarizes Metro's directly operated and purchased transportation bus vehicle requirements over the next ten years.

<u>Attachments:</u> <u>Presentation</u>

22. SUBJECT: NEXTGEN REGIONAL SERVICE CONCEPT

2019-0460

RECOMMENDATION

CONSIDER:

- A. APPROVING the Regional Service Concept, which is the framework for restructuring Metro's bus routes and schedules for NextGen and includes:
 - 1. Goals and objectives of the new bus network;
 - 2. Measures of success;
 - 3. Route and network design concepts based on public input and data analysis;
 - 4. Framework for balancing tradeoffs that consider Metro's Equity Platform; and
- B. FOLLOWING approval by all five Regional Service Councils, the Board shall then approve the final NextGen Service Plan.

Attachments: Attachment A - Existing Service Evaluation

Attachment B - NextGen Public Engagement Summary

Attachment C - NextGen Working Group - Equity Platform in Action

Attachment D - Transit Propensity Score

Attachment E - Route and Segment Performance

Attachment F - Service Design Concepts

43. SUBJECT: METRO FREEWAY SERVICE PATROL

2019-0208

RECOMMENDATION

AUTHORIZE the Chief Executive Officer to:

- A. AWARD a firm fixed unit rate Contract No. FS58039000 for Metro Freeway Service Patrol (FSP) Regional light duty towing services Region 1 to Kenny's Auto Service, in an amount not to exceed \$20,936,369 for 52 months, subject to resolution of protest(s), if any; and,
- B. AWARD a firm fixed unit rate Contract No. FS58039001 for Metro Freeway Service Patrol (FSP) regional light duty towing services Region 2 to Platinum Tow and Transport in an amount not to exceed \$24,006,823 for 52 months, subject to resolution of protest(s), if any; and,
- C. INCREASE Contract Modification Authority (CMA) to 29 existing Freeway Service Patrol contracts as delineated below for a total amount of \$14,521,000 thereby increasing the CMA amount from \$11,161,294 to \$25,682,294 and extend the periods of performance as follows:
 - Beat no. 1: All City Tow Contract No. FSP2828200FSP141, for \$219,000 for 8 months
 - Beat no. 2: Citywide Towing Contract No. FSP2785600FSP142, for \$258,000 for 9 months
 - Beat no. 3: Hollywood Car Carrier Contract No. FSP3469400B3/43, for \$849,000 for 9 months
 - Beat no. 4: Frank Scotto Towing Contract No. FSP2788200FSP144, for \$237,000 for 9 months
 - Beat no. 5: Sonic Towing, Inc. Contract No. FSP3469500B5/17, for \$320,000 for 11 months
 - Beat no. 6: Neighborhood Towing 4 U Contract No. FSP3469600B6, for \$338,000 for 11 months
 - Beat no. 8: Citywide Towing Contract No. FSP2825800FSP148, for \$293,000 for 9 months

- Beat no. 9: Frank Scotto Towing Contract No. FSP3470000B9, for \$394,000 for 11 months
- Beat no. 10: Neighborhood Towing 4 U Contract No. FSP3848100FSP1410, for \$365,000 for 12 months
- Beat no. 12: Tip Top Tow Contract No. FSP2826700FSP14, for \$796.000 for 12 months
- Beat no. 13: Reliable Delivery Service Contract No. FSP2831500FSP1413, for \$440,000 for 7 months
- Beat no. 17: Sonic Towing, Inc. Contract No. FSP3469500B5/17, for \$241,000 for 9.5 months
- Beat no. 18: Bob & Dave's Towing, Inc. Contract No. FSP2690300FSP1418, for \$695,000 for 14.5 months
- Beat no. 20: Bob's Towing Contract No. FSP2836600FSP1420, for \$211,000 for 12 months
- Beat no. 21: Bob's Towing Contract No. FSP2839000FSP1421, for \$153,000 for 12 months
- Beat no. 24: T.G. Towing, Inc. Contract No. FSP2833200FSP1424, for \$275,000 for 11 months
- Beat no. 28: Hadley Tow Contract No. FSP3847300FSP1428, for \$99,000 for 11 months
- Beat no. 33: Mid Valley Towing Contract No. FSP2851900FSP1433, for \$266,000 for 9 months
- Beat no. 34: South Coast Towing, Inc. Contract No. FSP2839600FSP1434, for \$292,000 for 11 months
- Beat no. 36: Hadley Tow Contract No. FSP2841400FSP1436, for \$288,000 for 11 months
- Beat no. 37: Reliable Delivery Service Contract No. FSP3696000FSP1437, for \$690,000 for 11 months
- Beat no. 38: Steve's Towing Contract No. FSP38468001438, for \$106,000 for 11 months
- Beat no. 39: Jon's Towing Contract No. FSP3470400B27/39, for \$253,000 for 9.5 months
- Beat no. 41: T.G. Towing, Inc. Contract No. FSP2760200144, for \$322,000 for 8 months
- Beat no. 42: Platinum Tow & Transport Contract No. FSP2842100FSP1442, for \$290,000 for 11 months
- Beat no. 43: Hollywood Car Carrier Contract No. FSP3469400B3/43, for \$828,000 for 9.5 months
- Beat no. 70: Tip Top Tow Contract No. FSP3471300B70, for \$920,000 for 7 months
- Beat no. 71: Bob & Dave's Towing, Inc. Contract No. FSP3471500B71, for \$932,000 for 6 months
- Region 1: Kenny's Auto Service Contract No. FSP13-R1, for \$3,151,000 for 9 months

New Blue Phase 2 Blue Line Bus Shuttle Service Observations

Frequency (Peak Period)

- Line 860 Express: 6-12 minutes
- Line 863 Select: 12 minutes/M-F
- Line 864 Local: 6-12 minutes

Average Weekday Bus Shuttle Ridership - Phase 1

- Line 860 Express: 4,882
- Line 861 Select: 1,376
- Line 862 Local: 15,671

Average Weekend Bus Shuttle Ridership - Phase 1

- Line 860 Express: 831
- Line 862 Local: 11,496

Average Weekday Bus Shuttle Ridership - Phase 2

- Line 860 Express: 5,572
- Line 863 Select: 2,216
- Line 864 Local: 23,897

Average Weekend Bus Shuttle Ridership - Phase 2

- Line 860 Express: 1,431
- Line 864 Local: 15,415

* March and June 2019 average ridership comparison

Average Rail Service Ridership

Phase 1 (May 2019)

- Weekday: 29,560
- Weekend: 18,687

Average Rail Service Ridership

Phase 2 (June 2019)

- Weekday: 10,950
- Weekend: 8,357

New Blue Phase 2 Expo Line Bus Shuttle Service Observations

Frequency During Peak Periods

• Line 856 (Local): 6 -12 mins during peak, 12 mins during mid-day and weekends & 20 mins during late nights

Average Weekday Ridership

• Line 856: 9,000

Average Weekend Ridership

• Line 856: 5,371

Alternate Service

- Silver Line 910 & 950
- Metro Rapid: 720, 733 & 754
- Big Blue Bus: R7 & R10
- LADOT DASH: F
- Can also take Line 864 Local

New Blue Phase 2 Flower/Figueroa Street Bus-Only Lane Observations

Occupancy

• The New Blue northern segment shuttle service plan (including two Expo Line stations: Pico and 7th St/Metro Center) requires 70 buses per hour during peak service to meet demand, including other municipal operators who utilize the bus lanes

Enforcement

- Eight assigned LAPD motor officers
- Enforcement and traffic officer support continues to be critical for proper utilization of the bus-only lane

Shuttle Customer and Bus Operator Feedback

Positive feedback relative to improved shuttle travel times

New Blue Phase 2 – Customer Feedback

New Blue Metro Customer Feedback

 Received approximately 120 questions and comments via the project hotline, emails, texts, and social media, related to trip planning, requests for increased capacity for Line 860 Express, and challenges with TAP transfers (resolved).

Jon Fox | UX @JonFoxUX June 24, 2019 - 4:23pm • View Post

@metrolosangeles I just took the Expo line to LATTC and then the shuttle to 7th/Metro to go to Union. I notice that the Tap system deducted both at 26th St and again at 7th/Metro which should be a transfer. Will the system be updated to show shuttle transfer and not deduct twice?

Brocco9 @Brocco9 June 26, 2019 - 7:10am • View Post

@metrolosangeles there needs to be more busses running north between 6:55 am and 7:07 am at willow. There are SO many people waiting to get in a bus and barely anyone gets a seat. Why haven't you thought of this after so many months??

OPERATIONS, SAFETY AND CUSTOMER EXPERIENCE COMMITTEE JULY 18, 2019

SUBJECT: METRO BUS FLEET FORECAST AND ZERO EMISSION BUS PROGRAM UPDATE

ACTION: RECEIVE AND FILE

RECOMMENDATION

RECEIVE AND FILE status report on the Zero Emission Bus Program and Bus Fleet Management Plan (BFMP) which summarizes Metro's directly operated and purchased transportation bus vehicle requirements over the next ten years.

ISSUE

In April 2016, Metro's Board of Directors approved a motion to convert Metro's bus fleet to Zero Emission Buses (ZEB) by 2030. Also, in December 2018, the California Air Resources Board (CARB) approved the Innovative Clean Transit (ICT) Regulation that sets a statewide goal for public agencies to gradually transition to 100% ZEB fleet by 2040. Further, Metro's bus vehicle requirements indicate a need to replace 834 buses by 2022. To ensure the fleet is maintained in a State of Good Repair and sufficient quantities are available for service, Metro will need to effect a procurement by September 2019.

DISCUSSION

In April 2016, Metro's Board of Directors approved a motion to convert Metro's bus fleet to Zero Emission Buses (ZEB) by 2030. Also, in December 2018, the California Air Resources Board (CARB) approved the Innovative Clean Transit (ICT) Regulation that sets a statewide goal for public agencies to gradually transition to 100% ZEB fleet by 2040. The ICT Regulation includes the following purchase requirement timeline:

- 2023 2025: 25% of buses purchased in this period must be ZEB
- 2026 2028: 50% of buses purchased in this period must be ZEB
- 2029 onward: 100% of buses purchased in this period must be ZEB

Metro has been working to comply with both the Metro Board directive and CARB's ICT Regulation by implementing a two-phase approach. Phase 1 focuses on implementing near-term changes that can be readily applied with existing technology, with minimal impact to service, and minimal risk. It also includes the development of a Master Plan for the transition of the balance of Metro's system.

Specifically, in Phase 1:

- Electrification of Metro Orange Line by 2020
 - Delivery of New Flyer and BYD battery electric buses; quantities of 40 and 5, respectively.
 - Terminal charging installation at North Hollywood and Chatsworth Stations.
 - Overnight charging installation at Division 8 in Chatsworth.
- Electrification of Metro Silver Line by approximately 2021
 - Delivery of BYD battery electric buses, quantity of 60.
 - Terminal charging installation at El Monte Bus Station and Harbor Gateway Transit Center.
 - Overnight charging installation at Division 9 in El Monte.
- Development of Zero Emission Master Plan (Plan)
 - The Plan will define where and how to expand electric bus service by division given current technology and infrastructure capabilities.
 - o The plan will be developed iteratively as information becomes available (e.g. NextGen).
 - o The first iteration is expected to be completed by September 2019.

In Phase 2, Metro will implement the Zero Emission Master Plan as approved by the Board, will continue to assess ZEB technologies as they mature, and take measured steps toward full transition to 100% ZEB fleet for use throughout Metro's operating region.

Challenges to transitioning to 100% ZEB operation include:

- Infrastructure:
 - Power to the divisions needs to be increased to maintain existing levels of transit service capability. For divisions in SCE territory, the average increase is from 5 MW to 15 MW. Risk is time required by utilities to implement upgrades.
 - Charging infrastructure needs to be added to divisions. The very limited space constraints at the divisions dictates that work must be done in stages to preclude impact to service. The risk is the time needed to complete work.
- Vehicles and technology:
 - Procurement of ZEB's cannot exceed capacity of infrastructure to charge them. Risk is that over-capacity of ZEB's will result in them being severely underused and the warranty period being wasted.
 - Per CA regulations, by 2022 curb weight limits will drop from 24,000 lb. to 22,000 lb.
 The risks are that currently compliant ZEB configurations will not comply in 2022 or will not be able to add batteries to increase range.
 - Performance of ZEB's still does not match that of CNG buses. Risk is that number of ZEB's procured will need to exceed number of CNG buses being retired just to maintain existing levels of transit service
 - ZE vehicle and charging strategies are still not fully mature or service proven. Risk is the limited interoperability between vehicles and charging equipment will impact service.
- Costs:

- Agenda Number: 21.
- o Infrastructure: The estimated cost to transition Metro's divisions to 100% ZE operations is approximately between \$700M to \$1B.
- Vehicles: ZE buses are currently \$100,000 to \$300,000 more expensive than conventional 40 ft. CNG buses.
- Operating Costs: are not fully known at this time
- Utility Costs: are not fully known at this time.

BUS FLEET MANAGEMENT PLAN

Metro also maintains a Bus Fleet Management Plan (BFMP) that provides a long-term outlook on bus replacement requirements based on service needs, State of Good Repair (SGR) and life-cycle.

Assumptions to the BFMP include:

- Life Cycle Federal Transit Administration (FTA) defines a bus life cycle at 12 years. Metro allows buses to extend to 15 years. However, Metro recently has extended buses to 18 years to maintain the fleet requirement.
- Spare Ratio FTA recommends an additional 20% fleet above the peak vehicle requirement (PVR) to accommodate regular maintenance of transit vehicles and ability to scale transit service when needed. While Metro aims to provide a 20% spare ratio, it is allowable to drop to 15%.
- Fleet Requirement based on current peak hour service levels
- New Projects Upcoming initiatives such as future Bus Rapid Transit (BRT) lines or new services are also considered

Based on the BFMP, our peak vehicle requirement (PVR) is 1,961 buses. Added with a 20% spare ratio, our total fleet size is currently 2,368 buses.

DECOMMISSIONING OF BUSES AND FUTURE IMPACTS

Between 2018 and 2022, Metro anticipates decommissioning of 834 buses. An additional 351 buses will also be eligible for decommissioning by 2024. However, Metro's current order of electric and CNG buses approved in 2017 will result in delivery of only 470 new buses. Therefore, Metro will be 364 buses short in 2022 without additional action taken.

OPTIONS TO BRIDGE THE GAP

In 2020 there will be a shortage of 364 buses if no additional action is taken. The need may be greater if the ZEB to CNG replacement ratio exceeds 1:1, there are reliability issues due to the introduction of new technologies, or if there are unexpected operational challenges. The following options exist to mitigate the anticipated shortage:

- Exercise existing CNG bus option for 440 buses (205 40 ft. + 235 60 ft.)
- Exercise existing Electric bus options for 100 options (forty 40 ft + sixty 60 ft)
- Re-tank buses due for retirement
 - Impacts include extending a component of the existing bus fleet while other key operational components continue to age;
 - No improvement to emissions levels

- Reduce Service to match bus fleet availability
 - Impacts include more crowding, longer wait times, shorter spans, and/or less geographic coverage, as well as reduced customer satisfaction.

DETERMINATION OF SAFETY IMPACT

This will report will have a positive impact on system safety, service quality, and system reliability for our customers.

FINANCIAL IMPACT

Currently, this report does not have a financial impact.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

This item supports the following Strategic Goals 1) Provide high-quality mobility options that enable people to spend less time traveling and 5) Provide responsive, accountable, and trustworthy governance within the Metro organization.

NEXT STEPS

Staff will continue to monitor and update the Bus Fleet Forecast as data are available and projections revised, reflecting any new Board approved projects, operating results, and proposed bus procurement program. In September 2019, staff will return to the Board with a recommended bus procurement program to fulfill the near-term gap in fleet requirement.

- Current Background & Timeline
- Strategic Plan for ZEB Implementation
- Phase I | Update on Near-Term Activities
 - O Silver and Orange Line Electrification
 - o ZEB Master Plan
 - Challenges
 - Utility Grid Modeling
 - Conversion of Operating Divisions

Transition to ZEB Operations – 2017 Guiding Principles

- Continue to replace aging bus fleet (~200 Buses per Year)
 - o Status: 465 buses ordered in 2017.
 - ~350 buses to be delivered in 2019.
- Upgrade current CNG buses to "Near-Zero" Low NOx engines
 - O Status: 196 buses upgraded at Mid-life (On-Target)
- Maintain existing bus fleet in a "State of Good Repair"
 - O Status: Fleet age is increasing.
 - Extend Life (re-tank & recycle into "mid-life") or replace additional 369+/- buses by 2022
 - Assumes 1:1 replacement of CNG to Electric
- Improve Service Quality and Reliability
 - O Status: New CNG Buses placed into service in 2019.
- Transition Metro Orange Line (MOL) to Zero-Emission by 2020
 - O Status: On Target for Completion
- Transition Metro Silver Line (MSL) to Zero-Emission by ~2021
 - O Status: On Target for Completion
- Goal of 100% Zero -Emission Bus Fleet by 2030
 - O Status: Master Plan addresses implementation roadmap.

Bus Fleet Requirements & Availability

Metro Bus Fleet Decommissioning Forecasts

Fleet Planning Parameters

Peak Vehicle Requirement

- 2,300+ buses (scheduled service + spares)
- 1,900+ buses (scheduled service only)

Spare Ratio

- 20% > (FTA requirement)
- 15% 20% (Metro policy)

Bus Retirement Age

- 12 years (FTA requirement)
- 15-18 years (Metro Policy)

- 834 additional buses needed by FY2022 to meet current service levels with exceeding FTA spare ratio and age requirements
- 465 buses on order (~350 buses to be delivered in 2019)

Current Background & Timeline

January 2019

O Provided Preliminary update to Board Staff to indicate need for procurement actions

• <u>July 2019</u>

- o Provide Metro Board with a ZEB Master Plan update
- O Evaluate opportunities to expedite transition
 - Bundle division conversions to single procurements
 - Acquire or lease additional operating space

September 2019

- O Refine cost estimates, infrastructure phasing schedule, and procurement strategies
- Procurement Decision (using contract Options)

• <u>Spring 2020</u>

- O Provide Metro Board with a ZEB Master Plan update
- o New Bus Procurement Decision Fleet Mix (TBD)
 - Delivery in 2023 and later.

Strategic Plan for ZEB Implementation

- Phase 1: Near-Term Activities (2020 2021)
 - Orange Line Electrification Charging Infrastructure & Vehicles
 - O Silver Line Electrification Charging Infrastructure & Vehicles
 - O Upgrade Near-Zero CNG Engines to RCNG at mid-life
 - O Refine & Develop Master Plan Details
- Phases 2/3: Long-Term Activities (2022 2030, and beyond)
 - o Conversion of Divisions from CNG Fueling to Battery Charging
 - o Procurement of Vehicles
- Key Milestones 2019:
 - o ZEB Technology Assessment/ZEB Master Plan
 - O Dimensions of Phases 2 and 3

Silver and Orange Line Electrification

- Orange Line (60-foot BEBs)
 - o 45 Buses (40 New Flyer, 5 BYD)
 - NF Pilot bus due Summer 2019
 - NF and BYD Production Complete Fall 2020
 - O Depot Charging (Division 8)
 - Charger Commissioning: July 2019
 - o En Route Charging
 - Expected Completion: Fall 2020
- Silver Line (40-foot BEBs)
 - o 60 Buses (BYD)
 - Pilot: TBD
 - Production Completed by Winter 2021
 - o Depot Charging (Division 9)
 - Design considers full-scale deployment and upgrading capacity to 18 MW. (Current Limit of 5 MW)
 - Applied for SCE Charge-Ready Transport
 - En Route Charging
 - Design On-going for El-Monte& Harbor Gateway

ZEB Master Plan - Challenges

- 1. Bus-Related Challenges:
 - O Performance Standard: 65mph top speed; sustain 10% grade; 250+ mile range
 - Currently, up to 120 mile range with Full HVAC, Passenger Loading
 - o Curb Axle Weight: Current limit is 24,000 lbs.
 - In 2022 limit drops to 22,000 lbs.
 - Limits ability to add batteries to increase range
 - o Technology reliability risks not service proven
- 2. Division Charging Infrastructure Challenges:
 - Limited grid capacity at divisions
 - Limits number of BEBs that can be assigned
 - o Long lead times for utilities to implement necessary grid upgrades
 - Need to increase capacity from ~5 MW to ~15 MW
 - 3 to 5 year cycle from planning to deployment
 - O Limited space at divisions
 - Conversion must be done sequentially, adding time to schedule

ZEB Master Plan - Challenges

- 3. Funding Challenges:
 - o Additional capital funding required for 100% ZEB program
 - o Preliminary Capital Cost Estimates
 - ~\$700 Million to ~\$1 Billion in Infrastructure costs
 - ~\$400 Million in additional vehicle costs.
 - o Operational:
 - Utility Rates and resulting costs are under revision.
 - Operating Costs are not fully known at this time.

Need to optimize depot and en route charging strategies; vehicle performance; service block ranges; and costs.

ZEB Master Plan – Utility Grid Modeling (Division 9 Example)

- Modeling is Basic Input to Utility Planning
- ~18 MW needed at Division 9 with no En Route Charging
 - O Transamerica Pyramid Building requires 2.1 MW
 - Only 5 MW is capacity currently available

ZEB Master Plan – Utility Grid Modeling (All Divisions)

- Power limitations
- o Range and weight

Metro

Sub-optimal for fleet size, operating costs, and bus parking

ZEB Master Plan - Conversion of Divisions (Phasing Schedule)

ZEB Master Plan – Conversion of Divisions (Phasing Schedule)

ZEB Master Plan - Conversion of Divisions (Phasing Schedule)

- Division overhead charging
 - o Gantry is lower-cost design
 - o Gantry optimizes space
 - o Gantry with platform:
 - Saves space
 - Provides for equipment, solar and battery storage
 - More expensive

ZEB Master Plan - Conversion of Divisions (Cost)

- \sim \$50M \$80M per Division
- Sophisticated with Solar and Battery Storage
- \sim \$70M \$120M per Division

Thank you

Agenda Number: 22.

OPERATIONS, SAFETY, AND CUSTOMER EXPERIENCE COMMITTEE JULY 18, 2019

SUBJECT: NEXTGEN REGIONAL SERVICE CONCEPT

ACTION: APPROVE RECOMMENDATION

RECOMMENDATION

CONSIDER:

- A. APPROVING the Regional Service Concept, which is the framework for restructuring Metro's bus routes and schedules for NextGen and includes:
 - 1. Goals and objectives of the new bus network;
 - Measures of success:
 - 3. Route and network design concepts based on public input and data analysis:
 - 4. Framework for balancing tradeoffs that consider Metro's Equity Platform; and
- B. FOLLOWING approval by all five Regional Service Councils, the Board shall then approve the final NextGen Service Plan.

ISSUE

In January 2018, Metro began the NextGen Bus Study aimed at reimagining the bus network to be more relevant, reflective of, and attractive to the diverse customer needs within Los Angeles County. This process is divided into four phases:

- 1. Conduct market research, travel demand analysis and existing service evaluation to identify areas of success, deficiency, and gaps within the network;
- 2. Establish a Regional Service Concept to guide the development of the NextGen Service Plan;
- 3. Develop the NextGen Service Plan, including routing, stop spacing, frequency, span of service, and coordination with municipal operators;
- 4. Implement the NextGen Service Plan through extensive engagement and public hearing process.

This report requests approval of a Regional Service Concept that defines the goals and objectives of the new bus network, measures of success, route and network design concepts based on public input and data analysis, and framework for balancing tradeoffs that consider Metro's Equity Platform.

File #: 2019-0460, File Type: Plan Agenda Number: 22.

DISCUSSION

Given the transforming landscape of transportation and travel demand within Los Angeles County, Metro embarked on an effort in January 2018 to reimagine the bus network to be more relevant, reflective of, and attractive to the diverse customer needs within Los Angeles County. More specifically, the NextGen Bus Study aims to increase transit use within the County over the next decade by retaining current customers and attracting them to ride more often, reclaiming past customers, and recruiting new customers. In addition, the new bus network will set the foundation for future growth from transportation investments provided through Measures R and M.

The NextGen Bus Study is divided into four phases, as follows:

Phase I: Research and Analysis - This phase consisted of understanding customers and what they want in a bus system. A significant effort went into understanding overall travel patterns within LA County using cell phone location data as well as an analysis of regional TAP use across 26 transit operators. A comprehensive evaluation of the existing bus network (Attachment A), broken down by routes and segments by time of day, was conducted to understand current successes as well as deficiencies and gaps in service. Significant public engagement was conducted with customers and residents with over 10 million touchpoints throughout the County via online engagement, print advertising, pop-up sessions, 260+ stakeholder and community meetings, on-board bus canvassing, and at 20 interactive public workshops in order to validate the market research, receive comments, and to gain valuable insight into route and area specific concerns and recommendations (Attachment B).

<u>Phase II: Regional Service Concept</u> - Based on the research and outreach conducted in Phase I, a Regional Service Concept is now being presented to the Board for approval. This report states the goals and objectives for the bus network, measures of success, route and network design concepts based on public input and data analysis, and framework for balancing tradeoffs in consideration of Metro's Equity Platform. This service concept provides policy guidance for the redesign of the bus routes and schedules as well as how success of the NextGen Bus Study should be measured.

<u>Phase III: NextGen Service Plan</u> - Once the Regional Service Concept has been approved by the Board, routing and schedules will be redesigned accordingly to develop the draft NextGen Service Plan. This plan will specify route and schedule changes as well as bus stop spacing and frequencies by time of day and day of week. Also, since the County's municipal transit operators account for over 30% of the region's transit service, a significant focus of the plan will include recommendations on how to coordinate with the municipal operators to provide seamless service for customers. This phase is expected to be completed by Fall 2019 when it will be presented to the Board.

<u>Phase IV: Implementation</u> -Implementation of the NextGen Service Plan is expected to be spread over three service changes starting in June 2020. As with any major service change, a Title VI equity analysis will be conducted to ensure the service plan is neither disparately impacting minorities, nor disproportionately impacting low-income populations. This analysis requires a formal public hearing process which takes four months from initiation to approval by the Board appointed Regional Service Councils. Upon approval by the Service Councils, three additional months are necessary to finalize

schedules and assignments to be presented to the bus operators for bidding, per terms of the SMART Collective Bargaining Agreement. Therefore, to begin implementation of the NextGen Service Plan in June 2020, the formal public hearing and approval process must start in November 2019, otherwise implementation will be delayed until December 2020, the next scheduled service change date. Metro bus riders will be informed of these changes utilizing the various communications tools including digital media, radio and print advertising, on-board information, and other media outlets.

As stated above, this report requests approval of a Regional Service Concept that defines the goals and objectives of the new bus network, measures of success, route and network design concepts based on public input and data analysis, and framework for balancing tradeoffs in consideration of Metro's Equity Platform.

Goals and Objectives

In 2018, the Board adopted Metro Vision 2028 as the agency's strategic plan. The plan outlines five goals to guide the development of transportation in LA County. The NextGen Bus Study addresses **Goal #1: Provide high quality mobility options that enable people to spend less time traveling**. The study also encompasses two sub-goals: 1) Target infrastructure and service investments towards those with the greatest mobility needs; and 2) Invest in a world class bus system that is reliable, convenient, safe, and attractive to more users for more trips.

In addition to the strategic plan, the Board adopted Motion 38.1 (June 2018), endorsing travel speed, service frequency, and system reliability as the highest priority service design objectives for the NextGen Bus Study. Finally, regardless of the level of resources expended on the bus network, optimizing system performance should always be an objective in network design to maximize benefit to the public.

These goals and objectives are driving the development of the NextGen Service Plan, including routing, stop spacing, frequency, span of service, and coordination with municipal operators. In addition, a set of performance measures have been defined below to ensure the bus network continues to evolve consistent with the goals and objectives defined by the Board.

Public Engagement

Throughout the Study, Metro conducted extensive public engagement to inform, engage, and solicit input from riders, residents, businesses, schools, community-based organizations, ADA groups, and faith communities throughout LA County to inform Metro's efforts to redesign Metro's Bus System. (See Attachment B)

Metro formed a NextGen Bus Study Working Group to help identify issues and concerns. The Working Group consists of more than 50 representatives of stakeholder groups including Metro Service Councils, community-based groups, faith communities, business associations, educational institutions, advocacy groups, and environmental organizations. Working Group members were tasked with providing input from the various constituencies they represent. This group has met six times to date and will continue to provide input and guidance throughout the Study.

File #: 2019-0460, File Type: Plan

Agenda Number: 22.

This public engagement effort serves to integrate public comments into the Regional Service Concept that is being proposed in this report. The public comments are validating the market research conducted by the technical contractor and informing Metro staff on route specific recommendations that will be developing and presenting to the Board in Fall 2019 as part of the Draft Bus Service Plan.

The highlights of this countywide public engagement effort are outlined below:

- More than 13,000 people provided comments about Metro's bus system through questionnaires promoted online, administered on-board bus canvassing, and provided at many of the events noted below.
- More than 60% of participants reached were people of color representing multiple genders, age groups, zip codes, and income levels that make up the diversity of LA County.
- Over 260 community events and stakeholder briefings.
- Coordination with local Municipal Bus Operators.
- Bi-monthly updates to the five Metro Service Councils
- Bus rider engagement through 300,000 take-one brochures aboard the bus and rail system.
- More than 9 million digital engagement touchpoints
- Over 1.4 million in circulation through earned media and paid print advertising in ten different languages
- Two Telephone Town Halls were conducted with more than 3,600 participants
- 20 NextGen Public Workshops from January-March 2019

A concerted effort was made to ensure that the public engagement cumulatively reflects input that is reflective of the diversity of LA County's population.

Metro's Equity Platform in Action

The most recent NextGen Working Group meeting, held May 29, 2019, focused on how the Equity Platform has been and will continue to be reflected within the bus network redesign. This meeting was titled *Metro's Equity Platform in Action Through the NextGen Bus Study*. At this meeting Metro shared how the Four Pillars of Metro's Equity Platform have been implemented at each step of the NextGen Bus Study for both the technical and communications efforts. A summary of this meeting can be found in Attachment C.

The framework for equity begins with Title VI of the Civil Rights Act of 1964 which protects minority and low-income communities from disparate and disproportionate negative impacts as a result of major transit service changes. Metro defines major service changes as any change to a route or schedule that results in a 25% change in route miles, revenue miles, or revenue hours cumulatively over three consecutive years. Once triggered, a Title VI/Environmental Justice evaluation must be presented to the Board for consideration and approval to demonstrate that it would be more of a burden to these communities if alternative service changes are implemented.

Metro's Equity Platform builds upon Title VI in two distinct ways. First, it goes beyond ethnicity and income to determine communities with the greatest mobility needs. Through market research,

surveys, and public input, other groups most reliant on transit include non-English speaking new immigrants, youth and seniors, persons without access to an automobile either by choice or necessity, persons with disabilities, and women who tend to make more transit trips than men. In addition, the NextGen Working Group concluded that transit is important to everyone, but in different ways specific to each community. For example, communities more reliant on transit need service throughout the day and week for all trip purposes, while communities who have more mobility options, may only need transit for their commute or certain discretionary trips.

Second, NextGen Bus Study aims to go above and beyond Title VI, to not only protect against negative impacts, but to further improve service for communities with the greatest mobility needs. To do this, the Four Pillars of the Equity Platform have been integrated into the NextGen Bus Study planning and public engagement process.

- I. <u>Define and Measure</u> Use Title VI as a baseline for identifying communities with the greatest needs, and supplement those with market research to identify the segments of population and trips with the highest propensity for transit use. Evaluate bus network changes based on the customer focused performance metrics established within this report with particular focus on communities with the greatest mobility needs as identified above.
- II. <u>Listen & Learn</u> -The technical work of the NextGen Bus Study identified important information about Metro's current and potential customers. This data was validated by the robust countywide public engagement effort, including engaging customers onboard buses, outreach sessions at community events, stakeholder briefings, interactive public workshops, digital engagement and print advertising. Comments received will be incorporated into the systemwide service design as well as individual route changes.
- III. <u>Focus & Deliver</u> Service design concepts (discussed below) have been established to address the recurring themes identified from the public outreach and market research, including faster and more frequent service, better reliability and accessibility to key destinations, better connectivity particularly with the municipal operators, and improved perception of security on board buses and at bus stops. These concepts, described below, will be used to redesign the routes and schedules.

In addition, a Transit Propensity Index score (Attachment D) has been developed and assigned to every Census Tract in Los Angeles County. This index score considers the various market segments likelihood to use transit, the transit orientation of the environment being served, and the travel demand within the area. Areas with high scores should be prioritized for high quality transit service.

Lastly, other customer experience enhancements such as improved security, accurate real time arrival information, cleanliness, and improved first/last mile service are critical to attracting customers to use transit.

IV. <u>Train & Grow</u> - The Board adopted Transit Service Policy will be updated to reflect the Regional Service Concept as adopted by the Board, including the goals and objectives of the bus network, measures of success, route and network design concepts based on public input

and data analysis, and framework for balancing tradeoffs in consideration of Metro's Equity Platform. In addition, an annual monitoring program will be established to track the progress of achievement towards the goals and objectives, and to inform on necessary adjustments.

Network Development Process

There are three key elements that are taken into consideration during the network development process to identify when and where transit can be successful.

- Transit Propensity Areas where the propensity to use transit is the greatest embody three main characteristics. First, there is a significantly large population of transit market segments, including people who rely on transit for most of their travel, commuters and students who use transit for work and school trips, and discretionary riders who choose transit for some or all their trips. Second, is the intensity of travel demand to and from areas based on population and employment densities, retail and entertainment, colleges and universities, and other trip generators. For NextGen, cell phone location data is also being used to identify areas of greatest travel intensity. Finally, a pedestrian oriented street environment is also critical, including safe and well lighted pathways, sidewalks and curb-cuts, grid street network, and level topography. A full description of the Transit Propensity Index score is in Attachment D.
- Existing Service Performance It is important to identify the most productive segments of the existing bus network which articulates current transit demand. These corridors and routes should be optimized through the network development process, and lessons learned should be applied to other areas with similar demand and service characteristics. Through the NextGen Bus Study process, the entire Metro bus network has been dissected into segments by time of day and day of week, and various performance metrics have been calculated for each segment to create a 360-degree view of system performance. Attachment E provides route and segment level analysis based on some of the key performance metrics.
- <u>Service Environment</u> A transit-oriented service environment is also critical to the success of transit, including the pedestrian orientation of the streets and land use, barriers to other modes such as limited and costly parking supply, and transit supportive infrastructure including bus only lanes and transit priorities.

Once we understand where and when transit is and can be successful, the appropriate service design concepts must be matched with the specific needs of each market segment. Service design concepts have been developed to address the recurring themes identified through public engagement and market research, including:

- Faster and more frequent service;
- Better reliability and accessibility to key destinations;
- Better connectivity particularly with the municipal operators; and
- Improved perception of safety on board buses and at bus stops.

Service design concepts that will guide the route and schedule planning are summarized in Table 1

below indicating which theme each concept addresses. A detailed description of the concepts is presented in Attachment F.

Table 1
Service Design Concepts

	Faster service	Frequent service throughout the day	More reliable service	connectivity	Accessibility to key destinations	Improved security
Routing to Reflect Current Travel Patterns and Transit Propensity				X	X	X
Standardize Frequencies by Service Tiers	X	х				
Subarea Transit Hubs				х		х
Shorter Route Lengths			х			
Hybrid Local/Rapid Stop Spacing	х		х			
Municipal Operator Coordination				х	x	
Microtransit and Other On- Demand		х			х	
Transit Supportive Infrastructure	х		х			х

Measuring Success

Providing high quality mobility options that enable people to spend less time traveling on the transit network requires that we are available when and where our customers want to travel, we are competitive enough to have them try us over other options, and we are attractive enough to ensure they return for the same trip and ideally for more trips. Therefore, our recommended measures of success are aimed at evaluating the bus network within these three stages of Find, Try, and Rely. These customer focused measures help to balance our traditional metrics of productivity and efficiency (e.g. ridership, boardings per hour, subsidy per boarding).

Agenda Number: 22.

Several of these measures (italicized below) will be used to evaluate the network through the lens of equity.

<u>Find</u> - How well do people understand how effectively transit can serve their needs? Is the system easy to understand & use? Proposed measures include:

- Services and information is Readily Available
 - Percentage of trip ends within ¼ mile of transit stop
 - Trip planner, app, and website usage rates
 - Percent of public considering transit (survey-based)
- The Bus System is Easy to Understand and Use
 - Percentage of out of direction travel
 - Percentage of route miles with all-day frequent service (<15 min headways)
 - Percent of public understand how to use system (survey-based)

<u>Try</u> - How can we encourage customers to try the regional transit system? (Metro and Municipal Bus Operators) Proposed measures include:

- Bus Goes Where/When Customers Want
 - Percentage of trips compatible with transit by time of day and day of week
 - Number of jobs and activity centers accessible within a 15 minute and 30 minute transit ride
 - Number of unique transit users
- Bus system is Competitive
 - Door-to-door travel times
 - Competitiveness of transit time to drive time
 - System-wide boardings
- Coverage is Adequate
 - Population within ¼-mile of transit stops by frequency of service
- Transit Journeys are Simple
 - Average number of transfers
 - Percent of trips that are one-seat rides

<u>Rely</u> - How can we provide services that customers can rely on for their travel needs? Proposed measures include:

Bus System is Effective and Productive

- Competitive transit paths for short, evening, midday, and weekend trips
- Number of frequent riders
- Boardings by time of day and day of week
- Boardings per revenue hours and miles
- Cost per passenger mile
- Buses are Reliable
 - Headway regularity on frequent routes
 - o On-time performance
 - Real time arrival accuracy
- Customers are Satisfied
 - Rides per week for frequent and infrequent users
 - Percentage of customers satisfied with Metro services (survey-based)

FINANCIAL IMPACT

Adoption of the NextGen Regional Service Concept would have positive impacts to the agency by establishing policy guidance for redesigning the Metro bus network based on robust outreach and analytical rigor. In addition, the Regional Service Concept establishes measures of success based on the user's perspective to ensure that bus service better matches their needs.

Impact to Budget

The NextGen Bus Study is currently funded in the FY20 Budget.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

Recommendation supports strategic plan goal #1: Provide high quality mobility options that enable people to spend less time traveling.

NEXT STEPS

With approval of the NextGen Regional Service Concepts, staff will continue to redesign the Metro bus network and develop the NextGen Service Plan for NextGen Working Group, Board, Service Council, and the public's consideration. This plan is expected to be completed with new lines and schedules by Fall 2019. Staff will continue to coordinate with municipal operators throughout the plan development and will conduct significant stakeholder and public engagement prior to the public hearing process for implementation starting June 2020.

EXECUTIVE SUMMARY

1 OVERVIEW

Throughout the 2018 and 2019 calendar year, public engagement to stakeholders across LA County was conducted in an effort to assist the NextGen Bus Study team design a new bus network that is more relevant, reflective of, and attractive to the residents of LA County. These efforts generated improved overall awareness of the NextGen Bus Study and garnered valuable feedback from a wide variety of stakeholder groups.

2 PUBLIC ENGAGEMENT ACTIVITIES (FEBRUARY 2018 – JUNE 2019)

Activities included NextGen Working Group meetings, stakeholder group presentations, participation in community events, transportation roundtables, collection of feedback through public awareness questionnaires, internal stakeholder group meetings and public workshops. Specifically, meetings with key stakeholder groups were held to build relationships with important community members and receive feedback on bus system priorities. We made a concerted effort to ensure that the public engagement cumulatively reflects input that is reflective of the diversity of LA County's population including race, age, ethnicity, geography, income levels, languages, different levels of ability (ADA), current riders and non-riders, and relevant characteristics.

2.1 NextGen Working Group

The NextGen Working Group met a total of four times in 2018 and twice in 2019 with a cumulative attendance of more than 200 individuals. Members of the Working Group represent a variety of stakeholder groups and include representatives from nearly 70 community organizations throughout LA County, including groups such as Service Councils, Advisory Councils, Business and Community Organizations, Chambers of Commerce, Educational Institutions, Government Agencies, Non-Profit, Faith-Based Institutions, Transportation Agencies, Transportation Services and Groups and Union Groups. Attachment A provides a list of all member organizations that have participated in the working group meetings.

The first meeting in March 2018 provided the Working Group with an overview of the study and incorporated a listening session to get a baseline understanding of constituent needs. The second meeting in May 2018 focused on travel patterns, attitudes and preferences, and the Working Group members were asked to identify any additional information or insights that the data may have missed. The next meeting was in July 2018 and gave Working Group members an understanding of the challenges and opportunities that exist with Metro's current bus system, which included review of the evaluation criteria and exploring how market analysis data can help inform bus system redesign decisions. The fourth meeting was in September 2018 and invited Working Group members to explore and provide feedback on different service concepts and policy choices for each of the five different service council areas in the county, which included careful consideration of potential service trade-offs. The meeting in

April 2019 allowed the Working Group members to dive deep into the practical applications of the data, service concepts and design considerations that will help guide the redesign of the Metro bus system. The most recent meeting in May 2019 addressed the question "How does the Equity Platform manifest and get reflected in how the bus network and service lines are redefined?" Three breakout sessions were held to address this question and various themes were identified by the Working Group. Feedback received from all six working group meetings has been compiled and shared with the NextGen team and will serve to inform the study process.

2.2 Community, Faith-Based, Student & Stakeholder Organizations Presentations & Briefings

In the course of the year, the Outreach Team also connected with and obtained feedback from a number of constituents through a variety of community, faith-based, underserved, student and other stakeholder organizations. This was achieved by providing approximately 60 stakeholder briefings and presentations to groups such as the Watts Rising Collaborative, Valley Industry Commerce Association, Commission on the Status of Women, Southeast LA Collaborative, Pacoima Beautiful, Los Angeles Council of Religious Leaders, LA Unified School District, Da Vinci Schools, and Temple City School District. Additionally, when meetings could not be arranged, stakeholder organizations were also provided with project updates through email and phone calls, including collateral materials for distribution to their members.

2.3 Local Government, Partner Agencies & Internal Stakeholder Group Meetings & Briefings

Insights provided by local government agency partners, elected officials, municipal operators and other internal Metro departments are also vital to this process; therefore, 75 meetings have been held to date with these stakeholders. These meetings took a variety of forms that were customized to each stakeholder group, including presentations at standing meetings (i.e. Service Council), one-on-one briefings, focus groups, working sessions (i.e. Metro bus operators and Customer Care) and an internal working group comprised of different Metro departments. Similar to the community groups, these stakeholders were also provided project updates via email and phone calls.

2.4 Public Events and Pop-Ups

Staff also connected with hundreds of community members one-on-one at more than 80 pop-ups and public events, such as the Cinco De Mayo Celebration at Olvera Street, Monrovia Family Music Festival, California African American Museum, Arcadia 626 Night Market, Huntington Park 4th of July Celebration and the NoHo Block Party. Additionally, a Mobile Unit pop-up was used in areas like La Mirada and Bellflower to connect with communities that have limited access to technology by providing access to laptops and knowledgeable staff to help educate and receive feedback from stakeholders. On-board bus questionnaires were also utilized to ensure input was received from Metro Bus riders and were targeted along Metro's busiest bus corridors.

2.5 Public Awareness Questionnaires

Two quantitative online questionnaires were also conducted, one in Summer 2018 and the other in Fall 2018. Printed versions of the questionnaires were also made available for use during stakeholder meetings and an ADA-compliant version was created upon request from a member of the seeing-impaired community. The first questionnaire collected information on ridership use and motivations, while the second survey asked respondents to prioritize service concepts and acknowledge tradeoffs via MetroQuest. For the second questionnaire, over 60% were people of color with a balance of genders, age groups, zip codes, and income levels equitably representing the diversity of Los Angeles County. Collectively, the questionnaires collected more than 12,000 responses from both riders and non-riders throughout LA County.

2.6 Public Workshops

A series of 20 public workshops throughout Los Angeles County were held and served as an opportunity for the general public to learn about the study process, design criteria under consideration, data input received to date, community input heard to date and provide input on their concerns and what service changes they feel would be useful within their community. In total, about 1,800 comments were received from nearly more than 1,000 workshop attendees. The workshop format was strategically designed with stations to educate, inform and bring current all attendees in an interactive way; providing three different methods of commenting.

2.7 Project Information Distribution

Information about the project, availability of the questionnaires and public workshop details were promoted through print advertising, distribution of multi-lingual take-ones, bus advertisements and digital engagement via project toolkits for stakeholder groups, digital ads, social media, emails and website pageviews. This resulted in more than 10 million touchpoints with residents across LA County. Additionally, Working Group members, cities and elected offices were asked to distribute and promote the study and workshop information through their own websites, social media and member list.

WHAT WE'VE HEARD SECTION ON FOLLOWING PAGE

3 WHAT WE'VE HEARD

The following summarizes the feedback received to date through the outreach activities previously discussed. The recurring themes that emerged during the public workshops reinforced and validated the feedback received from the NextGen Working Group and through online Questionnaires.

NEXTGEN MEETINGS, WORKSHOPS, AND EVENTS

The following table includes all 268 meetings, events and workshops that have taken place throughout the course of the NextGen Bus Study, which has included:

- 86 community events and pop-ups
- 75 briefings with local government, partner agencies, municipal operators, COGs, Metro TAC and other internal stakeholders
- 59 briefings and meetings with community/faith-based organizations and other stakeholder groups
- 22 public workshops (including 2 Telephone Town Halls)
- 20 Metro Service Council presentations
- 6 NextGen Working Group meetings

Feedback Received Through Meetings and Events

The desired service improvements and priorities that emerged during these meetings and events were consistent and complementary. Recurring themes included increased frequency, improved reliability, more evening/afternoon service, safety and security, and better connectivity with other systems. Local government and municipal transit operators especially emphasized coordination with Metro to ensure there is not duplication of service and a more seamless experience as a rider transfers between services.

PRIORITIES QUESTIONNAIRE

By building strong relationships with faith-based and community groups, the Metro team was able to leverage digital tools that help stakeholders understand the complexity of redesigning an entire bus system, resulting in obtaining quality feedback from often underrepresented stakeholders that considered both technical aspects of the system and personal needs and experiences. Ultimately, over 60% of respondents were people of color with a balance of genders, age groups, zip codes, and income levels equitably representing the diversity of LA County. The questionnaire input deadline was extended multiple times to accommodate request from Community Based Organizations for additional input time.

The MetroQuest questionnaire asked respondents to prioritize service concepts and acknowledge tradeoffs. The following highlight respondent priorities:

Set Your Budget Screen

Category	Total Budget Allocated	Percentage of Total
More reliable service	95,263	15.8%
More peak hour frequency	85,999	14.3%
More safety and security	81,252	13.5%
More geographic coverage	75,143	12.5%
More evening service	74,477	12.4%
Better real-time bus arrival info	74,183	12.3%
More weekend service	64,507	10.7%
More midday frequency	51,139	8.5%

Note: Budget allocated refers to the total value of the coins allocated to each category.

Tradeoffs

F	Route Desig	n	System De		System Design		Service Times	
Fewer stops	Neutral	More stops	More buses	Neutral	More routes	Rush hour	Neutral	Non- rush hour
54.3%	22.3%	23.3%	54.0%	17.5%	28.5%	53.7%	15.5%	30.8%

Connectivity		Reliability			
More	Neutral	Direct route	Reliable	Neutral	Reliable info
transfers			service		
41.9%	16.6%	41.6%	54.1%	10.9%	35.0%

2019 PUBLIC WORKSHOPS

Public Workshops Overview

The NextGen Bus Study public workshops leveraged stations that were intentionally designed to be interactive and create an environment of inclusion and collaboration, which opened a dialog between the Metro service planning team and the residents the system serves. All meetings emphasized the importance of Metro staff interacting with bus riders and residents, forging an understanding between service developers and Metro riders. These workshops provided an opportunity for the public to learn about and provide feedback on current Metro bus service, and a forum for community input that encouraged an ongoing dialogue with current and non-riders. Given the impact service changes may have on communities and residents, Metro placed great emphasis on engaging with the public and key stakeholders to ensure their concerns and comments are considered and included during the service redesign process.

At the end of the initial 10 public workshops, 1,083 public comments were received from 675 highly engaged attendees. Due to the success in attendance and constructive comments received, the NextGen Bus Study then hosted an additional 10 targeted public workshops, resulting in an additional 721 comments from 356 attendees. In total, 1,804 comments were received from 1,031 individuals.

Over the course of the 20 workshops, the following reoccurring themes for improving service across the county emerged (in order of most recurring):

Bus Service Related Themes

- Increase service frequency and decrease average wait times.
- Provide real time information as it pertains to scheduling and bus arrivals.
- Create greater transit connectivity throughout Los Angeles County.
- Eliminate the number of transfers needed during long distance travel.
- Coordinate with other municipal bus operators and local transit providers.
- Provide more mid-day service and late-night service.

Passenger Experience Themes

- Enhance safety and security improvements on the bus and at bus stops.
- Increase quality of customer service from Metro staff.
- Improve cleanliness on buses and at bus stops.
- Provide better First-Last Mile improvements along bus routes

Workshop Locations Approach

The meetings were geographically balanced, with the initial 10 locations selected based on service council areas and the project team's close coordination with Metro Service Councils, their staff, Working Group members, and key community leaders. The venues identified were intentionally near Metro transit as well as within heavy ridership areas. The additional 10 targeted workshops focused on traditionally underrepresented community groups and were identified with the help of Working Group members. (See Attachment B for workshop locations.)

Workshop Format

Workshop attendees received a meeting guide upon entering the workshop, as well as a fact sheet, FAQ, and comment card (Attachment C). The meeting materials were made available to attendees in multiple languages, including English, Spanish, Russian and Simplified Chinese. Interpreters were also available for attendees at the workshops:

- Spanish interpreters were available at all NextGen workshops.
- Mandarin interpreters were available during the workshop hosted at the San Gabriel Asian Youth Center.
- Russian interpreters were available for the workshop hosted at Plummer Park in West Hollywood.
- American Sign Language (ASL) interpreters were available at both ADA-focused meetings

The workshops consisted of five informational stations for attendees to experience. These stations carried different themes and points of emphasis regarding the study (Project Purpose, What We've Heard, What We've Learned Through Data, Service Redesign Considerations, Interactive Mapping and Public Comment and Metro Departments and Other Initiatives). To aid in the delivery of key messages throughout the workshop, each station was staffed and included a screen with display boards of key themes and information for the attendee.

Workshop attendees had the opportunity submit their comments regarding Metro bus service. These comments focused on a wide array of subjects including bus frequency, travel times, transfers, and user experience. Comments were submitted using a touchscreen GIS map platform, service council specific roll out map of the bus system, or by using a comment card provided by project staff. These various formats ensured that the public was actively engaged in providing feedback in a way most convenient to them.

Notification and Extended Engagement for Public Workshops

From December 2018 through April 2019, a variety of public noticing and extended outreach was performed to create awareness for both rounds of the workshop series across each service council area. This outreach included the use of direct mail resources, online digital e-blasts and contacting local cities, community-based organizations and municipalities to assist in promoting the workshop series. Workshop information was also distributed directly to Metro riders on trains and buses and to LA County residents in areas of the meeting workshop locations through door-to-door delivery of notices and flyers.

The following table provides a high-level summary of these comprehensive notification efforts:

	Notification of Public Workshops
Print Notices	 Nearly 134,000 take-ones placed on Metro bus and rail lines Approximately 12,300 notices hand-delivered to property owners, occupants and businesses in areas around the meeting locations 330+ stakeholder organizations received notices via mail to distribute at activity centers
Digital Communications	 Electronic meeting notice emailed to 3,200 NextGen project database contacts
Communications	 Electronic meeting notice emailed to 147,000 AARP database contacts Nearly 500 media toolkits, which provided easily shareable information, sent to Working Group members, stakeholder organizations and Los Angeles County cities (Attachment D) 160+ posts to stakeholder-owned social media platforms, community e-blasts, blog posts and online news articles recorded (Attachment E) Metro social media posts (Facebook and Twitter) published before and during all 20 meetings, resulting in 100's of positive comments (Attachment F) NextGen webpage included meeting information and was visited approximately 15,000 times between December 2018 and April 2019
Working Group Member Organization List	List of all Working Group members attending a working group meeting (Attachment A)

Workshop Summary Themes by Service Council Area

To create a broader view of bus rider requests and concerns, this section focuses on the most frequently submitted comments organized by Service Council area. Each area had a unique set of community priorities and concerns that were shared among workshops in similar geographic locations.

San Fernando Valley

- Frequency improvements to the Orange Line running though the San Fernando Valley are needed. Arrival/departure times of buses are inconsistent and make long distance travel difficult.
- Improvements to safety infrastructure are needed at bus stops. Implementing safety lights, emergency call systems and increasing the presence of security officers are requested improvements from the public.
- Service through Reseda and Northridge is inconsistent and involves long wait times and inconsistent arrival/ departure times. Improvements to service frequency in these highly congested areas are needed.

Westside/Central

- The 780 Rapid line should be extended east into San Gabriel Valley and south to West LA.
- Create service originating in West Hollywood/Hollywood that terminates in West Los Angeles.
- The consistency of arrival/departure times throughout the service council are unreliable.
 Transferring between lines becomes increasing difficult when service is inconsistent.

South Bay

- Increase morning and evening peak hour service for routes connecting the South Bay to West Los Angeles.
- Increase the number of routes branching off rail lines. Routes that continue to travel in a similar direction are needed.
- The Metro 40 bus line needs service and security improvements. Wait times for this line are
 long and makes transferring difficult. Stops along this route feel unsafe to passengers due to a
 lack of a security.

Gateway Cities

- An increase in the Metro police presence is needed at stops and on buses. Passengers feel unsafe when waiting for buses and when traveling.
- Extend the 760 into Compton. Traveling from Central Los Angeles to Downtown and areas of northern Los Angeles county is becoming increasing difficult.
- Improvements to transit connectivity between Central Los Angeles and the San Gabriel Valley are needed.

San Gabriel Valley

- Improvements to arrival time accuracy at bus stops and on the Metro app are needed.
- Provide more Rapid service from San Gabriel Valley into Downtown and Central Los Angeles.
- Hours of operation on major lines like the 489 and 780 need to begin earlier in the morning.
 Ideally before 6am Monday-Friday.
- The Temple City Youth Committee surveyed 148 students and 63 adults about their public transportation concerns. 37 percent of people surveyed have never taken public transportation. Common problems included the issues of safety, TAP cards are difficult to access, speed, reliability, and overcrowding. Participants felt additional stops are needed as well as shade covers, more security, and videos on how to ride the bus and read the maps.

Elected Offices /	 Luis Mata, City of Los Angeles, Department on Disability 		
Key Stakeholders	Wendy Cabil, Access Services/CAC		
Media	• N/A		
Key Themes	Divers need to be more patient with disabled patrons,		
	people with speech impairments, and deaf riders.		
	Increase the frequency on busy routes. When the buses		
	are full it becomes more difficult to be on the bus with		
	a wheelchair.		
	Improve transit connectivity with other routes in case		
	one bus is missed, there is another option.		
	Create more shelters at bus stops to accommodate		
	wheelchairs.		
	Increase accommodation for the disabled community Increase accommodation for the disabled community for the disabled community for the disabled community for the disa		
	such as: internal bus signage to notify stops, additional		
	wheelchair mounts and space and increased usage of braille.		
	Consider Access services when redesigning the bus system so disabled riders do not lose service or		
	coverage.		
	 Ramps on the new buses are steeper and make those in 		
	wheelchairs feel uneasy while using them.		
	wheelenans reel aneasy wille using them.

Welcome **Public Workshop**

Winter 2019

Station Summaries

Through the NextGen Bus Study, Metro is designing a modern, more useful bus network that better fits the needs of today's rider.

Station 2 - What We've Heard

We're gathering input from stakeholders across LA County. To date, this feedback has resulted in the following recurring themes to be addressed by the NextGen Bus Study:

TO BE ADDRESSED BY NEXTGEN:

- > Equity
- > Customer Experience
- > Accessibility
- > Connectivity
- > Schedule
- > Engagement

TO BE ADDRESSED BY OTHER METRO INITIATIVES:

- > Operator Issues
- > Education
- > Safety and Security
- > Technology
- > Fares

Station 3 - What We've Learned Through Data

We've studied travel patterns and preferences of more than 5 million people in LA County and we've learned where transit is already successful and where we need to improve and rethink service.

Station 4 - Service Redesign Considerations

We're reviewing many considerations in evaluating the bus service. These include which areas perform the strongest, where more service is needed, where riders want/need to go, and how much service is needed for each corridor, and more.

Station 5 - Interactive Mapping and Public Comments

Public participation throughout LA County is critical to the success of this study. Interactive maps will gather valuable input and information from you to help us shape the new Bus Service Plan.

Station 6 - Metro Departments and Other Initiatives

Metro representatives from various departments will be on hand to answer questions and discuss other initiatives that will integrate with the NextGen Bus Study.

*En = English, Sp = Spanish

Fact Sheet - Winter 2019

Every day, we hear your comments about how Metro's buses can better serve you.

We've listened. We've heard you. We've taken action.

So, what is NextGen?

In 2018 Metro began the process to reimagine and restructure our bus system to better meet the needs of past, current and future riders. The goal of the NextGen Bus Study is to design a new bus network that is more relevant, reflective of, and attractive to the residents of LA County. We believe this redesigned network will improve service to current customers, attract new customers and win back past customers.

Why is Metro doing this?

Simply put, the bus network in LA County carries over 70% of Metro customers but has not had a major overhaul in 25 years. Since that time, our county has evolved dramatically. Over a million residents have been added, transforming many local

communities with new travel patterns. The Metro Rail system was just beginning 25 years ago, but now LA County has 105 miles of service and service will continue to grow steadily over the next 25 years. In addition, with new transportation options like ride hailing apps and bike share, it is important that our bus system integrates with all the ways Angelinos travel today, with flexibility built in for the future.

What is the timeline?

The NextGen Bus Study began in spring 2018 with a new bus service plan scheduled for rollout as early as December 2019. The NextGen Bus Study consists of four steps. At each step, the public will be encouraged to actively participate. We are currently in step 2 and Metro is working on processing all of the robust input received to date to prepare the draft service concepts.

SPRING/SUMMER 2018

Market Demand & Travel Patterns,

Project awareness and listening to

what the market tells us about how

we travel, evaluate how existing

bus service relates to the needs

What We've Heard

Metro is gathering input from stakeholders across LA County. To date, we have identified the following recurring themes as a result of this input.

How can you participate?

This is all about you. So, we need you as our partner. Public engagement is critical to the success of the NextGen Bus Study and every step of the process will include several opportunities for public input. Here are some of the current and upcoming opportunities:

- > Attend any of the 10 public workshops being held throughout the county between January 8 and February 6, 2019 visit metro.net/nextgen to find a location in your Service Council area
- > Email your thoughts or request a presentation for your organization or event by contacting Robert Cálix at nextgen@metro.net
- > Check the project website regularly or sign-up for our mailing list at metro.net/nextgen

Frequently Asked Questions (FAQ) Winter 2019

OVERVIEW

1) What is the NextGen Bus Study?

Metro has set out to design a new bus network that is more relevant, reflective of, and attractive to the residents of LA County. We believe this redesigned network will improve service to current riders, attract a new generation of users and win back past customers. The NextGen Bus Study consists of four steps. At each stage, the public will be encouraged to actively participate and provide informative and valuable input.

2) Why is Metro doing this now?

Simply put, the bus network in LA County carries over 70% of Metro customers but has not had a major overhaul in 25 years. Since that time, our county has evolved dramatically. Over a million residents have been added, transforming many local communities with new travel patterns. The Metro Rail system was just beginning 25 years ago, but now LA County has 105 miles of service and service will continue to grow steadily over the next 25 years. In addition, with new transportation options like ride hailing apps and bike share, it is important that our bus system integrates with all the ways Angelinos travel today, with flexibility built in for the future.

3) What is the timeline for the NextGen Bus Study?

The NextGen Bus Study began in Spring 2018 with a new Bus Service Plan anticipated for rollout as early as December 2019.

4) Will the NextGen Bus Study result in minor adjustments to the current bus network or truly redesign the system with a "clean slate approach"?

The goal of the NextGen Bus Study is to create an attractive and competitive world-class bus system. To achieve this goal, all aspects of Metro bus service are on the table for study, including speed, distance, frequency, time of day, reliability as well as quality of service and safety. Some of the most heavily traveled lines, e.g. Vermont Ave., Western Ave., Ventura Blvd., may not see major changes, but may be modified to provide better connections to other routes and services. Public input along with the technical evaluation of travel data will inform the extent of the changes.

PLANNING AND PUBLIC FEEDBACK

5) How will the NextGen Bus Study be integrated with Metro's other studies and projects?

Metro will account for long and short-term transit projects and studies that involve or impact the NextGen Bus Study and its resulting Bus Service Plan. Among the projects being considered are the Metro Bus Rapid Transit (BRT) Vision and Principles Study, Metro Rail/BRT Capital Projects, Metro Long Range Transportation Plan, and the Metro MicroTransit Pilot Project and Mobility on Demand Grant Program.

6) Will bus service provided by the LA County municipal transit operators also be included in the NextGen Bus Study?

Through the NextGen Bus Study, we are taking a holistic approach to the LA County bus system that does not look at Metro alone but instead leverages all resources, including municipal operators.

7) At this point in the NextGen Bus Study what type of feedback has been received?

In an effort to gain public input Metro has participated in public outreach activities including the distribution of surveys and attendance at over 170 meetings and events. Metro has received input from the public and stakeholders, including responses from over 12,000 survey participants. To date, this feedback has resulted in the following recurring themes to be addressed by the NextGen Study: equity, customer experience, connectivity, engagement, accessibility and schedules. Additional input received focuses on operator issues, education, safety, technology and fares. While these issues will not be specifically addressed by the NextGen Bus Study, comments related to these topics will be shared with the appropriate internal departments for consideration.

8) Will the NextGen Bus Study consider the unique needs and desires of my community?

One of the goals of the NextGen Bus Study is to receive input from stakeholders throughout LA County. Public participation will help ensure that the NextGen Bus Service Plan considers each community's needs and character.

FUNDING/RESOURCES

9) Will the NextGen Bus Service Plan be constrained to the current level of service hours?

The initial assumption of the NextGen Bus Study is to develop a service plan within the range of 7 million service hours, plus or minus 10 percent (6.3 million to 7.7 million hours). However, this does not preclude Metro from developing a service plan that exceeds this range should the benefits justify any tradeoffs to other Metro projects and programs.

10) How will fares be affected?

Fares are not being considered as part of this effort.

11) Will there be further opportunities for public input on the NextGen Bus Study?

Yes. Public engagement is critical to the success of the NextGen Bus Study and Metro is actively soliciting input. Here are some of the current and upcoming opportunities:

- > Attend any of the 10 public workshops being held throughout the county between January 8 and February 6, 2019 visit metro.net/nextgen to find a location near you
- > Email your thoughts or request a presentation for your organization or event by contacting Robert Cálix at nextgen@metro.net
- > Check the project website regularly or sign-up for our mailing list at metro.net/nextgen

Stakeholder Toolkit

D.2

Elected Official Toolkit

Dear Stakeholder,

The purpose of this electronic toolkit is to provide you with notification materials to assure that your community is aware about this initiative and has the opportunity to provide input regarding the redesign of Metro's bus system. The copy-ready text allows you to easily share information that can be utilized with the online platform of your choice. Below are some of the ways that you can help us spread the word about the upcoming series of public workshops.

- 1. Distribute electronically via email: share any of the included graphics and content with your email contacts.
- 2. **Post to your website:** you can use any of the images provided to post to your homepage. Link the image to the online workshop notice.
- 3. **Feature the workshop dates and details on your events calendar:** promote the upcoming workshop dates in your region on your online events calendar (if applicable) and make announcements at your meetings or other special events.
- 4. **Social media posting/sharing:** use the provided image of your choice on your social media profiles (Facebook, Twitter, Instagram) and share the link on your post.
- 5. **Workshop Notice:** share the workshop notices we will be sending you by placing it on your front counters, message boards, and other publicly accessible areas. Let us know if you need additional notices.
- 6. **Events:** let us know if there are any upcoming events where the team can make an announcement to share the workshop dates and distribute workshop notices.

Thank you in advance for your assistance in getting the word out for the NextGen Bus Study public workshops. If you have any questions, please contact me directly at 213-922-5644 or Calivr@metro.net.

Sincerely,

Robert Cálix

Senior Manager

Los Angeles County Metropolitan Transportation Authority

Subject: Join us at a Workshop Jan 8 to Feb 6, 2019, and Receive a Free TAP card

Come to any public workshop between January 8 and February 6, 2019, to help us redesign the bus system. You'll meet with Metro staff, learn about the study and share your thoughts on how to improve LA's bus system. We want your thoughts on bus routes, frequencies, day and times of operation. Stop in anytime during the workshop hours.

*Everyone will receive a free TAP card, while supplies last. We'll also be raffling additional Metro transit passes.

For more information, visit <u>metro.net/projects/nextgen/upcoming-meetings</u> or view the <u>workshop</u> <u>notice</u> to find a location near you.

- 3. **Feature the workshop dates and details on your events calendar:** promote the upcoming workshop dates in your region on your online events calendar (if applicable) and make announcements at your meetings or other special events.
- 4. **Social media posting/sharing:** use the provided image of your choice on your social media profiles (Facebook, Twitter, Instagram) and share the link on your post.
- 5. **Events:** let us know if there are any upcoming events where the team can make an announcement to share the workshop dates and distribute workshop notices.

Thank you in advance for your assistance in getting the word out for the NextGen Bus Study public workshops. If you have any questions, please contact me directly at 213-922-5644 or Calikr@metro.net.

Sincerely,

Robert Cálix

Senior Manager

Los Angeles County Metropolitan Transportation Authority

Subject: Join us at a Workshop Jan 8 to Feb 6, 2019, and Receive a Free TAP Card

Come to any public workshop between January 8 and February 6, 2019, to help us redesign the bus system. You'll meet with Metro staff, learn about the study and share your thoughts on how to improve LA's bus system. We want your thoughts on bus routes, frequencies, day and times of operation. Stop in anytime during the workshop hours.

*Everyone will receive a free TAP card, while supplies last. We'll also be raffling additional Metro transit passes.

For more information, visit <u>metro.net/projects/nextgen/upcoming-meetings</u> or view the <u>workshop</u> <u>notice</u> to find a location near you.

NEXTGEN Bus Study

SUMMARY
Working Group Meeting #6:
Metro's Equity Platform in Action
Through the NextGen Bus Study
May 29, 2019

NextGen Working Group Meeting #6

The NextGen Bus Study is continuing its effort to improve Metro's bus network by working in collaboration with the NextGen Working Group to help design a better bus system and make it more relevant for the changing travel patterns and needs of Los Angeles County's diverse population. Metro has and will continue to engage with the NextGen Working Group to ensure that a wide range of communities are represented in the process.

During the sixth meeting, Metro staff and Working Group members, held a facilitated discussion, and addressed *Metro's Equity Platform in Action Through the NextGen Bus Study*, including how the Four Pillars of Metro's Equity Platform (I. Define and Measure, II. Listen and Learn, III. Focus and Deliver and IV. Train and Grow) have been implemented at each step of the study for both the technical and communications efforts.

Based on the Metro Board's request to understand how public input is shaping the NextGen Bus Study recommendations, the Working Group focused on the question "How Does the Equity Platform manifest and get reflected in how the bus network and service lines are redefined?" This was discussed within the context of how a redesigned bus system would function by first maximizing the efficiency of the current service hours to determine if additional service hours are needed. Some of the principal ideas shared by Working Group members in discussions include the following:

- Success will be achieved when taking the bus is a point of pride and when choosing to ride the bus is seen as a positive, viable option for everyone.
- Change in the mindset of the leadership and decision makers to develop a kinship with the current bus riders and the communities they represent.
- Metro needs to give bus improvements the same or higher priority, than capital improvement projects there is a need to reflect pride in the bus system.
- Customers of all ages, races and backgrounds should feel safe and empowered to ride the bus.
- Accessibility is key to ensuring that the Equity Platform in Action continues.
- Feedback needs to be in real-time, fast and customer focused.
- Avoid reduction of bus service levels that could negatively impact diverse communities.
- Look for opportunities to increase the number of total service hours to help improve and advance bus service.

Breakout Sessions

Working Group members were assigned to one of three groups to deliberate questions related to the driving question. The following summary highlights each group's focus and dialogue:

Group One: NextGen Plan and Equity Platform Measurements

Group One focused on the NextGen bus plan and equity measurements, and addressed the question, "In thinking about Metro's Equity Platform in Action, how will we know we are successful?" The key themes from this group were:

- Frequency, availability and speed for all groups is equally important
- Improved customer service is imperative for long-term success
- Connectivity and integration with other modes and agencies/operators
- Wayfinding and ease of use
- Inclusivity and access to competitive transit service for all people across the county (i.e. existing riders, non-riders, low income, middle income, etc.)
- Safety and cleanliness
- Additional bus operator training to diffuse tense situations

Group Two: NextGen Equity Platform Guiding Principles Development

Group Two covered NextGen equity guiding principles development and set out to answer the question, "When we think about Metro's Equity Platform in Action, what values inform and shape our decision-making in service line planning?" This group's key themes were:

- Accessibility and reliability
- Fairness and inclusivity give a voice to people and make sure they feel heard
- Needs-based system, including both geographic and individual needs
- Multi-faceted and layered approach to intersectionality empowerment through access to opportunities for the multi-faceted needs of individuals representing diverse groups
- Safety and Security

Group Three: NextGen Application of Equity Platform and Future Feedback Mechanisms

Group Three addressed the application of equity and future feedback mechanisms needed by focusing on the key question, "How will Metro's Equity Platform in Action guide and shape our approach to soliciting community input for service line planning?" The value statements from this group were:

- Public transit is for all of Los Angeles and we should prioritize buses over cars
- Elevate NextGen to be as important as a capital project (rail)

- Improve the experience of current riders
- Stay true to the vision
- Metro must celebrate bus riders as part of environmental "hero" impacts
- Lifeline over lifestyle address needs over providing options
- Working routes should empower economic success
- Purposeful data collection <u>that consistently includes</u> marginalized and non-traditional community members, Limited-English-Population residents, students and bus operators
- First/last mile should be (system-wide) safe and dignified for all
- Better understand and assess effectiveness of community usage of incentive programs and improve promoting discounted fares
- Tech integration for ridership and for evaluation assessment

Group Consensus on Measurements, Guiding Principles, and Feedback Mechanisms

After the breakout sessions, the members reconvened as a group with a facilitated discussion where they reviewed and came to a consensus on measurements, guiding principles, and feedback mechanisms as it pertains to the Equity Platform in Action as identified below.

<u>Success Measurements and Guiding Principles</u> – The groups stated success in this area will be achieved when taking the bus is seen as a positive, viable option for everyone, which will also be evident in the results – who is riding? Cultural humility is a value that needs to be added. Furthermore, reduction of bus service levels that will limit the potential impact and benefit of the NextGen Bus Study should be avoided, and opportunities to increase the number of total service hours should be explored to help improve and advance bus service.

<u>Customer Service, Public Education and Customer Feedback Mechanism</u> – The groups felt the rider's experience was just as important as their journey. Greater utilization and integration of technology was suggested, such as a way for customers to use an App that allows for high quality real-time bus arrival information and provides an opportunity for Metro to receive feedback relating to the route, bus operators, and rider experience. Metro also needs to educate the public on how routes are planned, how stations are set up, and how stops are set up to increase transparency. Customers need to feel they have been heard.

<u>Safety and Emergencies</u> – Metro must employ a wide range of strategies such as bus station design, lighting, real time information, and the appropriate balance of visible, uniformed security/police, in order to ensure customers of all ages, races, and backgrounds feel safe and empowered to the ride the bus. Major emergencies need to be prevented and a quick response is required when they do happen. Metro must have better accountability on

NEXTGEN Bus Study

making sure elevators are working and having a way to easily report maintenance issues and getting them fixed.

<u>Train and Grow Pillar (Future)</u> – Bus operator training needs to be enhanced and they should know how to deescalate a tense situation on the bus. However, there was a concern about over burdening them with responsibility. Metro also needs to continue to seek ways to coordinate with other agencies and municipal bus operators.

<u>Metro Board Involvement</u> – The Metro Board should take pride in their bus system and place equal attention to it as they do for Metro's rail service. It is important for the senior leadership to be present to hear what stakeholders, communities, and customers are saying and not just reading it in a report.

The NextGen Bus Study is striving to create a world-class bus system that is accessible, reliable and an essential part of the comprehensive transportation system for Los Angeles County. To accomplish this, Metro will continue the Equity Platform in Action throughout this Study process as it develops the NextGen bus service concept and service line planning.

Metro will continue to rely on the NextGen Working Group as the community leaders whom Metro can rely on to ensure the redesigned bus system is accessible and equitable for the diverse stakeholders and communities in our county. The NextGen Working Group's continued involvement and guidance are essential to the success of the NextGen Bus Study.

Attachment D Transit Propensity Score for Census Tracts in Los Angeles County Methodology

The concept of a Transit Propensity Score (TPS) is that there are physical, locational, and socio-economic factors that can potentially serve as a predictor of where transit service, if made available, could thrive. Most models, either regionally based or corridor based rely on the supply of transit service, its frequency, etc. as a key element to predict transit use. The Centers for Neighborhood Technology (AllTransitTM), for example, provides a Transit, Jobs, Health, Equity, Bikeshare and Carshare, among other scores for each area or region selected. Their goal is to explore the social and economic impacts of Public Transit that is offered.¹ Alternatively, many cities have turned to the Census to collect data and compare the results of the socio-economic factors, journey to work, and other parameters that can be associated with transit use. Robert Bush, AICP of HDR presented a paper at the APTA Bus and Paratransit Conference held in Raleigh North Carolina on May 8, 2012. The principal question at the heart of the work was "Where should transit service be provided?"

Mr. Bush examined characteristics of transit riders using the following demographic factors:

- 1. Zero Vehicle housing units
- 2. Mobility limitations that prevented individuals from going outside the home
- 3. Employment disabilities
- 4. Minority populations
- 5. Recent immigrant populations with a tenure of less than 10 years
- 6. Low income households (Income less than or equal to \$15,000
- 7. Females

All these factors were found to be relevant when controlling for income. Certain factors were rejected because of a lack of available data at the census block group level. These rejected variables included younger and older workers. Education played a significant role in defining a category of commuters that were found to have higher income but primarily related to rail travel. Finally, the team did not use categories of individuals who were primarily renters and non-licensed drivers because the variables could not be controlled for income. The resultant model, added an 8th factor to the above list – population density.

Ultimately, the research came down to two major factors – population and employment density. Figure 1 displays the results of the research and displays the linkage between the two highest ranking factors – population and employment density and the transit service supportive of that ratio. The study also provided a table which displayed the relationships between Mode and Density. Shown in Exhibit 1.

¹ CNT has created a robust, one of a kind database consisting of stop, route and frequency information for 824 transit agencies in regions with populations greater than 100,000 as well as a large number of smaller regions and agencies. Metropolitan areas as defined by the U.S. Office of Management and Budget with 2013 populations greater than 100,000 were chosen, and the transit agencies serving these areas were compiled from the 2013 National Transit Database as well as the American Public Transportation Agency. Based on their website, CNT has collected data from 824 Transit Agencies, covers 661,966 stop locations, and 13,099 routes.

Figure 1: Employment and Population Supportiveness by Mode

Exhibit 1 – Relationship between Mode and Density									
Service Level	DU / Acre		Population /	Population / Square Mile		/ Acre			
	Low	High	Low High		Low	High			
Demand Resp	2	3	3,500	5,000	2,000	3,000			
60 Min Freq	3	4	5,000	6,500	3,000	3,000			
30 min Freq	4.5	6	7,500	10,00	4,000	5,000			
10 min freq	7.5	10	12,500	16,500	6,000	8,000			
LRT	9	12	15,000	20,000	8,000	10,000			
Rapid	12	15	20,000	25,000	10,000	13,000			

In a study completed for Ann Arbor Michigan, the researchers there found that population and employment density are two key factors that can be used to predict transit service.² Applying these two criteria to census tracts in Los Angeles the resultant mapping of transit propensity results are shown in Figure 2.

² The Study was conducted for the City of Ann Arbor Michigan in 2009 as part of the *Transportation Plan Update*. In their approach, thresholds were estimated from Urban Development Intensities in the Washington, D.C. area by Terry Holzheimer and residential densities from in *Public Transportation and Land Use Policy*.

Figure 2 -Transit Propensities in Los Angeles Using Ann Arbor and Washington DC Studies

The most notable result of application of the Ann Arbor model is the definition of major transit corridors in the Los Angeles area that are supportive of different types of service. The model suggests that the darker the area, the more likely people are to be disposed towards transit services. As the population and employment densities are reduced, as expected, the propensity for transit use also declines. This result using the Ann Arbor Study mirrors the result in the HDR work done for Raleigh North Carolina. Importantly, the Ann Arbor method was completed without looking specifically at the availability of transit service. This approach is very useful for informing the NextGen study as will be discussed later.

Finally, in this survey of socio-economic factors likely to affect transit ridership produced by others, the City of Los Angeles undertook an effort to define Travel Behavior Zones.³ The values of their index run from 1 to 4 and are based on the following factors:

- 1. Population Density
- 2. Daytime Population density
- 3. Land Use Diversity Score
- 4. Intersection density
- 5. Distance to the nearest BRT or Rail Station
- 6. Distance to the nearest bus stop

³ Technical Summary, *Characterizing Travel Behavior Zones* in Los Angeles, 2016.

The land Use Diversity score measures the mix of uses in an area and includes residential, retail (excluding big box stores), entertainment, office and institutional uses. Figure 3 displays the results of the City's analyses.

Figure 3 – Map of City of Los Angeles Travel Behavior Zones

Not surprisingly, the zones range from a low TBZ score (Red) to the highest TBZ score (Green and Blue). The City also superimposed a map of the rail transit system in Los Angeles as of 2016 before the EXPO line was extended to Santa Monica. Note, areas on the map that are white in color are not part of the City of Los Angeles. However, for the most part the rail system is in the densest TBZ locations.

NextGen Bus Study

The NextGen Bus Study is intended to redraw the bus system for Los Angeles. This process of refreshing the system extent was undertaken because of recent ridership declines and data taken from regional surveys that indicate that the bus system is not providing service to the places that people need to travel. As a result, Metro staff undertook a study to develop its own propensity index or score based on the 2010 Census, and its updates through 2016, as well as locations of major attractors of transit ridership, including schools, shopping centers, hospitals, and other institutions. The model was made significantly more robust than those of the literature survey above and produced results like the population and employment density formulations.

The TPS, however, is a device to estimate how likely individual census tracts might use transit service based on the underlying demographic and geographical data of the tract. Data sources used include the 2010 US Census, SCAG regional model data, various Los Angeles County resources from the GIS data portal, ArcGIS online resources, and data developed by Metro staff.

The TPS considers that there are three major components of predisposition to ride transit. They are:

- Elements of Demand -e.g. Population and employment densities, including seniors, persons aged 18-34, and persons that are attending grades K-12. According to a recent TCRP Study that seeks to shed light on transit propensity, transit use is significant among millennials (ages 18-34). Hence, Metro staff included the millennials as identified in the census as one of the indicators⁴.
- 2. Market Segments e.g. characteristics relating to the reason for travel. Some people are commuters, some are Transit Dependent, and some are choice riders. Each one of these markets has attributes broken down as follows:
 - a. Commuters ages 35-54, and 55 years or older, have a higher education above 12th grade, and incorporate many single individuals.
 - b. Transit dependents comprised of individuals with zero cars available, lower income, ages 10-19, ages 55+, single mothers, and individuals with disabilities
 - c. Choice riders, comprised of individuals between the ages of 20-34, have higher education beyond 12th grade, and are single (no children).
- 3. Built Environment aspects of the environment that people must navigate to travel to and from. Attributes that fall into this area of the TPS include:
 - a. An assessment of the walkability of the census tract based on the number connected street intersections
 - b. the square footage of built development, and

⁴ M. Coogan, G. Spitz, T. Adler, N. McGukin, R. Kuzmyak, and K. Karash, *Understanding Changes in Demographics, Preferences, and Markets for Public Transportation,* TCRP 201, TRB, National Academies of Science, Engineering and Medicine, 2018.

c. housing density

The three components of the TPS were weighted as follows:

- a. Elements of Demand 30%
- b. Market Segments 30%
- c. Built Environment 40%

The individual elements that make up the three categories were weighted according to the number of attributes for that category and all attributes within a category had an equal contribution.

The Total Score includes the following 19 measures:

- Population per Acre
- Employment per Acre
- Non-Industrial Employment per Acre
- School Enrollment per Acre (includes Elementary, Middle, and High Schools)
- University population (includes enrollment and employment)
- Home-Based Shopping Trips per Acre
- Zero Car Households per Acre
- Poverty / Low Income Households per Acre
- School Age Students (age 10 -19) per Acre
- Seniors over 55 as of 2010 per Acre
- Single Mothers per Acre
- Disabled population per Acre
- Individuals Aged 20 to 34 per Acre
- Population with a bachelor's degree or higher per Acre
- Population that is single per Acre
- Individuals Aged 35 to 54 per Acre
- Walkability of the Census Tract (either a score of 0 or a 5)
- Housing units per Acre
- Square feet of occupiable space per acre

Each measure has the tract scores distributed into a natural break (Jenks Methodology) distribution of 5 groups, and then given a score of 1 through 5. Then, all the scores for each component are added and divided out to a total score of 5 for each component. A multiplier of 4/3 is used to account for the extra weight of the built environment component. The three final components are added to come up with a final score, which is again distributed into natural breaks.

Walkability is a measure that seeks to blend the density of intersections (nodes) with a limited block length. A tract is walkable when the connected node ratio (CNR) is at least 0.9 and the average block length is no more than 600 feet for given street block. CNR is the number of street intersections divided by the number of intersections plus cul-de-sacs and street ends. These thresholds were chosen based on

a variety of measures suggested by urban geographers and seeing which ones line up the best with Metro transit boardings. The walkability score is not unlike the one used by the City of Los Angeles. The resultant TPS is shown in Figure 4. Metro is continuing to refine its definition of walkability and has contracted with "Walkscore.com" to provide more detailed information on walkability. This document will be updated upon receipt of that information.

Figure 4 – Resultant Transit Propensity based on the Los Angeles Metro Methodology

Conclusion

Metro staff successfully created a TPS for the City and County of Los Angeles. The results of the application of the scoring methodology reveal similar patterns found in an examination of the two-variable model shown in Figure 2 as well as mirrors studies performed by the Service Development Department relative to riders by time of day. Both methods provide substantial evidence that the TPS can be used as a predictor of transit use.

As shown in Figure 5, the PM peak origins mirror the distribution of propensities displayed in Figure 4. The conclusion is that the Metro TPS adequately models areas that require transit service.

Appendix

Scores for each of the categories are sorted using natural breaks in the data (Jenks).

- A total score greater than 0 and less than 3.5 was assigned a score of 1
- Total Score between 3.5 and 4.9 was assigned a score of 2
- Total Score between 4.9 and 6.7 was assigned a score of 3
- Total Score between 6.7 and 9.0 was assigned a score of 4
- Total Score between 9.0 and 13.0 (maximum score attained by any census tract) was assigned a score of 5

The details of the scores by category are shown in Exhibit 2. The latest formula used to calculate the TPS is shown in Exhibit 3. The table of Variables is described in Exhibit 4.

	Exhibit 2	Details of Each	Measure	
Measure	Numerator	Denominator	Natural Break Points	Dta Source
Population per Acre	Total population	Total Land Acreage of Census Tract	0-12.16 (1) 12.16-25.30 (2) 25.30-43.05 (3) 43.05-76.80 (4) 76.80-147.64 (5)	2010 US Census

```

Exhibit 4 – Data Table Elements

Number	Column	Description
	Name	•
1	fid	Field ID (not used)
2	GEOIDIO	US Census Geo-ID (primary identifier)
3	ALAND10	Area of Land
4	AWATER10	Area of Water
5	INTPTLAT10	Latitude
6	INTPTLONIO	Longitude
7	Рор	Population
8	Emp	Employment
9	Nonjndus	Non-Industrial Employment
10	Zero_HH	Zero-Car Households
11	Pov	Households in Poverty
12	Walkable	Is the Census Tract Walkable
13	Pop_AC	Population per Acre (using AAcre)
14	Em_AC	Employment per Acre (using AAcre)
15	NE_AC	Non-Industrial Employment per Acre (using AAcre)
16	Pop_AC_Score	Natural Breaks Score 1-5 for Population per Acre
17	Em_AC_Score	Natural Breaks Score 1-5 for Employment per Acre
18	NE_AC_Score	Natural Breaks Score 1-5 for Non-Industrial Employment per Acre
19	Walkable_Score	Walkability Score (Either a 0 or a 5)
20	Zero_HH_AC	Zero-Car Households per Acre (using AAcre)
21	Pov_AC	Households in Poverty per Acre (using AAcre)
22	Zero_HH_Score	Natural Breaks Score 1-5 for Zero Car Households per Acre
23	Pov_Score	Natural Breaks Score 1-5 for Households in Poverty per Acre
24	School	School Enrollment
25	School_AC	School Enrollment per Acre
26	School_AC_Score	Natural Breaks Score 1-5 for School Enrollment per Acre
27	Shop	Home-Based Shopping Trips
28	Shop_AC	Home-Based Shopping Trips per Acre
29	Shop_AC_Score	Natural Breaks Score 1-5 for Home-Based Shopping Trips per Acre
30	AAcre	Land Area in Acres
31	PP10JL9	Population 10-19 years of age
32	PP20_34	Population 20-34 years of age
33	PP35_54	Population 35-54 years of age
34	PP55	Population 55+ years of age
35	Bach%	Percent of Population with a Bachelor Degree
36	Bach_AC	Population with a Bachelor Degree per Acre
37	Bach_SC	Natural Breaks Score 1-5 for Population with a Bachelor Degree per Acre
38	P1019AC	Population 10-19 years of age per Acre
39	P3554AC	Population 35-54 years of age per Acre
40	P55AC	Population 55+ years of age per Acre
41	P2034AC	Population 20-34 years of age per Acre

Number	Column	Description
	Name	
42	P1019SC	Natural Breaks Score 1-5 for Population 10-19 years of age per Acre
43	P2034SC	Natural Breaks Score 1-5 for Population 20-34 years of age per Acre
44	P3554SC	Natural Breaks Score 1-5 for Population 35-54 years of age per Acre
45	P55SC	Natural Breaks Score 1-5 for Population 55+ years of age per Acre
46	Disab%	Percent of Population Disabled
47	DisabAC	Population with a Disability per Acre
48	DisabSC	Natural Breaks Score 1-5 for Population with a Disability per Acre
49	Single	Percent of Population that is Single
50	Mother	Percent of Population that is a Single Mother
51	SingleAC	Single Population per Acre
52	MotherAC	Single Mother Population per Acre
53	SingleSC	Natural Breaks Score 1-5 for Single Population per Acre
54	MotherSC	Natural Breaks Score 1-5 for Single Mother Population per Acre
		University Population (including part-time/full-time enrollment and
55	UniPop	employment)
		Natural Breaks Score 1-5 for University Population (Note that this is NOT per
56	UniSC	acre)
57	SqftParcel	Square Feet of livable/workable space per parcel
58	Parcels	Number of Parcels
59	SqftAC	Square Feet of livable/workable parcel space per acre
		Natural Breaks Score 1-5 for Square Feet of livable/workable parcel space per
60	SqftSC	Acre
61	HU	Housing Units
62	HU_AC	Housing Units per Acre
63	HU_SC	Natural Breaks Score 1-5 for Housing Units per Acre
64	Total Score 3	Total Transit Propensity Score (latest score)

ATTACHMENT F SERVICE DESIGN CONCEPTS

NextGen service design concepts are being developed and used to redesign the Metro bus network. These concepts are guidelines established based on the feedback received through the various stakeholder and public outreach sessions. Network characteristics most important to the public include:

- Faster service
- Frequent service throughout the day
- More reliable service
- Better network connectivity
- Accessibility to key destinations
- Improved security

Based on these service themes, the following service design concepts will guide the redesign of the Metro bus network:

Hybrid Local/Rapid Stop Spacing — Currently stop spacing is determined by route classification. For example, local lines are planned with ¼ mile stop spacing while Rapid lines have ¾ to 1 mile stop spacing. As a result, customers travelling on local lines go slower between communities but have closer access to origins and destinations. Conversely, Rapid customers travel faster along a corridor, but may be picked up or dropped off much further from their origin or destination. In addition, resources are split between the local and Rapid lines resulting in wider headways for each service. Therefore, overall end to end travel time including walking/rolling to the stop, waiting for the bus and finally the in-vehicle run time may result in longer travel times on the Rapid, especially for shorter distance trips.

Consolidating local and Rapid resources along a corridor will provide much better headways, and customizing stop spacing along the corridor based on changing land use densities along a corridor results in shorter wait times, faster on board travel times compared to the local, and shorter walk/roll compared to Rapid service. In addition, this standardizes the frequency along the entire corridor, vs inconsistent frequencies between local and Rapid services that have different speeds.

Shorter Route Lengths and Subarea Transit Hubs – The cell phone location based data indicates that almost half of all travel in Los Angeles County are within 1 to 5 miles. In addition, the origin-destination travel patterns indicate that many people travel locally and not necessarily regionally across the region. Creating shorter route lengths will improve schedule reliability. Being able to tie the lines to subarea transit hubs will improve network efficiencies and provide a safer and more convenient location for transfers.

<u>Municipal Operator Coordination</u> – Roughly one third of transit service in LA County is provided by municipal bus operators and Metrolink. Their coverage is especially strong in Santa Monica, South Bay, Gateway Cities, and eastern San Gabriel Valley. Therefore, it is imperative that Metro bus service is closely coordinated with municipal transit service. Given that several of the municipal operators are currently undergoing their own system redesigns, there is an opportunity to work together to develop service change ideas between Metro and municipal services to improve overall coordination for customers.

<u>Microtransit and Other On-Demand</u> – Some areas of the County are difficult to serve with fixed route transit due to terrain, narrow streets, and dispersed lower density destinations. In addition, travel activity in some areas are low during certain times of day or days of week. Metro is currently piloting Mobility on Demand and will be implementing a pilot program for Microtransit. These service modes may be more appropriate for areas and times of day where fixed route cannot be competitive and will be considered for application in lieu of fixed route if warranted.

Standardize Frequencies by Service Tiers — Currently, schedules are written based on the Board adopted load standard for frequent services (15 min or better) and based on policy for in-frequent services (wider than 15 min). To ensure the core network has consistent frequencies and span of service, corridors will be categorized into tiers based on transit propensity, current ridership, and overall travel demand. Each tier will be assigned a frequency designation (e.g. 10 min peak/12 min base) to ensure that all services within the tier provide consistent service levels for ease of transfer along the network. If a line requires better frequencies than the tier designation, it will be set based on the Board adopted load standard.

Routing to Reflect Current Travel Patterns and Transit Propensity – Currently corridors are being evaluated by segments. Based on the origin – destination travel patterns identified using the cell phone location based data as well as regional TAP data, the segments will be connected together to create lines. Better aligning the routing with travel patterns is expected to reduce the number of transfers required to make a trip and increase the distance travelable and access to opportunities along the network within 15 min, 30 min, etc. While resources will be focused in areas with high transit propensity, there will be a concerted effort to maintain service in areas of low demand but with the greatest mobility needs.

<u>Transit Supportive Infrastructure</u> – The service design will identify transit supportive infrastructure that either improves overall travel time and reliability or reduces inefficiencies in the network. Speed and reliability improvements include bus only lanes, queue jumpers, bus bulb outs, signal retiming, All Door Boarding, fare payment technology, etc. improves the attractiveness and competitiveness of transit while reducing revenue hours that can be reapplied to better use. Infrastructure that optimizes terminals and layover locations, reduce out of direction movements, and improves transfer movements will reduce non-revenue miles and hours that can be reallocated to revenue service.

Table 1 illustrates how each service concept will address the various themes expressed by the public and stakeholders.

NEXTGEN Bus Study

Regional Service Concept (Planning Framework) July 2019

Recommendation

APPROVE:

- A. Regional Service Concept, which is the **framework** for restructuring Metro's bus routes and schedules for NextGen and includes:
 - 1. Goals and objectives of the new bus network
 - 2. Measures of success
 - 3. Route and network design concepts based on public input and data analysis
 - 4. Framework for balancing tradeoffs that consider Metro's Equity Platform
- B. Following approval by all five Regional Service Councils, the Board shall then approve the final NextGen Service Plan

Bus Network Goals and Objectives

Provide high quality mobility options that enable people to spend less time traveling (Metro Vision 2028)

- Target infrastructure and service investments towards those with the greatest mobility needs
- Invest in a world class bus system that is reliable, convenient,
 and attractive to more users for more trips
- Endorse travel speed, service frequency, and system reliability as the highest priority service design objectives for the NextGen Bus Study (Motion 38.1)
- Optimize system performance to maximize benefit to the public

How Can Metro Help Equitably Grow Transit Ridership?

How well do people understand how effectively transit can serve their needs? Is the system easy to understand & find?

How can we encourage people to try transit? Does transit go where & when they need it to? Is transit competitive with other options? Is the service attractive?

Once people have tried transit, how can we attract them to use it more often? Is service fast, frequent & reliable enough to retain riders & entice occasional/infrequent riders?

Metro's Equity Platform in Action NextGen Goes Beyond Title VI/EJ

Title VI/EJ protects against making opportunities worse for minority and/or low income groups.

Metro enhances Title VI/EJ in it's Equity Platform by:

- Going above and beyond to improve service for communities with greatest mobility needs
- Inclusiveness beyond ethnicity and income

Folding the Equity Framework into NextGen

DEFINE & MEASURE • Use Title VI/EJ and Performance Measures to ensure we are achieving our equity objectives

LISTEN & LEARN

- Use survey results to help define what improvements are wanted/needed
- Verify results through outreach and engagement

FOCUS & DELIVER

 NextGen service design concepts and network redesign based on transit propensity, service performance, service environment and public feedback

TRAIN & GROW

 Refresh Board adopted policies based on NextGen service design concepts

How is the public's feedback incorporated into service design concepts?

NEXTGEN
Bus Study

Network Development Process

Service Performance

Service Environment

Transit Orientation

Fixed route bus service succeeds when:

- There is a high concentration of travel where transit can be competitive, AND
- Current transit service is well aligned with the demand, AND
- The built environment & other external factors favor transit use.

Service Design Concepts

Bus service must be designed to the specifications of individual markets based on:

- Time of day/day of week, AND
- Trip distance, AND
- Demographics served, AND
- External factors impacting transit competiveness

NextGen Service Plan Implementation Schedule

Month	Milestone
July 2019	Board approval of Regional Service Concept (planning framework)
September 2019	Complete Draft Service Plan
October to November 2019	Board staff workshopsExternal Working Group review of Draft Service Plan
December 2019	Refine Draft Service Plan for public review
Starting January 2020	 Board approval of revised Transit Service Policy Public and stakeholder workshops and outreach on Draft Service Plan Conduct public hearings on Draft Service Plan Service Council approval of proposed Final Service Plan Board approval of Final Service Plan Implementation of Service Plan

OPERATIONS, SAFETY AND CUSTOMER EXPERIENCE COMMITTEE JULY 18, 2019

SUBJECT: MEMBERSHIP ON METRO'S SERVICE COUNCILS

ACTION: APPROVE RECOMMENDATION

RECOMMENDATION

APPROVE Diane Velez for membership on Metro's San Gabriel Valley Service Council.

<u>ISSUE</u>

The term of a member of the San Gabriel Valley Service Council expired June 30, 2019. The term of the now-vacant seat is July 1, 2019 - June 30, 2022.

DISCUSSION

Metro seeks to appoint Service Council members reflective of the demographics of each respective region. The 2010 Census demographics of each of the Service Council regions are as follows:

% Sector Total	Hispanic	White	Asian	Black	Other	Total Pop
Gateway Cities	63.9%	16.7%	8.5%	8.6%	2.3%	100.0%
San Fernando Valley	41.0%	42.0%	10.7%	3.4%	2.9%	100.0%
San Gabriel Valley	50.0%	19.9%	24.9%	3.3%	2.0%	100.0%
South Bay	42.5%	23.8%	12.0%	18.3%	3.4%	100.0%
Westside/Central	43.5%	30.7%	13.0%	10.0%	2.8%	100.0%
Service Area Total	48.5%	26.8%	14.0%	8.2%	2.6%	100.0%

Diane Velez has been nominated to serve by the San Gabriel Valley Council of Governments, the nominating authority for this seat on the San Gabriel Valley Service Council. If approved by the Board, Ms. Velez will serve the remainder of the seat's three-year term. A brief listing of her qualifications is provided along with the nomination letter from the nominating authority.

San Gabriel Valley

A. Diane Velez, San Gabriel Valley Service Council, New Appointment Nominated by: San Gabriel Valley Council of Governments

Term Ending: June 30, 2022

The demographic makeup of the San Gabriel Valley Service Council with the appointment of this nominee will consist of four (4) White members, three (3) Hispanic members, one (1) Asian member, and one (1) Native American member as self-identified by the members in terms of racial/ethnic identity. The gender breakdown of the Council will be seven (7) men and two (2) women.

DETERMINATION OF SAFETY IMPACT

Maintaining the full complement of representatives on each Service Council to represent each service area is important. As each representative is to be a regular user of public transit, and each Council is composed of people from diverse areas and backgrounds, this enables each Council to better understand the needs of transit consumers including the need for safe operation of transit service and safe location of bus stops.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

Approval of this recommendation supports the following Metro Strategic Plan Goal: 3) Enhance communities and lives through mobility and access to opportunity.

ALTERNATIVES CONSIDERED

The alternative to approving this appointment would be for this nominee to not be approved for appointment. To do so would result in reduced effectiveness of the Service Council, as it would increase the difficulty of obtaining the quorum necessary to allow the Service Council to formulate and submit their recommendations to the Board. It would also result in the Service Council having less diverse representation of their respective service area.

NEXT STEPS

Staff will continue to monitor the major contributors to the quality of bus service from the customer's perspective and share that information with the Service Councils for use in their work to plan and to implement and improve bus service in their areas and the customer experience using our bus service.

NEW APPOINTEES BIOGRAPHIES AND QUALIFICATIONS

Diane Velez, Nominee for San Gabriel Valley Service Council

A lifelong resident of the City of Baldwin Park, Diane Velez currently works as a Program Specialist with Active SGV, a local nonprofit with a mission to support a more sustainable, equitable, and livable San Gabriel Valley. Prior to joining Active SGV, Ms. Velez was a Community Engagement Specialist with Multicultural Communities for Mobility, where she researched barriers to bike share usage in downtown Los Angeles. She previously worked as a Program Consultant with Women Care Global, where she supported studies of women's reproductive health.

Ms. Velez has been a Hispanic Scholarship Fund volunteer since 2016 and is a previous CicLAvia volunteer. Ms. Velez holds a Bachelor of Arts degree in anthropology from University of California, Los Angeles, and a Master of Public Health from San Diego State University.

Agenda Number: 24.

OPERATIONS, SAFETY, AND CUSTOMER EXPERIENCE COMMITTEE JULY 18, 2019

SUBJECT: A650 HEAVY RAIL VEHICLE OVERHAUL AND CRITICAL COMPONENT

REPLACEMENT PROGRAM

ACTION: APPROVE RECOMMENDATIONS

RECOMMENDATION

AUTHORIZE the Chief Executive Officer to:

- A. INCREASE the Life-of-Project (LOP) budget to Contract No. A650-2015, for the Heavy Rail Vehicle Overhaul and Critical Component Replacement Program (OCCRP), by \$6,047,723 increasing the total Life-of-Project (LOP) budget from \$99,061,908 to \$105,109,632;
- B. EXECUTE Contract Modification No. 4 to Contract No. A650-2015, with Talgo Inc., for the Heavy Rail Vehicle Overhaul and Critical Component Replacement Program (OCCRP), for the truck frame inspection and repair services in the firm-fixed price amount of \$5,054,030; and
- C. EXECUTE Contract Modifications under this Contract for up to \$1,000,000 per Contract Modification.

ISSUE

During a routine vehicle inspection, cracks were identified on the truck frames of the original Option A650 heavy rail vehicle fleet. This fleet, consisting of 74 heavy rail vehicles and twelve (12) spare truck frames, is currently undergoing a modernization effort. Inspection services are required to identify additional truck frames present with cracks among the fleet. Repair services are required should cracks be identified during the inspection effort.

Inspecting and repairing the vehicle truck frame is a good engineering practice for the foundation of the whole rail vehicle and promotes the safety of the rail vehicle's critical sub-systems. Having a single reliable firm perform this work will streamline the inspection, repairs and warranty process and minimize the impacts to revenue service.

BACKGROUND

The Metro Red Line opened in January 1993. The existing Option Order vehicles have been in

File #: 2019-0151, File Type: Contract

Agenda Number: 24.

revenue service for an average of twenty-five (25) years.

Metro places the highest priority on the safety of our customers, the public, and our employees. To that extent, there is a constant focus on taking proactive measures to maintain our rail vehicle fleet in a State of Good Repair and seek innovative approaches to prevent accidents on our rail system.

During a routine vehicle inspection, cracks were observed on a number of truck frames used on the A650 Heavy Rail Vehicles. Metro's Rail Vehicle Engineering (RVE) immediately developed an inspection and repair procedure, which included using magnetic particle inspection (MPI) on all mating members, welds and beam surfaces. Two (2) of the truck frames that were found to have cracks were then sent out to a local vendor for additional inspection, then repaired. It was then determined that the entire fleet would require inspection and repair if needed.

Several inspection and repair options were considered to avoid impacting revenue service and the ongoing modernization effort, including using a local vendor to perform this work. However, it was determined that having Talgo perform the inspection and repair on all 74 Option A650 heavy rail vehicles and twelve (12) spare truck frames currently undergoing a modernization effort was the fastest and most economical way forward with the least impact to revenue service and the ongoing modernization effort.

DISCUSSION

To mitigate this issue, staff proposes performing non-destructive testing (NDT) on all 74 Option A650 heavy rail vehicles and twelve (12) spare truck frames currently undergoing a modernization effort. After the testing is complete, truck frames identified with cracks shall be repaired and repainted prior to re-assembly.

If the contract modification is approved, Talgo Inc. shall perform the testing and inspection on the 74 Option A650 heavy rail vehicles currently undergoing a modernization effort and the twelve (12) spare truck frames.

The Diversity and Economic Opportunity Department (DEOD) did not recommend a Disadvantaged Business Enterprise (DBE) goal for this procurement as it is not applicable. This procurement falls under the Federal Transit Administration's (FTA) Transit Vehicle Manufacturer (TVM) goal in accordance with 49 Code of Federal Regulations (CFR) Part 26.49. However, Talgo Inc. has established a 6.51% DBE goal under the FTA TVM goal.

DETERMINATION OF SAFETY IMPACT

Approval of this item will have a direct and positive impact to system safety, service quality, system reliability, maintainability and overall customer satisfaction.

FINANCIAL IMPACT

The approved LOP budget for CP 206038 - A650 HRV Midlife Modernization Project is \$99,061,908. This amount includes funds for the HRV Modernization project and Contract Modification No.1, 2 and

File #: 2019-0151, File Type: Contract

Agenda Number: 24.

3. There are also funds allocated for Professional Services, Metro Labor, and Project Contingency. The requested LOP increase of \$6,047,723 also includes other technical and program management support services. The LOP will increase from \$99,061,908 to \$105,109,632.

This contract modification action will not impact the FY20 Budget.

Since this is a multi-year contract/project, the Cost Center Manager, Project Manager, and Senior Executive Officer, Vehicle Engineering and Acquisition will be responsible for ensuring that project costs are budgeted in future Fiscal Years.

Impact to Budget

The funding sources for this project may come from Transportation Development Act (TDA) Article 4, Cap and Trade, and other State and Federal funding. Funding will be allocated as funding allocations and opportunities arise. Use of these funding sources will maximize allowable funding mechanisms given approved funding provisions.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

Approval of this recommendation supports the following Metro Strategic Plan Goal 5) Provide responsive, accountable, and trustworthy governance within the Metro organization. This project will improve safety, service, and reliability in an effort to provide a world-class transportation system that enhances quality of life for all who live, work, and play within LA County.

ALTERNATIVES CONSIDERED

The Board may choose not to approve these contract modifications. However, this alternative is not recommended. A catastrophic failure of the vehicle truck frame could cause a major disruption in service, thus directly impacting customer safety and customer service.

NEXT STEPS

Upon Board approval, the contract modification will be exercised with Talgo, Inc.

A. Procurement Background

This Board Action is to approve Contract Modification No. 4 issued in support of the addition of truck frame repairs to the A650 Heavy Rail Vehicle (HRV) as part of the overhaul and critical component replacement program on the Option Buy A650 consisting of 74 vehicles.

This Contract Modification will be processed in accordance with Metro's Acquisition Policy and the contract type is a firm fixed unit price.

On September 22, 2016, Metro's Board of Directors approved Board Agenda Item 2016-0538 to Talgo, Inc. in the amount of \$54,698,676 for the overhaul of 38 A650 Heavy Rail Vehicles, with the option to overhaul the remaining 36 vehicles of the newest A650 fleet. On October 26, 2017, Metro's Board of Directors approved the exercise of a Contract Option to overhaul the remaining 36 heavy rail vehicles increasing the contract value to \$72,970,494.

The intent of this overhaul program is to replace vital systems and components and update relevant technology to ensure the continued safety, reliability, availability,

and maintainability of the newest A650 heavy rail fleet for full revenue service and maintain the fleet's State of Good Repair.

This recommended Contract Modification is to add the inspection, testing, and repair of cracks discovered in the vehicle truck frame to the scope of the A650 overhaul program currently underway by Talgo. This change has merit because the work fulfills the intent of the overhaul program to ensure the safety, reliability and availability of the A650 HRVs.

B. Cost/Price Analysis

The recommended price has been determined to be fair and reasonable based upon cost analysis, technical evaluation, fact finding, and negotiations.

Proposal Amount	Metro ICE	Negotiated Amount
\$5,136.812	\$1,732,350	\$5,054,030

The difference between the Metro ICE and the Negotiated Amount is attributed to a number of factors that were not fully considered in the Metro ICE.

The Metro ICE was developed using direct labor rate estimates only and did not address labor or manufacturing overheads. The correct application of fully burdened labor rates would have significantly increased the ICE amount.

The Metro ICE also underestimated transportation costs. Due to the specialized nature of the work, the non-destructive testing and the repairs will be performed at a subcontractor's facility and this will require specialized transportation.

Another major factor not considered in the Metro ICE is the schedule impact. The inclusion of this work into the A650 overhaul program will require an extension of the project by 2 months. The costs associated with the schedule extension were not included in the Metro ICE. Other factors such as travel costs and profit were also not part of the Metro ICE.

DEOD SUMMARY

HEAVY RAIL VEHICLE OVERHAUL AND CRITICAL COMPONENT REPLACEMENT PROGRAM/CONTRACT NUMBER A650-2015

A. Small Business Participation

Talgo Inc. is a Transit Vehicle Manufacturer (TVM) and is on the Federal Transit Administration's (FTA) list of eligible TVMs. Talgo Inc. reported that it submitted its overall Disadvantaged Business Enterprise (DBE) goal of 1.65% to FTA for FY19, in compliance with 49 Code of Federal Regulations (CFR) Section 26.49(a)(1). TVMs submit overall DBE goals and report participation directly to FTA annually.

B. Living Wage and Service Contract Worker Retention Policy Applicability

The Living Wage and Service Contract Worker Retention Policy is not applicable to this contract. Rolling stock solicitations are not one of the covered contract types in Metro's Living Wage and Service Contract Worker Retention Policy.

C. Prevailing Wage Applicability

Prevailing Wage is not applicable to this contract.

D. Project Labor Agreement/Construction Careers Policy

Project Labor Agreement/Construction Careers Policy is not applicable to this Contract. Project Labor Agreement/Construction Careers Policy is applicable only to construction contracts that have a construction related value in excess of \$2.5 million.

E. Local Employment Plan Program (LEP)

Local Employment Plan Program is applicable on this contract. Staff will be monitoring progress on all LEP commitments, including the contractual commitments in creating employment opportunities in Los Angeles County and the 10% commitment to hire disadvantaged workers.

Local Employment Plan Commitment:

LEP Commitment for Base + All Options	\$2,212,675
LEP Actuals to Date	\$0.00
Balance of LEP to be attained	\$2,212,675
Disadvantaged Workers attainment	\$0.00

The manufacturer LEP Plan identifies that the LEP achievements and Disadvantaged Worker participation will commence in the assembly stage of the contract.

OPERATIONS, SAFETY AND CUSTOMER EXPERIENCE COMMITTEE JULY 18, 2019

SUBJECT: ENTERPRISE ASSET MANAGEMENT SYSTEM

ACTION: APPROVE RECOMMENDATIONS

RECOMMENDATION

CONSIDER:

- A. ESTABLISHING a Life of Project (LOP) Budget for the Enterprise Asset Management (EAM) Project, capital project number 207155, in the amount of \$45,800,000;
- B. AUTHORIZING the Chief Executive Officer to award a 37-month, firm fixed price Contract No. PS51755000 to 21Tech LLC, in the amount of \$10,205,207 for the Enterprise Asset Management System Software Acquisition and Software Support Services, subject to the resolution of any properly submitted protest(s), if any; and
- C. APPROVING Contract Modification Authority specific to Contract No. PS51755000 in the amount of \$2,041,041 or 20% of the total contract value, to cover the costs of any unforeseen services or license fees that may be necessary to complete this phase of the project.

ISSUE

The Maintenance and Materials Management System (M3) is a mission critical system with over 3,200 daily users. M3 is used extensively across Metro for Work Management, Maintenance and Repair of Assets, Material Management, Incident Tracking, and Timekeeping for operational employees. The 15 years old system is no longer supported by the software vendor. In addition, it does not comply with some of the critical functionality now required for meeting the Federal "Moving Ahead for Progress in the 21st Century Act" (MAP 21 State of Good Repair) requirements.

This Contract is for the acquisition of the core Enterprise Asset Management System (EAMS) software as well as the installation and demonstration of its initial/provisional acceptance by Metro. The Contractor is also responsible for the integration of third-party software proposed as part of their solution.

The LOP Budget includes the purchase of software and related support services (Phase 1), a Contract for a Systems Implementation, Integration and Business Process Services Provider (Phase

2) and the hardware and internal resources required to complete the three-year project.

Approval of the LOP Budget, award of the Contract for Phase 1, and Contract Modification Authority will allow Metro to replace the current legacy-based M3 system and provide a scalable technology to support Metro's expanding transit services with the tools needs to comply with MAP 21 State of Good Repair.

BACKGROUND

In November of 2017, the Metro Board of Directors was notified of Metro's assessment of the M3 system and intent to proceed with the procurement of a replacement EAM system. As the software is no longer supported or maintained by the vendor, the current EAM (M3) system is an aging technology application impacting employee productivity, operations, maintenance expenses, and the ability to create data-driven maintenance strategies.

Metro intends to replace the current M3 system with a modern Commercial Off-the-Shelf (COTS) EAMS solution that includes:

- Implementing a new, modern transportation asset management software solution with comprehensive functionality including linear asset management, GIS, and mobility features.
- Implementing updated business processes across all functional areas that, when coupled with
 the EAMS software, will result in more efficient operations (i.e., improved productivity) and
 more effective asset management while enhancing data quality using industry-accepted asset
 classification schemes and hierarchy structures; refinement of location hierarchy and location
 codes; including asset condition scoring readily accessible by management for improved
 decision making and regulatory reporting.

DISCUSSION

Staff is requesting approval for a LOP of \$45,800,000 be established to replace the current M3 System and implement business process improvement relating to the new system. The LOP will include the contract for software and services (Contract No. PS51755000), internal labor, hardware needed to support the system and contracting with a Business Systems Implementation and Integration Service provider to determine and implement a comprehensive EAMS solution using the selected EAMS software and to develop and prepare improved standard operational processes based on industry best practices.

The Phase 1 Contractor's primary focus is to deliver and install the proposed core EAMS software and provide support for the software during the contracted term which will cover some or all of the overall EAM Program timeline. Per Metro's requirements, the Contractor will provide (a) software acquisition/licensing, (b) software technical support, (c) development, testing and documentation for interfaces between core EAMS software and the proposed third party software (TPS), (d) technical training aids/documentation to be included in the conduct of training sessions, and (e) development, testing and documentation for selected custom functionality (by Metro Task Order, if applicable).

File #: 2019-0373, File Type: Contract Agenda Number: 25.

DETERMINATION OF SAFETY IMPACT

The approval of this capital project and contract award will have a direct and positive impact to safety, service quality, system reliability, performance, and overall customer satisfaction.

FINANCIAL IMPACT

Adoption of Recommendation will establish an LOP budget of \$45.8 million for this project in Cost Center 9210 - Information Management, Capital Project 207155 - Enterprise Asset Management System Replacement (EAMS Project).

The \$4,200,000 for EAM Software Acquisition and Software Support Services is included in the FY20 budget under several accounts in Cost Center 9210 in Project 207155 - Enterprise Asset Management System Replacement (EAMS Project).

Since this is a multi-year contract, the project manager and cost center manager will be accountable for budgeting the cost in future fiscal years.

Impact to Budget

The initial source of funds for Capital Project 207155 Enterprise Asset Management System is TDA-4 for which is a State Funding Source.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

Recommendation supports strategic plan goal #1) to provide high-quality mobility options that enable people to spend less time traveling and #5) to provide responsive, accountable and trustworthy governance within the Metro organization.

ALTERNATIVES CONSIDERED

The alternative is not to approve the LOP or award the Contract for the EAMS System risking our ability to meet Federal MAP 21 State of Good Repair requirements and resulting in the continued use of the M3 software which is not supported and does not optimize maintenance and operational activities.

NEXT STEPS

Upon approval by the Board, Staff will execute Contract No. PS51755000 with 21Tech LLC for the EAMS Software Acquisition and Software Support Services and will release a Request for Proposals (RFP) for Phase 2 of the EAM Project for the System Implementation, Integration and Business Process Services.

A. Procurement Background

This Board Action is to approve Contract No. PS51755000 to 21Tech LLC to provide a Commercial Off-the-Shelf (COTS) Enterprise Asset Management System (EAMS) software solution. Board approval of contract award is subject to the resolution of any properly submitted protest.

Request for Proposals (RFP) No. PS51755 was issued in accordance with Metro's Acquisition Policy and the contract type is a firm fixed price.

Six amendments were issued during the solicitation phase of this RFP:

- Amendment No. 1 was issued on August 30, 2018 to provide proposers an option to participate in the pre-proposal conference via conference call;
- Amendment No. 2 was issued on September 6, 2018 to extend the proposal due date to October 25, 2018;
- Amendment No. 3 was issued on September 21, 2018 to provide answers to formally submitted questions;
- Amendment No. 4 was issued on October 3, 2018 to provide Attachment D (report samples) in a zip file.
- Amendment No. 5 was issued on October 9, 2018 to provide Attachment C (report samples) in a different file format.
- Amendment No. 6 was issued on October 19, 2018 to extend the proposal due date to November 1, 2018.

A pre-proposal conference was held on September 5, 2018 and was attended by 41 participants representing 27 firms. There were 210 questions submitted and responses were released prior to the proposal due date.

A total of 127 firms downloaded the RFP and were included on the plan holders list. A total of seven proposals were received by the due date of November 1, 2018.

B. Evaluation of Proposals

A Proposal Evaluation Team (PET) consisting of staff from Metro's Operations Department, Information and Technology Services Department, Vendor/Contract Management Department, Asset Management Department and Accounting Department was convened and conducted a comprehensive technical evaluation of the proposals received.

The proposals were evaluated based on a three-step evaluation criteria as outlined in the RFP. In order to be considered technically qualified to perform the services, the Proposers had to meet the Minimum Requirements on a pass/fail basis. The pass/fail requirements were that the Proposer had to demonstrate that they had implemented an Enterprise Asset Management (EAM) solution at one of the 25 largest public transit authorities with bus and rail operations or an international public transit agency of similar size. In Step 2 and Step 3, the proposals were evaluated based on the criteria outlined in the RFP and were worth a total of 150 points combined. The amount of points for each criteria are listed below and have been converted to percentages.

Step 1: Minimum Requirements	Pass/Fail
Step 2: Evaluation Criteria (100 points	66.67 percent
 Ability to Meet Software Requirements (45 points) 	30.00 percent
Project Management Plan and Timeline (15 points)	10.00 percent
 Proposer Qualification and Reference Checks (15 points) 	10.00 percent
 Technical Proposal Cost and Total Cost of Ownership 	16.67 percent
(25 points)	
Step 3: Demonstrations (50 points)	33.33 percent
Total (150 points)	100 percent

Several factors were considered when developing the evaluation criteria for this solicitation, giving the greatest importance to Step 2 which awarded the most points based on the Proposer's demonstrated ability to meet Metro's technical requirements for the system.

The PET began its independent evaluation of the proposals on November 6, 2019. Of the seven proposals received, three proposals were determined not to meet the minimum pass/fail requirements and were eliminated from further consideration. The remaining four firms' proposals were then evaluated based on the Step 2 evaluation criteria. All four remaining firms were determined to be within the competitive range and were invited to participate in the Step 3, Demonstrations, evaluation phase. The firms that were in the competitive range are listed below in alphabetical order:

- 21 Tech LLC
- Interloc Solutions, Inc.
- International Business Machines Corp.
- Trapeze Software Group Inc.

Demonstration scripts were provided to each firm approximately three weeks prior to their scheduled demonstration date. Firms were required to demonstrate how their proposed core EAMS software's functionality met Metro's requirements. The demonstrations began on January 14, 2019 and concluded on February 7, 2019.

The PET finalized their scores in February of 2019. The final scoring determined 21Tech LLC to be the highest ranked firm and Metro engaged in further technical discussions and negotiations from March 2019 through June 2019.

Qualifications Summary of Firms within the Competitive Range:

21 Tech LLC (21Tech)

21Tech is a California based firm that specializes in public sector EAM software deployments and integrations. The core software solution proposed is Infor EAM. 21Tech's experience with the Infor EAM product includes work for clients such as the San Francisco Municipal Transportation Agency, the San Francisco Department of Public Works, the Kansas City Transit Authority, the San Antonio VIA, the Toronto Metrolinx, and the Quebec RTC. For this project, 21Tech assembled a team of subcontractors that included Infor Public Sector, Inc., Bentley Systems, Inc., Accenture LLP, Knowledge Architects LLC, and Cognetic Technologies.

<u>Trapeze Software Group, Inc. (Trapeze)</u>

Trapeze is headquartered in Canada and is dedicated to public transit software solutions. With over 1,600 implementations across 15 countries worldwide, their clients include the Chicago Transit Authority, the Regional Transit District of Denver, and the Metropolitan Atlanta Rapid Transit Authority.

International Business Machines Corporation (IBM)

IBM is a globally integrated company based in New York that has been in business for over 100 years. Their proposed software solution, Maximo, is currently in production in agencies such as Amtrak, the Washington Metropolitan Area Transit Authority, and the San Francisco Bay Area Rapid Transit.

Interloc Solutions, Inc. (Interloc)

Interloc Solutions is based in Folsom, California and has been in business for approximately 14 years. As an IBM Gold Partner, Interloc focuses their work on the IBM Maximo product. Interloc has provided services to agencies such as Amtrak, BART, and most-recently, the Dallas Area Rapid Transit.

^{*}Firm provided separate proposals for different deployment solutions

C. <u>Cost/Price Analysis</u>

The recommended price has been determined to be fair and reasonable based upon an independent cost estimate, adequate price competition, cost analysis, technical evaluation, fact finding, clarifications and negotiations.

The negotiated amount of the Contract is reflective of Metro's discussions with the Proposer. The original Statement of Work requested that the proposers provide license pricing for a limited number of users and provide options and recommendations on when would be the best time to implement enterprise-wide licensing, if that was an option. During discussions, Metro determined that it would be in its best interest to secure enterprise-wide licensing for the core EAM software. The negotiated amount reflects the additional amount for the enterprise-wide licenses.

	Proposer Name	Proposal Amount	Metro ICE	Negotiated Amount
1.	21 Tech LLC –Hybrid *	\$8,983,563	\$10,498,000	\$10,205,207
2.	21 Tech LLC –Cloud *	\$9,051,423

4.	IBM -Cloud *	\$5,627,000		
5.	IBM –On-Prem *	\$11,041,000		
6.	Interloc Solutions, IncCloud	\$12,394,000		

^{*}Firm provided separate proposals for different deployment solutions

D. Background on Recommended Contractor

The recommended firm, 21Tech LLC is located in Los Altos, California and has been in business for 22 years. 21Tech is a premier Infor EAM Transit certified partner and has completed large-scale Infor EAM implementations and upgrades across the country. 21Tech's proposed solution of the core Infor EAM system, supplemented by Bentley's AssetWise suite of products, demonstrated the functionality that Metro requires across the Agency.

DEOD SUMMARY

ENTERPRISE ASSET MANAGEMENT SYSTEM SOFTWARE ACQUISITION AND SOFTWARE SUPPORT SERVICES/PS51755000

A. Small Business Participation

The Diversity and Economic Opportunity Department (DEOD) established a 10% Small Business Enterprise (SBE)/Disabled Veterans Business Enterprise (DVBE) goal for this solicitation. 21 Tech, LLC exceeded the goals with a 24.59% SBE commitment and a 3.11% DVBE commitment.

Small Business	7% SBE	Small Business	24.59% SBE
Goal	3% DVBE	Commitment	3.11% DVBE
Jour		Commitment

OPERATIONS, SAFETY, AND CUSTOMER EXPERIENCE COMMITTEE EXECUTIVE MANAGEMENT COMMITTEE JULY 18, 2019

SUBJECT: OFFICE OF THE INSPECTOR GENERAL REPORT ON METRO SECURITY

PERFORMANCE REVIEW FISCAL YEAR 2018

ACTION: RECEIVE AND FILE

RECOMMENDATION

RECEIVE AND FILE OIG report on Metro Security Performance Review Fiscal Year 2018.

ISSUE

On February 23, 2017, the Metro Board passed a motion directing that the Inspector General conduct an annual audit of each law enforcement services contract to determine how key performance indicators are measuring up against actual performance metrics. The audit is to ensure that Metro is receiving the services it is paying for.

BACKGROUND

In 2017, LACMTA (Metro) awarded three separate 5-year firm fixed unit rate contracts to the Los Angeles Police Department (LAPD), the Los Angeles County Sheriff's Department (LASD), and the Long Beach Police Department (LBPD) for transit law enforcement services to support day-to-day operations across Metro's entire service area. Metro also directly employs transit security officers who perform fare checks and bus/rail patrolling.

DISCUSSION

A. Trends in Crime, Perceptions of Safety, and Safety and Security Complaints

There are three key outcome measures that can be used to evaluate the effectiveness and trends of Metro's safety and security approach and program. These are the level of reported crime on the system, the perceptions of safety by users of the system, and the number of safety and security complaints made by users of the system.

Reported Crime

Total reported Violent Crime on the Metro System decreased by 18% between FY 2015 and FY 2018,

with most of this decrease (14%), occurring between FY 2017 and FY 2018. Total reported Property Crime on the Metro System decreased 15% between FY 2015 and FY 2018, with a decrease of 16% occurring between FY 2015 and FY 2017, and an increase of 1% occurring between FY 2017 and FY 2018.

Obtaining complete and accurate reporting of crime that occurs on the Metro System continues to be challenging. This is partially due to the fact that the Metro System operates within multiple jurisdictions with their own law enforcement agencies who respond to, handle, and report crime that may not be reported to Metro.

In addition, in the LAPD service area of the Metro System, LAPD neighborhood patrol units respond to and handle many crimes that occur within the Metro System. An unknown number of these crimes are not reported to the LAPD Transit Policing Division and so are not tracked and reported to Metro.

We recommend the Metro System Security and Law Enforcement (SSLE) Department continue to work with contract law enforcement agencies to improve the complete and accurate reporting of crime that occurs on the Metro System.

Rider Perceptions of Safety

Perception of crime and disorder on the Metro System creates a risk to the confidence in safety held by passengers and Metro employees and poses a risk to the reputation of Metro as a safe and secure system. Passengers who perceive the system to be unsafe will not use the service, and therefore reduce the number of people using transit and Metro's ridership.

Based on Metro rider surveys conducted annually, rider perceptions of safety on the Metro Train system declined slightly and rider perceptions of safety on the Metro Bus system improved slightly between FY 2015 and FY 2018. These changes in perceptions of safety are small and within the margin of error for the survey. However, it is important to continue to monitor rider perceptions of safety on the Metro System and to develop strategies to address concerns and improve that perception.

Complaints Regarding Safety and Security

Another important indicator of the public or riders' perception of the safety of the Metro System is the number of complaints received regarding safety and security. During the period from FYs 2015 to 2018, rider complaints for the bus system regarding passenger safety or conduct issues were not among the top ten complaints. However, for the rail system, rider complaints regarding passenger safety or conduct issues were the second most common complaint of the top ten complaints for FYs 2015 to 2017. For FY 2018, complaints regarding passenger safety or conduct issues dropped to five of the top ten.

We recommend the SSLE Department continue to monitor rider survey results regarding perceptions of safety of riders on the Metro System and complaints regarding safety and passenger conduct issues and develop strategies to improve those perceptions and reduce complaints.

B. Resource Monitoring and Oversight

Agenda Number: 26.

The SSLE Department is charged with ongoing oversight of the contracted law enforcement services as well as the operations of Metro Security.

Audits of Contracted Law Enforcement Personnel Presence

Metro has and will continue to have a substantial investment in resources devoted to system safety and security. Ensuring that these resources are effectively and efficiently used is very important.

Oversight and monitoring of contracted law enforcement resources has been problematic. Metro has had some difficulty in ensuring that law enforcement personnel assigned to Metro are actually present and performing as assigned. Historically, Metro has not had an effective means of verifying the accuracy of staffing information provided by contract law enforcement, or of verifying that personnel charging time on the Metro contract are actually present and providing the contracted services.

Beginning with FY 2018, the SSLE Department implemented regular "audits" of law enforcement personnel to monitor consistency between personnel time reported and the invoiced costs. Beginning in September 2017, Metro also began conducting "field audits" of law enforcement personnel in addition to the comparison audits of information provided by contracted law enforcement agencies. These field audits involve taking the roster of law enforcement personnel assigned to work and verifying that those personnel are actually in the field and providing the contracted service. These field audits strengthen Metro's contract oversight and monitoring.

GPS Based Contracted Law Enforcement Oversight and Monitoring

The SSLE Department has been working to develop and implement an effective method of tracking and monitoring the activities of safety and security resources deployed on the Metro System using the GPS function on smartphones used by Metro safety and security personnel.

The Mobile Phone Validators (MPV) provided to contracted law enforcement officers are now GPS enabled and are able to provide information on the location and movement of the MPV and law enforcement resources. Metro has not yet begun using the GPS function and information generated to track or monitor the activities of contracted law enforcement resources.

We recommend the SSLE Department should work to develop a more macro approach to oversight and monitoring of contracted law enforcement resources using the GPS function of the MPV assigned to contracted law enforcement personnel and the data generated from them.

Oversight of Other Law Enforcement Contract Requirements

In our review of compliance with the contract terms, we found some instances of non-compliance by all three law enforcement agencies with qualifications and training of personnel assigned, reports and information being provided to Metro, equipment provided under the contract, and appropriate support for invoices submitted. Increased monitoring and oversight of these requirements seems warranted given the size of the contracts and the importance of the services being provided.

We recommend the SSLE Department should consider expanding monitoring and oversight of other contract requirements including qualifications and training of personnel, required reporting, equipment provided, and invoice support and compliance with the contract. We also recommend

Metro seek reimbursement for overbillings and overpayments resulting from noncompliance with contract terms during FY 2018.

C. Key Performance Indicators (KPI)

It is essential that Metro clearly define performance expectations for each of the contract law enforcement agencies and use meaningful performance indicators to evaluate how well these expectations are being met.

Reporting of Crime and Incident Response Time Indicators

Two of the KPI included in each of the law enforcement contracts were intended to provide information on the outcomes of the law enforcement service provided including changes in the number of crimes reported and increases in crime incident response times.

In crime reporting the emphasis should be on violent crime, which is obviously the most impactful to the Metro System and has the greatest impact on Metro's riders. Reporting all crime in the aggregate is less meaningful because violent crimes such as homicide, robbery and rape are given the same weight as lesser crimes such as larceny, petty theft, and vandalism.

A primary workload for law enforcement is responding to and handling incidents that occur on the Metro System or calls for service. Metro's SSLE Department currently only collects and reports response time information for emergency calls for service. While emergency calls for service are obviously the most important calls, tracking and reporting response time on less urgent incidents and calls for service is also important.

Often these lower priority calls for service involve quality of life issues and concerns as well as victims of property crimes. A slow response to these incidents can have a negative impact on the perception of the riding public transit that the system is safe and well protected. In addition, not requiring contract law enforcement agencies to track and report these response times communicates to them and their officers that these calls are not important.

We recommend that Metro's SSLE Department begin to collect and report on response times for all calls for service that require a law enforcement response.

Visibility of Law Enforcement Security Personnel Indicators

Providing a visible security presence within the Metro System is an important strategy for providing both a sense and reality of safety. Three of the KPI included in each of the law enforcement contracts were intended to provide information on the visibility of law enforcement security personnel on the Metro System. These are 1) the ratio of proactive versus dispatched activity, 2) the number of foot and vehicle patrols of bus stops, transit centers, train platforms, plazas, and stations, and 3) the number of bus and train boardings.

Contract law enforcement agencies were only able to report on the ratio of proactive versus dispatched activity. Contract law enforcement agencies were not able to report on the other two KPI. While these are important indicators and would provide useful information on the level of activity and visibility of contracted law enforcement personnel, it was not practical for the law enforcement

agencies to reliably collect meaningful information for these indicators. As discussed in Section B of this report, using the GPS function and the data generated could provide more reliable and meaningful information on the amount of time contracted law enforcement officers spend on each of these activities related to KPI 2 and 3 above.

Law Enforcement Personnel Presence Indicator

One of the KPI included in each of the law enforcement contracts was intended to provide information on the presence of the contracted law enforcement personnel. This is the ratio of staffing levels and vacant assignments. This indicator is important in both communicating to the contract law enforcement agencies the need to actually staff contracted assignments and to report how effectively these positions are actually being staffed. Reported staffing levels collectively were at 98.5% or above during FY 2018.

Baseline Expectations and Other Potential Performance Indicators

It is important to establish baseline expectations or targets for each performance indicator. This not only clearly communicates performance expectations, but it also can help drive improvements in performance through the development and implementation of new strategies. Baseline performance levels for each KPI have not been developed.

We recommend Metro's SSLE Department work with contract law enforcement agencies to establish baseline or target performance levels for each of the KPI currently in use. They should also work together to determine if additional KPI would be appropriate and meaningful.

D. Community Policing

Community policing within a transit system should place an emphasis on quality of life issues. The customers of the Metro System must feel safe and secure. The presence of security, in whatever form, must have a "felt presence;" that is, they must be visible and engaged without becoming oppressive and threatening.

Metro Community Policing Plan

The Metro SSLE Department is in the process of developing a community policing plan for the Metro System. The Metro Community Policing Plan will be a unified plan instead of having each of the three law enforcement agencies develop individual community policing plans. The Metro Community Policing Plan is part of Metro's new Equity Platform, which aims to assure equity across all programs impacting transit service, planning, and policing. The SSLE Department expects to have a draft Metro Community Policing Plan completed by the Fall of 2019.

We recommend the Metro SSLE Department continue to develop the Metro Community Policing Plan and ensure it includes specific training in Problem Oriented Policing for law enforcement personnel, attendance by law enforcement personnel at community meetings, and protocols to obtain feedback from bus and rail managers.

Law Enforcement Service Request (LESR) System

Metro employees, including bus and train operators, maintenance personnel, customer service

representatives, and others are the front-line representatives of Metro and have ongoing and direct interaction with the riding public. The LESR system implemented in FY 2018 should provide good information on Metro employee safety and security issues and concerns on the system going forward.

During FY 2018, a total of 935 law enforcement service requests were generated by Metro employees. Our review of the requests and responses indicate that law enforcement agencies are using the LESR to identify and resolve issues and concerns.

E. Compliance with Specific Contract Requirements

The contracts with the three law enforcement agencies each contain specific requirements related to personnel and training, billing, required reports, and other contractual requirements.

Overview of Law Enforcement Contract Requirements

Each of the contracts with the three law enforcement agencies includes specific contract requirements. This includes requirements for the experience and training of law enforcement personnel assigned to Metro, billing information and supporting documentation, required information and reports on activities, and other information on equipment provided.

Los Angeles Police Department (LAPD) Contract Compliance

The following are the results of our review of LAPD's contract compliance:

- LAPD was not in compliance with two of the contract requirements related to personnel and training.
- The total amount billed and paid to LAPD for FY 2018 did not exceed the estimated cost specified in the contract for Year 1.
- Invoices submitted to Metro were based on actual services provided and supported by daily summary of assignments and hours worked using the cost data from the payroll system.
 However, actual payroll records were not submitted with the invoices as required.
- For overtime charges, we were unable to determine whether the billing rates exceeded the approved maximum fully burdened hourly rates because the list of maximum fully burdened hourly rates that LAPD submitted to Metro was not in compliance with the contract.
- Eight labor classifications totaling \$281,400.77 were not found in the required list of maximum fully burdened hourly rates.
- For straight time charges, we identified a total amount of \$3,874.99 as overbilled by LAPD and overpaid by Metro.
- LAPD invoiced an overhead rate of 12.76% for overtime hours that was unsupported by

adequate documentation.

- LAPD met 8 out of 9 contract requirements for submitting required reports to Metro. The
 reports were submitted with adequate information and in a format that allows Metro to
 determine the calculation of the reported figures. However, no information was provided as to
 when these reports were submitted to Metro so we were unable to determine if the reports
 were submitted on time in accordance with the contract.
- Exhibit E of the contract provides a list of equipment that the LAPD was supposed to provide under the contract. We found that LAPD did not provide the equipment in the quantities listed in Exhibit E.

Los Angeles County Sheriff's Department (LASD) Contract Compliance

- LASD was not in compliance with two of the contract requirements related to personnel and training.
- The total amount billed and paid for FY 2018 to LASD did not exceed the estimated cost specified in the contract for Year 1.
- Except for a credit amount understatement of \$1,699.68, the billing rates were consistent with Metro's approved rates. Invoices were based on actual services provided and supported by Payment Certification, the Service Level and Billing Status Report, and the Patrol Compliance Report.
- LASD met 7 out of 8 contract requirements for required reports. The reports were submitted in a timely manner, with adequate information and in a format that allows Metro to determine the calculation of the reported figures.

Long Beach Police Department (LBPD) Contract Compliance

- LBPD was not in compliance with the contract requirement for Transit Policing training.
- The total amount billed and paid for FY2018 exceeded the estimated cost specified in the contract for Year 1 by \$885,578.
- Daily summary of assignments for all hours worked and payroll records were not submitted with the invoices.
- The billing rates exceeded Metro's approved maximum fully burdened hourly rates for three labor categories. Only one of the three labor categories was listed in the approved maximum fully burdened hourly rates. We identified a total amount of \$14,643.89 as overbilled by LBPD

and overpaid by Metro.

- The billing methodology for equipment cost was not consistent with the contract agreement.
- LBPD met 8 out of 9 contract requirements for required reports. The reports were submitted
 with adequate information and in a format that allows Metro to determine the calculation of the
 reported figures. No information was provided as to when these reports were submitted to
 Metro so we were unable to determine if the reports were submitted to Metro on time.

F. Fare and Code of Conduct Compliance Enforcement

Enforcing fare compliance on the Metro System as well as the Metro Customer Code of Conduct is a key element of Metro's safety and security mission.

Code of Conduct and Parking Enforcement and Citations

The vast majority (98%) of the citations for Metro Code of Conduct violations are issued by Metro Security. This demonstrates the substantial change in the transfer in responsibility for fare and code of conduct enforcement from contracted law enforcement to Metro Security. The number of Code of Conduct citations issued increased substantially (162%) between FY 2017 and FY 2018. Total citations are 35% below the level for FY 2013.

Performance Indicators for Metro Security

The role and responsibilities of Metro Security have expanded substantially over the past few years and now includes primary responsibility for enforcing Metro's Code of Conduct on the system, including fare enforcement. Given this, it is important that Metro Security have an effective accountability system, including meaningful performance indicators.

The SSLE Department reports they will be developing KPIs for Metro Security during 2019. These KPIs will cover two key areas: Fare Enforcement and Critical Infrastructure Protection. The fare enforcement KPI will focus on effective strategies to increase fare compliance. The critical infrastructure KPI will focus on assessing and mitigating security threats to the transit system and its critical structures.

FINANCIAL IMPACT

Adoption of the recommendations in this report does not increase the financial impact on the agency.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

The recommendations in this report support Strategic Plan Goal 2.1 (Improving security), Goal 5.6 (fostering and maintaining a strong safety culture), and Goal 2 (delivering outstanding trip experiences).

NEXT STEPS

File #: 2019-0481, File Type: Informational Report Agenda Number: 26.

Metro management should:

 Complete the Schedule for Tracking Metro's Proposed Actions in response to the recommendations provided in Appendix B of the report as determinations are made on implementing the recommendations; and

• Periodically report to the Metro Board on the status of actions taken to implement the recommendations.

Metro Board Members

Re: Report on Metro Security Performance Review Fiscal Year 2018

Dear Metro Board Members:

The Office of the Inspector General (OIG) conducted a security-focused review to determine the level of performance for transit security function services (law enforcement and Metro's Transit Security Officers) during FY 2018. Since 2009, Metro has had a contract with the Los Angeles County Sheriff's Department (LASD) to provide Metro with transit policing services. Beginning July 1, 2017, Metro implemented a new transit security strategy, which includes obtaining services from three law enforcement agencies – the City of Los Angeles Police Department (LAPD), the City of Long Beach Police Department (LBPD), and the Los Angeles County Sheriff's Department (LASD). Metro also directly employs transit security officers and began using Metro security officers for fare checks and bus/rail patrolling.

The Metro Board directed the OIG to perform an annual audit of each law enforcement services contract to determine how key performance indicators are measuring up against metrics and ensure that Metro is receiving the services it is paying for. To accomplish this directive, the OIG prepared a scope of work for the Request for Proposal. BCA Watson Rice WR, LLP, was hired to perform the security performance review for fiscal year 2018, and completed the attached report.

The review identified a number of recommendations for improving transit security performance. The Appendix to the report lists 25 recommendations that will enhance performance efficiency and effectiveness in the following transit security areas:

- Crimes reporting accuracy and completeness
- Report response times for all categories of dispatched incident calls for service
- Oversight and monitoring law enforcement resources
- Review, revise, and adopt key performance indicators (KPI) for law enforcement services including base line target levels of performance for each KPI, and develop **KPIs for Metro Transit Security**
- Develop a Metro Community Policing Plan
- Monitor each law enforcement services contract to ensure compliance with contract requirements in areas such as:
 - Meeting required personnel certifications and completing required training
 - o Monitoring billings and submission of payroll records and other required supporting documentation
 - Providing maximum hourly rates for each labor classification
 - o Submitting required reports in a timely manner

- o Providing the equipment in the quantities required by the contract
- Returning to Metro overbilled and overpaid amounts (LAPD \$3,874.99) and (LBPD \$164,643.89), and issuing an additional credit amount to Metro (LASD \$1,699.68) because the monthly rate to calculate the original credit did not comply with the contract.

We appreciate the assistance provided by Metro staff during this review. I am available to answer any questions the Board Directors may have regarding this report.

Sincerely,

Karen Gorman

Inspector General

Metro Office of the Inspector General

Metro Security Performance Review Fiscal Year 2018

June 2019

FINAL REPORT

1. Executive Summary

Background and Objectives

In 2017, Metro awarded three separate 5-year firm fixed unit rate contracts to the Los Angeles Police Department (LAPD), the Los Angeles County Sheriff's Department (LASD), and the Long Beach Police Department (LBPD) ("Contractors") for transit law enforcement services to support day-to-day operations across Metro's entire service area.

On February 23, 2017, the Metro Board passed a motion directing that the Inspector General be tasked with annually auditing each law enforcement services contract to determine how key performance indicators are measuring up against actual performance metrics. The audit is to ensure that Metro is receiving the services it is paying for.

A. Trends in Crime, Perceptions of Safety, and Safety and Security Complaints

There are three key outcome measures that can be used to evaluate the effectiveness and trends of Metro's safety and security approach and program. These are the level of reported crime on the system, the perceptions of safety by users of the system, and the number of safety and security complaints made by users of the system.

Reported Crime

Total reported Violent Crime on the Metro System decreased by 18% between FY 2015 and FY 2018, with most of this decrease (14%), occurring between FY 2017 and FY 2018. Total reported Property Crime on the Metro System decreased 15% between FY 2015 and FY 2018, with a decrease of 16% occurring between FY 2015 and FY 2017, and an increase of 1% occurring between FY 2017 and FY 2018.

Obtaining complete and accurate reporting of crime that occurs on the Metro System continues to be challenging. This is partially due to the fact that the Metro System operates within multiple jurisdictions with their own law enforcement agencies who respond to, handle, and report crime that may not be reported to Metro.

In addition, in the LAPD service area of the Metro System, LAPD neighborhood patrol units respond to and handle many crimes that occur within the Metro System. An unknown number of these crimes are not reported to the LAPD Transit Policing Division and so are not tracked and reported to Metro.

We recommend the Metro System Security and Law Enforcement (SSLE) Department continue to work with contract law enforcement agencies to improve the complete and accurate reporting of crime that occurs on the Metro System.

Rider Perceptions of Safety

Perception of crime and disorder on the Metro System creates a risk to the confidence in safety held by passengers and Metro employees and poses a risk to the reputation of Metro as a safe and secure system. Passengers who perceive the system to be unsafe will not use the service, and therefore reduce the number of people using transit and Metro's ridership.

Based on Metro rider surveys conducted annually, rider perceptions of safety on the Metro Train system declined slightly and rider perceptions of safety on the Metro Bus system improved slightly between FY 2015 and FY 2018. These changes in perceptions of safety are small and within the margin of error for the survey. However, it is important to continue to monitor rider perceptions of safety on the Metro System and to develop strategies to address concerns and improve that perception.

Complaints Regarding Safety and Security

Another important indicator of the public or riders' perception of the safety of the Metro System is the number of complaints received regarding safety and security. During the period from FYs 2015 to 2018, rider complaints for the bus system regarding passenger safety or conduct issues were not among the top ten complaints. However, for the rail system, rider complaints regarding passenger safety or conduct issues were the second most common complaint of the top ten complaints for FYs 2015 to 2017. For FY 2018, complaints regarding passenger safety or conduct issues dropped to five of the top ten.

We recommend the SSLE Department continue to monitor rider survey results regarding perceptions of safety of riders on the Metro System and complaints regarding safety and passenger conduct issues and develop strategies to improve those perceptions and reduce complaints.

More information on trends in crime, perceptions of safety, and safety and security complaints can be found beginning on page 14 of this report.

B. Resource Monitoring and Oversight

The SSLE Department is charged with ongoing oversight of the contracted law enforcement services as well as the operations of Metro Security.

Audits of Contracted Law Enforcement Personnel Presence

Metro has and will continue to have a substantial investment in resources devoted to

system safety and security. Ensuring that these resources are effectively and efficiently used is very important.

Oversight and monitoring of contracted law enforcement resources has been problematic. Metro has had some difficulty in ensuring that law enforcement personnel assigned to Metro are actually present and performing as assigned. Historically, Metro has not had an effective means of verifying the accuracy of staffing information provided by contract law enforcement, or of verifying that personnel charging time on the Metro contract are actually present and providing the contracted services.

Beginning with FY 2018, the SSLE Department implemented regular "audits" of law enforcement personnel to monitor consistency between personnel time reported and the invoiced costs. Beginning in September 2017, Metro also began conducting "field audits" of law enforcement personnel in addition to the comparison audits of information provided by contracted law enforcement agencies. These field audits involve taking the roster of law enforcement personnel assigned to work and verifying that those personnel are actually in the field and providing the contracted service. These field audits strengthen Metro's contract oversight and monitoring.

GPS Based Contracted Law Enforcement Oversight and Monitoring

The SSLE Department has been working to develop and implement an effective method of tracking and monitoring the activities of safety and security resources deployed on the Metro System using the GPS function on smartphones used by Metro safety and security personnel.

The Mobile Phone Validators (MPVs) provided to contracted law enforcement officers are now GPS enabled and are able to provide information on the location and movement of the MPVs and law enforcement resources. Metro has not yet begun using the GPS function and information generated to track or monitor the activities of contracted law enforcement resources.

We recommend the SSLE Department should continue to work to develop a more macro approach to oversight and monitoring of contracted law enforcement resources using the GPS function of the MPV assigned to contracted law enforcement personnel and the data generated from them.

Oversight of Other Law Enforcement Contract Requirements

In our review of compliance with the contract terms, we found some instances of noncompliance with qualifications and training of personnel assigned, reports and information being provided to Metro, equipment provided under the contract, and appropriate support for invoices submitted. Increased monitoring and oversight of these requirements seems warranted given the size of the contracts and the importance of the services being provided.

We recommend the SSLE Department should consider expanding monitoring and oversight of other contract requirements including qualifications and training of personnel, required reporting, equipment provided, and invoice support and compliance with the contract. We also recommend Metro seek reimbursement for overbillings and overpayments resulting from noncompliance with contract terms during FY 2018.

More information on resource monitoring and oversight can be found beginning on page 21 of this report.

C. Key Performance Indicators (KPIs)

It is essential that Metro clearly define performance expectations for each of the contract law enforcement agencies and use meaningful performance indicators to evaluate how well these expectations are being met. The KPIs for each of the three contracted law enforcement agencies are listed in Exhibit 6 on page 25 of this report.

Reporting of Crime and Incident Response Time Indicators

Two of the KPI included in each of the law enforcement contracts were intended to provide information on the outcomes of the law enforcement service provided including changes in the number of crimes reported and increases in crime incident response times.

In crime reporting the emphasis should be on violent crime, which is obviously the most impactful to the Metro System and has the greatest impact on Metro's riders. Reporting all crime in the aggregate is less meaningful because violent crimes such as homicide, robbery and rape are given the same weight as lesser crimes such as larceny, petty theft, and vandalism.

A primary workload for law enforcement is responding to and handling incidents that occur on the Metro System or calls for service. Metro's SSLE Department currently only collects and reports response time information for emergency calls for service. While emergency calls for service are obviously the most important calls, tracking and reporting response time on less urgent incidents and calls for service is also important.

Often these lower priority calls for service involve quality of life issues and concerns as well as victims of property crimes. A slow response to these incidents can have a negative impact on the perception of the riding public transit that the system is safe and well protected. In addition, not requiring contract law enforcement agencies to track and report these response times communicates to them and their officers that these calls are not important.

We recommend that Metro's SSLE Department begin to collect and report on response times for all calls for service that require a law enforcement response.

Visibility of Law Enforcement Security Personnel Indicators

Providing a visible security presence within the Metro System is an important strategy for providing both a sense and reality of safety. Three of the KPI included in each of the law enforcement contracts were intended to provide information on the visibility of law enforcement security personnel on the Metro System. These are 1) the ratio of proactive versus dispatched activity, 2) the number of foot and vehicle patrols of bus stops, transit centers, train platforms, plazas, and stations, and 3) the number of bus and train boardings.

Contract law enforcement agencies were only able to report on the ratio of proactive versus dispatched activity. Contract law enforcement agencies were not able to report on the other two KPI. While these are important indicators and would provide useful information on the level of activity and visibility of contracted law enforcement personnel, it was not practical for the law enforcement agencies to reliably collect meaningful information for these indicators. As discussed in Section B of this report, using the GPS function and the data generated could provide more reliable and meaningful information on the amount of time contracted law enforcement officers spend on each of these activities related to KPI 2 and 3 above.

Law Enforcement Personnel Presence Indicator

One of the KPI included in each of the law enforcement contracts was intended to provide information on the presence of the contracted law enforcement personnel. This is the ratio of staffing levels and vacant assignments. This indicator is important in both communicating to the contract law enforcement agencies the need to actually staff contracted assignments and to report how effectively these positions are actually being staffed. Reported staffing levels collectively were at 98.5% or above during FY 2018.

Baseline Expectations and Other Potential Performance Indicators

It is important to establish baseline expectations or targets for each performance indicator. This not only clearly communicates performance expectations, but it also can help drive improvements in performance through the development and implementation of new strategies. Baseline performance levels for each KPI have not been developed.

We recommend Metro's SSLE Department work with contract law enforcement agencies to establish baseline or target performance levels for each of the KPI currently in use. They should also work together to determine if additional KPI would be appropriate and meaningful.

More information on KPI can be found beginning on page 25 of this report.

D. Community Policing

Community policing within a transit system should place an emphasis on quality of life issues. The customers of the Metro System must feel safe and secure. The presence of security, in whatever form, must have a "felt presence;" that is, they must be visible and engaged without becoming oppressive and threatening.

Metro Community Policing Plan

The Metro SSLE Department is in the process of developing a community policing plan for the Metro System. The Metro Community Policing plan will be a unified plan instead of having each of the three law enforcement agencies develop individual community policing plans. The Metro Community Policing plan is part of Metro's new Equity Platform, which aims to assure equity across all programs impacting transit service, planning, and policing. The SSLE Department expects to have a draft Metro Community Policing Plan completed by the Fall of 2019.

We recommend the Metro SSLE Department continue to develop the Metro Community Policing plan and ensure it includes specific training in Problem Oriented Policing for law enforcement personnel, attendance by law enforcement personnel at community meetings, and protocols to obtain feedback from bus and rail managers.

More information on Community Policing can be found beginning on page 37 of this report.

Law Enforcement Service Request (LESR) System

Metro employees, including bus and train operators, maintenance personnel, customer service representatives, and others are the front-line representatives of Metro and have ongoing and direct interaction with the riding public. LESR system implemented in FY 2018 should provide good information on Metro employee safety and security issues and concerns on the system going forward.

During FY 2018, a total of 935 law enforcement service requests were generated by Metro employees. Our review of the requests and responses indicate that law enforcement agencies are using the LESR to identify and resolve issues and concerns.

E. Compliance with Specific Contract Requirements

The contracts with the three law enforcement agencies each contain specific requirements related to personnel and training, billing, required reports, and other contractual requirements.

Overview of Law Enforcement Contract Requirements

Each of the contracts with the three law enforcement agencies includes specific contract requirements. This includes requirements for the experience and training of law enforcement personnel assigned to Metro, billing information and supporting documentation, required information and reports on activities, and other information on equipment provided.

Los Angeles Police Department (LAPD) Contract Compliance

The following are the results of our review of LAPD's contract compliance:

- LAPD was not in compliance with two of the contract requirements related to personnel and training.
- The total amount billed and paid to LAPD for FY 2018 did not exceed the estimated cost specified in the contract for Year 1.
- Invoices submitted to Metro were based on actual services provided and supported by daily summary of assignments and hours worked using the cost data from the payroll system. However, actual payroll records were not submitted with the invoices as required.
- For overtime charges, we were unable to determine whether the billing rates exceeded the approved maximum fully burdened hourly rates because the list of maximum fully burdened hourly rates that LAPD submitted to Metro was not in compliance with the contract.
- Eight labor classifications totaling \$281,400.77 were not found in the required list of maximum fully burdened hourly rates.
- For straight time charges, we identified a total amount of \$3,874.99 as overbilled by LAPD and overpaid by Metro.
- LAPD invoiced an overhead rate of 12.76% for overtime hours that was unsupported by adequate documentation.
- LAPD met 8 out of 9 contract requirements for submitting required reports to Metro.
 The reports were submitted with adequate information and in a format that allows
 Metro to determine the calculation of the reported figures. However, no information
 was provided as to when these reports were submitted to Metro so we were unable
 to determine if the reports were submitted on time in accordance with the contract.
- Exhibit E of the contract provides a list of equipment that the LAPD was supposed to provide under the contract. We found that LAPD did not provide the equipment

in the quantities listed in Exhibit E.

More information on LAPD's contract compliance can be found beginning on page 49 of this report.

Los Angeles County Sheriff's Department (LASD) Contract Compliance

- LASD was not in compliance with two of the contract requirements related to personnel and training.
- The total amount billed and paid for FY 2018 to LASD did not exceed the estimated cost specified in the contract for Year 1.
- Except for a credit amount understatement of \$1,699.68, the billing rates were consistent with Metro's approved rates. Invoices were based on actual services provided and supported by Payment Certification, the Service Level and Billing Status Report, and the Patrol Compliance Report.
- LASD met 7 out of 8 contract requirements for required reports. The reports were submitted in a timely manner, with adequate information and in a format that allows Metro to determine the calculation of the reported figures.

More information on LASD's contract compliance can be found beginning on page 63 of this report.

Long Beach Police Department (LBPD) Contract Compliance

- LBPD was not in compliance with the contract requirement for Transit Policing training.
- The total amount billed and paid for FY 2018 exceeded the estimated cost specified in the contract for Year 1 by \$885,578.
- Daily summary of assignments for all hours worked and payroll records were not submitted with the invoices.
- The billing rates exceeded Metro's approved maximum fully burdened hourly rates for three labor categories. Only one of the three labor categories was listed in the approved maximum fully burdened hourly rates. We identified a total amount of \$14,643.89 as overbilled by LBPD and overpaid by Metro.
- The billing methodology for equipment cost was not consistent with the contract agreement.
- LBPD met 8 out of 9 contract requirements for required reports. The reports were submitted with adequate information and in a format that allows Metro to determine

the calculation of the reported figures. No information was provided as to when these reports were submitted to Metro so we were unable to determine if the reports were submitted to Metro on time.

More information on LBPD's contract compliance can be found beginning on page 70 of this report.

F. Fare and Code of Conduct Compliance Enforcement

Enforcing fare compliance on the Metro System as well as the Metro Customer Code of Conduct is a key element of Metro's safety and security mission.

Code of Conduct and Parking Enforcement and Citations

The vast majority (98%) of the citations for Metro Code of Conduct violations are issued by Metro Security. This demonstrates the substantial change in the transfer in responsibility for fare and code of conduct enforcement from contracted law enforcement to Metro Security. The number of Code of Conduct citations issued increased substantially (162%) between FY 2017 and FY 2018. Total citations are 35% below the level for FY 2013.

Performance Indicators for Metro Security

The role and responsibilities of Metro Security have expanded substantially over the past few years and now includes primary responsibility for enforcing Metro's Code of Conduct on the system, including fare enforcement. Given this, it is important that Metro Security have an effective accountability system, including meaningful performance indicators.

The SSLE Department reports they will be developing KPI for Metro Security during 2019. These KPI will cover two key areas: Fare Enforcement and Critical Infrastructure Protection. The fare enforcement KPI will focus on effective strategies to increase fare compliance. The critical infrastructure KPI will focus on assessing and mitigating security threats to the transit system and its critical structures.

More information on fare and code of conduct compliance can be found beginning on page 80 of this report.

2. Background

The Los Angeles County Metropolitan Transportation Authority (Metro) is the region's principal agency for multi-modal transit operations. Metro operates transit service from eleven (11) geographically distinct bus divisions, four light rail lines, and two subway lines. In addition, critical rail infrastructure includes Union Station, 7th Street/Metro Center, and Willowbrook/Rosa Parks Station. Critical bus infrastructure includes the Harbor/Gateway Station and El Monte Transit Center.

In 2017, Metro awarded three separate 5-year firm fixed unit rate contracts to the LAPD, the LASD, and the LBPD ("Contractors") for transit law enforcement services to support day-to-day operations across Metro's entire service area. The objective of this review is to determine and verify the level of performance being reported for transit security function services for LAPD, LASD, LBDP, and Metro's Transit Security Officers during FY 2018 (July 1, 2017 to June 30, 2018).

- LAPD Contract No. PS5862100LAPD24750: On March 1, 2017, Metro entered a
 5-year firm fixed unit rate contract with LAPD to provide transit law enforcement
 services within the specified coverage areas as indicated in Attachments 1 and 2
 of the Statement of Work (SOW) in the contract. This contract became effective on
 March 1, 2017, and ends on June 30, 2022. The total contract amount is not-toexceed \$369,330,499.
- LASD Contract No. PS5863200LASD24750: On September 1, 2017, Metro entered a 5-year firm fixed unit rate contract with LASD to provide transit law enforcement services within the specified coverage areas as indicated in Attachments 1 and 2 of the SOW in the contract. This contract became effective on September 1, 2017, and ends on June 30, 2022. The total contract amount is not-to-exceed \$246,270,631.
- LBPD Contract No. PS5862300LBPD24750: On March 23, 2017, Metro entered a
 5-year firm fixed unit rate contract with LBPD to provide transit law enforcement
 services within the specified coverage areas as indicated in Attachments 1 and 2
 of the SOW in the contract. This contract became effective on March 23, 2017,
 and ends on June 30, 2022. The total contract amount is not-to-exceed
 \$30,074,628.

Except for different service coverage areas specified in Attachments 1 and 2 of each contract, the three contracts have the same or similar scope of work including specific responsibilities, training requirements, reporting requirements (including reports and

documents submission), monthly key performance indicators (KPI), and billing requirements. The contracts state that the Contractor is responsible for the following:

- Augment Contractor or regional response to 911 emergency, priority, and routine calls for service;
- Crime analysis and reporting;
- Augment Contractor or regional criminal investigations, accident investigations, and law enforcement response to major incidents;
- Reduce system-wide vulnerability to terrorism;
- Conduct joint anti-terrorism drills, training sessions, and intelligence sharing with other local, state, and federal law enforcement agencies;
- Provide access to K9 explosive detection on an on-call overtime basis;
- Ride Metro buses and trains, patrol bus and rail stations/corridors, and maintain high visibility at key Metro critical infrastructure locations;
- Provide law enforcement presence during periodic fare enforcement and passenger screening operations;
- Remove persons without a valid transit fare from buses, trains, buildings, and stations:
- Conduct mutually agreed upon grade crossing enforcement operations;
- Respond to and resolve incoming calls for service from Metro bus, rail, and security dispatch centers;
- Respond to and resolve incoming complaints from Metro's Transit Watch program;
- Respond to and resolve citizen complaints related to criminal activity;
- Conduct proactive anti-crime operations when not handling a dispatched call;
- Participate in Metro emergency and disaster preparedness planning and drills;
- Collaborate with social service agencies to address the impact of homelessness on the transit system;
- Enforce Metro's Code of Conduct;
- Attend weekly coordination meetings or other meetings as required; and
- Provide additional law enforcement services to address unforeseen events/requirements.

In addition to contract transit law enforcement services, Metro's SSLE Department employs Transit Security Officers (TSO) who provide security over Metro facilities, perform fare compliance checks, and patrol bus and rail systems. Metro TSOs are not sworn or certified law-enforcement officers and do not have authority to detain or arrest.

3. Objectives, Scope and Methodology

On February 23, 2017, the Metro Board passed a motion directing that "the Inspector General be tasked with annually auditing each law enforcement services contract to determine how key performance indicators are measuring up against actual performance metrics. The audit is to ensure that Metro is receiving the services it is paying for."

The overall objective of the audit is to evaluate transit security performance provided by each of the three Contractors and Metro's Transit Security Department during FY 2018. In particular, the audit will review, analyze, and report on:

- Actual performance of the performance indicators in the transit law enforcement services contracts.
- Contractor (LAPD, LASD, LBPD) adherence to requirements in matters such as:
 - Personnel and training,
 - Reporting,
 - Community Policing Plan,
 - o Billing, and
 - Security and Emergency Preparedness.
- Effectiveness of fare compliance checks.
- Number of fare validation checks accomplished in FY 2018, compared to fare checks made in the previous 3 years.
- Number of citations issued in FY 2018, compared to the past 3 years.
- Crime statistics for Metro in FY 2018, compared to the statistics for the past 3 years.

The methodology used to complete this review is described in each section of this report.

4. Review Results

The following sections provide information on the results of the review of Metro's transit security function performance review.

A. Trends in Reported Crime, Perceptions of Safety, and Complaints

There are three key outcome measures that can be used to evaluate the effectiveness and trends of Metro's safety and security approach and program. These are the level of reported crime on the system, the perceptions of safety by users of the system, and the number of safety and security complaints made by users of the system. Each of these are described in the following sections.

Reported Crime

Crime and disorder risks within the Metro System include the incidents of crime, general disturbances of the peace, and public safety. These risks are similar to those faced by most communities, albeit in a more specific arena. Crime and disorder risks are measured primarily by the number and severity of crime that occurs within an area.

Finding 1: Obtaining complete and accurate reporting of crime that occurs on the Metro System continues to be challenging.

Some crimes that occur on the Metro System are not reported to Metro and therefore cannot be tracked or used to determine trends in crime on the Metro System. This is partially due to the fact that the Metro System operates within multiple jurisdictions with their own law enforcement agencies.

Many calls for service on the Metro System are received directly by local law enforcement agencies. This is due to patrons on the Metro System dialing 911 on their mobile phones to report an incident and to request law enforcement services. These calls would, in most cases, go to the public safety call taking and dispatch center of the local law enforcement agency. Once the call is received, the incident or call would be responded to and handled by the local law enforcement agency. The call would be given a priority and would be responded to and handled as deemed appropriate by the local law enforcement agency given the relative priority of other calls the agency is handling.

These law enforcement agencies respond to and handle an unknown number of crimes that occur within the Metro System. This is the case in the areas of the Metro System that are serviced by the LASD, much of which is within the jurisdiction and service area of municipal law enforcement agencies. In many cases, the LASD is not informed of

these crimes and so has no way to track or report them. In other cases, the LASD may receive a copy of the crime report, but these crimes are not added to the crimes reported to Metro as having occurred within the system because they are not responded to and handled by the LASD.

In the LAPD service area of the Metro System, LAPD neighborhood patrol units respond to and handle many crimes that occur within the Metro System. An unknown number of these crimes are not reported to the LAPD Transit Policing Division and so are not tracked and reported to Metro. The LAPD has developed an approach and system to identify these crimes and include them in the tracking and reporting of crime that occurs within the LAPD service area of the Metro System. However, this system is still fairly new and not all LAPD neighborhood police units are aware of the need to report these crimes to the LAPD Transit Policing Division.

Recommendation 1: The Metro SSLE Department should continue to work with contract and other law enforcement agencies to improve the complete and accurate reporting of crime that occurs on the Metro System.

Reported Part I Crime

The Federal Bureau of Investigation (FBI) Uniform Crime Reporting system defines serious crime (Part I) as homicides, rape, robbery, aggravated assault, burglary, larcenytheft, motor vehicle theft and arson. The Uniform Crime Reports (UCR) are official data on crime in the United States, published by the FBI. UCR is a nationwide, cooperative statistical effort of law enforcement agencies voluntarily reporting data on crimes. Crime statistics are compiled from UCR data and published annually by the FBI in the <u>Crime in the United States</u> report series.

Reported Violent Crime

Part I violent crime¹ includes homicide, rape, aggravated assault, and robbery. Total reported Violent Crime on the Metro System decreased by 18% between FY 2015 and FY 2018, with most of this decrease (14%) occurring between FY 2017 and FY 2018.

As shown in Exhibit 1, Part I Violent Crimes reported to Metro during the four-year period (FY 2015 to FY 2018) declined by 18% during the period. The most significant decline

¹ In the FBI's UCR Program, violent crime is composed of four offenses: murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault. Violent crimes are defined in the UCR Program as those offenses which involve force or threat of force.

occurred between FY 2017 and FY 2018 with a 14% decline. Some of this decline may be due to a 12% decline in ridership over the four-year period. As the exhibit shows, reported violent crime per million riders declined 14% between FY 2017 and FY 2018, but only declined 7% over the entire four-year period.

Exhibit 1									
Reported Part 1 Violent Crime on the Metro System FY 2015 to FY 2018									
Crime	FY 2015	FY 2016	Change	FY 2017	Change	FY 2018	Change	Total Change	
Homicide	1	3	200%	3	0%	1	-67%	0%	
Rape	3	11	267%	5	-55%	16	220%	433%	
Robbery	375	404	8%	404	0%	393	-3%	5%	
Aggravated Assault	370	322	-13%	308	-4%	219	-29%	-41%	
Aggravated Assault on an Operator	30	18	-40%	20	11%	6	-70%	-80%	
Totals	779	758	-3%	740	-2%	635	-14%	-18%	
Ridership (Millions)	445.3	428.9	-4%	390.0	-9%	390.9	0%	-12%	
Per 1 Million Riders	1.75	1.77	1%	1.90	7%	1.62	-15%	-7%	
Per Day	2.13	2.08	-2%	2.03	-2%	1.74	-14%	-18%	
Source: Analysis of crime reported by LASD for FYs 2015 to 2017, and reported by LAPD, LASD, and LBPD for FY 2018									

Reported Property Crime

Property crime on the Metro system is also an important consideration. Part I Property Crimes² include burglaries, thefts, motor vehicle thefts, and arsons. Total reported Property Crime per day on the Metro System decreased 15% between FY 2015 and FY 2018, with a decrease of 16% occurring between FY 2015 and FY 2017, and an increase of 1% occurring between FY 2017 and FY 2018.

As shown in Exhibit 2 Part I Property Crimes reported to Metro during the four-year period compared (FY 2015 to FY 2018) declined by 15% during the period. The most significant decline occurred between FY 2015 and FY 2017 with a 16% decline. Some of this decline may be due to a 12% decline in ridership over the four-year period. As the exhibit shows,

_

² In the FBI's UCR Program, property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. These theft-type offenses involve the taking of money or property, without force or threat of force against the victims. The property crime category includes arson because the offense involves the destruction of property.

reported property crime per million riders declined 3% over the four-year period. Reported Property Crime essentially stayed the same between FY 2017 and FY 2018.

Exhibit 2										
Reported Part 1 Property Crime on the Metro System										
FY 2015 to FY 2018

Reported Other Crime

Other significant crime (Part II³) reported also provides useful information on the safety and security of the Metro System. Total reported Other Crime (Part II) per day on the Metro System decreased 15% between FY 2015 and FY 2018, with a decrease of 16% occurring between FY 2015 and FY 2017, and an increase of 1% occurring between FY 2017 and FY 2018.

As shown in Exhibit 3 on the following page, Other Crime (Part II) reported to Metro during the four-year period compared (FY 2015 to FY 2018) declined by 17% during the period. The most significant decline occurred between FY 2016 and FY 2017 with an 11% decline. Some of this decline may be due to a 12% decline in ridership over the four-year period. As the exhibit shows, reported other crime per million riders declined 3% over the four-year period. Reported other crime declined 8% between FY 2017 and FY 2018.

³In the FBI's Uniform Crime Reporting (UCR) Program Part II, the following categories are tracked: simple assault, curfew offenses and loitering, embezzlement, forgery and counterfeiting, disorderly conduct, driving under the influence, drug offenses, fraud, gambling, liquor offenses, offenses against the family, prostitution, public drunkenness, runaways, sex offenses, stolen property, vandalism, vagrancy, and weapons offenses.

Trends in reported crime over the four-year period for each rail line, bus operations, and for Union Station are provided in Appendix A of this report.

Trends in Rider Perceptions of Safety

Perception of crime and disorder on the Metro System, and any mass transit system for that matter, creates a risk to the confidence in safety held by passengers and Metro employees and poses a risk to the reputation of Metro as a safe and secure system. Passengers who perceive the system to be unsafe will not use the service and therefore reduce the number of people using transit and Metro's ridership.

Based on Metro's On-Board Customer Satisfaction Surveys conducted during FYs 2015 to 2019 the percentage of riders responding they feel safe either waiting for a train or riding a train declined between FY 2015 and FY 2019. In FY 2015, 84% of riders responded they felt safe waiting for a train, compared to 79% for FY 2019. Similarly, in FY 2015 83% of riders responded they feel safe riding a train, compared to 77% for FY 2019, as shown in Exhibit 4 on the following page.

	Exhibit 4 Metro Rider Perceptions of Safety of Train and Bus System										
2015	2016	Change	2017	Change	2018	Change	2019	Change	Total Change		
	Percentage Responding Feel Safe Waiting for a Train										
84%	82%	-2.4%	80%	-2.4%	82%	2.5%	79.0%	-3.7%	-6.0%		
		Pe	rcentag	e Respondi	ng Feel	Safe Riding	a Train				
83%	81%	-2.4%	79%	-2.5%	79%	0.0%	77.0%	-2.5%	-7.2%		
		Perd	entage	Responding	g Feel Sa	afe Waiting	for a Bus				
85%	88%	3.5%	86%	-2.3%	87%	1.2%	87.0%	0.0%	2.4%		
	Percentage Responding Feel Safe Riding a Bus										
89%	91%	2.2%	90%	-1.1%	90%	0.0%	91.0%	1.1%	2.2%		
Sc	ource: Me	etro On-Boai	rd Custor	mer Satisfac	tion Surv	eys Conduc	ted during	FYs 2015 to	2019		

As this exhibit shows, the percentage of riders responding they feel safe either waiting for a bus or riding a bus increased between FY 2015 and FY 2019. In FY 2015, 85% of riders responded they felt safe waiting for a bus, compared to 87% for FY 2019. Similarly, in FY 2015 89% of riders responded they feel safe riding a bus, compared to 91% for FY 2019.

These changes in perceptions of safety are small and within the margin of error for the survey. However, it is important to continue to monitor rider perceptions of safety on the Metro System and to develop strategies to address concerns and improve that perception.

Trends in Complaints Regarding Safety and Security

Another important indicator of the public or riders' perception of the safety of the Metro System is the number of complaints received regarding safety and security. Metro Customer Relations tracks complaints received by category using the C-CATS complaint tracking system.

During the period from FY's 2015 to 2018 rider complaints regarding passenger safety or conduct issues were not among the top ten complaints on the bus system. However, on the rail system, rider complaints regarding passenger safety or conduct issues were the second most common complaint of the top ten complaints for FY's 2015 to 2017. For FY 2018, complaints regarding passenger safety or conduct issues dropped to number five of the top ten.

As Exhibit 5 on the following page shows, complaints regarding passenger safety or conduct issues increased from 296 in FY 2015 to 381 in FY 2016 and to 458 in FY 2017. These complaints declined by over half for FY 2018.

Exhibit 5 Number of Metro Rider Complaints Regarding Passenger Safety or Conduct Issues										
2015 2016 Change 2017 Change 2018 Change Change										
296	381	28.7%	458	20.2%	223	-51.3	-24.7%			

The Metro SSLE Department should continue to monitor rider survey results regarding perceptions of the safety of riders on the Metro System and complaints regarding safety and passenger conduct issues, and develop strategies to address significant rider concerns, improve perceptions, and reduce complaints.

B. Resource Monitoring and Oversight

Metro's SSLE Department is charged with ongoing oversight of the contracted law enforcement services as well as the operations of Metro Security. We reviewed and evaluated the oversight and supervision provided by SSLE to ensure compliance with contract requirements.

Audits of Contracted Law Enforcement Personnel Presence

Metro has and will continue to have a substantial investment in resources devoted to system safety and security. Ensuring that these resources are effectively and efficiently used is very important.

Oversight and monitoring of contracted law enforcement resources has been problematic. Metro has had some difficulty in ensuring that law enforcement personnel assigned to Metro are actually present and performing as assigned. Historically, Metro has not had an effective means of verifying the accuracy of this reporting, or of verifying that personnel charging time on the Metro contract are actually present and providing the contracted services.

Beginning with FY 2018, the SSLE Department implemented regular "audits" of law enforcement personnel. These paper audits involve comparing the amounts billed by each law enforcement agency on the invoice to information on personnel charging time to the contract and the roster or schedule of personnel working (in-service). This comparison is completed for specific days each month. These regular paper audits are a positive step and provide increased oversight and monitoring of law enforcement staffing. However, these audits only monitor consistency between personnel time reporting and the invoice. They do not ensure that personnel charging time are actually present and working as assigned.

Observation: Field audits of contracted law enforcement personnel presence strengthens contract oversight and monitoring.

In September 2017, Metro's SSLE Department contract compliance staff began conducting "field audits" of law enforcement personnel to verify personnel assigned to work under each contract are actually present. These audits involve taking the roster of law enforcement personnel assigned to work and verifying that those personnel are actually in the field and providing the contracted service. These "spot" checks are a move in the right direction and provide some assurance that law enforcement services are being provided as contracted. This approach is different from the approach recommended in the FY 2017 performance review to use radio and camera systems throughout the Metro

System several days each month to conduct audits of personnel assigned. However, the field audit approach should be at least as effective.

The Metro SSLE Department should continue to conduct field audits of contracted law enforcement personnel to provide assurance that the law enforcement services contracted for are actually being provided.

GPS Based Contracted Law Enforcement Oversight and Monitoring

The Metro SSLE Department has been working to develop and implement an effective method of tracking and monitoring the activities of safety and security resources deployed on the Metro System using the GPS function on smartphones used by Metro safety and security personnel. There is much potential for this function to provide a reliable and verifiable mechanism for Metro to ensure that contracted law enforcement resources are being used effectively and as planned.

The Mobile Phone Validators (MPV) provided to contracted law enforcement officers are now GPS enabled and are able to provide information on the location and movement of the MPV and law enforcement resources. This information is being used by two of the contracted law enforcement agencies (LAPD and LBPD) to monitor the deployment of their resources under the contract and have reportedly found this function to be helpful. The other law enforcement agency (LASD) has not fully used this function due to concerns raised by the LASD's labor union.

Finding 2: The Mobile Phone Validator GPS function and information generated is not being used by Metro to monitor or provide oversight of contracted law enforcement resources.

Metro has not yet begun using the GPS function and information generated to track or monitor the activities of contracted law enforcement resources. This is partially due to concerns about live tracking of police personnel outside of each police agency and partially due to concerns raised by the LASD's labor union.

These concerns could largely be mitigated by taking a more macro approach to monitoring and oversight. Rather than tracking each individual MPV and officer, the system and data could be used to generate overall information such as how much time was spent at different locations or parts of the Metro System. For example, the function and data could be used to generate reports on the amount of time spent riding each rail line, patrolling each station, or riding on buses. The data collected could be anonymous and not provide information on individual MPV or officers, which should largely alleviate concerns raised.

Recommendation 2: The Metro SSLE Department should continue to work to develop a more macro approach to oversight and monitoring of contracted law enforcement resources using the GPS function of the Mobile Phone Validators (MPV) assigned to contracted law enforcement personnel and the data generated from them.

Oversight of Other Law Enforcement Contract Requirements

Providing monitoring and oversight of contract law enforcement personnel assigned to ensure they are actually present and providing the service Metro is paying for is a top priority. However, it is also important that monitoring and oversight be performed to ensure other contract requirements are also being complied with. These contract requirements include those related to the qualifications and training of personnel assigned, reports and information being provided to Metro, equipment provided under the contract, and providing appropriate support for invoices submitted.

Observation: Monitoring and oversight of compliance with law enforcement contract requirements could be strengthened.

In our review of compliance with the contract terms, we found some instances of non-compliance with the terms in the above areas (See Section E: Compliance with Contract Requirements of this report for our discussion and recommendations). Increased monitoring and oversight of these requirements seems warranted given the size of the contract and the importance of the services being provided.

Observation: Billing discrepancies with contract terms were identified for the two months reviewed as part of this audit.

In our review of compliance with contract terms (See Section E of this report – Compliance with Contract Requirements for our discussion and recommendations) we also found some instances where contract billings and payments were not in compliance with the contract terms, resulting in potential overbillings and overpayments. Billings and payments for all twelve months of FY 2018 should also be reviewed since this audit focused on only two months. Metro should also consider amending the billing terms of the contracts if needed.

SSLE Department Changes

The following key organizational changes were reported by the SSLE Department during FY 2018.

- A new Director of Compliance was appointed in 2018. This change has greatly improved overall contract compliance and performance management.
- A new Deputy Executive Officer (DEO) joined the team in 2019. The DEO will
 oversee the design and construction of Metro's new Emergency Services
 Operations Center (ESOC). The ESOC will serve as SSLE's central command
 center, integrating law enforcement, transit security, and physical security
 operations.
- A new Executive Officer (EO) joined the team in 2019. The EO will serve as the Deputy Chief of the SSLE and will directly oversee transit security and emergency management operations.
- LA Metro's Emergency Management Department joined the SSLE in 2019. This will ensure seamless communications/planning between law enforcement, transit security, and operations.

C. Key Performance Indicators (KPIs)

It is essential that Metro clearly define performance expectations for each of the contract law enforcement agencies and use meaningful performance indicators to evaluate how well these expectations are being met. The following exhibit shows the KPI included in each of the three law enforcement contracts.

	Exhibit 6										
	Key Performanc	e indicators in Law Enforcement Se	ervices (Contract	S						
	KPI Title	Definition	LAPD	LASD	LBPD						
1	The number of foot and vehicle patrols of bus stops, transit centers, train platforms, plazas, stations	 The total number of patrol minutes per officer spent on the following: Riding the train/buses Foot patrols of bus stops/transit centers/train platforms/plazas/stations Vehicle patrols of bus stops, transit centers, train platforms, plazas, stations 	Х	X	Train Only						
2	Ratio of staffing levels and vacant assignments	The number of officers required to work per contract compared to the number of officers present	Х	Х	Х						
3	Ratio of proactive versus dispatched activity	The percentage of time law enforcement personnel spend proactively patrolling the system compared to responding to calls for service	X	×	Х						
4	Number of bus and train boardings	The number of times contracted law enforcement personnel board buses or trains	Х	Х	Train Only						
5	Incident response times	The time from when the call is received by the police department (dispatch center) to the time when a law enforcement officer actually makes contact at the scene	Х	Х	Х						
6	Decreases/Increases in crime	Part 1 & Part 2 crimes per million passenger boardings	Х	Х	Х						
7	Number of grade crossing operations	Each agency conducts 1 grade crossing operation per month (minimum 4-hour operation). The focus is on pedestrian safety and vehicle compliance with gates	Х	Х	Х						
8	Number of fare enforcement operations	The number of contracted law enforcement agencies operations focused specifically on fare enforcement.	NA	NA	Х						

To review key performance indicators, we:

- Obtained, summarized, and analyzed the monthly reports on KPIs for FY 2018.
- Determined whether Metro and the three law enforcement agencies jointly developed baseline performance metrics for each KPI in the contract.
- If the baseline performance metrics were developed, compared the baseline performance metrics for each KPI to actual performance for each agency. Discussed with Metro management the reason(s) for any KPIs where actual performance was above the metrics (30% or more), and determined appropriate corrective actions.
- If baseline performance metrics were not developed, determined the reason and timeframe for developing these metrics.

Reporting of Crime and Incident Response Time Indicators

Two of the KPI included in each of the law enforcement contracts were intended to provide information on the outcomes of the law enforcement service provided. These are:

- Decreases/Increases in crime
- Incident response times

The level of crime on the Metro System is clearly the most important indicator of the effectiveness of Metro's SSLE Department and each of the contract law enforcement agencies. Continuing to track and report the level of crime on the system is essential.

Finding 3: Current aggregate reporting of all reported Part I and Part II crime on the Metro System does not adequately reflect the amount of reported violent crime.

In crime reporting, the emphasis should be on violent crime, which is obviously the most impactful to the Metro System and has the greatest impact on Metro's riders. Reporting all crime in the aggregate is much less meaningful because the number of violent crimes such as homicide, robbery, and rape is given the same weight as lesser crimes such as larceny, petty theft, and vandalism.

As discussed in Section A of this report, complete and accurate reporting of crime on the Metro System continues to be a challenge.

The following Exhibit 7 shows how crime on the Metro System is reported.

Recommendation 3: The Metro SSLE Department should consider providing more detailed information on reported crime to distinguish between violent crime and property and petty crime.

A primary workload for law enforcement is responding to and handling incidents that occur on the Metro System or calls for service. Responding to these calls and effectively handling the incidents that generate these calls is a high priority for ensuring system safety and security. Calls for service that require a physical response are categorized and dispatched by each of the law enforcement agencies using priority categories. The following are representative of categories used:

- Emergency Calls: Are the highest priority and include situations where life or property is in imminent danger. These include crimes in progress such as robberies, rapes, assaults, or burglaries. These also include violent domestic disturbances and reports of individuals with guns or other weapons.
- **Priority Calls:** Include situations that require a fairly immediate police response, with no immediate threat to life or property. These could include disputes, disturbances of the peace, and suspicious activities.

 Routine Calls: Include calls where there is no substantial threat to life or property, but a response is needed. These include taking reports on crimes where a significant amount of time has elapsed since the occurrence of the crime as well as quality of life issues that need to be addressed.

Finding 4: Metro's SSLE Department currently only collects and reports response time information for emergency calls for service.

While emergency calls for service are obviously the most important calls, tracking and reporting response time on less urgent incidents and calls for service is also important. Often these lower priority calls for service involve quality of life issues and concerns as well as victims of property crimes. A slow response to these incidents can have a negative impact on the perception of the riding public that the system is safe and well protected. In addition, not requiring contract law enforcement agencies to track and report these response times communicates to them and their officers that these calls are not important.

Exhibit 8 below shows that the monthly average emergency incident response times for FY 2018 ranged from 3.83 minutes to 7.91 minutes.

Recommendation 4: The Metro SSLE Department should collect and report response time information for all three categories of calls for service.

Visibility of Law Enforcement Security Personnel Indicators

Providing a visible security presence within the Metro System is an important strategy for providing both a sense and reality of safety. Uniformed patrols, usually within the high traffic stations of the system creates a felt presence of safety and security among the riding public. Visible presence in areas frequently used by passengers include areas near fare gates, boarding areas of buses and trains, station entrances, and public parking areas.

Three of the KPI included in each of the law enforcement contracts were intended to provide information on the visibility of law enforcement security personnel on the system. These are:

- The ratio of proactive versus dispatched activity
- The number of foot and vehicle patrols of bus stops, transit centers, train platforms, plazas, stations
- The number of bus and train boardings

Contract law enforcement agencies were able to only report on the ratio of proactive versus dispatched activity. This is an important measure related to visibility as it indicates how much of their time is spent being visible, doing problem solving, and other proactive activities including community policing. Exhibit 9 on the following page shows the distribution of time spent by contract law enforcement agencies. As this exhibit shows, the reported proactive law enforcement activity ranged from a low of 81% in August of 2017, to a high of 92% in June of 2018. This also shows a positive trend.

Finding 5: Contract law enforcement agencies were not able to report on two of the Key Performance Indicators outlined in each of the contracts:

- The number of foot and vehicle patrols of bus stops, transit centers, train platforms, plazas, stations
- Number of bus and train boardings

While these are important indicators and would provide useful information on the level of activity and visibility of contracted law enforcement personnel, it was not practical for the agencies to reliably collect meaningful information for these indicators. This is partly due to the lack of definition for patrols or boardings and partly due to the fact that reliably tracking this information would be difficult even with clear definitions.

In addition, what is important is the amount or percentage of contracted law enforcement time that is actually spent on trains and buses, platforms, and stops. The count of the number of times law enforcement personnel step on or off a train or bus or other locations is not that useful. As discussed in Section B of this report, using the GPS function and data generated could provide reliable and meaningful information on the amount of time contracted law enforcement officers spend on each of these activities.

Recommendation 5: The Metro SSLE Department should use the GPS function and data generated to provide reliable and meaningful information on the amount of time contracted law enforcement officers spend on various parts of the Metro System.

Law Enforcement Personnel Presence Indicator

One of the KPI included in each of the law enforcement contracts was intended to provide information on the presence of the contracted law enforcement personnel. This is the ratio of staffing levels and vacant assignments.

This performance indicator is largely the result of past experience where a significant number of the law enforcement assignments that were to be staffed by contracted law enforcement were vacant or were not staffed. This indicator is important in both communicating to the contract law enforcement agencies the need to actually staff contracted assignments and to report how effectively these positions are actually being staffed.

Law Enforcement Personnel Activity Indicators

Two of the KPI included in law enforcement contracts were intended to provide information on the level of specific activities of the contracted law enforcement personnel. These are:

- Number of grade crossing operations
- Number of fare enforcement operations (Only LBPD)

A grade crossing is where a rail line and road or pedestrian walkway come together. Each contracted law enforcement agency is required to conduct grade crossing operations to enforce grade crossing rules and improve pedestrian safety. Each of these operations are to be for four hours. Exhibit 11 on the following page shows the number of grade crossing operations for each month by law enforcement agency. As this exhibit shows, reported grade crossing operations increased from 15 in July of 2017 to 639 in June of 2018.

The number of fare enforcement operations is a KPI reporting requirement for only the Long Beach Police Department. Information on the number of these operations is not included in the monthly KPI reports.

Baseline Expectations and Potential Performance Indicators

Performance measurement and reporting demonstrates the success or effectiveness of organizational or program activities in addressing a specific need or attaining a specific goal. A meaningful performance measurement framework includes a balanced set of indicators, ensures the collection of sound and reliable indicator data, provides for the analysis and reporting of indicator information and drives service improvement efforts and the testing of new initiatives.

In addition, it is important to establish baseline expectations or targets for each performance indicator. This not only clearly communicates performance expectations; it also can help drive improvements in performance through development and implementation of new strategies.

Finding 6: Baseline performance levels for each Key Performance Indicator have not been developed.

To establish clear expectations, Metro's SSLE Department should work with contract law enforcement agencies to establish baseline or target performance levels for each KPI currently in use. They should also work together to determine if additional KPI's would be appropriate and meaningful. The following Exhibit 12 provides a list of potential performance indicators as a starting point for discussions between Metro's SSLE Department and contract law enforcement agencies on performance tracking and reporting.

Each of these are standard performance indicators that should be tracked using basic call center and Computer Aided Dispatch Software.		
	Criminal Investigations			
Violent Crime Clearance Rate	FBI Uniform Crime Reporting	This provides an indication of how effective criminal investigators are at solving crime on the Metro system.		
Violent Crimes per Investigator	Number of violent crimes reported divided by the number of investigators assigned to investigate them.	This provides an indication of the level of investigative workload for TSB investigators.		
Property Crime Clearance Rate	FBI Uniform Crime Reporting	This provides an indication of how effective criminal investigators are at solving crime on the Metro system.		
Property Crimes per Investigator	Number of property crimes reported divided by the number of investigators assigned to investigate them.	This provides an indication of the level of investigative workload for TSB investigators.		
Metro Patron / Riders Com	mendations and Complaints, and In	•		
Number of Commendations	Contract law enforcement agency Service Commendation and Complaint Tracking System	Provides an indication of the number of times Metro patrons or riders are pleased with the actions of the contract law enforcement personnel.		
Commendations per 100 Contracted Law Enforcement Personnel	and Complaint Hacking System	Provides for a comparison of performance over time with changes in staffing levels.		

Exhibit 12 Potential Performance Indicators				
Indicator	Comments			
Number of Complaints Against Sworn Officers		Provides an indication of the number of times Metro patrons or riders complain about the actions of contract law enforcement personnel.		
Complaints per 100 Sworn Officers		Provides for a comparison of performance over time with changes in staffing levels.		
Number of Complaints against Metro Security Officers		Provides an indication of the number of times Metro patrons or riders complain about the actions of Metro Security personnel.		
Complaints per 100 Metro Security Officers		Provides for a comparison of performance over time with changes in staffing levels.		
Number of Internal Affairs Cases	Internal Affairs	Provides an indication of the number of serious allegations against contract law enforcement and Metro Security personnel.		
Internal Affairs Cases per 100 Assigned Personnel		Provides for a comparison of performance over time with changes in staffing levels.		

Recommendation 6: The Metro SSLE Department should work with the contract law enforcement agencies to review, revise, and adopt KPI's including baseline or target levels of performance for each KPI.

D. Community Policing

According to the U.S. Department of Justice's Office of Community Oriented Policing Services (COPS), community policing is an approach defined by combining the development of partnerships (i.e., the building of relationships) among affected stakeholders and with problem solving. Concerted engagement in these activities ultimately results in transformations within law enforcement organizations and communities as their efforts break down cultural barriers.

Community policing within a transit system should place an emphasis on quality of life issues. The customers of the Metro System must feel safe and secure. The presence of security, in whatever form, must have a "felt presence;" and must be visible and engaged without becoming oppressive and threatening.

Quality of life issues such as fare evasion, graffiti, and panhandling are problems within the system. Program personnel should employ a zero-tolerance approach for minor issues in order to ensure that an environment enabling the commission of major crimes does not emerge.

Each of the law enforcement services contracts contains requirements related to community policing. The specific requirements are:

- The Contractor shall update annually the Metro approved Community Policing Plan. Building and sustaining community partnerships is central to Metro's goal of reducing vulnerability to crime. This will require periodic attendance at community meetings and other events designed to foster Metro's relationship with the community. Contractor's staff shall be provided specific training in Problem Oriented Policing in order to assist Metro in addressing longstanding challenges related to crime, blight, and disorder. The cost of such training and/or exercises are eligible for reimbursement by Metro under this Contract.
- As part of the Community Policing Plan, it is important for the Contractor to incorporate feedback from rail managers into the overall policing strategy. Maintaining a continuous dialogue will foster an operational understanding of the unique challenges associated with policing in a transit environment. The primary goal of these collaborative efforts is to ensure that each of the Divisions are given appropriate coverage and foster the safety of the operators.

To determine the extent to which law enforcement resources servicing the Metro System are following community policing principles we:

 Requested the Metro approved Community Policing Plan for each Contractor to determine if each Contractor:

- Created or updated the Community Policing Plan?
- Provided staff with specific training in Problem Oriented Policing to assist Metro in addressing matters related to crime and disorder?
- Attended community meetings and other events designed to foster Metro's relationship with the community?
- Have a protocol in place to obtain feedback from bus and rail managers (feedback that will be used in the overall policing strategy)?
- Determined whether each Contractor and Transit Security is using reports of Law Enforcement Service Requests (LESR) as a tool to where crime, fare evasion and other problems occur.

Metro Community Policing Plan

Finding 7: The Metro SSLE Department is in the process of developing a community policing plan for the Metro System.

The Metro Community Policing plan will be a unified plan instead of having each of the three law enforcement agencies develop individual community policing plans. The Metro Community Policing plan is part of Metro's new Equity Platform, which aims to assure equity across all programs impacting transit service, planning, and policing.

The SSLE Department will be partnering with community-based organizations to develop the new Community Policing Plan. So far, SSLE has attended 3 planning sessions facilitated by the LA Metro's Planning Department and attended by multiple community organizations.

Metro's SSLE Department and the community will jointly develop a Community Policing Plan that accomplishes three basic goals:

- Develop a common understanding of what it means to be "safe/secure" while riding transit
- 2. Establish policing priorities (such as reducing/preventing crime, reducing sexual assault/harassment, and addressing homelessness)
- 3. Establish clear accountability measures (transparent crime reporting, commendations/compliant processes, etc.)

The SSLE Department expects to have a draft Metro Community Policing Plan completed by the Fall of 2019.

Recommendation 7: The Metro SSLE Department should continue to develop the Metro Community Policing plan and ensure it includes:

- Specific training in Problem Oriented Policing for law enforcement personnel to assist Metro in addressing matters related to crime and disorder
- Attendance at community meetings and other events designed to foster
 Metro's relationship with the community
- Protocols to obtain feedback from bus and rail managers that will be used in the overall policing strategy

Law Enforcement Service Request (LESR) System

Metro employees, including bus and train operators, maintenance personnel, customer service representatives, and others are the front-line representatives of Metro and have ongoing and direct interaction with the riding public. As such, they are in a prime position to identify and report public safety and law enforcement issues and concerns.

Observation: LESR system implemented in FY 2018 should provide good information on safety and security issues and concerns on the system going forward.

During FY 2018, a total of 935 law enforcement service requests were generated by Metro employees. Review of the requests and responses indicate that law enforcement agencies are using the LESR to identify and resolve issues and concerns. The following Exhibit 13 shows some of the more frequent requests (fare evasion and threats to operators) made by Metro employees using the LESR system during FY 2018.

Exhibit 13 Law Enforcement Service Request System Requests for FY 2018				
Problem Identified Number Identified				
Fare Evasion	150			
Threats to Operator	109			
Passenger Disturbing the Peace	77			
Drug Use or Sale on Bus or Train	65			
Obstruction of Bus Zone	54			
Drug Use or Sale on Bus or Train Terminal/Platform	42			
Threats to Patrons	35			
Transients at Bus Stop or Train Terminal	32			
Alcohol Use at Bus Stop or Train Terminal	30			

Exhibit 13 Law Enforcement Service Request System Requests for FY 2018				
Problem Identified	Number Identified			
Chronic Homeless	28			
Eating/Drinking on Bus or Train	25			
Under the Influence in Public	23			
Transients Refusing to Leave	23			
Objects Thrown at Bus or Train	22			
Playing Music on Bus or Train	21			
Assault on Bus or Rail Operator	19			
Smoking on Bus or Train	18			
Assault on Patron(s)	15			
Rowdy School Children	14			
Gang Members	12			
Alcohol Use on Bus or Train	11			
Rowdy Behavior	10			

The Metro SSLE Department should continue to use the Law Enforcement Service Request System to provide information on safety and security issues and concerns on the Metro System.

Transit Community Policing Training Curriculum

Each of the contracts with the three law enforcement agencies required all contracted law enforcement personnel to attend a course on Transit Policing. This course was to outline Metro's community policing approach for the Metro System. The curriculum will be developed by Metro prior to the training and cover the topics of:

- a) Overview of Metro's Organization Chart, Bus and Rail Operations
- b) Mitigating Terrorism in the Transit Environment
- c) Impact of Crime and Disorder on Transit Ridership
- d) Transit Watch App
- e) Metro's Customer Service Expectations
- f) Partnering with Metro's Security Team
- g) Fare Collection and Fare Evasion
- h) Grade Crossing Enforcement
- i) Metro Customer Code of Conduct

Observation: Metro's Transit Community Policing Training curriculum covers the topics listed in the contracts.

Metro provided a copy of the Transit Police Training Curriculum as of December 5, 2018. Based on this document, Metro's training curriculum covers the topics listed in the contract.

Specific information on the compliance with the contract requirement that all contracted law enforcement personnel attend this training is provided under the Personnel and Training Requirements in Section E: Compliance with Specific Contract Requirements Section of this report.

The Metro SSLE Department should continue to ensure Community Policing training is provided to contracted law enforcement personnel and update the curriculum to reflect the Metro Community Policing Plan when complete.

E. Compliance with Specific Contract Requirements

The contracts with the three law enforcement agencies each contain specific requirements related to personnel and training, billing, required reports, and other contract requirements.

Overview of Law Enforcement Contract Requirements

Each of these requirements are outlined as follows.

Personnel and Training Requirements (Section 1.2)

Section 1.2 of each contract provides specific requirements for the personnel assigned to provide service to Metro, including the training and experience of these personnel. Each of the law enforcement services contracts provides specific requirements for the personnel assigned under the contract. The following Exhibit 14 shows the personnel and training contract requirements included in each of the three law enforcement contracts.

	Exhibit 14 Personnel and Training Requirements in Law Enforcement Contracts				
	Contract Requirements	LAPD	LASD	LBPD	
1	Each sworn law enforcement officer/supervisor assigned to Metro must hold an active (Basic, Intermediate, Advanced or Supervisory) California POST Peace Officer's Certificate.	Х	Х	Х	
2	Command level officers must hold an active Management or Executive POST Peace Officer's Certificate.	Х	NA	Х	
3	All supervisors and managers must have completed department training equivalent to supervisory and/or advanced POST courses.	NA	Х	NA	
4	Only POST certified personnel are authorized to provide law enforcement services.	X	X	Х	
5	Personnel must have completed their probationary period.	Х	NA	Х	
6	Personnel must have a minimum of eighteen months of law enforcement experience.	X	NA	Х	

	Exhibit 14 Personnel and Training Requirements in Law Enforcement Contracts			
	Contract Requirements	LAPD	LASD	LBPD
7	Personnel must have no current duty restrictions.	Х	NA	Х
8	All Contractor personnel must attend a Metro safety training immediately following the issuance of a Notice to Proceed. After Notice to Proceed, any new personnel of the Contractor will be required to attend this Metro safety training.	X	X	X
9	Within the first six months of assignment, all law enforcement personnel must complete a four-hour training course in Transit Policing.	х	Х	Х

To determine compliance with these requirements by each of the contracted law enforcement agencies, we selected 30 sworn officers assigned to LA Metro by each of the three Contractors and determined whether law enforcement personnel met the following contract requirements:

- a. Each sworn law enforcement officer/supervisor assigned to Metro hold an active California POST (Peace Officer's Certificate).
- b. Command level officers hold an active Management or Executive POST Peace Officer's certificates (not required for LASD).
- c. Only POST certified personnel are providing law enforcement services.
- d. Personnel assigned to the contract:
 - Completed their probationary period (not required for LASD);
 - Have a minimum of 18 months of law enforcement experience (not required for LASD);
 - Have no current duty restrictions (not required for LASD).
- e. Personnel assigned to the contract attended the Metro's safety training within the first 6 months, and completed other training required by the contract.

Billing (Section 7.0)

Each contract for law enforcement services includes specific requirements regarding billing for services provided including providing specific supporting documentation. The

following Exhibit 15 shows the billing contract requirements included in each of the three law enforcement contracts.

	Exhibit 15 Billing Requirements in Law Enforcement Contracts				
	Contract Requirements	LAPD	LASD	LBPD	
1	The Contractor's monthly invoice shall be based upon and reflect the actual services provided.	Х	NA	Х	
2	The billings must be accompanied by supporting documentation, to include, but shall not be limited to, daily summary of assignments and hours worked and payroll records.	х	NA	Х	
3	Contractor shall be paid based on actual units of service performed on a daily basis, in accordance with the agreed upon deployment plan/schedule multiplied by the actual fully burdened rate of each personnel deployed in accordance with the Exhibit B of the contract.	X	NA	X	
4	Exhibit B: Contractor shall submit for approval of Metro, a list of maximum fully burdened hourly rates for each labor classification as follows: • Sworn Field Personnel (Overtime) • Management/Field Supervisory and Administrative Personnel	X	NA	Х	
5	The Contractor's monthly invoice shall be calculated as the monthly pro-rata portion of the annual firm fixed rate as specified in the applicable LASD's SH-AD 575 Deployment of Personnel Form. For each job position that did not meet the service levels promised on the Form 575, a credit shall be provided to Metro using the annual estimated cost per position per SH-AD575 divided by 12 months and number of day for the month, multiplied by number of days the position remained unfilled in whole or in part.	NA	X	NA	

To determine compliance with these requirements by each of the contracted law enforcement agencies, we:

- Determined whether the total amount billed and paid during FY18 is consistent with the cost limits specified in the contract for FY18 for each contract.
- Reviewed Contractor billings for two months (April and May 2018) and determined whether:
 - Invoices are supported by documentation such as daily summary of assignments and hours worked and payroll records (not applicable for LASD).
 - Invoices were based on actual services provided.
 - Billing rates were consistent with contract terms.

Required Reports (Section 2.1)

Each of the law enforcement services contracts provides specific requirements for the reports to be provided under the contract. The following exhibit shows the contract report requirements included in each of the three law enforcement contracts.

	Exhibit 16 Reporting Requirements in Law Enforcement Contracts				
	Required Reports	LAPD	LASD	LBPD	
1	Weekly schedule for each watch or shift. Must include each employee's name, actual hours worked, assignment and rank.	Х	Х	х	
2	Daily summary of work activity for each employee.	X	NA	NA	
3	Watch Commander Summary of Major Events of the Day.	NA	NA	Х	
4	4 Monthly summary of crime activity, citations issued, arrests made.		Х	Х	
5	Monthly summary of commendations and complaints.	Х	Х	Х	
6	The number of cases referred for follow-up investigation and the subsequent disposition.	Х	Х	NA	

	Exhibit 16 Reporting Requirements in Law Enforcement Contracts				
7	Monthly Report on the number of Part 1 crime cases referred for follow-up investigation and the subsequent disposition.	NA	NA	Х	
8	After-Action Reports following special operations, emphasis details and/or major incidents.	X	Х	Х	
9	Annual Community Policing Plan.	Х	Х	Х	
10	Monthly summary of Problem-Oriented Policing projects.	Х	Х	Х	
11	Law Enforcement Sensitive Reports (distribution to Metro's CEO, DCEO, COO, Chief of Risk Safety and Asset Management and Chief of System Security and Law Enforcement).	X	Х	NA	
12	Executive Summary of Major Events/Incidents on the Metro System (distribution to Metro's CEO, DCEO, COO, Chief of Risk Safety and Asset Management, and Chief of System Security and Law Enforcement).	NA	NA	х	

To determine compliance with these requirements by each of the contracted law enforcement agencies, we:

- Determined whether each Contractor provided Metro with the following required reports in a timely manner, with complete information, and in a format that allows Metro to determine the calculation of reported figures:
 - Weekly schedule for each watch or shift.
 - Daily summary of work activity for each employee.
 - Monthly summary of crime activity, citations issued, and arrests made.
 - Monthly summary of commendations and complaints.
 - Number of cases referred for follow-up investigation and the subsequent disposition.

- After-Action reports following special operations, emphasis details and/or major incidents.
- Annual Community Policing Plan.
- Monthly summary of Problem Oriented Policing projects.
- Law Enforcement Sensitive Reports.
- Determined whether each Contractor provided Metro with complete and timely data to measure:
 - How assets are assigned and tracked using GPS.
 - The time/date/category/disposition of calls for service.
 - o Incident response times.
 - Ratio of proactive versus dispatched activity.
 - Number of criminal citations/infractions/violations issued.
 - Number of misdemeanor and felony arrests.
 - Real Time Crime analysis data.
- Determined whether Metro has provided Contractor personnel with Mobile Phone Validators, Metro Transit Watch tools, Mobile Video Surveillance tools, and access to video feeds where possible. Evaluate whether Contractor personnel are utilizing these tools, or whether any other tools are needed.
- Evaluated whether each Contractor has the necessary tools to communicate with other police/fire agencies, investigate crimes and accidents, prepare reports, and analyze and predict crime trends. Are their methods effective and adequate?
- Reviewed the adequacy of protocols that Metro has developed with each Contractor (LAPD, LASD, and LBPD) for dispatching nonemergency service calls that are not appropriate for the 911 system.

Other Contract Requirements

Each contract for law enforcement services includes additional specific requirements. To determine compliance with these requirements by each of the contracted law enforcement agencies, we:

 Determined whether the Contractor provided the equipment in the quantities listed in Exhibit E of each contract (such as information technology, communication, and field equipment and vehicles).

- Determined whether Metro has an adequate process to verify that the Contractor provides the required equipment/vehicles (not required for LASD and LBPD).
- Evaluated threat analyses and strategies identified by each Contractor to address security threats.
- Determined whether the Contractors responded timely to requests for K9 explosive detection services.
- Determined whether the Contractors responded timely to requests for law enforcement presence during fare enforcement and passenger screening operations.
- Determined whether the Contractors adequately collaborated with social service agencies to address the impact of homelessness on the transit system.

Los Angeles Police Department (LAPD) Contract Compliance

The following sections provide information on the LAPD's compliance with contract requirements.

LAPD Personnel and Training Requirements Compliance

LAPD provided a list of 5,623 personnel names assigned to the Metro contract. Of the 5,623 names, 5,597 were sworn personnel and 26 were reserve personnel. We randomly selected 30 sworn officers' names and requested LAPD to provide documentation indicating that law enforcement personnel met the contract requirements.

Finding 8: LAPD was not in compliance with two of the contract requirements related to personnel and training:

- Command level officers must hold an active Management or Executive POST Peace Officer's certificate.
- All law enforcement personnel must complete a four-hour training course in Transit Policing within the first six months of assignments.

According to Section 1.2 of the contract, command level officers must hold an active Management or Executive POST Peace Officer's Certificate. Based on the information that LAPD provided, 4 of the selected 5 command level officers (Deputy Chief, Commander, Lieutenant 1 and Lieutenant 2) were in compliance by holding an active Management POST Peace Officer's certificate. One of the selected 5 command level officers (Captain 3) held an active Supervisory POST Peace Officer's certificate instead of the required Management or Executive POST Peace Officer's Certificate.

Also, Section 1.2 of the contract required all law enforcement personnel to complete a four-hour training course in Transit Policing within the first six months of assignments. Based on the information that LAPD provided, 1 out of 30 selected personnel did not attend this training. Twenty-nine of 30 of the selected personnel attended the Transit Policing Training (TPT) on various training dates from August 24, 2018 to March 8, 2019. According to LAPD, the one law enforcement personnel who did not attend this training within the first six months of assignment was because the training was not available. LAPD indicated that the training was made available on August 23, 2018.

Exhibit 17 on the following page summarizes the results of our review.

	Exhibit 17 Los Angeles Police Department Compliance with Contract Personnel and Training Requirements					
Contract Requirements			liance No	Comments		
1.	Each sworn law enforcement officer/supervisor assigned to Metro must hold an active Basic, Intermediate, Advanced or Supervisory California POST Peace Officer's Certificate.	Yes	NO			
2.	Command level officers must hold an active Management or Executive POST Peace Officer's certificate.		Х	Captain 3 - Supervisory POST Peace Officer's certificate.		
3.	Only Post certified personnel are authorized to provide law enforcement services.	Х				
4.	Personnel assigned to the contract completed their probationary period.	Х				
5.	Personnel assigned to the contract have a minimum of 18 months of law enforcement experience.	X				
6.	Personnel assigned to the contract have no current duty restrictions.	Х				
7.	Personnel assigned to the contract completed Metro's Safety Training.	Х				
8.	Personnel assigned to the contract completed training course in Transit Policing.		Х	1 out of 30 or 3.33% of the selected personnel have not completed the Transit Policing Training.		

Recommendation 8:

- A. LAPD should continue monitoring the contract requirements to ensure all personnel meet the required certification and complete the transit policing training before working on any Metro assignments.
- B. Metro's SSLE Department should continue monitoring the contract requirements for qualifications and training of personnel to ensure compliance.

LAPD Billing Requirements Compliance

On March 1, 2017, Metro entered a five-year firm fixed unit rate contract with LAPD based on LAPD's proposal dated February 21, 2017, for a not-to-exceed amount of \$369,330,499. The exhibit below summarizes the amount estimated for each year.

Exhibit 18 Los Angeles Police Department Contract Amounts for Each Contract Year						
	Amount					
Year 1	\$ 70,098,520					
Year 2	69,495,306					
Year 3	73,652,923					
Year 4	76,531,010					
Year 5	79,552,740					
Total	\$ 369,330,499					

Observation: The total amount billed and paid to LAPD for FY 2018 did not exceed the estimated cost specified in the contract for Year 1.

For Fiscal Year 2018 (FY 2018), the total amount billed and paid to LAPD was \$68,848,044. Thus, the total amount billed and paid for FY 2018 did not exceed the estimated cost of \$70,098,520. The exhibit below summarizes the contract amount and billing and payment amount for year 1.

Exhibit 19
Los Angeles Police Department Contract Amount and
Billing And Payment Amount for FY 2018

Exhibit 19 Los Angeles Police Department Contract Amount and Billing And Payment Amount for FY 2018						
	Year 1					
Contract Amount	\$ 70,098,520					
Billing and Payment	68,848,044					
Difference	\$ 1,250,476					

If the LAPD ever anticipates exceeding the estimated cost of the contract, they should inform Metro before incurring any costs. Metro's SSLE Department should continue monitoring the billing, payment and contract amount to ensure that costs do not exceed the contract amount.

Finding 9: Invoices submitted to Metro were based on actual services provided and supported by daily summary of assignments and hours worked using the cost data from the payroll system. However, actual payroll records were not submitted with the invoices as required.

According to Section 7.0 of the SOW in the contract, the Contractor's monthly invoice shall be based on actual services provided and supported by daily summary of assignments and hours worked and payroll records.

We reviewed LAPD's billing for two invoices (invoice no. 18MTADP0411 and 18MTADP0512). Invoice No. 18MTADP0411 is for period from April 15, 2018 to May 12, 2018 in the amount of \$4,748,089.82. Invoice No. 18MTADP0512 is for the period from May 13, 2018 to June 9, 2018 in the amount of \$4,915,288.17. For each of these two invoices, LAPD submitted 19 spreadsheets detailing the daily hours and costs of each employee for each type of cost classifications and locations of the services. Per LAPD, the daily hours and costs billed for each employee were based on actual payroll data exported from their payroll system. Actual payroll records for each employee were not submitted with the invoices.

Recommendation 9:

- A. LAPD should submit the required payroll records with the monthly invoice.
- B. Metro should continue to monitor LAPD's billings to ensure all the required supporting documents are submitted with the invoices.

Finding 10: For overtime charges, we were unable to determine whether the billing rates exceeded the maximum fully burdened hourly rates because LAPD's list of maximum fully burdened hourly rates was not in compliance with the contract requirements.

According to the contract, ninety (90) days prior to the start of each fiscal year, LAPD shall submit a list of maximum fully burdened hourly rates to Metro for approval. This list shall include the maximum hourly direct labor rate and overhead rate for each labor classification for straight time and overtime. Also, the contract stated that in no case shall the billing rate for each personnel exceed the maximum fully burdened rate set for each labor classification.

On November 30, 2017, LAPD submitted to Metro a list of personnel rates including the calculation of the maximum fully burdened hourly rate for each labor classification for Fiscal Year 2017-2018. We reviewed this list and noted that the maximum fully burdened hourly rate for each labor classification was not in compliance with the contract requirements as follows:

- LAPD calculated the maximum hourly direct labor rate for each labor classification using the maximum hourly direct labor rate from Fiscal Year 2016-2017 plus a 4% increase. However, the contract stated that the maximum escalation rate for base year 1 was 0%.
- LAPD did not include the maximum fully burdened hourly rates for each labor classification for overtime.

For each of the two invoices (invoice No. 18MTADP0411 and 18MTADP0512) selected for testing, we attempted to compare the hourly rates billed to the list of maximum fully burdened hourly rates that LAPD submitted to Metro on November 30, 2017. Since this list did not include the maximum fully burdened hourly rates for overtime, we were unable to determine whether the billing rates for overtime exceeded the maximum fully burdened hourly rates for each labor classification. Based on the two sample invoices, the direct labor cost for overtime was \$6,255,471.25, which is approximately 85.04% of the total direct labor costs billed.

Exhibit 20 on the following page summarizes the direct labor cost billed for straight time and overtime for the two sample invoices.

Exhibit 20 Los Angeles Police Department Direct Labor Costs Billed								
	18MT	ADP0411	18N	MTADP0512	Total	Percentage		
Direct Labor - ST	\$ 5	47,497.67	\$	552,580.62	\$1,100,078.29	14.96%		
Direct Labor - OT	3,0	64,640.39	3	3,190,830.86	6,255,471.25	85.04%		
Total	\$ 3,6	12,138.06	\$ 3	3,743,411.48	\$7,355,549.54	100.00%		

Recommendation 10:

- A. LAPD should submit the list of maximum fully burdened hourly rates for each labor classification for overtime in accordance with the contract requirements. Also, the escalation rate included in the calculation of the maximum fully burdened hourly rates should not exceed the maximum escalation rate stipulated in the contract.
- B. Metro's SSLE Department should work with LAPD to ensure that the list of maximum fully burdened hourly rates comply with the contract requirements. Metro should also review the billing rates for overtime for all invoices to determine the extent of overbillings for FY 2018.

Finding 11: Eight labor classifications on two invoices were not found in the required list of maximum fully burdened hourly rates. The amount billed for these labor classifications totaled \$281,400.77.

As mentioned previously, according to the contract, LAPD shall submit a list of maximum fully burdened hourly rates to Metro for approval that includes the maximum hourly direct labor rate and overhead rate for each labor classification for straight time and overtime. Also, the contract stated that in no case shall the billing rate for each personnel exceed the maximum fully burdened rate set for each labor classification.

For each of the two invoices (invoice No. 18MTADP0411 and 18MTADP0512) selected for testing, we compared the hourly rates billed to the list of maximum fully burdened hourly rates that LAPD submitted to Metro on November 30, 2017. Based on our review, eight labor classifications were not found in the required list of maximum fully burdened hourly rates. The total amount billed for these eight labor classifications was \$281,400.77.

Exhibit 21 below summarizes the amount billed for the classifications not found in the required list of maximum fully burdened hourly rates.

Class CD 18MTADP0411 18MTADP0512 Total 1223-0 \$ 3,137.30 \$ 2,012.72 \$ 5,150.02 2207-1 330.04 165.02 \$ 495.06 2207-2 29,848.31 28,697.89 \$ 58,546.20 2207-3 62,083.82 60,710.96 \$ 122,794.78 2209-1 1,502.24 1,614.84 \$ 3,117.08 2214-C 2,863.81 1,204.52 \$ 4,068.33 3711-5 18,614.40 33,036.84 \$ 51,651.24	Exhibit 21 Los Angeles Police Department Amount Billed for Each Labor Classification Not found in the List of Maximum Fully Burdened Hourly Rates								
2207-1 330.04 165.02 \$ 495.06 2207-2 29,848.31 28,697.89 \$ 58,546.20 2207-3 62,083.82 60,710.96 \$ 122,794.78 2209-1 1,502.24 1,614.84 \$ 3,117.08 2214-C 2,863.81 1,204.52 \$ 4,068.33	Class CD	18MTADP0411	18MTADP0512	Total					
2207-2 29,848.31 28,697.89 \$ 58,546.20 2207-3 62,083.82 60,710.96 \$ 122,794.78 2209-1 1,502.24 1,614.84 \$ 3,117.08 2214-C 2,863.81 1,204.52 \$ 4,068.33	1223-0	\$ 3,137.30	\$ 2,012.72	\$ 5,150.02					
2207-3 62,083.82 60,710.96 \$ 122,794.78 2209-1 1,502.24 1,614.84 \$ 3,117.08 2214-C 2,863.81 1,204.52 \$ 4,068.33	2207-1	330.04	165.02	\$ 495.06					
2209-1 1,502.24 1,614.84 \$ 3,117.08 2214-C 2,863.81 1,204.52 \$ 4,068.33	2207-2	29,848.31	28,697.89	\$ 58,546.20					
2214-C 2,863.81 1,204.52 \$ 4,068.33	2207-3	62,083.82	60,710.96	\$ 122,794.78					
	2209-1	1,502.24	1,614.84	\$ 3,117.08					
3711-5 18.614.40 33.036.84 \$ 51.651.24	2214-C	2,863.81	1,204.52	\$ 4,068.33					
Σ. Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ Ξ	3711-5	18,614.40	33,036.84	\$ 51,651.24					
9184-0 8,189.59 27,388.47 \$ 35,578.06	9184-0	8,189.59	27,388.47	\$ 35,578.06					
Total \$ 126,569.51 \$ 154,831.26 \$ 281,400.77	Total	\$ 126,569.51	\$ 154,831.26	\$ 281,400.77					

Recommendation 11:

- A. LAPD should submit the list of maximum fully burdened hourly rates for all labor classifications in accordance with the contract requirements. For any additional labor classifications not identified in the list of maximum fully burdened hourly rate, LAPD should submit a revised list to Metro for approval prior to incurring the cost.
- B. Metro's SSLE Department should continue to monitor LAPD's billings to ensure only the approved labor classifications are billed and included in the list of maximum fully burdened hourly rates. Metro should also review the billing rates for straight time for all invoices to determine the extent of overbillings.

Finding 12: We identified a total amount of \$3,874.99 as overbilled and overpaid to LAPD.

For each of the two invoices (invoice No. 18MTADP0411 and 18MTADP0512) selected for testing, we compared the hourly rates billed to the approved list of maximum fully burdened hourly rates that LAPD submitted to Metro on November 30, 2017. We found that that the fully burdened hourly rate that LAPD billed for straight time exceeded the maximum fully burdened hourly rate for five labor classifications. Also, we noted that

there are costs billed for classifications showing zero labor hours. We identified a total amount of \$3,874.99 as overbilled and overpaid to LAPD.

The exhibit below summarizes the overbilled and overpaid amount for the labor classification with rate differences and zero hours.

		Exhil	oit 2	22					
Los Angeles Police Department Overbilled and Overpaid Amount due to									
Labor Classification With Rate Difference And Zero Hours									
						C	Overbilled/

Various					0	\$	1,934.34		
					Subtotal	\$	2,026.62		
					Total	\$	3,874.99		
							2,026.62		

Recommendation 12:

- A. LAPD should return the overbilled and overpaid amount of \$3,874.99 to Metro.
- B. Metro's SSLE Department should continue monitoring LAPD's billings to identify and resolve billing discrepancies.

Finding 13: LAPD invoiced an overhead rate of 12.76% for overtime hours that was unsupported by adequate documentation.

For straight time indirect cost overhead, LAPD billed Metro using CAP 38 rates of 77.48% for civilian and 157% for sworn personnel. For overtime indirect cost overhead, LAPD billed 12.76% for sworn field personnel. A copy of Memorandum No. 17-016 dated

August 30, 2017 was provided to support the Federal Government's approved Cost Allocation Plan (CAP) 38 indirect cost rates of 77.48% and 157%.

According to the instructions for CAP 38, these rates are to be applied only to straight time for full time gross salaries. For rates applicable to part time or overtime salaries, LAPD needs to contact the CAP staff. No documentation was provided to support the overtime overhead rate of 12.76%. The overtime overhead rate of 12.76% was not included in the list of maximum fully burdened hourly rates that LAPD submitted to Metro on November 30, 2017.

The exhibit below summarizes the amount billed for overtime indirect cost overhead for the two invoices selected for testing.

	Exhibit 23 Los Angeles Police Department Amount Billed for Overtime Indirect Cost Overhead									
Invo	ice No.	18	MTADP0411	18MTADP0512	Total					
Sworn Field Personnel (Sworn Field Personnel (Overtime)									
Direct Labor (Q53)		\$	2,837,742.25	\$ 2,902,159.77	\$5,739,902.02					
Overhead Rate	12.76%		362,095.91	370,315.59	732,411.50					
Total	•	\$	3,199,838.16	\$ 3,272,475.36	\$6,472,313.52					
	•									

Recommendation 13:

- A. LAPD should submit the prevailing Cost Allocation Plan (CAP) rate together with the list of maximum fully burdened hourly rates for overtime.
- B. Metro's SSLE Department should continue to monitor LAPD's billings to ensure the overtime overhead rate billed was based on the CAP overhead rate approved by the Federal Government in effect at the time the work was performed.

LAPD Compliance with Required Reports

We requested Metro to provide the reports with date received showing that LAPD submitted the required reports in a timely manner, with adequate information, and in a format that allows Metro to determine the calculation of reported figures.

Finding 14: LAPD met 8 out of 9 contract requirements for submitting required reports to Metro. The reports were submitted with adequate information and in a format that allows Metro to determine the calculation of the reported figures. However, no information was provided as to when these reports were submitted to Metro so we were unable to determine if the reports were submitted on time in accordance with the contract.

Metro provided various reports including Watch Commander's Daily Reports for April 10, 2018 and May 17, 2018, Weekly After-Action Reports for April 2018 and May 2018, Work Summary Report for April 2018 and May 2018, Strategic Plan for 2017-2019, and KPI Reports for April 2018 and May 2018. No information was provided as to when these reports were submitted to Metro.

We reviewed all the reports provided and found that LAPD met 8 out of the 9 contract requirement for required reports. These eight reports were submitted with adequate information and in a format that allows Metro to determine the calculation of the reported figures. The month summary of Problem-Oriented Policing projects was not provided.

Exhibit 24 below summarizes the required reports and the results of our review.

	Exhibit 24								
	Los Angeles Police Department Compliance with Contract Reporting Requirements								
	Required Reports	Comments							
1	Weekly schedule for each watch or shift. Must include each employee's name, actual hours worked, assignment and rank.	Yes	Daily schedule for each watch was included in the submission of Watch Commander's Daily Report, not weekly. Daily Worksheet Portrait included each employee's name, actual hours worked, assignment and rank.						
2	Daily summary of work activity for each employee.	Yes	Daily Activity Log included employee name, work date, start time, end time and work hours.						
3	Monthly summary of crime activity, citations issued, arrests made.	Yes							

	Exhibit 24 Los Angeles Police Department Compliance with Contract Reporting Requirements							
4	Monthly summary of commendations and complaints.	Yes						
5	The number of cases referred for follow-up investigation and the subsequent disposition.	Yes	TSB Significant Arrests.					
6	After-Action Reports following special operations, emphasis details and/or major incidents.	Yes	Weekly After-Action Report.					
7	Annual Community Policing Plan.	Yes	Strategic Plan for fiscal years 2017-2019.					
8	Monthly summary of Problem- Oriented Policing projects.	No	No information provided.					
9	Law Enforcement Sensitive Reports (distribution to Metro's CEO, DCEO, COO, Chief of Risk Safety and Asset Management and Chief of System Security and Law Enforcement)	Yes	This report refers to "after action reports and intelligence briefings". Chief of System Security and Law Enforcement confirming that he has access to the information but no copies were provided.					

Recommendation 14:

- A. LAPD should submit to Metro in a timely manner the monthly Summary of Problem-Oriented Policing projects.
- B. Metro's SSLE Department should continue to monitor LAPD's submission of reports and stamp the date received on reports to ensure all the required reports are submitted in a timely manner and with complete information to allow Metro to determine the calculation of the reported figures.

LAPD Equipment Requirements Contract Compliance

Section 5.0 of the contract required LAPD to provide the equipment as listed in Exhibit E. There are four categories listed in the Exhibit E. The four categories listed below are the property that LAPD is required to provide. Each category listed out the items needed.

- A. Information Technology (IT) Equipment
- B. Communication Equipment
- C. Vehicles
- D. Field Equipment

Finding 15: LAPD did not provide the equipment in the quantities listed in Exhibit E of the contract.

- Metro does not have an adequate process to verify that LAPD provides the required equipment and vehicles.
- Computers provided by LAPD are not listed in the Exhibit E of the contract.
- The Vehicles provided by LAPD are not consistent with the quantity listed in the Exhibit E of the contract.

According to Metro, the equipment and vehicles provided by LAPD has been tracked on Excel spreadsheets. Metro provided one spreadsheet of a list of computers with Metro tag numbers and another spreadsheet for shop inventory. We compared the items and quantities listed in these two spreadsheets to Exhibit E.

We found that the computers that LAPD provided were not listed in Exhibit E. For vehicles, we found that the quantities provided did not agree with the quantities listed in Exhibit E. No data was provided for IT equipment, communication equipment, and field equipment. Thus, we determined that Metro does not have an adequate process to verify that LAPD provided the required equipment and vehicles.

Based on the list of computers with Metro tag numbers, LAPD provided 135 computers. Of the 135 computers, 126 computers had the asset tag number, Metro tag number, serial number, make, and model. Nine (9) of the 135 computers had only the asset tag number and Metro tag number. We attempted to compare the computer and quantity listed in the spreadsheet to Exhibit E. We found that the computers provided were not listed in Exhibit E of the contract.

Based on the list of shop inventory that Metro provided, we found that LAPD did not provide the vehicles in the quantities listed in Exhibit E of the contract. Exhibit 25 on the following page summarizes the required quantities compared to the quantities provided.

Exhibit 25 Los Angeles Police Department Comparison of Contracted and Provided Equipment

	Quantity	Quantity Provided by	
Vehicles Item	Per Contract	LAPD	Difference
1. BW-MFF	21		
2. BW-Patrol	48		
Subtotal - BW	69	60	9
3. Dual Purpose	6	9	-3
4. Motor Pool	5	No Data	
5. Plain (un-marked)	1	6	-5
6. Undercover	3	No Data	

Recommendation 15:

- A. LAPD should provide the equipment in the quantities listed in Exhibit E of the contract or Metro should amend Exhibit E of the contract.
- B. Metro's SSLE Department should continue to monitor LAPD's equipment to ensure the quantities listed in Exhibit E of the contract are properly provided and in a timely manner.

Other Contract Areas

LAPD was responsive and supportive in evaluating and developing strategies to address security threats, requests for K9 explosive detection services, requests for law enforcement presence during fare enforcement and passenger screening operations, and in addressing the impact of homelessness on the transit system based on discussions with Metro's SSLE Department.

Los Angeles County Sheriff's Department (LASD) Contract Compliance

The following sections provide information on the LASD's compliance with contract requirements.

LASD Compliance with Personnel and Training Requirements

LASD provided a list of 228 sworn officers' names assigned to Metro. We randomly selected 30 sworn officers' names and requested LASD to provide documentation indicating that law enforcement personnel met the contract requirements.

Finding 16: LASD was not in compliance with two of the contract requirements related to personnel and training:

- All Personnel must attend a Metro's Safety Training immediately following the issuance of a Notice to Proceed.
- All law enforcement personnel must complete a four-hour training course in Transit Policing within the first six months of assignments.

According to LASD, 27 of the 30 personnel selected had attended the Metro's safety training course, and 3 deputies did not complete this training. For the Transit Policing Training, 6 of the 30 or 20% of the personnel selected have not attended the Metro Transit Policing training. These personnel did not attend the safety training and Transit Policing training because they either have not yet started working at Transit Services Bureau or have been off work for an extended time. Twenty-four out of 30 or 80% of the selected personnel attended the Transit Policing Training on various training dates from September 14, 2018 to March 5, 2019. According to LASD, the law enforcement personnel did not attend this training within the first six months of assignments because the training was not yet available. However, LASD indicated that the training was made available on February 18, 2018.

Exhibit 26 below summarizes the results of our review.

Exhibit 26 Los Angeles Sheriff's Department Compliance with Contract Personnel and Training Requirements							
Contract Requirements	Comp Yes	liance No	Comments				
Each sworn law enforcement officer/supervisor assigned to Metro hold an active California POST	Х						

	Exhibit 26 Los Angeles Sheriff's Department Compliance with Contract Personnel and Training Requirements								
	Contract Requirements	Yes	No	Comments					
	(Peace Officer's Certificate).								
2.	All supervisors and managers must have completed department training equivalent to supervisory and/or advanced POST courses.	Х		All sergeants and lieutenants selected have Advanced POST certificates.					
3.	Only POST certified personnel are authorized to provide law enforcement services.	X							
4.	Personnel assigned to the contract completed Metro's Safety Training.		Х	3 out of 30 or 10% of the selected personnel had not completed the Safety Training.					
5.	Personnel assigned to the contract completed training course in Transit Policing.		Х	6 out of 30 or 20% of the selected personnel had not completed the Transit Policing Training.					

Recommendation 16:

- A. LASD should continue monitoring the contract requirements to ensure all personnel complete the safety training and transit policing training before working on any Metro assignments.
- B. Metro's SSLE Department should continue monitoring the contract requirements for qualifications and training of personnel to ensure compliance with the contract.

LASD Compliance with Billing Requirements

On September 1, 2017, Metro entered into a five-year firm fixed unit rate contract with LASD for a not-to-exceed amount of \$246,270,631. There is no detailed breakdown in

the contract for the not to exceed amount of \$246,270,631. However, the estimated cost for year 1 (FY 2018) was \$41,586,561.

Observation: The total amount billed and paid for FY 2018 to LASD did not exceed the estimated cost specified in the contract for Year 1.

For FY 2018, the total amount billed and paid to LASD was \$41,114,094. Thus, the total amount billed and paid for FY 2018 did not exceed the estimated cost of \$41,586,561. The exhibit below summarizes the contract amount and billing and payment amount for year 1.

Exhibit 27 Los Angeles Sheriff's Department Contract Amount and Billing And Payment Amount For FY 2018					
		Year 1			
Contract Amount	\$	41,586,561			
Billing and Payment		41,114,094			
Difference	\$	472,467			

If LASD ever anticipates that they may exceed the estimated cost in the contract, they should inform Metro in a timely manner before incurring any cost. Metro's SSLE Department should continue monitoring the billing, payment and contract amount to ensure that costs do not exceed the contract amount.

Observation: Except for the credit amount understatement of \$1,699.68 (discussed in the next section), the billing rates were in compliance with Metro's approved rates. Invoices were based on actual services provided and supported by Payment Certification, the Service Level and Billing Status Reports, and the Patrol Compliance Reports.

According to Section 7.0 of the Statement of Work in the contract, the Contractor's monthly invoice shall be calculated as the monthly pro-rata portion of the annual firm fixed rate as specified in the applicable LASD's SH-AD 575 Deployment of Personnel Form.

We reviewed LASD's billing for two invoices (April 2018 and May 2018). The April invoice was for the period April 1, 2018 to April 30, 2018. The May invoice was for the period May 1, 2018 to May 31, 2018. For each of these two invoices, we compared the annual and monthly rates billed to the annual firm fixed rate specified in the contract. We found that the annual rate and monthly rate for each level of services were properly computed in accordance with the contract requirement. Invoices were based on actual services and

supported by payment certification, service level and billing status reports and patrol compliance reports.

Metro's SSLE Department should continue monitoring LASD's billings to ensure the billing rates and supporting documents are in compliance with the contract.

Finding 17: The billing rate for the credit amount was not in compliance with Metro's approved rate.

For the month of May, a credit amount of \$149,701.16 was included in the invoice to refund Metro for the overbilling of two positions, Team Leader and Access Services Investigator. This overbilling was discovered when LASD's Contract Law Enforcement Bureau completed its internal audit and discovered that LASD overbilled Metro for a Team Leader position for 7 months and an Access Services Investigator for 4 months due to the key overhead positions being unfilled and the job duties for these positions were not completed. The credit amount was calculated using the monthly rate of \$12,551.96 for Team Leader and \$15,459.36 for Access Services Investigator. These monthly rates were determined by reducing personnel in the Transit Cost Model to determine the overhead monthly salaries for each of these positions.

We found that the monthly rates used for the calculation of the credit amount were not in compliance with the contract. According to the contract, for each job position that did not meet the service levels promised on the Form 575, a credit shall be provided to Metro using the annual estimated cost per position per SH-AD575 divided by 12 months and number of days for the month, multiplied by the number of days the position remained unfilled in whole or in part. For the Access Services Investigator, the annual estimated cost per SH-AD575 was \$190,611.35 divided by 12 months would be \$15,884.28 per month. Thus, the credit amount in the May invoice was understated by \$1,699.68. There was no annual estimated cost for the Team Leader position in the SH-AD575.

Exhibit 28 on the following page summarizes the calculation of the rate difference and cost difference for the Access Services Investigator.

Exhibit 28 Los Angeles Sheriff's Department Rate and Cost Differences For Access Services Investigator								
	Description	Amount						
	Monthly Rate (May Invoice)	\$ 15,459.36						
	Monthly Rate (SH-AD575)	\$ 15,884.28						
	Rate Difference	\$ (424.92)						
	No. of Month	4						
	Cost Difference	\$ (1,699.68)						

Recommendation 17:

- A. LASD should issue an additional credit amount of \$1,699.68 to Metro.
- B. Metro's SSLE Department should continue monitoring LASD's billings to ensure each job position meets the service levels promised on Form 575 and the billing rates are in compliance with the contract.

LASD Compliance with Reporting Requirements

We requested Metro to provide the reports with the date received showing that LASD submitted the required reports in a timely manner, with adequate information, and in a format that allows Metro to determine the calculation of reported figures.

Finding 18: LASD met 7 out of 8 contract requirements for required reports. The reports were submitted in a timely manner, with adequate information, and in a format that allows Metro to determine the calculation of the reported figures.

Metro provided various email submissions from LASD including attachments of KPI data and monthly reporting requirements for July 2017 to June 2018. Daily Report, AM Scheduling, PM Scheduling and EM (night shift) Scheduling were also provided for April 8, 2018. We reviewed all the emails and reports provided and found that LASD met 7 out of the 8 contract requirement for required reports. These reports were submitted in a timely manner with adequate information and in a format that allows Metro to determine the calculation of the reported figures. LASD did not submit a report for the number of cases referred for follow-up investigation and the subsequent disposition.

Exhibit 29 on the following page summarizes the required reports and the results of our review.

	Exhibit 29 Los Angeles Sheriff's Department Compliance with Contract Reporting Requirements									
	Required Reports	Compliance	Comments							
1	Weekly schedule for each watch or shift. Must include each employee's name, actual hours worked, assignment and rank.	Yes	Daily schedules for each shift (AM, PM, and EM reports) were submitted to Metro. These reports showed each employee's name, actual hours worked, assignment and rank.							
2	Monthly summary of crime activity, citations issued, arrests made.	Yes								
3	Monthly summary of commendations and complaints.	Yes								
4	The number of cases referred for follow-up investigation and the subsequent disposition.	No	Per LASD, they had been requesting for clarification from Metro on the item but received no response.							
5	After-Action Reports following special operations, emphasis details and/or major incidents.	Yes								
6	Annual Community Policing Plan.	Yes	LASD did not submit the Annual Community Policing Plan. However, LASD indicated that they participated in the completion of the Annual Community Policing Plan with LAPD, LBPD, and Metro.							
7	Monthly summary of Problem- Oriented Policing projects.	Yes								

	Exhibit 29 Los Angeles Sheriff's Department Compliance with Contract Reporting Requirements								
8	Law Enforcement Sensitive Reports (distribution to Metro's CEO, DCEO, COO, Chief of Risk Safety and Asset Management and Chief of System Security and Law Enforcement).	Yes	This report refers to "after action reports and intelligence briefings". Chief of System Security and Law Enforcement confirming that he has access to the information but no copies were provided.						

Recommendation 18:

- A. LASD should submit to Metro in a timely manner the report for the number of cases referred for follow-up investigation and the subsequent disposition.
- B. Metro's SSLE Department should work with LASD to resolve any issues regarding the required reports. Also, Metro should continue monitoring LASD's submission of reports to ensure all the required reports were submitted in a timely manner and with complete information to allow Metro to determine the calculation of the reported figures.

Other contract Areas

LASD was responsive and supportive in evaluating and developing strategies to address security threats, requests for K9 explosive detection services, requests for law enforcement presence during fare enforcement and passenger screening operations, and in addressing the impact of homelessness on the transit system based on discussions with Metro's SSLE Department.

Long Beach Police Department (LBPD) Contract Compliance

The following sections provide information on the LBPD's compliance with contract requirements.

LBPD Compliance with Personnel and Training Requirements

LBPD provided a list of 480 sworn officers' names assigned to Metro. We randomly selected 30 sworn officers' names and requested LBPD to provide documentation indicating that law enforcement personnel met the contract requirements.

Finding 19: LBPD was not in compliance with the contract requirement for Transit Policing Training.

According to Section 1.2 of the contract, all law enforcement personnel must complete a four-hour training course in Transit Policing within the first six months of assignment. Based on the information provided by LBPD, 1 out of 30 of the selected personnel had not completed this training. Twenty-nine out of 30 of the selected personnel attended the Transit Policing Training on various training dates from August 10, 2018 to February 28, 2019. According to LBPD, the law enforcement personnel did not attend this training within the first six months of assignments because the training was not yet available. LBPD indicated that the training was made available on February 16, 2018.

Exhibit 30 below summarizes the results of our review.

Exhibit 30 Long Beach Police Department Compliance with Contract Personnel and Training Requirements Contract Requirements Compliance Comments								
Contract Requirements	Yes	No	Comments					
Each sworn law enforcement officer/supervisor assigned to Metro hold an active California POST (Peace Officer's Certificate).	Х							
Command level officers hold an active Management or Executive POST Peace Officer's certificates.	Х		The following command level officers hold an active Management POST Peace Officer's certificates: Deputy Chief, Commander, and Lieutenant.					

	Exhibit 30 Long Beach Police Department Compliance with Contract Personnel and Training Requirements								
	Contract Requirements		liance No	Comments					
3.	Only Post certified personnel are authorized to provide law enforcement services.	Х							
4.	Personnel assigned to the contract completed their probationary period.	X							
5.	Personnel assigned to the contract have a minimum of 18 months of law enforcement experience.	Х							
6.	Personnel assigned to the contract have no current duty restrictions.	Х		1 out of 30 selected personnel had current duty restriction. Per LBPD, this Officer had no duty restriction when he worked Metro overtime.					
7.	Personnel assigned to the contract completed Metro's Safety Training.	X							
8.	Personnel assigned to the contract completed training course in Transit Policing.		Х	1 out of 30 or 3.33% of the selected personnel had not completed this training.					

Recommendation 19:

A. LBPD should ensure all personnel have completed the transit policing training before working on any Metro assignments.

B. Metro's SSLE Department should monitor the contract requirements for qualifications and training of personnel to ensure compliance.

LBPD Compliance with Billing Requirements

On March 23, 2017, Metro entered into a five-year firm fixed unit rate contract with LBPD for a not-to-exceed amount of \$30,074,628. The exhibit below summarizes the amount estimated for each year.

Exhibit 31 Long Beach Police Department Contract Amount Proposed for Each Contract Year							
Amount							
Year 1	\$	5,459,271					
Year 2		5,517,674					
Year 3		5,959,087					
Year 4		6,316,633					
Year 5		6,821,963					
Total	\$	30,074,628					

Finding 20: The total amount billed and paid for FY 2018 exceeded the estimated cost specified in the contract for Year 1.

For FY 2018, the total amount billed and paid to LBPD was \$6,344,849. Thus, the total amount billed and paid for FY 2018 exceeded the estimated cost in the contract of \$5,459,271 by \$885,578 for Year 1, see exhibit below for details.

Exhibit 32 Long Beach Police Department Difference Between Contract Amount and Amount Billed and Paid for FY 2018							
	Year 1						
Contract Amount	\$ 5,459,271						
Billing and Payment	6,344,849						
Difference	\$ (885,578)						

Recommendation 20:

- A. LBPD should inform Metro of the amount expected to exceed the estimated cost specified in the contract for each year before incurring the costs.
- B. Metro's SSLE Department should continue monitoring LBPD's billings, payments and contract amount to ensure that costs do not exceed the contract amount.

Finding 21: Invoices were based on actual services provided and supported by biweekly Work Hour Detail Schedules and partial Daily Metro Cost schedules along with Regular Overtime Reports and Employee Time Records. Daily summary of assignments for all hours worked and payroll records were not submitted with the invoices.

According to Section 7.0 of the Statement of Work in the contract, the Contractor's monthly invoice shall be based on actual services under the terms of the contract. The billings must be accompanied by supporting documentation, to include but shall not be limited to, daily summary of assignments and hours worked and payroll records.

We reviewed LBPD's billing for two invoices (April 2018 and May 2018). The April invoice was for two pay periods ending March 30, 2018 and April 13, 2018 in the amount of \$471,008.58. The May invoice was for two pay periods ending April 27, 2018 and May 11, 2018 in the amount of \$467,869.88. For each of these two invoices, LBPD submitted a Work Hour Detail schedule by pay period. Daily summary of assignments for all hours worked and payroll records were not submitted with the invoices.

The exhibit below summarizes the costs billed for April 2018 and May 2018.

Exhibit 33 Long Beach Police Department Costs Billed for April 2018 and May 2018							
Description	April 2018	May 2018					
Personnel Cost							
Operational	\$319,236.48	\$317,264.34					
Administrative	42,229.54	46,016.64					
Total Before Indirect Cost Overhead	361,466.02	363,280.98					
Indirect Cost Overhead - 25%	90,366.51	90,820.25					
Total Personnel Cost	451,832.53	454,101.23					
Equipment Cost	15,340.84	11,014.92					
Indirect Cost Overhead - 25%	3,835.21	2,753.73					
Total Equipment Cost	19,176.05	13,768.65					
Total Amount Billed	\$471,008.58	\$467,869.88					

Recommendation 21:

- A. LBPD should submit the daily summary of assignments for all hours worked and payroll records with the invoices.
- B. Metro's SSLE Department should continue monitoring LBPD's billings to ensure all the required supporting documents were submitted with the invoices.

Finding 22: We identified a total amount of \$14,643.89 as overbilled and overpaid to LBPD.

On August 28, 2017, Metro's Contract Administration Manager sent an email to LBPD for the revised schedule of approved Maximum Fully Burdened Rate for Fiscal Year 2017/2018. This schedule listed the maximum hourly direct labor rate, indirect overhead rate of 25% and administrative overhead rate of 9.6% for each labor category. According to the email, invoices shall be billed based on the actual hourly direct labor rate of each personnel plus the applicable indirect overhead rate and administrative overhead rate. In no instance shall the fully burdened hourly rate for

each personnel exceed the maximum fully burdened hourly rate approved for each labor category.

For each of the two invoices (April 2018 and May 2018) that we selected for testing, we compared the hourly rates billed to the list of maximum fully burdened rates that Metro approved on August 28, 2017. We found that that the fully burdened hourly rate that LBPD billed to Metro exceeded the approved maximum fully burdened hourly rate for three labor categories (Lieutenant, Officer, and Sergeant). In addition, we found one labor category (Police Corporal) that LBPD billed was not listed in the approved maximum fully burdened hourly rate. We identified a total amount of \$14,643.89 as overbilled and overpaid to LBPD.

The exhibit below summarizes the labor category with the hourly rate and cost difference.

Long Beach Police Department Labor Categories with Hourly Rate and Cost Differences

									T	a4a1	- April and M			¢	14,643.89

Recommendation 22:

A. LBPD should return to Metro the overbilled and overpaid amount of \$14,643.89.

B. Metro's SSLE Department should continue to monitor LBPD's billings to ensure only the approved labor classifications are billed and included in the list of maximum fully burdened hourly rates. Metro should also review the billing rates for all invoices to determine the extent of overbilling for FY2018.

Finding 23: The billing methodology for equipment cost was not in compliance with the contract agreement.

For April 2018 and May 2018 invoices, LBPD billed the costs for supplies and equipment, fleet, and technology services as equipment cost using monthly actuals plus an additional 25% of the actual cost as indirect cost overhead. This methodology was not in compliance with the contract. According to Section CP-01 of the contract, cost of vehicles, equipment, supplies including uniforms and other items needed by law enforcement personnel in the performance of the Statement of Work should be included in the maximum fully burdened hourly rate as equipment/supplies overhead cost. Equipment/supplies overhead cost shall be computed using an hourly direct labor rate plus indirect overhead cost times equipment/supplies overhead rate. Since LBPD used a different billing methodology than the methodology required by the contract, LBPD billed Metro \$21,571.99 less than if the contract method had been used.

The exhibit below summarizes the cost impact using LBPD's billing methodology vs. contract required billing methodology for equipment cost for April 2018 and May 2018 invoices.

Exhibit 35 Long Beach Police Department Cost Impact for Equipment Cost for April 2018 and May 2018							
Description	April 2018	May 2018	Total				
Amount billed by LBPD for personnel cost and equipment cost (a)	\$471,008.58	\$467,869.88	\$938,878.46				
Amount calculated using the contract required methodology (b)	\$481,625.24	\$478,825.20	\$960,450.45				
Difference (a-b)	\$ (10,616.66)	\$ (10,955.32)	\$ (21,571.99)				

Recommendation 23: Metro's SSLE Department should review the billing methodology specified in the contract for equipment cost and determine whether the contract should be amended.

LBPD Compliance with Contract Reporting Requirements

We requested Metro to provide the reports with the date received showing that LAPD submitted the required reports in a timely manner, with adequate information, and in a format that allows Metro to determine the calculation of reported figures.

Finding 24: LBPD met 8 out of 9 contract requirements for required reports. The reports were submitted with adequate information and in a format that allows Metro to determine the calculation of the reported figures. No information was provided as to when these reports were submitted to Metro so we were unable to determine if the reports were submitted to Metro on time.

Metro provided various reports including monthly summary schedules and weekly deployment summary for July 2017 to June 2018. Weekly deployment summary and daily summary were also provided with the billings for April 2018 and May 2018. No information was provided as to when the monthly reports were submitted to Metro. We reviewed all the reports provided and found that LBPD met 8 out of the 9 contract requirement for required reports. These reports were submitted with adequate information and in a format that allows Metro to determine the calculation of the reported figures. LBPD did not submit the after action reports following special operations, emphasis details and/or major incidents because of on-going litigation.

Exhibit 36 below summarizes the required reports and the results of our review.

	Exhibit 36 Long Beach Police Department Compliance with Contract Reporting Requirements									
	Required Reports	Comments								
1	Weekly schedule for each watch or shift. Must include each employee's name, badge number, actual hours worked, assignment and rank.	Yes	Weekly Deployment Summary included each employee's name, badge number, actual hours worked, assignment and rank.							
2	Watch Commander Summary of Major Events of the Day.	Yes	Daily Summary included significant events of the day.							

	Exhibit 36 Long Beach Police Department Compliance with Contract Reporting Requirements									
	Required Reports	Compliance	Comments							
3	Monthly summary of crime activity, citations issued, arrests made.	Yes								
4	Monthly summary of commendations and complaints.	Yes								
5	Monthly Report on the number of Part 1 crime cases referred for follow-up investigation and the subsequent disposition.	Yes								
6	After-Action Reports following special operations, emphasis details and/or major incidents.	No	Reports not provided. Per LBPD, major incident after action reports cannot be provided because of an ongoing litigation.							
7	Annual Community Policing Plan.	Yes	No Annual Community Policing Plan. Per LBPD, Metro SSLE Department developed a joint community policing plan.							
8	Monthly summary of Problem- Oriented Policing projects.	Yes								
9	Executive Summary of Major Events/Incidents on the Metro System (distribution to Metro's CEO, DCEO, COO, Chief of Risk Safety and Asset Management and Chief of System Security and Law Enforcement).	Yes	This report refers to "after action reports and intelligence briefings". Chief of System Security and Law Enforcement confirmed that he has access to the information but no copies were provided.							

Recommendation 24: Metro's SSLE Department should continue monitoring LBPD's submission of reports to ensure all the required reports are submitted in a timely manner and with complete information to allow Metro to determine the calculation of the reported figures.

Other Contract Areas

LBPD was responsive and supportive in evaluating and developing strategies to address security threats, requests for K9 explosive detection services, requests for law enforcement presence during fare enforcement and passenger screening operations, and in addressing the impact of homelessness on the transit system based on discussions with Metro's SSLE Department.

F. Fare and Code of Conduct Compliance Enforcement

Enforcing fare compliance on the Metro system, as well as the Metro Customer Code of Conduct is a key element of Metro's safety and security mission. Currently, this mission is primarily the role of Metro Security but is also performed by contracted law enforcement personnel. To review Metro fare and code of conduct compliance enforcement we:

- Determined the number of fare validation checks (report by month, rail line, and compare to target)
- Summarized the total number of citations issued in FY 2018 and compared with the total number of citations issued in prior years.
- Determined whether performance indicators or metrics were developed for Metro's transit security and fare compliance functions.

Code of Conduct and Parking Enforcement and Citations

Exhibit 37 on the following page shows the citations for Metro Code of Conduct violations, including those related to transit fares. As this exhibit shows, the vast majority (98%) of the citations for Metro Code of Conduct violations are issued by Metro Security. This demonstrates the substantial change in the responsibility for fare and code of conduct enforcement from contracted law enforcement to Metro Security.

Parking enforcement is also an important function to ensure safety and that vehicles do not interfere with Metro bus and rail operations. Exhibit 38 shows the citations for parking violations issued by Metro Security and each of the contracted law enforcement agencies. As this exhibit shows, Metro Security issued the largest number of parking citations (49%), while the LASD issued a substantial number (43%) as well.

Exhibit 39 shows the trend in citations issued over the past six years. As this exhibit shows, the number of citations issued increased substantially (162%) between FY 2017 and FY 2018. Total citations are 35% below the level for FY 2013.

Exhibit 39 Citations for Metro Code of Conduct Violations FY 2013 to FY 2018								
Year	Citations Issued	Annual Change	Cumulative Change					
FY 2013	100,937							
FY 2014	82,892	-18%	-18%					
FY 2015	58,102	-30%	-42%					
FY 2016	29,524	-49%	-71%					
FY 2017	25,218	-15%	-75%					
FY 2018	66,102	162%	-35%					
FY 2018	totals include 22	2,516 formal wa	rnings issued.					

This increase in citations is likely attributable to the completion of the transition in responsibility for Code of Conduct enforcement from contracted law enforcement agencies to Metro Security.

Performance Indicators for Metro Security

The role and responsibilities of Metro Security have expanded substantially over the past few years and now includes primary responsibility for enforcing Metro's Code of Conduct on the system, including fare enforcement. Given this, it is important that Metro Security have an effective accountability system, including meaningful performance indicators.

Finding 25: The SSLE Department plans to develop performance indicators for Metro Security during 2019.

The SSLE Department reports they will be developing Key Performance Indicators (KPI) for Metro Security during 2019. These KPI will cover two key areas: Fare Enforcement and Critical Infrastructure Protection. The fare enforcement KPI will focus on effective strategies to increase fare compliance. The critical infrastructure KPI will focus on assessing and mitigating security threats to the transits system and its critical structures.

Recommendation 25: The SSLE Department should continue and complete efforts to develop key performance indicators for Metro Security during FY 2019.

Appendix B: Schedule of Recommendations and Proposed Actions

Exhibit 47 Metro Security Performance 2018 Review Recommendation Summary and Proposed Actions

	Recommendation Si	ummary and	a Proposea	Actions	
No.	Recommendation	Staff Assigned	Agree or Disagree	Proposed Action	Completion Date Estimate
1	The Metro SSLE Department should continue to work with contract law enforcement agencies to improve the complete and accurate reporting of crime that occurs on the Metro System.				
2	The Metro SSLE Department should continue to work to develop a more macro approach to oversight and monitoring of contracted law enforcement resources using the GPS function of the Mobile Phone Validators (MPV) assigned to contracted law enforcement personnel and the data generated from them.				
3	The Metro SSLE Department should consider providing more detailed information on reported crime to distinguish between violent crime and property and petty crime.				
4	The Metro SSLE Department should collect and report response time information for all three categories of calls for service.				
5	The Metro SSLE Department should use the GPS function and data generated to provide reliable and meaningful information on the amount of time contracted law enforcement officers spend on various parts of the Metro System.				
6	The Metro SSLE Department should work with the contract law enforcement agencies to review, revise and adopt Key Performance Indicators (KPI) including baseline or target levels of performance for each KPI.				

No.	Recommendation	Staff Assigned	Agree or Disagree	Proposed Action	Completion Date
7	The Metro SSLE Department should continue to develop the Metro Community Policing plan and ensure it includes: Specific training in Problem Oriented Policing for law enforcement personnel to assist Metro in addressing matters related to crime and disorder Attendance at community meetings and other events designed to foster Metro's relationship with the community Protocols to obtain feedback from bus and rail managers that will be used in the overall policing strategy				Estimate
8	A. LAPD should continue monitoring the contract requirements to ensure all personnel meet the required certification and complete the transit policing training before working on any Metro assignments. B. Metro SSLE Department should continue monitoring the contract requirements for qualifications and training of personnel to ensure compliance.				
9	A. LAPD should submit the required payroll records with the monthly invoice. B. Metro should continue to monitor LAPD's billings to ensure all the required supporting documents are submitted with the invoices				
10	A. LAPD should submit the list of maximum fully burdened hourly rates for each labor classification for overtime in accordance with the contract				

No.	Recommendation	Staff Assigned	Agree or Disagree	Proposed Action	Completion Date Estimate
	requirements. Also, the escalation rate included in the calculation of the maximum fully burdened hourly rates should not exceed the maximum escalation rate stipulated in the contract. B. Metro SSLE Department should work with LAPD to ensure that the list of maximum fully burdened hourly rates complied with the contract requirements. Metro should also review the billing rates for overtime for all invoices to determine the extent of				
11	overbillings for FY 2018. A. LAPD should submit the list of maximum fully burdened hourly rates for all labor classifications in accordance with the contract requirements. For any additional labor classifications not identified in the list of maximum fully burdened hourly rate, LAPD should submit a revised list to Metro for approval prior to incurring the cost. B. Metro SSLE Department should continue to monitor LAPD's billings to ensure only the approved labor classifications are billed and included in the list of maximum fully burdened hourly rates. Metro should also review the billing rates for straight time for all invoices to determine the extent of overbillings.				
12	A. LAPD should return the overbilled and overpaid amount of \$3,874.99 to Metro.				

No.	Recommendation	Staff Assigned	Agree or Disagree	Proposed Action	Completion Date Estimate
	B. Metro SSLE Department should continue monitoring LAPD's billings to identify and resolve billing discrepancies.				
13	A. LAPD should submit the prevailing Cost Allocation Plan (CAP) rate together with the list of maximum fully burdened hourly rates for overtime. B. Metro SSLE Department should continue to monitor LAPD's billings to ensure the overtime overhead rate billed was based on the CAP overhead rate approved by the Federal Government in effect at the time the work was performed.				
14	A. LAPD should submit to Metro in a timely manner the monthly Summary of Problem-Oriented Policing projects. B. Metro's SSLE Department should continue to monitor LAPD's submission of reports and stamp the date received on reports to ensure all the required reports are submitted in a timely manner and with complete information to allow Metro to determine the calculation of the reported figures.				
15	 A. LAPD should provide the equipment in the quantities listed in Exhibit E of the contract. B. Metro SSLE Department should continue to monitor LAPD's equipment to ensure the quantities listed in Exhibit E of the contract are properly provided and in a timely manner. 				

		01-11	A	B	Completion
No.	Recommendation	Staff Assigned	Agree or Disagree	Proposed Action	Date Estimate
16	 A. LASD should continue monitoring the contract requirements to ensure all personnel complete the safety training and transit policing training before working on an Metro assignments. B. Metro SSLE Department should continue monitoring the contract requirements for qualifications and training of personnel to ensure compliance with the contract. 	у			
17	A. LASD should issue an additional credit amount of \$1,699.68 to Metro. B. Metro SSLE Department should continue monitoring LASD's billings to ensure each job position meet the service leve promised on Form 575 and the billing rates are in compliance with the contract.	ls e			
18	A. LASD should submit to Metro a timely manner the report for number of cases referred for follow-up investigation and the subsequent disposition. B. Metro SSLE Department should work with LASD to resolve any issues regarding the required reports. Also, Metro should continue monitoring LASD's submission of reports to ensurall the required reports were submitted in a timely manner and with complete informatio to allow Metro to determine the calculation of the reported figures.	e dd y re			
19	A. LBPD should continue monitoring the contract requirements to ensure all personnel have completed the	,

	transit policing training before working on any Metro assignments. B. Metro SSLE Department should continue monitoring the contract requirements for qualifications and training of personnel to ensure compliance.				
20	 A. LBPD should inform Metro the amount expected to exceed the estimated cost specified in the contract for each year before incurring the costs. B. Metro SSLE Department should continue monitoring LBPD's billings, payments and contract amount to ensure that costs do not exceed the contract amount. 				
21	 A. LBPD should submit the daily summary of assignments for all hours worked and payroll records with the invoices. B. Metro SSLE Department should continue monitoring LBPD's billings to ensure all the required supporting documents were submitted with the invoices. 				
22	 A. LBPD should return to Metro the overbilled and overpaid amount of \$14,643.89. B. Metro SSLE Department should continue to monitor LBPD's billings to ensure only the approved labor classifications are billed and included in the list of maximum fully burdened hourly rates. Metro should also review the billing rates for all invoices to determine the extent of overbillings for FY2018. 				

No.	Recommendation	Staff Assigned	Agree or Disagree	Proposed Action	Completion Date Estimate
23	Metro SSLE Department should review the billing methodology specified in the contract for equipment cost and determine whether the contract should be revised.				
24	Metro SSLE Department should continue monitoring LBPD's submission of reports to ensure all the required reports are submitted in a timely manner and with complete information to allow Metro to determine the calculation of the reported figures.				
25	The SSLE Department should continue and complete efforts to develop key performance indicators for Metro Security during FY 2019.

Office of the Inspector General Metro Security Performance Review Fiscal Year 2018

Metro Operations, Safety, and Customer Experience Committee

July 18, 2019

BCA Watson Rice, LLP

- Metro awarded three separate 5-year firm fixed unit rate contracts to the LAPD, the LASD, and the LBPD for transit law enforcement services in 2017.
- 2. The Metro Board directed the OIG to annually audit each law enforcement services contract.
- 3. The audit is to ensure that Metro is receiving the services it is paying for.
- 4. This report evaluates transit security performance provided by the three Contractors and Metro's Transit Security Department during FY 2018.

- 1. Reported Violent Crime decreased by 18% between FYs 2015 and 2018, with most of this decrease (14%), occurring between FYs 2017 and 2018.
- 2. Reported Property Crime decreased 15% between FYs 2015 and 2018, with a decrease of 16% occurring between FYs 2015 and 2017, and an increase of 1% occurring between FYs 2017 and 2018.
- 3. Rider perceptions of safety on the Metro Train system declined slightly and rider perceptions of safety on the Metro Bus system improved slightly between FYs 2015 and 2018.

Key Recommendations

There were 25 recommendations, but these are some key ones:

- 1. Improve the reporting of crime that occurs on the Metro System:
 - A. More detailed information on reported crime to distinguish between violent crime and property and petty crime, and
 - B. Report crimes related to the Metro System but handled by Non-Metro assigned personnel.
- 2. Strengthen oversight and monitoring of resources using the GPS function of the Mobile Phone Validators.
- 3. Review, revise, and adopt KPIs including baseline or target levels of performance.
- 4. Continue and expand monitoring and oversight of contract compliance, including:
 - A. Reviewing invoices for potential overbilling,
 - B. Enforcement of training requirements,
 - C. Staying within budget, and
 - D. Deployments that increase rider perceptions of safety.
- 5. Improve documentation to support billings.
- 6. Seek some refunds of small amounts due to Metro.

OPERATIONS, SAFETY, AND CUSTOMER EXPERIENCE COMMITTEE EXECUTIVE MANAGEMENT COMMITTEE JULY 18, 2019

SUBJECT: OFFICE OF THE INSPECTOR GENERAL REPORT ON METRO SECURITY

PERFORMANCE REVIEW FISCAL YEAR 2018

ACTION: RECEIVE AND FILE

RECOMMENDATION

RECEIVE AND FILE OIG report on Metro Security Performance Review Fiscal Year 2018.

ISSUE

On February 23, 2017, the Metro Board passed a motion directing that the Inspector General conduct an annual audit of each law enforcement services contract to determine how key performance indicators are measuring up against actual performance metrics. The audit is to ensure that Metro is receiving the services it is paying for.

BACKGROUND

In 2017, LACMTA (Metro) awarded three separate 5-year firm fixed unit rate contracts to the Los Angeles Police Department (LAPD), the Los Angeles County Sheriff's Department (LASD), and the Long Beach Police Department (LBPD) for transit law enforcement services to support day-to-day operations across Metro's entire service area. Metro also directly employs transit security officers who perform fare checks and bus/rail patrolling.

DISCUSSION

A. Trends in Crime, Perceptions of Safety, and Safety and Security Complaints

There are three key outcome measures that can be used to evaluate the effectiveness and trends of Metro's safety and security approach and program. These are the level of reported crime on the system, the perceptions of safety by users of the system, and the number of safety and security complaints made by users of the system.

Reported Crime

Total reported Violent Crime on the Metro System decreased by 18% between FY 2015 and FY 2018,

Agenda Number: 26.

with most of this decrease (14%), occurring between FY 2017 and FY 2018. Total reported Property Crime on the Metro System decreased 15% between FY 2015 and FY 2018, with a decrease of 16% occurring between FY 2015 and FY 2017, and an increase of 1% occurring between FY 2017 and FY 2018.

Obtaining complete and accurate reporting of crime that occurs on the Metro System continues to be challenging. This is partially due to the fact that the Metro System operates within multiple jurisdictions with their own law enforcement agencies who respond to, handle, and report crime that may not be reported to Metro.

In addition, in the LAPD service area of the Metro System, LAPD neighborhood patrol units respond to and handle many crimes that occur within the Metro System. An unknown number of these crimes are not reported to the LAPD Transit Policing Division and so are not tracked and reported to Metro.

We recommend the Metro System Security and Law Enforcement (SSLE) Department continue to work with contract law enforcement agencies to improve the complete and accurate reporting of crime that occurs on the Metro System.

Rider Perceptions of Safety

Perception of crime and disorder on the Metro System creates a risk to the confidence in safety held by passengers and Metro employees and poses a risk to the reputation of Metro as a safe and secure system. Passengers who perceive the system to be unsafe will not use the service, and therefore reduce the number of people using transit and Metro's ridership.

Based on Metro rider surveys conducted annually, rider perceptions of safety on the Metro Train system declined slightly and rider perceptions of safety on the Metro Bus system improved slightly between FY 2015 and FY 2018. These changes in perceptions of safety are small and within the margin of error for the survey. However, it is important to continue to monitor rider perceptions of safety on the Metro System and to develop strategies to address concerns and improve that perception.

Complaints Regarding Safety and Security

Another important indicator of the public or riders' perception of the safety of the Metro System is the number of complaints received regarding safety and security. During the period from FYs 2015 to 2018, rider complaints for the bus system regarding passenger safety or conduct issues were not among the top ten complaints. However, for the rail system, rider complaints regarding passenger safety or conduct issues were the second most common complaint of the top ten complaints for FYs 2015 to 2017. For FY 2018, complaints regarding passenger safety or conduct issues dropped to five of the top ten.

We recommend the SSLE Department continue to monitor rider survey results regarding perceptions of safety of riders on the Metro System and complaints regarding safety and passenger conduct issues and develop strategies to improve those perceptions and reduce complaints.

B. Resource Monitoring and Oversight

The SSLE Department is charged with ongoing oversight of the contracted law enforcement services as well as the operations of Metro Security.

Audits of Contracted Law Enforcement Personnel Presence

Metro has and will continue to have a substantial investment in resources devoted to system safety and security. Ensuring that these resources are effectively and efficiently used is very important.

Oversight and monitoring of contracted law enforcement resources has been problematic. Metro has had some difficulty in ensuring that law enforcement personnel assigned to Metro are actually present and performing as assigned. Historically, Metro has not had an effective means of verifying the accuracy of staffing information provided by contract law enforcement, or of verifying that personnel charging time on the Metro contract are actually present and providing the contracted services.

Beginning with FY 2018, the SSLE Department implemented regular "audits" of law enforcement personnel to monitor consistency between personnel time reported and the invoiced costs. Beginning in September 2017, Metro also began conducting "field audits" of law enforcement personnel in addition to the comparison audits of information provided by contracted law enforcement agencies. These field audits involve taking the roster of law enforcement personnel assigned to work and verifying that those personnel are actually in the field and providing the contracted service. These field audits strengthen Metro's contract oversight and monitoring.

GPS Based Contracted Law Enforcement Oversight and Monitoring

The SSLE Department has been working to develop and implement an effective method of tracking and monitoring the activities of safety and security resources deployed on the Metro System using the GPS function on smartphones used by Metro safety and security personnel.

The Mobile Phone Validators (MPV) provided to contracted law enforcement officers are now GPS enabled and are able to provide information on the location and movement of the MPV and law enforcement resources. Metro has not yet begun using the GPS function and information generated to track or monitor the activities of contracted law enforcement resources.

We recommend the SSLE Department should work to develop a more macro approach to oversight and monitoring of contracted law enforcement resources using the GPS function of the MPV assigned to contracted law enforcement personnel and the data generated from them.

Oversight of Other Law Enforcement Contract Requirements

In our review of compliance with the contract terms, we found some instances of non-compliance by all three law enforcement agencies with qualifications and training of personnel assigned, reports and information being provided to Metro, equipment provided under the contract, and appropriate support for invoices submitted. Increased monitoring and oversight of these requirements seems warranted given the size of the contracts and the importance of the services being provided.

We recommend the SSLE Department should consider expanding monitoring and oversight of other contract requirements including qualifications and training of personnel, required reporting, equipment provided, and invoice support and compliance with the contract. We also recommend

Agenda Number: 26.

Metro seek reimbursement for overbillings and overpayments resulting from noncompliance with contract terms during FY 2018.

C. Key Performance Indicators (KPI)

It is essential that Metro clearly define performance expectations for each of the contract law enforcement agencies and use meaningful performance indicators to evaluate how well these expectations are being met.

Reporting of Crime and Incident Response Time Indicators

Two of the KPI included in each of the law enforcement contracts were intended to provide information on the outcomes of the law enforcement service provided including changes in the number of crimes reported and increases in crime incident response times.

In crime reporting the emphasis should be on violent crime, which is obviously the most impactful to the Metro System and has the greatest impact on Metro's riders. Reporting all crime in the aggregate is less meaningful because violent crimes such as homicide, robbery and rape are given the same weight as lesser crimes such as larceny, petty theft, and vandalism.

A primary workload for law enforcement is responding to and handling incidents that occur on the Metro System or calls for service. Metro's SSLE Department currently only collects and reports response time information for emergency calls for service. While emergency calls for service are obviously the most important calls, tracking and reporting response time on less urgent incidents and calls for service is also important.

Often these lower priority calls for service involve quality of life issues and concerns as well as victims of property crimes. A slow response to these incidents can have a negative impact on the perception of the riding public transit that the system is safe and well protected. In addition, not requiring contract law enforcement agencies to track and report these response times communicates to them and their officers that these calls are not important.

We recommend that Metro's SSLE Department begin to collect and report on response times for all calls for service that require a law enforcement response.

Visibility of Law Enforcement Security Personnel Indicators

Providing a visible security presence within the Metro System is an important strategy for providing both a sense and reality of safety. Three of the KPI included in each of the law enforcement contracts were intended to provide information on the visibility of law enforcement security personnel on the Metro System. These are 1) the ratio of proactive versus dispatched activity, 2) the number of foot and vehicle patrols of bus stops, transit centers, train platforms, plazas, and stations, and 3) the number of bus and train boardings.

Contract law enforcement agencies were only able to report on the ratio of proactive versus dispatched activity. Contract law enforcement agencies were not able to report on the other two KPI. While these are important indicators and would provide useful information on the level of activity and visibility of contracted law enforcement personnel, it was not practical for the law enforcement

Agenda Number: 26.

agencies to reliably collect meaningful information for these indicators. As discussed in Section B of this report, using the GPS function and the data generated could provide more reliable and meaningful information on the amount of time contracted law enforcement officers spend on each of these activities related to KPI 2 and 3 above.

Law Enforcement Personnel Presence Indicator

One of the KPI included in each of the law enforcement contracts was intended to provide information on the presence of the contracted law enforcement personnel. This is the ratio of staffing levels and vacant assignments. This indicator is important in both communicating to the contract law enforcement agencies the need to actually staff contracted assignments and to report how effectively these positions are actually being staffed. Reported staffing levels collectively were at 98.5% or above during FY 2018.

Baseline Expectations and Other Potential Performance Indicators

It is important to establish baseline expectations or targets for each performance indicator. This not only clearly communicates performance expectations, but it also can help drive improvements in performance through the development and implementation of new strategies. Baseline performance levels for each KPI have not been developed.

We recommend Metro's SSLE Department work with contract law enforcement agencies to establish baseline or target performance levels for each of the KPI currently in use. They should also work together to determine if additional KPI would be appropriate and meaningful.

D. Community Policing

Community policing within a transit system should place an emphasis on quality of life issues. The customers of the Metro System must feel safe and secure. The presence of security, in whatever form, must have a "felt presence;" that is, they must be visible and engaged without becoming oppressive and threatening.

Metro Community Policing Plan

The Metro SSLE Department is in the process of developing a community policing plan for the Metro System. The Metro Community Policing Plan will be a unified plan instead of having each of the three law enforcement agencies develop individual community policing plans. The Metro Community Policing Plan is part of Metro's new Equity Platform, which aims to assure equity across all programs impacting transit service, planning, and policing. The SSLE Department expects to have a draft Metro Community Policing Plan completed by the Fall of 2019.

We recommend the Metro SSLE Department continue to develop the Metro Community Policing Plan and ensure it includes specific training in Problem Oriented Policing for law enforcement personnel, attendance by law enforcement personnel at community meetings, and protocols to obtain feedback from bus and rail managers.

Law Enforcement Service Request (LESR) System

Metro employees, including bus and train operators, maintenance personnel, customer service

representatives, and others are the front-line representatives of Metro and have ongoing and direct interaction with the riding public. The LESR system implemented in FY 2018 should provide good information on Metro employee safety and security issues and concerns on the system going forward.

During FY 2018, a total of 935 law enforcement service requests were generated by Metro employees. Our review of the requests and responses indicate that law enforcement agencies are using the LESR to identify and resolve issues and concerns.

E. Compliance with Specific Contract Requirements

The contracts with the three law enforcement agencies each contain specific requirements related to personnel and training, billing, required reports, and other contractual requirements.

Overview of Law Enforcement Contract Requirements

Each of the contracts with the three law enforcement agencies includes specific contract requirements. This includes requirements for the experience and training of law enforcement personnel assigned to Metro, billing information and supporting documentation, required information and reports on activities, and other information on equipment provided.

Los Angeles Police Department (LAPD) Contract Compliance

The following are the results of our review of LAPD's contract compliance:

- LAPD was not in compliance with two of the contract requirements related to personnel and training.
- The total amount billed and paid to LAPD for FY 2018 did not exceed the estimated cost specified in the contract for Year 1.
- Invoices submitted to Metro were based on actual services provided and supported by daily summary of assignments and hours worked using the cost data from the payroll system.
 However, actual payroll records were not submitted with the invoices as required.
- For overtime charges, we were unable to determine whether the billing rates exceeded the approved maximum fully burdened hourly rates because the list of maximum fully burdened hourly rates that LAPD submitted to Metro was not in compliance with the contract.
- Eight labor classifications totaling \$281,400.77 were not found in the required list of maximum fully burdened hourly rates.
- For straight time charges, we identified a total amount of \$3,874.99 as overbilled by LAPD and overpaid by Metro.
- LAPD invoiced an overhead rate of 12.76% for overtime hours that was unsupported by

adequate documentation.

- LAPD met 8 out of 9 contract requirements for submitting required reports to Metro. The
 reports were submitted with adequate information and in a format that allows Metro to
 determine the calculation of the reported figures. However, no information was provided as to
 when these reports were submitted to Metro so we were unable to determine if the reports
 were submitted on time in accordance with the contract.
- Exhibit E of the contract provides a list of equipment that the LAPD was supposed to provide under the contract. We found that LAPD did not provide the equipment in the quantities listed in Exhibit E.

Los Angeles County Sheriff's Department (LASD) Contract Compliance

- LASD was not in compliance with two of the contract requirements related to personnel and training.
- The total amount billed and paid for FY 2018 to LASD did not exceed the estimated cost specified in the contract for Year 1.
- Except for a credit amount understatement of \$1,699.68, the billing rates were consistent with Metro's approved rates. Invoices were based on actual services provided and supported by Payment Certification, the Service Level and Billing Status Report, and the Patrol Compliance Report.
- LASD met 7 out of 8 contract requirements for required reports. The reports were submitted in a timely manner, with adequate information and in a format that allows Metro to determine the calculation of the reported figures.

Long Beach Police Department (LBPD) Contract Compliance

- LBPD was not in compliance with the contract requirement for Transit Policing training.
- The total amount billed and paid for FY2018 exceeded the estimated cost specified in the contract for Year 1 by \$885,578.
- Daily summary of assignments for all hours worked and payroll records were not submitted with the invoices.
- The billing rates exceeded Metro's approved maximum fully burdened hourly rates for three labor categories. Only one of the three labor categories was listed in the approved maximum fully burdened hourly rates. We identified a total amount of \$14,643.89 as overbilled by LBPD

and overpaid by Metro.

- The billing methodology for equipment cost was not consistent with the contract agreement.
- LBPD met 8 out of 9 contract requirements for required reports. The reports were submitted
 with adequate information and in a format that allows Metro to determine the calculation of the
 reported figures. No information was provided as to when these reports were submitted to
 Metro so we were unable to determine if the reports were submitted to Metro on time.

F. Fare and Code of Conduct Compliance Enforcement

Enforcing fare compliance on the Metro System as well as the Metro Customer Code of Conduct is a key element of Metro's safety and security mission.

Code of Conduct and Parking Enforcement and Citations

The vast majority (98%) of the citations for Metro Code of Conduct violations are issued by Metro Security. This demonstrates the substantial change in the transfer in responsibility for fare and code of conduct enforcement from contracted law enforcement to Metro Security. The number of Code of Conduct citations issued increased substantially (162%) between FY 2017 and FY 2018. Total citations are 35% below the level for FY 2013.

Performance Indicators for Metro Security

The role and responsibilities of Metro Security have expanded substantially over the past few years and now includes primary responsibility for enforcing Metro's Code of Conduct on the system, including fare enforcement. Given this, it is important that Metro Security have an effective accountability system, including meaningful performance indicators.

The SSLE Department reports they will be developing KPIs for Metro Security during 2019. These KPIs will cover two key areas: Fare Enforcement and Critical Infrastructure Protection. The fare enforcement KPI will focus on effective strategies to increase fare compliance. The critical infrastructure KPI will focus on assessing and mitigating security threats to the transit system and its critical structures.

FINANCIAL IMPACT

Adoption of the recommendations in this report does not increase the financial impact on the agency.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

The recommendations in this report support Strategic Plan Goal 2.1 (Improving security), Goal 5.6 (fostering and maintaining a strong safety culture), and Goal 2 (delivering outstanding trip experiences).

NEXT STEPS

File #: 2019-0481, File Type: Informational Report Agenda Number: 26.

Metro management should:

 Complete the Schedule for Tracking Metro's Proposed Actions in response to the recommendations provided in Appendix B of the report as determinations are made on implementing the recommendations; and

• Periodically report to the Metro Board on the status of actions taken to implement the recommendations.

SUBJECT: MONTHLY UPDATE ON TRANSIT SAFETY AND SECURITY PERFORMANCE

ACTION: RECEIVE AND FILE

RECOMMENDATION

RECEIVE AND FILE Transit Safety and Security Report.

ISSUE

This report reflects May 2019 performance data as reported under the transit policing deployment strategy which is a combination of in-house fare compliance officers, private security for fixed assets and a multi-agency law enforcement deployment strategy by the Los Angeles Police Department (LAPD), Los Angeles County Sheriff's Department (LASD), and Long Beach Police Department (LBPD). The information in this report summarizes Crimes Against Persons, Crimes Against Property, and Crimes Against Society data under Uniform Crime Reporting (UCR) Program, average emergency response times, assaults on bus operators, and Metro's fare compliance and homeless outreach efforts. The Six Key Performance Indicators (KPI) are Uniform Crime Reporting guidelines, Average Emergency Response Times, Percentage of Time Spent on the System, Ratio of Staffing Levels vs Vacant Assignments, Ratio of Proactive vs Dispatched Activity, and Number of Grade Crossing Operations.

BACKGROUND

UCR is a National Incident-Based Reporting System from the US Department of Justice. It captures crime offenses in one of three categories: Crimes Against Persons, Crimes Against Property, and Crimes Against Society.

DISCUSSION

Crime stats are as follows:

Crimes Against Persons

For the month of May 2019, crimes against persons increased by 9 crimes system-wide compared to the same period last year.

Agenda Number: 27.

Crimes Against Property

For the month of May 2019, crimes against property decreased by 16 crimes system-wide compared to the same period last year.

Crimes Against Society

For the month of May 2019, crimes against society decreased by 10 crimes system-wide compared to the same period last year.

Bus Operator Assaults

There were 9 bus operator assaults reported in May, which is four more compared to the same period last year.

Average Emergency Response Times:

Emergency response times averaged 4.61 minutes for the month of May.

Physical Security Improvements:

The Systems Security and Law Enforcement division continues to provide a secure and safe environment for our patrons and employees. Our Metro Facility physical security assessment was completed, and the report was presented to key Metro leaders in Bus and Rail Operations, Information Technology and Facilities. The physical security assessment of Union Station started in August and concluded in February 2019.

We are working closely with the Los Angeles Police Department to develop a concept of the operations for the deployment of the Thruvision detection at range technology. We have had several meetings with the LAPD, and we continue to develop the procedures that will protect the public and Metro.

We met with the California Public Utilities Commission representatives to plan our Triennial Audit which will occur in September 2019.

We continue to improve our new Transit Watch application, and we hope to have the prototype ready this winter.

The Red Line ancillary area surge continues, and we are making progress with securing our underground rail stations.

The New Blue Line North project planning commenced, and the site walks were conducted to identify law enforcement and security locations to support the construction.

Metro's Homeless Efforts:

In spring 2016, Metro created the Metro Homeless Task Force to address the displaced persons that have turned to Metro system and property for alternative shelter. Out of the Task Force, Metro created the Metro Transit Homeless Action Plan which was presented to the Metro Board of Directors in February 2017. The Action Plan's goals are to enhance the customer experience, maintain a safe and secure system, and provide coordinated outreach. Components of the plan include Metro's coordination with County and City Measure H and Measure HHH. The plan also called for the hiring

of two C3 teams (County, City, Community) through the County Department of Health Services as indicated by Metro's Board of Directors. The C3 teams are to provide coordinated and responsive outreach to the homeless and to ultimately get them in housing resources.

Metro's C3 Homeless Outreach Teams:

Metro's C3 Homeless Outreach teams' twelve-month pilot program began on May 22, 2017 with initial homeless outreach on the Red Line. Since the launch of Metro's C3 Homeless Outreach teams they have provided substantial homeless outreach-with 5,194 total unduplicated homeless contacts,1,315 of whom have been linked to permanent housing solutions with a total of 114 homeless persons permanently housed. In FY19 Metro expanded the C3 teams from two to eight teams to cover rail, bus and Union Station.

C3 Homeless Outreach May1, 2019 through May 31, 2019:

Performance Measure	May Number Served	Project Year to date Number Served
Contacts with unduplicated individuals	220	5,194
Unduplicated individuals engaged	82	2,785
Unduplicated individuals provided services (obtaining vital documents, follow-up activities, transportation, CES packet, clinical assessment, etc.) or successful referral (supportive services, benefits linkage etc.)	134	2,122
Unduplicated individuals engaged who are successfully linked to an interim housing resource	83	862
Unduplicated individuals engaged who are linked to a permanent housing resource	22	339
Unduplicated individuals engaged who are permanently housed	16	114

Staff received eight referrals from LAPD. Of these, two could not be located and two declined services. Of those remaining:

- Four people were placed in interim housing.
- One of these four is now living with her significant other.
- The other three are continuing to work with the team toward permanent housing.

Impact Story resulting in Stable Housing

Recently Metro Security referred a 30 year old female and her three male children ages 10, 8, 6 to PATH Metro. The client reported that she was stranded in Los Angeles after fleeing a domestic violence relationship and was trying to return to her mother's home in Hemet, California. The client displayed obvious signs of being distraught and worried that her abuser would find her at the station. The determination was made by PATH Outreach Team members to transport the client and her children to her mother's home in Hemet rather than trying to place her on the next available train. The client's mother was contacted and gladly agreed to receive her daughter and grandchildren. PATH Metro Outreach Team then transported all four individuals to Hemet, California in PATH's company vehicle. Client and children were reunified with her mother and are residing in her home. The Client promised to follow-up with the police to report the abuse. Client also stated that her

Agenda Number: 27.

abuser did not know the location of her mother's home and as a result of that she "felt safe" at her mother's home.

C3 Coordination with Law Enforcement

With Metro System Security and Law Enforcement personnel as the lead, Metro's C3 teams coordinate with LAPD's Homeless Outreach and Protective Engagement (HOPE) Teams, LASD's Mental Evaluation Teams (MET), Long Beach PD, and Metro's Transit Security Officers, in an effort to engage the homeless and provide placement into services. These law enforcement entities provide gap service on the lines for homeless outreach when the C3 Teams are off duty or working another portion of the system.

Sheriff Mental Evaluation Team (MET) Contacts May 5, 2019 through June 1, 2019

These monthly statistics only include contacts of the Transit MET Units. They do not include contacts made by other Transit Services Bureau personnel. In addition to the data reported below, Transit MET Units:

- Transported 21 clients to other homeless outreach connection services.
- 2 teams attended LASD/MET MILO training at Industry Station 05/22/2019.
- 7 teams attended LACMET training meeting hosted by LASD County-Met 05/22/2019.
- 6 teams attended Basic Crisis Negotiation training course from 05/28/2019 05/31/2019.
- 7 teams attended Advance Crisis Negotiation training course from 06/03/2019 06/05/2019.

Long Beach Quality of Life Officers Update May 2019

The Quality of Life Officers began working with LBPD at the beginning of February 2019. The Blue Line Closure was in effect for the entire month of May. The number of contacts should increase once the "New Blue" opens in June.

The Quality of Life Officers have concluded their work with Metro personnel and Long Beach Health Department's Multi-Service Center Homeless Outreach personnel at two right-of-way homeless encampments in Long Beach. The encampment locations are:

- An abandoned golf course property adjacent to the blue Line and north of the Wardlow Station.
- On the eastern perimeter right-of-way at Division 11.

These locations are in maintenance mode with Quality of Life Officers checking on the locations daily to ensure encampments do not become re-entrenched.

May 2019 Law Enforcement Homeless Outreach

ACTION	LAPD HOPE	LASD MET	LBPD
Contacts	1,183	441	14
Referrals	30	267	4
5150 Holds	15	15	0

Detox	0	0	0
Rehab	3	0	0

Metro ROW Encampment:

 May 1, 2019 - MRL Vermont Beverly Station Plaza, abandoned site. Trash cleanup completed on May 3, 2019.

Metro Encampments Outside, Adjacent to Metro ROW:

 May 24, 2019 - Burbank Branch Chandler Bikeway East of Vineland Avenue - Active Encampment Cleanup was cleared by LAPD and cleaned by LADOT on May 30, 2019.

Measure H Generalist:

Metro's Homeless Action Plan integrates itself into the work provided under Measures H and HHH. Part of the E6 Strategies of Measure H includes 40 additional outreach workers otherwise known as "generalists" to conduct outreach on government properties including Metro, and countywide parks, libraries, beaches and harbors. These generalists do not go past the fare gates and their data, per the county will not be extrapolated for Metro. However, these generalists currently work with the C3 teams to provide outreach services.

Connect Days

Connect Days provide comprehensive homeless resources at location sites throughout LA County. These resource opportunity events are led by Council Districts (CD) and are utilized by Metro's C3 and Measure H teams when the Connect Days are adjacent to Metro properties. CD1 hosts a standing Connect Day at MacArthur Park that was utilized in May by Metro's C3 teams to provide comprehensive resources to the homeless.

Mental Health Outreach Workers:

The LA County Department of Mental Health has provided a mental health clinician to one of Metro's contracted HOPE team. Mental Health professionals are paired with all MET Teams.

Faith Based Partnership

Since January 2019, Metro has hosted four regional faith leader roundtable discussions to identity ways that Metro and the Faith based community in LA County may partner to serve the homeless. There is a major opportunity for faith-based groups to provide additional resources to homeless contacts on Metro in several ways: hosting Connect Days; partnering with entities that provide necessities (food, shelter, clothing) and providing referral information. Metro invites faith based groups and local nonprofits interested in providing resources to transit located homeless to contact Metro's System Security and Law Enforcement Department.

Agenda Number: 43.

OPERATIONS, SAFETY, AND CUSTOMER EXPERIENCE COMMITTEE JULY 18, 2019

SUBJECT: METRO FREEWAY SERVICE PATROL

ACTION: APPROVE RECOMMENDATIONS

RECOMMENDATION

AUTHORIZE the Chief Executive Officer to:

- A. AWARD a firm fixed unit rate Contract No. FS58039000 for Metro Freeway Service Patrol (FSP) Regional light duty towing services Region 1 to Kenny's Auto Service, in an amount not to exceed \$20,936,369 for 52 months, subject to resolution of protest(s), if any; and,
- B. AWARD a firm fixed unit rate Contract No. FS58039001 for Metro Freeway Service Patrol (FSP) regional light duty towing services Region 2 to Platinum Tow and Transport in an amount not to exceed \$24,006,823 for 52 months, subject to resolution of protest(s), if any; and,
- C. INCREASE Contract Modification Authority (CMA) to 29 existing Freeway Service Patrol contracts as delineated below for a total amount of \$14,521,000 thereby increasing the CMA amount from \$11,161,294 to \$25,682,294 and extend the periods of performance as follows:
- Beat no. 1: All City Tow Contract No. FSP2828200FSP141, for \$219,000 for 8 months
- Beat no. 2: Citywide Towing Contract No. FSP2785600FSP142, for \$258,000 for 9 months
- Beat no. 3: Hollywood Car Carrier Contract No. FSP3469400B3/43, for \$849,000 for 9 months
- Beat no. 4: Frank Scotto Towing Contract No. FSP2788200FSP144, for \$237,000 for 9 months
- Beat no. 5: Sonic Towing, Inc. Contract No. FSP3469500B5/17, for \$320,000 for 11 months
- Beat no. 6: Neighborhood Towing 4 U Contract No. FSP3469600B6, for \$338,000 for 11 months
- Beat no. 8: Citywide Towing Contract No. FSP2825800FSP148, for \$293,000 for 9 months
- Beat no. 9: Frank Scotto Towing Contract No. FSP3470000B9, for \$394,000 for 11 months
- Beat no. 10: Neighborhood Towing 4 U Contract No. FSP3848100FSP1410, for \$365,000 for 12 months
- Beat no. 12: Tip Top Tow Contract No. FSP2826700FSP14, for \$796,000 for 12 months
- Beat no. 13: Reliable Delivery Service Contract No. FSP2831500FSP1413, for \$440,000 for 7

months

- Beat no. 17: Sonic Towing, Inc. Contract No. FSP3469500B5/17, for \$241,000 for 9.5 months
- Beat no. 18: Bob & Dave's Towing, Inc. Contract No. FSP2690300FSP1418, for \$695,000 for 14.5 months
- Beat no. 20: Bob's Towing Contract No. FSP2836600FSP1420, for \$211,000 for 12 months
- Beat no. 21: Bob's Towing Contract No. FSP2839000FSP1421, for \$153,000 for 12 months
- Beat no. 24: T.G. Towing, Inc. Contract No. FSP2833200FSP1424, for \$275,000 for 11 months
- Beat no. 28: Hadley Tow Contract No. FSP3847300FSP1428, for \$99,000 for 11 months
- Beat no. 33: Mid Valley Towing Contract No. FSP2851900FSP1433, for \$266,000 for 9 months
- Beat no. 34: South Coast Towing, Inc. Contract No. FSP2839600FSP1434, for \$292,000 for 11 months
- Beat no. 36: Hadley Tow Contract No. FSP2841400FSP1436, for \$288,000 for 11 months
- Beat no. 37: Reliable Delivery Service Contract No. FSP3696000FSP1437, for \$690,000 for 11 months
- Beat no. 38: Steve's Towing Contract No. FSP38468001438, for \$106,000 for 11 months
- Beat no. 39: Jon's Towing Contract No. FSP3470400B27/39, for \$253,000 for 9.5 months
- Beat no. 41: T.G. Towing, Inc. Contract No. FSP2760200144, for \$322,000 for 8 months
- Beat no. 42: Platinum Tow & Transport Contract No. FSP2842100FSP1442, for \$290,000 for 11 months
- Beat no. 43: Hollywood Car Carrier Contract No. FSP3469400B3/43, for \$828,000 for 9.5 months
- Beat no. 70: Tip Top Tow Contract No. FSP3471300B70, for \$920,000 for 7 months
- Beat no. 71: Bob & Dave's Towing, Inc. Contract No. FSP3471500B71, for \$932,000 for 6 months
- Region 1: Kenny's Auto Service Contract No. FSP13-R1, for \$3,151,000 for 9 months

<u>ISSUE</u>

Based on the success of the regional approach as demonstrated with the first regional beat, staff is recommending the award of two FSP Regional light duty tow service contracts (Regions 1 & 2). The Region 1 contract award will replace the expiring Region 1 contract. The Region 2 contract award will expand the FSP Regional format from a single region to two (2) regions. Region 2 consolidates six (6) FSP beats in and around the central downtown Los Angeles freeway corridor into a single regional contract. A single contractor managing the FSP service in this area will have the flexibility to more quickly and efficiently respond to congestion due to incidents consistent with the Region 1 experience.

Recommendation C authorizes contract modification authority (CMA) in the amount of \$14,521,000 to execute contract modifications to existing FSP light duty tow service contracts. Additional funds are needed to extend and replenish existing FSP contracts, in anticipation of the phased startup of the two multi-beat Regional contracts (Recommendations A & B) and the award and startup of

sixteen (16) individual beat contracts in Q3 FY2020.

To ensure the largest pool of prospective proposers for the Regions, it was necessary to procure the Regional contracts before the individual beat contracts to avoid the contract cap limits required to ensure optimal service. Extending the period of performance will ensure seamless and efficient operation of the FSP program during the initial contract mobilization phase of the new Regional contracts where contractors order trucks to be built to Metro FSP specifications, hire and train drivers, contract with various sub-contractors and outfit their vehicles with the appropriate equipment at Metro's radio shop. Increased CMA will also provide funds to address increased operating costs such as insurance and fuel and will also replenish funding to contracts that provide support to Caltrans construction projects through a Cooperative Agreement. The FSP program currently expends up to \$75,000 each month to support Caltrans construction projects.

BACKGROUND

FSP is a congestion mitigation program managed in partnership with Metro, CHP and Caltrans serving motorists on all major freeways in Los Angeles County. The Los Angeles County FSP program has the highest benefit to cost ratio of all the statewide FSP programs.

The program utilizes a fleet of roving tow and service trucks designed to reduce traffic congestion by efficiently rendering disabled vehicles operational or by quickly towing those vehicles from the freeway to a designated safe location. Quick removal of motorists and their disabled vehicles from the freeway reduces the chances of further incidents caused by onlookers and impatient drivers. FSP helps save fuel and reduce air polluting emissions by reducing stop-and-go traffic. The service is free to motorists and operates seven days a week during peak commuting hours.

Metro contracts with independent tow service providers for light duty tow service on general purpose lanes on all major freeways in Los Angeles County, 2 light duty contracts on the ExpressLanes (I-110 and I-10), and 2 heavy duty (Big Rig) contracts (I-710 and SR-91). Each weekday, 170 tow and service trucks are deployed during peak commuting hours.

The annual benefit of the program is a follows:

- For individual beats, an annual Benefit to Cost Ratio of 10:1 For every \$1 spent there is a \$10 benefit to motorists.
- 300,000 motorist assists
- 9,847,881,840 hours motorists saved from sitting in traffic
- 16,928,508 gallons of fuel savings
- Approximately 150,000,000 kg of CO2 reductions
- The average motorist wait time for FSP service is 7 minutes (the average wait time for AAA service is over 30 minutes)
- The Los Angeles County FSP program generates one-half of the cumulative benefits of the 14 FSP programs in the state.

DISCUSSION

The regional concept was introduced to improve performance, control program costs, and enhance the ability to actively conduct incident response in a large geographic area. The concept divided the FSP service area into six geographic regions. Each region would be comprised of six individual FSP light duty tow service beats with the contract awarded to a single vendor. The first FSP Regional contract (Region 1) was awarded on January 23, 2014. An evaluation of Region 1 was conducted and completed in August 2017 to assess the impacts and benefits of the regional approach. The evaluation focused on three general areas:1) performance, 2) program efficiency and 3) operational effectiveness.

To evaluate Region 1 performance, various data sources were used including; FSP Assist information, FSP contract information, Caltrans FSP statewide annual report, and Caltrans PeMS. Metrics such as assists per vehicle hour, percentage of time assisting motorists, cost per assist and benefit to cost ratio were utilized to evaluate potential differences between a single contract per beat and a regional beat. Within each performance category, Region 1 consistently outperformed all other contracts on every metric. The Benefit-to-Cost Ratio is one of the Key Performance Indicators used by Metro and Caltrans to measure the success of the FSP program. Region 1 performed at a 17.2:1 ratio which is 7 points higher than the FSP program's overall ratio of 10:1 (Metro's program is the top performing program in the state).

In terms of program efficiency, the evaluation revealed that by consolidating 6 beats into one region under a single contract, the contractor was able to leverage the large number of vehicles (25 tow and service vehicles) to negotiate volume discounts on vehicle prices, parts and equipment. As anticipated, the implementation of Region 1 reduced the administrative workload. This provided the opportunity to focus on operations and program performance. As a result, the Los Angeles County FSP program has been the most cost effective program in the state for the past two years.

The evaluation also identified operational efficiencies associated with the regional approach in terms of the contractor's ability to manage and motivate employees to exceed past beat performance, properly maintain and repair 25 contracted vehicles, and keep contract violation assessments to a bare minimum. This allowed program management staff and FSP CHP field supervision to focus their efforts in other areas of the FSP service area (communications system development).

Based on the benefits of the first regional beat, staff recommends award of a new contract for Region 1 which is expiring and award of an additional contract for a second region (Region 2). Staff will evaluate Region 2's operations and performance in a similar fashion as was done for Region 1.

DETERMINATION OF SAFETY IMPACT

The FSP Program enhances safety on Los Angeles County freeways by assisting motorists with disabled vehicles, towing vehicles from freeway lanes to prevent secondary accidents, and removing debris/obstacles from lanes that can be a hazard to motorists. During FSP operating hours, drivers provide specific services to motorists with disabled vehicles to get them safely back on the road or tow them to a designated safe location off of the freeway. FSP drivers patrolling their Beat locate and assist motorists in freeway lanes or along the shoulder significantly faster than it would take to call a private tow service. The

FSP Program completes approximately 300,000 assists annually.

FINANCIAL IMPACT

The amount of \$14,521,000 for CMA, and first year startup and operational costs of \$5,255,583 for Region 1 and \$5,497,288 for Region 2 is included in the FY20 budget in cost center 3352, Metro Freeway Service Patrol, under project number 300070. Since this action includes multi-year contracts, the cost center manager and Executive Officer, Congestion Reduction will be responsible for budgeting funds in future years.

Impact to Budget

The FSP program is funded through a combination of dedicated state funds, SB1 funding and Proposition C 25% sales tax. These funds are not eligible for Metro Bus and Rail Operating and Capital expenses. Metro is also reimbursed for the services provided to support Caltrans construction projects.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

The FSP Program aligns with Strategic **Goal 1: Provide high quality mobility options that enable people to spend less time traveling.** The program mitigates congestion on all major freeways in Los Angeles County.

ALTERNATIVES CONSIDERED

The Board may decide not to award the contracts or authorize the increase in contract modification authority. This alternative is not recommended as it will adversely impact the existing contracts and the level and quality of FSP service provided in Los Angeles County.

NEXT STEPS

Upon Board approval, staff will execute the necessary contracts to assure efficient and seamless delivery of the FSP program.

A. Procurement Background

This Board Action is to award Contract No. FS58039000 to Kenny's Auto Service #II (Region 1) and Contract No. FS58039001 to Platinum Tow and Transport (Region 2), in support of FSP Light Duty Towing Services for highways in Los Angeles County. Board approval of contract awards are subject to the resolution of any properly submitted protest.

This Freeway Service Patrol Request for Proposal (RFP) to award two regional contracts was issued in accordance with Metro's Acquisition Policy. The RFP was issued with an SBE/DVBE goal of 10% (SBE 7% and DVBE 3%). The contract type is a firm fixed hourly rate. The RFP allowed firms to propose on Regions 1 and 2; however, a firm could only be awarded one Region contract.

The RFP was advertised as a medium-sized business enterprise preference for medium-size businesses whose proposals would be considered first. However, none of the firms that submitted a proposal designated themselves as a medium sized business enterprise.

Two amendments were issued during the solicitation phase of this RFP:

• Amendment No. 1, issued on January 7, 2019, revised Exhibit B, Exhibit 1-Form 4, Exhibit 4, and Exhibit 11.1.

• Amendment No. 2, issued on January 10, 2019, revised Exhibit A and Exhibit H-1.1.

A pre-proposal conference was held on December 20, 2018, and was attended by 39 participants representing 24 companies. There were 21 questions asked and responses were released prior to the proposal due date.

A total of 36 firms downloaded the RFP and were included in the planholders' list. A total of ten proposals were received on January 28, 2019.

B. Evaluation of Proposals

A Proposal Evaluation Team (PET), consisting of staff from Metro Highway Programs and California Highway Patrol, was convened and conducted a comprehensive technical evaluation of the proposals received.

The proposals were evaluated based on the following evaluation criteria and weights:

•	Capability and Relevant Experience	20 percent
•	Business Plan	20 percent
•	Facility Visit	10 percent
•	Vehicle Inspection	10 percent
•	Price	30 percent
•	Partnering with Small Business	10 percent

The evaluation criteria are appropriate and consistent with criteria developed for other, similar highway towing service procurements. Several factors were considered when developing these weights, giving the greatest importance to price.

From February 8, 2019 through April 18, 2019, the PET completed its independent evaluation of the proposals. Of the ten proposals received, four were considered responsive. The PET determined that one of the four responsive firms was outside the competitive range and therefore, not included for further consideration as it did not adequately address the requirements of the RFP. As part of the RFP requirements, firms were required to meet the established SBE/DVBE goal of 10%. Six firms did not achieve this goal and were considered non-responsive.

The firms within the competitive range for awards in both regions are listed below in alphabetical order:

- 1. Freeway Towing, Inc.
- 2. Kenny's Auto Service, #II
- 3. Platinum Tow and Transport, Inc.

Qualifications of Firms Within the Competitive Range

Kenny's Auto Service, #II

Kenny's Auto Service conducted a towing pilot for FSP light duty towing Region 1 and are current providers of towing services. Their proposal and site visit demonstrated extensive knowledge in providing towing services for the region. They are a certified SBE and all vehicles designated for use in this region passed inspection. They proposed 20 drivers that would be dedicated to Metro towing with seven back-up drivers. Kenny's Auto Service will have the Director of Operations to serve as the Project Administrator along with the Deputy Administrator for the FSP program.

Platinum Tow and Transport, Inc.

Platinum Tow and Transport's proposal and site visit reflected the ability to execute the requirements for the Metro FSP towing program. They are a certified SBE. Their records management was organized and the towing yard was clean. All designated vehicles passed inspection and 37 drivers, along with four administrative personnel, will support the FSP project. Platinum Tow and Transport will provide three project managers to support the FSP Regional Towing contract.

Freeway Towing, Inc.

Freeway Towing is a current Metro FSP Big Rig Contractor. They have been in business for 31 years. Their proposal reflected good organization skills with a designated FSP manager and assistant manager. They proposed ten drivers designated for FSP only and they have been on the advisory committee for AAA Motor Club for 20 years.

Following is a summary of the PET evaluations scores by region:

REGION 1

C. Price Analysis

The recommended NTE amount has been determined to be fair and reasonable based upon an independent cost estimate (ICE), price analysis, technical analysis, and fact finding. The primary difference between the ICE and NTE amounts is future increases in vehicle insurance costs and fuel price fluctuations based on market conditions.

REGION 1

	Proposer Name	Proposal	Metro ICE	NTE amount
		Amount		
1.	Kenny's Auto Service, II	\$20,936,368.98	\$18,867,940	\$20,936,368.98

D. <u>Background on Recommended Contractors</u>

REGION 1

Kenny's Auto Service, #II

Kenny's Auto Service has been conducting business in the Metropolitan area of Los Angeles since 1938. Metro FSP towing certified since 1994, they have a fleet of 24 trucks that service 6 patrol routes and 70 miles of freeway. In addition to the current towing contract with Metro, they are also contracted with the LA County Sheriff's Department, California Highway Patrol and the City of Bellflower. Kenny's has the ability to store 400 vehicles in their state-of-the-art facility and is a member of the Department of Motor Vehicles Pull Notice program.

REGION 2

Platinum Tow and Transport, Inc.

Platinum Tow and Transport, Inc. started the tow business in October 2001 with a single tow truck. They now have a fleet of 39 trucks and operate out of 3 locations in Westlake Village, Camarillo, and Oxnard, California. The fourth location in Canoga Park serves as the depot for the Metro FSP. Services include light, medium, and heavy-duty towing and they have been a continuous partner with Metro since 2004. Existing contracts are with Metro, the Auto Club of Southern California, Los Angeles World Airports, and the California Highway Patrol.

A. Procurement Background

This Board Action is to approve Contract Modification Authority (CMA) for multiple contracts (see Attachment C-Contract Modification Authority Summary) for towing services in support of the Metro Freeway Service Patrol (FSP) program.

The proposed CMA increase for 29 FSP general purpose lane contracts in the amount of \$14,521,000 will continue required towing services for the FSP program and extend the period of performance to support unanticipated events, redeployment, and support during freeway construction work, and service delivery until new FSP Regional contracts are in place.

Attachment C-Contract Modification Authority Summary shows the list of contracts that require an increase in CMA.

Attachment D – Contract Modification/Change Order Log shows the contract modifications that have been issued to date to twelve contracts and no contract modifications are currently in negotiations or pending.

B. Cost

For contract modifications that are required in the future, prices will be determined fair and reasonable based upon independent cost estimate, fact-finding, technical analysis, and negotiations.

ATTACHMENT C CONTRACT MODIFICATION AUTHORITY (CMA) SUMMARY

METRO FREEWAY SERVICE PATROL TOWING SERVICES FOR GENERAL PURPOSE LANES

Beat	Contractor	Contract No.	Original Contract Value	Existing CMA	Requested CMA Increase	Revised Total CMA

DEOD SUMMARY

FSP LIGHT DUTY TOWING – REGION 1 AND REGION 2 FS58039000, FS58039001

A. Small Business Participation

The Diversity and Economic Opportunity Department (DEOD) established a 7% Small Business Enterprise (SBE) and 3% Disabled Veteran Business Enterprise (DVBE) goal for this procurement. For Region 1, Kenny's Auto Service, an SBE Prime, exceeded the goal by making a 96.99% SBE commitment and a 3.01% DVBE commitment. For Region 2, Platinum Tow & Transport, an SBE Prime, exceeded the goal by making a 94.29% SBE commitment and a 3.25% DVBE commitment.

Region 1 - Kenny's Auto Service

Small Business	7% SBE	Small Business	96.99% SBE

	Total	3.25%

Small Business Participation - Various Beats

Of the twenty-nine FSP contracts included in this modification, Contractors made SBE commitments for 21 Beats, 18 of which are meeting or exceeding their SBE commitment(s) and 11 of which are SBE Primes.

The FSP Contractors for Beats 1, 2, 8, 33, 38, 39 and 71 did not make SBE commitments and have no SBE participation. These contracts were procured prior to the 2016 legislative change to the Public Utilities Code that authorized meeting the SBE goal as a condition of award for non-federal IFB procurements.

The FSP Contractors for Beats 4, 12, and 70 have participation levels below their respective commitment levels and are in shortfall. For Beat 4, Mighty Transport, Inc. dba Frank Scotto Towing, made a 10.54% SBE commitment. The project is 62% complete and the current SBE participation is 7.23%, representing a 3.13% shortfall. Frank Scotto Towing added one (1) SBE subcontractor to perform on the contract which has decreased their shortfall from 3.94% as previously reported in November 2018 and expect to meet their commitment. For Beats 12 and 70, Tip Top Tow made a 10.20% SBE commitment for each, which is 92% and 89% complete, respectively. Current SBE participation is 1.81% and 0%, representing shortfalls of 8.39% and 10.20%. Tip Top Tow explained that their listed SBE had been decertified prior to subcontract execution for Beat 70, and that they are in the process of adding one (1) SBE to mitigate their shortfall for both beats.

Notwithstanding, Metro Project Managers and Contract Administrators will work in conjunction with DEOD to ensure that the FSP Contractors are on schedule to meet or exceed their SBE commitments. Additionally, key stakeholders associated with the contract have been provided access to Metro's tracking and monitoring system to ensure that all parties are actively tracking Small Business progress.

B. Living Wage and Service Contract Worker Retention Policy Applicability

The Living Wage and Service Contract Worker Retention Policy (LW/SCWRP) is applicable to this modification. Metro staff will monitor and enforce the policy guidelines to ensure that applicable workers are paid at minimum, the current Living Wage rate of \$19.56 per hour (\$14.22 base + \$5.34 health benefits), including yearly increases. The increase may be up to 3% of the total wage, annually. In addition, contractors will be responsible for submitting the required reports for the Living Wage and Service Contract Worker Retention Policy and other related documentation to staff to determine overall compliance with the policy.

C. Prevailing Wage Applicability

Prevailing wage is not applicable to this modification.

D. Project Labor Agreement/Construction Careers Policy

Project Labor Agreement/Construction Careers Policy is not applicable to this Contract. Project Labor Agreement/Construction Careers Policy is applicable only to construction contracts that have a construction contract value in excess of \$2.5 million.

Agenda Number: 44.

OPERATIONS, SAFETY, AND CUSTOMER EXPERIENCE COMMITTEE JULY 18, 2019

SUBJECT: GOLD LINE P2550 LIGHT RAIL VEHICLE (LRV) STATIC INVERTER APS/LVPS

OVERHAUL

ACTION: CONTRACT AWARD

File #: 2019-0483, File Type: Contract

RECOMMENDATION

AUTHORIZE the Chief Executive Officer to award a 60-month, Indefinite Delivery/Indefinite Quantity (IDIQ) Contract No. MA62488000 to AmeTrade, Inc., DBA AmePower, Inc., for the overhaul of P2550 Light Rail Vehicle Static Inverter Auxiliary Power Supply/Low Voltage Power Supply (APS/LVPS). This award is a not-to-exceed amount of \$2,509,943, subject to resolution of protest(s), if any.

ISSUE

In June 2017, the Board of Directors approved the implementation of a P2550 Component Overhaul Program. This procurement is for equipment overhaul services for the P2550 fleet as recommended by the Original Equipment Manufacturer (OEM) established guidelines. Execution of the overhaul will ensure that the fifty (50) rail car fleet remains in a constant State of Good Repair (SGR) while safeguarding passenger safety, vehicle performance and equipment longevity.

DISCUSSION

The Ansaldo Breda P2550 Light Rail Vehicle (LRV) fleet is in its 11th year of revenue operations. In order to ensure continued safety and reliability the Static Inverter requires overhaul at the eighth year or the six-hundred thousand (600,000) mileage interval as defined by the OEM. The Static Inverter equipment consists of low and high power electronics that drive the inverter modules, transduce voltages, and convert direct current voltages to power the various vehicle systems. The static inverter equipment consists of capacitors, resistors, relays, and circuit boards that degrade and drift over time. This is an integral component of the vehicle systems that provides regulated power to the vehicle inverter systems; therefore, it is critical to maintain the Static Inverter equipment in a constant state of good repair.

The P2550 Component Overhaul Program consists of a total of nine procurements for the overhaul of the major vehicle systems inclusive of propulsion, pantograph, battery, doors, couplers, high voltage and auxiliary power, friction brakes and truck systems. The power axle assembly, coupler, and friction brake contracts were awarded in December of 2017. Metro is requesting the approval of the Static Inverter APS/LVPS overhaul contract which is the ninth and final component overhaul procurement

requiring board approval for this project. This procurement is for the equipment overhaul services to complete the overhaul of fifty kits in addition to five spare kits to support the maintenance activities.

Metro's Transit Asset Management and Operations staff conducted a condition assessment of the P2550 fleet in the fall of 2016. The P2550 fleet's overall State of Good Repair (SGR) rating is 3.7 out of 5.0 for an overall adequate rating. This represents an asset that has reached its mid-life and has some moderately defective or deteriorated components. The assessment suggested that by performing the recommended OEM mid-life overhauls and addressing the design and obsolescence issues on the P2550 fleet, it is expected that the vehicles can reach their intended 30-year life based on statistical condition decay models.

Rail Fleet Services (RFS) Engineering developed an equipment overhaul specification for the Static Inverter APS/LVPS overhaul based upon the OEM recommendations and with RFS maintenance experience. The contractor will perform overhaul services in accordance with a defined schedule and with Metro's technical specifications requirements.

DETERMINATION OF SAFETY IMPACT

Safety is of the utmost importance to Metro and, therefore, it is imperative to maintain the P2550 fleet. The Static Inverter overhaul supports the complete P2550 overhaul program, ensuring the fleet is overhauled in accordance with regulatory standards, according to the defined schedule and technical specifications requirements, and within Metro's internal standards, policies and procedures.

FINANCIAL IMPACT

The approved Life-of-Project (LOP) for CP 214001 - P2550 Fleet Component Overhaul Program is \$35,007,546. Funding of \$357,356 for this contract award is included in the FY20 budget in cost center 3944, Rail Fleet Services Maintenance, line item 50441, Parts - Revenue Vehicle.

Since this is a multi-year Contract, the cost center manager, project manager and Sr. Executive Officer, Rail Fleet Services will ensure that the balance of funds is budgeted in future fiscal years.

Impact to Budget

The current source of funds for this contract award is Transportation Development Act Article 4 (TDA). Use of this funding source maximizes allowable funding mechanisms given approved funding provisions.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

Approval of this recommendation supports the following Metro Strategic Plan Goal 2, Deliver outstanding trip experience for all users of the transportation system.

ALTERNATIVES CONSIDERED

Deferral of this program is not recommended as the OEM is out-of-business and parts obsolescence is a significant concern to keep the static inverter operational until such time it will be a candidate for replacement during the midlife Modernization project. The static inverter is a safety critical device

that, if not properly maintained, could result in equipment failures and events due to loss of vehicle 'house power' to door systems, interior lighting, and battery charging. The static inverter provides control power to all vehicle systems and upon failure, poses a high risk to passenger safety, negative impact to vehicle availability and reliability.

NEXT STEPS

Overhaul of the P2550 Light Rail Vehicle Static Inverter APS/LVPS will continue in accordance with Rail Fleet Services' scheduled requirements. If approved, the project is scheduled to commence in October 2019.

A. Procurement Background

This Board Action is to approve Contract No. MA62488000 issued to perform overhaul services for the Gold Line P2550 Light Rail Vehicle (LRV) Static Inverter APS/LVPS. Board approval of contract awards are subject to resolution of any properly submitted protest.

The Request for Proposal (RFP) was issued in accordance with Metro's Acquisition Policy and the contract type is an Indefinite Delivery, Indefinite Quantity (IDIQ).

Three (3) amendments were issued during the solicitation phase of this RFP:

- Amendment No. 1, issued on May 2, 2019 provided revised proposal evaluation criteria and provided details to clarify the technical requirements.
- Amendment No. 2, issued on May 28, 2019 provided a new specification revision.
- Amendment No. 3, issued on June 4, 2019, provided an updated Schedule of Quantities and Prices and requested Best and Final Offers.

A total of three (3) proposals and one (1) alternative proposal were received on May 13. 2019.

B. Evaluation of Proposals

This procurement was conducted in accordance with, and complies with LACMTA's Acquisition Policy for a competitive RFP using evaluation criteria and weighted factors. Proposals were evaluated by the Source Selection Committee (SSC) based on the following evaluation criteria and weights:

Technical Capability	25%
Proposed Work Scope	30%
Project Management	20%
Price	<u>25%</u>

Total 100%

The firms that submitted proposals are listed below in alphabetical order:

- 1. AmeTrade, Inc. DBA AmePower
- 2. PSI Repair Services, Inc.
- 3. Woojin USA, Inc.

Woojin USA, Inc. also submitted an alternative proposal which was reviewed.

The SSC conducted a technical evaluation on each proposal received. The SSC found all three base proposals to be technically responsive and responsible to the RFP's Specification and Statement of Work requirements. The alternate proposal was also deemed responsive and responsible and was evaluated and scored. The following is a summary of the SSC's ranking/scores for this procurement:

Firm	Average Score	Factor Weight	Weighted Average Score	Rank
AmePower				
Technical Capability	94.67	25.00%	23.67	
Proposed Work Scope	91.11	30.00%	27.33	
Project Management	93.33	20.00%	18.67	
Price		25.00%	20.34	
Total		100.00%	90.01	1
PSI Repair Services				
Technical Capability	78.67	25.00%	19.67	
Proposed Work Scope	76.67	30.00%	23.00	
Project Management	83.33	20.00%	16.67	
Price		25.00%	25.00	
Total		100.00%	84.34	2
Woojin USA (Primary Proposal)				
Technical Capability	69.33	25.00%	17.33	
Proposed Work Scope	77.78	30.00%	23.33	
Project Management	73.33	20.00%	14.67	
Price		25.00%	14.75	
Total		100.00%	70.08	4

Woojin USA (Alternative				
Proposal)				
Technical Capability	75.33	25.00%	18.83	
Proposed Work Scope	83.33	30.00%	25.00	
Project Management	85.55	20.00%	17.11	
Price		25.00%	15.21	
Total		100.00%	76.15	3

The firm recommended for award, AmePower, Incorporated was found to be in full compliance with the technical and all other RFP requirements, and received the highest ranking.

Qualifications Summary of Firms within the Competitive Range:

AmePower

AmeTrade, Inc., dba AmePower has experience delivering high power electronic systems. Through discussions with their technical team, Metro's SSC determined that AmePower has the technical capability to perform the required overhauls and upgrade services. AmePower exhibited extensive rail overhaul experience and technical knowledge.

AmePower possesses the required experience, equipment, personnel, technical and operational resources to provide overhaul or replacement services of the Static Inverter per the technical specification. Additionally they provided a detailed written test plan which demonstrated their in-depth knowledge of the Statement of Work. AmePower also has a past history of successful performance with projects similar to the Static Inverter Overhaul project.

PSI Repair Services, Inc.

PSI Repair Services met the technical requirements and appears to have the necessary resources. PSI provided draft test and inspection plan information for the SSC which were acceptable. PSI has performed previous projects for Dallas Area Rapid Transit (DART), Denver RTD, and VTA Santa Clara as well as for Kinkisharyo International LLC. PSI has also performed P2550 inverter repairs for Metro in the past.

Woojin USA, Inc.

Woojin USA, Inc. has delivered energy storage systems and auxiliary power supplies to DTP (Denver Transit Partners), MBTA (Massachusetts Bay Transportation Authority), Seattle Sound Transit, SEPTA (Southeastern Pennsylvania Transportation Authority), TriMet (Tri-County Metropolitan Transportation District), and Tren Urbano in Puerto Rico.

C. Cost/Price Analysis

The recommended price has been determined to be fair and reasonable based upon adequate price competition, comparison to Metro's ICE, and the technical analysis of proposals, in accordance with RFP requirements.

Proposer Name	Initial Proposal Amount	BAFO Amount	Metro ICE
AmePower, Inc.	\$3,000,620	\$2,509,943	\$2,730,000
PSI	\$2,489,766	\$2,042,420	
Woojin-Primary	\$4,733,877	\$3,461,175	
Woojin-Alternate	\$3,356,078	\$3,356,078	

The price analysis of the initial proposals showed that one proposer did not submit complete pricing for all items requested. To ensure a complete price analysis and to assure that Metro would receive the best value for the contract, a request for Best and Final Offer (BAFO) was issued on June 4, 2019. All three competitors responded with complete price proposals which were used to complete the price analysis. Also, the BAFO request resulted in a cost savings to Metro of \$490,737 over the previous proposal from the recommended contractor, AmePower.

D. Background on Recommended Contractor

AmePower, Incorporated is a Metro certified SBE. AmePower is located in Miami, Florida and has been in business over 20 years. Amepower is a certified engineering company whose expertise includes: Insulated-Gate Bipolar Transistor (IGBT) to IGBT and Gate Turn-Off (GTO) Thyristor to IGBT technology conversions; overhaul, retrofit and manufacturing services for rolling stock systems including: Complete Converters; Low Voltage Power Supplies (LVPS); Phase Modules; Auxiliary Power Supplies (APS); and Battery Chargers.

AmePower evolved as leading suppliers of power electronics components in the Southeast, to a full Power Electronics solutions provider, primarily focused in the Mass Transportation Industry. AmePower has contracts for rail component overhauls with New York Transit of New York City and ACI Herzog of Puerto Rico. The firm has completed contracts to provide upgrade services with MARC of Maryland and WMATA of Washington, DC in the past 3 years.

AmePower has a current contract with Metro to repair the A650 GTO Phase Modules which will be completed in 2019. AmePower's contract performance with Metro has been satisfactory.

DEOD SUMMARY

GOLD LINE P2550 LIGHT RAIL VEHICLE (LRV) STATIC INVERTER APS/LVPS OVERHAUL CONTRACT NO. MA62488000

A. Small Business Participation

The Diversity and Economic Opportunity Department (DEOD) did not establish a Small/Disabled Veteran Business Enterprise (SBE/DVBE) goal for this procurement. While DEOD determined there was a lack of available SBE/DVBE certified firms to perform the specialized overhaul design and manufacturing work, staff continues to encourage eligible proposers to seek certification as SBEs. AMETRADE, Inc. responded accordingly, and was SBE certified prior to proposal due date. AMETRADE, Inc. made a 100% SBE commitment as a prime.

	SBE Contractors		SBE % Committed
1.	AMETRADE, Inc. (Prime)		100.00%
		Total Commitment	100.00%

B. Living Wage and Service Contract Worker Retention Policy Applicability

The Living Wage and Service Contract Worker Retention Policy is not applicable to this contract.

C. Prevailing Wage Applicability

Prevailing wage is not applicable to this contract.

D. Project Labor Agreement/Construction Careers Policy

Project Labor Agreement/Construction Careers Policy is not applicable to this Contract. Project Labor Agreement/Construction Careers Policy is applicable only to construction contracts that have a construction contract value in excess of \$2.5 million.
